VOLUME LI, PART II.

CONGRESSIONAL RECORD,

SIXTY-THIRD CONGRESS, SECOND SESSION.

IF THE AND THE AVAILABLY

CERTO O MATE ATAMO TO A STATE MOSTALIA MOSTALIA

SENATE.

Wednesday, December 17, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved.

PERSONAL EXPLANATION-BANKING AND CURRENCY.

Mr. SMITH of Georgia. Mr. President, inadvertently yesterday I voted on the amendment submitted by the Senator from Nebraska [Mr. HITCHCOCK] when I have a general pair with the senior Senator from Massachusetts [Mr. Lodge]. It never occurred to me that I ought not to have voted until I had gone downstairs, and the roll call having been concluded I could not later in the day withdraw the vote. The majority was so great that my vote amounted to nothing, but I wish to express my regret that I voted at all.

WITHDRAWAL OF PUBLIC LANDS (H. DOC. NO. 482).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report on land withdrawals from settlement, location, sale, or entry under the provisions of the act of Congress approved June 25, 1910, which, with the accompanying paper, was referred to the Committee on Public Lands and ordered to be

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a

quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators an-

Ashurst Bacon Borah Goff Hollis Hughes O'Gorman Smith, Ga. Smith, Md. Smith, S. C. Oliver Overman Brady Brandegee Bristow Bryan Burton Chamberlain James Johnson Jones Owen
Page
Perkins
Pittman
Poindexter
Pomerene

Shafroth Owen Smith, S. C. Smoot Sutherland Thompson Tillman Townsend Vardaman Walsh Weeks Williams Kenyon Kern Lane Clapp Clark, Wyo. Colt Lea McCumber Martin, Va. Martine, N. J. Myers Nelson Norris Crawford Dillingham Fletcher Shafroth Sheppard Sherman Gallinger Shively

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. Culberson] and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. SHAFROTH. I wish to announce that my colleague

[Mr. Thomas] is necessarily absent.

Mr. RANSDELL. I desire to announce that my colleague [Mr. THORNTON] is unavoidably absent. He is paired with the Senator from South Dakota [Mr. Sterling]. I ask that this announcement may stand for the day.

Mr. REED. I desire to announce the necessary absence of

my colleague [Mr. Stone], on account of a slight indisposition, which will probably confine him to his room for a day or two.

I make this announcement for the day. Mr. LEA. I was requested to announce that the Senator from Alabama [Mr. Bankhead] is detained at one of the executive departments on public business.

Mr. WEEKS. I wish to announce that my colleague [Mr. Lodge] is absent on account of illness, and to have the statement

stand for the day.

The VICE PRESIDENT. Sixty-three Senators have answered to the roll call. There is a quorum present.

PETITIONS AND MEMORIALS.

Mr. SIMMONS presented a memorial of the Chamber of Commerce of Wilmington, N. C., remonstrating against the passage of the so-called La Follette seamen's bill, which was ordered to lie on the table.

He also presented resolutions adopted by the Chamber of Commerce of Wilmington, N. C., favoring the enactment of legislation authorizing the Treasury Department to employ, within certain limitations, such outside architects as may be required to permit the erection without unnecessary delay of buildings for which appropriations have been made, etc., which were referred to the Committee on Public Buildings and Grounds

Mr. SMITH of Maryland presented a petition of the Merchants and Manufacturers' Association of Baltimore, Md., praying for the adoption of a 1-cent letter postage, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of the Merchants and Manufacturers' Association, of Baltimore, Md., remonstrating against the enactment of legislation providing for the regulation of the business of commission merchants engaged in interstate commerce, which was referred to the Committee on Interstate Com-

Mr. MARTINE of New Jersey. I present a telegram in the nature of a memorial in opposition to woman suffrage, which I ask may be read.

There being no objection, the telegram was read and ordered to lie on the table, as follows:

PLAINFIELD, N. J., December 14, 1913.

JAMES E. MARTINE, United States Capitol, Washington, D. C.:

In the name of 1,100 organized antisuffragists in Plainfield, I earnestly urge your cooperation in preventing an amendment to the Constitution granting women the franchise, and beg you to use your influence in preventing any furtherance of woman suffrage.

MARY M. JOOST,
President of Plainfield Branch New Jersey
Association Opposed to Woman Suffrage.

Mr. MARTINE of New Jersey. I also present a large number of telegrams on the same subject, and ask that they may be printed in the RECORD without reading.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

CRANFORD, N. J., December 15, 1913.

Hon. James E. Martine,

Washington, D. C.:

In protesting against the passage of the women's suffrage amendment
I am voicing at least 150 Cranford men and women over 21 of age.

Mrs. J. C. Denman.

PLAINFIELD, N. J., December 15, 1913.

Hon. James E. Martine, Washington, D. C.:

Please protest against amendment to Constitution for women suffrage.
FLORENCE TWEEDY.

ELIZABETH, N. J., December 14, 1913.

Hon. James E. Martine, Washington, D. C .:

Representing between eight and nine thousand women of New Jersey, I protest against the woman-suffrage amendment to the Constitution.

Very truly, yours,

CLARA VEZIN,
Chairman New Jersey State Legislative Committee
of the Association Opposed to Woman Suffrage.

MONTCLAIR, N. J., December 14, 1913.

Senator James E. Martine,
Senate Chamber, Washington, D. C.:

We depend upon you to defend us against the injustice of forcing woman suffrage upon New Jersey women. Mrs. Chas. W. Baker.

ELIZABETH, N. J., December 14, 1913.

Hon. James E. Martine, United States Senate, Washington, D. C.:

I protest against Federal amendments on suffrage. Please fight it, CAROLINE S. SIMPSON.

MORRISTOWN, N. J., December 14, 1913.

Senator James E. Martine,

Senate, Washington, D. C.:

The undersigned members of the Morristown Branch Opposed to Woman Suffrage beg to protest to you against the suffragist amendment of the Constitution of the United States now pending before the House Rules Committee.

Mrs. John R. Emery.
Mrs. William Shelton.
Mrs. Benjamin Nicoll.
Mrs. Edward Keasbey.
Miss Mary Campbell.
Miss Marion Forsythe.
Mrs. Stephen H. Little, President.

TRENTON, N. J., December 14, 1913.

Hon. James E. Martine, Washington, D. C.:

Representing more than 8,000 New Jersey women organized to oppose woman suffrage, I earnestly urge that you oppose any amendment of the Constitution granting suffrage to women.

Mrs. Edw. Yarde Breese, President.

PLAINFIELD, N. J., December 14, 1913.

Hon. James E. Martine, The Capitol, Washington, D. C.:

We earnestly urge your efforts against the promotion of the cause of equal suffrage. We strongly protest against being forced into political life.

R. A. LAWRENCE, Treasurer Plainfield Branch, New Jersey Association Opposed to Woman Suffrage.

TRENTON, N. J., December 14, 1913.

Hon. James E. Martine, United States Senate, Washington, D. C.:

As a representative of a majority of the women in New Jersey, I beg you to use your influence to prevent their being forced into the public political arena. ANNA L. DAYTON.

ELIZABETH, N. J., December 14, 1913.

Hon. James E. Martine,

United States Senate, Washington, D. C.:

As a member of the Elizabeth antisuffrage organization, which is constantly growing in numbers, I am glad that I may rely on you to do all you can to defeat a woman-suffrage amendment to the Constitution.

My father, William J. Magie, joins me in this telegram.

Henrietta O. Magie.

PLAINFIELD, N. J., December 14, 1913.

Hon. James E. Martine,

The Capitol, Washington, D. C.:

I protest against any action in favor of woman suffrage and beg that you will use every means in your power to prevent the same.

KATHARINE W. ROGERS.

Vice President Plainfield Branch,

New Jersey Association Opposed to Woman Suffrage.

PLAINFIELD, N. J., December 14, 1913.

Hon. James E. Martine, The Capitol, Washington, D. C .:

As chairman of the enrollment committee of the Plainfield Brauch of the New Jersey Association Opposed to Woman Suffrage, I desire to add my protest against any action in favor of woman suffrage.

LAURA E. OSGOOD.

ELIZABETH, N. J., December 14, 1913.

Hon. James E. Martine, United States Senate, Washington, D. C.:

I am an active member of the New Jersey Association Opposed to Woman Suffrage, and I wish again to enter my strenuous protest against the proposed amendment to the Federal Constitution granting the suffrage to women.

Mrs. James S. Green.

MONTCLAIR, N. J., December 14, 1913.

Senator James E. Martine, United States Senate Chamber, Washington, D. C.:

beg that you use your influence against any suffrage measure now pending

THEODORA KRICHBAUM.

PLAINFIELD, N. J., December 14, 1913.

Senator James E. Martine,

The Capitol, Washington, D. C.:

On behalf of the Plainfield (N. J.) Branch of the Association Opposed to Woman Suffrage I protest against any furtherance by Congress of the woman suffrage movement.

ANNA V. MOORE, Vice President.

BRICK CHURCH, N. J., December 15, 1913.

Senator MARTINE, The Senate, Washington, D. C.:

We members of the Orange Branch of the New Jersey Association Opposed to Woman Suffrage earnestly request that you vote against the suffrage amendment to the Constitution.

Mrs. William S. Rhodie, Mrs. Theodore Woodbury. Mrs. George T. Dixon, Mrs. I. Stowel Clark. Miss Margaret H. Pierson. Miss Louisa S. Henry.

the so-called La Follette seamen's bill, which were ordered to lie on the table.

Mr. O'GORMAN presented a petition of sundry citizens of New York, praying for the enactment of legislation granting relief to members of the United States Military Telegraph Corps who served during the Civil War, which was referred to the Committee on Peusions.

Mr. KERN presented a petition of the Chamber of Commerce of Indianapolis, Ind., praying for the adoption of certain amendments to the income-tax law, which was referred to the Committee on Finance.

BANKING AND CURRENCY.

Mr. O'GORMAN. Mr. President, I ask leave to have read a letter from a citizen of New York. It bears upon the protracted debate, which, of course, in the judgment of some people seems to involve unnecessary delay in securing the enactment of

the pending currency bill.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and the Secretary will read as requested.

The Secretary read as follows:

THE BUFFALO ASSOCIATION OF CREDIT MEN, Buffalo, N. Y., December 12, 1913.

The Buffalo Association of Cerdit Men,

Buffalo, N. Y., December 12, 1913.

Hon. James A. O'Gorman,

Capitol Building, Washington, D. C.

Hondralle Sir.: I write to you as president of the Buffalo Association of Credit Men. It is evident to the larger business interests that the banks of the country are contracting their commercial loans, withdrawing their reserves, and hoarding their resources, tending to the repetition of a situation which has beretofore proved a great embarrassment and a heavy loss to mercantile business.

This is one of the evils of our present banking and currency system, and we presume the tendency is due to a feeling of uneashness while banking and currency legislation is pending, and if not promptly checked the very bad debt loss of the year may be greatly increased.

The checking of this tendency, in our judgment, may be quickly accomplished through the passage of a banking and currency law, and we urge upon you the necessity for termination of debate in the Senate and the speedy enactment of a banking and currency law before the close of the year.

We feel that this accomplishment will relieve the tendencies referred to above and restore confidence with the banks of the country. We therefore again ask for your support in the speedy adoption of this legislation.

I am,

Very cordially, yours,

BUFFALO ASSOCIATION OF CREDIT MEN,

I B. DWYER President.

BUFFALO ASSOCIATION OF CREDIT MEN, J. B. DWYER, President.

Mr. WILLIAMS. I ask to have read at the desk an article from the Wall Street Journal.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[From the Wall Street Journal, Wednesday, Dec. 17, 1913.] SENATOR ROOT'S ECONOMIC ERRORS.

Mrs. Theodore Woodburght
Mrs. Theodore Woodburght
Mrs. Theodore Woodburght
Mrs. Missonous Woodbu

"An American merchant once went to Europe for the purpose of investigating why London did not hold America in the palm of its hand by ability at any time to throw billions of American securities upon the American market. His investigation proved to him what any banking expert could have shown him upon a piece of paper, to wit, that Europe could no more suddenly sell a billion of American securities for gold and take away the gold than could any combination of American investors, without making such a sacrifice of their property as would cut their fortunes in halves.

"Europe has no more proprietary rights in American gold by reason of holding American securities than has America itself. If anything has been demonstrated during the past 20 years it is that America, with her cotton, corn, and wheat, has equal right in the world's gold with European security holdings.

"The third economic fallacy of Senator Roor is that national banks will discount, indorse, and rediscount with regional reserve banks, and that these will practically indorse and rediscount with the Federal board, and that the Federal board will approve the issue of circulating notes, which will be held in circulation by people who have no use for them.

"The only place that such bills can find lodgement is in the pockets."

notes, which will be held in circulation by people who have no use for them.

"The only place that such bills can find lodgement is in the pockets of the people or the reserves of State banks, which requires a great stretch of the imagination to foresee a billion or two of unnecessary new bills constituting the reserve of State banks when a large part of the gold was being drawn out of circulation into the Federal reserve banks to make a basis for new and unwanted circulating notes.

"And this is without taking into account the first and last party to the transaction—the merchant who first goes into debt and makes the commercial paper.

"A real danger in this bill is in the discussion of it and the alarms, true and, false, that are raised concerning it by ignorant discussions at Washington and over the country. But what can we expect of new democracy from Oklahoma and Texas if we can not at least find sound economic principles, sound mathematics, and clear reading of the bill from the senatorial representative of the greatest banking State of the country, the Senator who should speak with the approval of all the banking interests of that State and of the Republican Party, the Party that should be for property protection, conservatism, and sound finance?"

Mr. OWEN. Mr. President, I simply wish to make a comment

Mr. OWEN. Mr. President, I simply wish to make a comment on the Boston News Bureau item, which the Senator from Mississippi has just had read at the desk, relative to Senator Roor's economic errors, which states that there did not seem to be anyone on either side of the Chamber able to correct them. I merely call attention to the fact that I corrected all three of them.

I ask that a telegram from the Clearing Mr. WILLIAMS. House Association of Jackson, Miss., which I send to the desk, may be read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

JACKSON, MISS., December 16, 1913.

Hon. John Sharp Williams, Washington, D. C.:

We indorse your vote on motion to table Hitchcock substitute providing for selection of directors of regional reserve banks and also upon number of regional reserve banks. We favor provisions in Glass-Owen bill as amended by Democratic members of Senate committee on these subjects rather than Hitchcock amendments.

Jackson Clearing House Association.

MRS. KATHERINE DAVIS GAILLARD.

Mr. O'GORMAN. From the Committee on Interoceanic Canals I report back favorably, without amendment, the joint resolu-tion (H. J. Res. 165) for recognition of the services of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis Gaillard. I ask unanimous consent for the present consideration of the joint resolution.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read as follows:

Was read as follows:

Resolved, etc., That the President is hereby authorized to pay, out of moneys appropriated for the salaries of the members of the Isthmian Canal Commission, to Katherine Gaillard, widow of David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, late an isthmian Canal commissioner, an amount equal to the salary for one year, as a member of the Isthmian Canal Commission, of the said David Du B. Gaillard, who died on December 5, 1913, from disease resulting from his long and arduous service in the construction of the Panama Canal.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, and was read the third time

Mr. TILLMAN. Mr. President, before the vote is taken on the passage of the joint resolution I should like to have the Secretary read the paper I send to the desk.

The VICE PRESIDENT. Is there objection? hears none, and the Secretary will read as requested.

The Secretary read as follows:

The following is a portion of a letter received by Senator B. R. Tillman from Mr. S. P. Verner, dated Cristobal, Canal Zone, December 4, 1913. The Senator thinks that Americans, especially South Carollinians, should know the esteem and admiration in which the men on the Isthmus held Col. David Du Bose Gaillard. The letter follows:

"I note what you say about my not coming to grife like Col. Gaillard, and I thank you for the warning. While I do believe that a change

to a more temperate climate would be a good thing, I believe I have a much stronger constitution than Col. Gaillard. He was hardly a victim of the tropical climate; rather was he a marity from his extreme devotion and burning self-immolation. Of course, some of us must think that he carried his devotion too far; he literally ate, drank, and slept "yardage," and his determination to get the cut through on time probably had most to do with his trouble. Very few other white men here suffered similarly. He was so wrapped up in his work that I never saw him smile on the job once; he took little recreation, seldom relaxed the mental grip which seized him; his whole nervous system was on fire with a resolve to do that thing, and his physique could not stand the strain.

"We South Carolinians may well be proud of him. We tried to sever the American Union once; now, in the person of Col. Gaillard, we really did cut the continent in twain. It was a sad and pathetic sight that day when Gamboa Dike was blown up and the cut was flooded to note the "absent colonel," whose special job it had been; all the others were there, rejoicing, but our colonel was dying in Baltimore. If he does die, Uncle Sam ought to erect a monument above Gamboa Hill which should stand forever—as long as the oceans run together; and let it be made of Fairfield granite, too."

The VICE PRESIDENT. The question is on the passage of

The VICE PRESIDENT. The question is on the passage of the joint resolution.

The joint resolution was passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES: A bill (S. 3751) granting an increase of pension to William G. Simpson; to the Committee on Pensions.

A bill (8, 3752) to authorize the construction of a lighthouse at Willapa Harbor, Wash.; to the Committee on Commerce.

By Mr. LANE: A bill '(S. 3753) granting a pension to Henry A. Ridgeway; to the Committee on Pensions.

By Mr. BURTON: A bill (S. 3754) granting a pension to John Carnes; to the Committee on Pensions.

By Mr. SMITH of Maryland:

A bill (S. 3755) granting a pension to Andrew McFrederick with accompanying papers); to the Committee on Pensions. By Mr. KERN:

A bill (S. 3756) granting an increase of pension to John G. D.

Bloomfield (with accompanying papers); A bill (S. 3757) granting an increase of pension to Catherine

Hartman (with accompanying papers) A bill (S. 3758) granting a pension to George S. Boze (with

accompanying papers); and A bill (S. 3759) granting a pension to Robert I. Morrison (with accompanying papers); to the Committee on Pensions.

By Mr. CHAMBERLAIN: A bill (S. 3760) granting a pension to Ellenor M. Warren; to

the Committee on Pensions.

By Mr. COLT:

A bill (S. 3761) for the relief of Matthew Logan (with accompanying papers); to the Committee on Military Affairs. By Mr. BRADLEY:

A bill (S. 3762) providing for the appointment of a board for the purpose of selecting a suitable site for a naval armor plant at or near Ashland, Ky., and submitting an estimate of the cost thereof; to the Committee on Naval Affairs.

BANKING AND CURRENCY.

The VICE PRESIDENT. Morning business is closed. Mr. OWEN. I move that the Senate proceed to the con-

sideration of the currency bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. KERN. Mr. President, I intend at this time to ask for

a unanimous-consent agreement for a date on which to vote on the banking and currency bill, and preliminary thereto desire

to say a few words on that subject.

The pending bill was laid before the Senate, together with the substitutes, since known, respectively, as the Owen and Hitchcock bills, on Saturday, the 22d day of last month. On the Monday following, which was the 24th day of the month, the distinguished chairman of the Banking and Currency Committee [Mr. Owen] addressed the Senate in support of the Owen substitute in a speech of rare ability, which reviewed every phase of the subject matter of the original bill and presented at great length the points of controversy between the advocates of the several propositions considered by the committee.

On the following day the able and accomplished Senator from Nebraska [Mr. Hitchcock], in an address of great merit, presented to the Senate very fully and exhaustively the views

of that branch of the committee represented by him, with the arguments supporting such views. He was followed by the distinguished Senator from Colorado [Mr. Shafeoth], whose speech, supplementing that of the chairman of the committee, was remarkable for the clearness and perspicuity with which the whole subject was discussed. These addresses, which covered every phase of the subject matter of the several bills, leaving little further to be said, attracted instant and universal attention, were read and reread and studied by all Senators, and were reviewed and discussed by every editorial writer in the country. The questions involved were further illuminated by a very able discussion by the learned Senator from Nevada [Mr. Newlands] on the 26th of November, whose address showed great research and learning and was of great aid to all interested in a general study of the subject.

Assuming, as has been intimated in certain quarters, that Senators generally had previously paid no attention to the subject, with this vast fund of information already before the Senate, already studied and digested by all Senators, all fresh in the minds of Senators, the general debate on the bill commenced on Monday of last week and has continued, practically without interruption, ever since—10 hours each day—making up to this time nearly 80 hours of consideration and discussion.

Every question involved has been discussed from every conceivable angle; every nook and corner of the field has been explored, reexplored, and then explored again. The discussion has been conducted on a high plane; the speeches delivered have been exceptionally able and instructive; and the running debates have not only covered all points in issue but many phases of many questions not in issue at all.

The truth is that this debate has been carried on until there is nothing to be said on either side that has not already been said, and we have reached the stages of vain repetition and crimination and recrimination.

An illustration of the point of absurdity reached by this debate was furnished a day or two ago, when the senior Senator from Ohio [Mr. Burron] brought in 50 or more questions, which he formulated into a sort of catechism, and proceeded to propound them one by one to the chairman of the Banking and Currency Committee, who with great patience submitted to that examination, and the Senate was edified by this species of recitation, which called up memories of the grammar-school exercises of our earlier days. Since that exhibition a large part of the time has been taken up in a discussion of the presidential prospects of a distinguished Senator, during which we were compelled to listen to his almost tearful declination of the great office so generously offered him by the senior Senator from New Hampshire [Mr. Gallinger], and the polite but firm refusal of the Senator from New Hampshire to accept the declination, leaving the presidential boom exactly as it started, except perhaps a trifle more vigorous, because it was developed in this serious discussion of this very serious subject that it was the universal consensus of opinion on both sides of this Chamber that 4 years from now, and even 8 or 12 years from this date, the distinguished Senator would still be in the bloom of manly vigor and able physically and mentally for that or any other job.

But, sir, not only during the days of serious and earnest and illuminating discussion—and I include in that characterization the speeches made last night on the subject of the insurance of bank deposits—and during these recent days of farcical catechism and discussion of presidential booms, the people of the country have been waiting, hoping, praying for action by the Senate, to the end that the uncertainty which now pervades the whole business world may be displaced by the confidence which will surely come with a settlement of the great questions here pending.

In many parts of the country, banks, without any excuse other than the lame one that these bills are pending and undisposed of, have called in loans and refused usual accommodations to customers until many business enterprises are suffering and many manufacturing concerns with orders to be filled are unable to procure money for their pay rolls, and, as a consequence, have been compelled to temporarily discharge their workmen.

I am informed that in my own State there are to-day several thousand men out of employment for the sole reason that their employers can not procure money from the banks with which to pay them their usual wages, and I am also informed that these men will be called to work again as soon as this bill is passed and the banking institutions certainly know that the question is settled.

The people understand that there is little difference in the essential features of these rival measures. They know that the

proponents of both seek to accomplish the same purpose, generally speaking, and the differences in matters of detail are honest differences.

They also know that it is scarcely possible that a bill absolutely perfect in every detail can be devised by the wit of man, and that such imperfections as may be disclosed by the practical workings of any bill may be readily remedied almost immediately upon their discovery. Now, sir, with this knowledge, is it strange that from every part of the country, and from all interests, there should come demands for speedy action?

The country expected fair, full, and free discussion of these proposed measures. That discussion has been had. As stated before, Senators are now repeating over and over again arguments already made, and the Senate has passed from the stage of discussion to that of profitless talk.

I believe it is the sentiment of the country that it is by far more important that some one of the proposed measures be enacted than that any particular one of these measures should be adopted. Every Senator here, now, at this very moment, knows how he intends to vote.

No Senator at this juncture expects to offer further arguments that will change a single vote.

Under these circumstances, it seems to me, sir, that we are trifling with the interests of the people every hour that we postpone a vote which will settle these mooted questions, send the workingmen now temporarily out of employment back to their work, and give assurance to the business interests of the country that they shall be no longer disturbed by inaction and delay on the part of the Senate.

The proposed agreement which I desire to submit is as follows:

I ask unanimous consent that not later than 5 o'clock p. m. on Thursday, December 18, the Senate shall proceed to vote on the bill H. R. 7837, the banking and currency bill, and such amendments thereto as may then be pending, and proceed with the voting until the final disposition of the bill; that beginning with to-morrow the Senate shall convene at 10.30 o'clock a. m. and continue in session until 6 o'clock p. m., when adjournment for the day shall be had, except as hereinafter provided.

That should be modified somewhat, as it was prepared on last night.

That on December 18—that is, to-morrow—if the bill is not sooner disposed of, the Senate shall consider amendments then pending, no Senator to speak more than 10 minutes on any amendment or on the bill, and a vote shall be taken on the final passage of the bill not later than 6 o'clock p. m. on Friday, December 19, on which day the Senate shall remain in session until 6.30 p. m. No amendment shall be considered, except by unanimous consent, on the 18th day of December which shall not have been offered prior to that date.

Mr. GALLINGER. Mr. President, it strikes me that the criticisms of Senators in this debate, to which we have just listened, are not justified by the facts. I regret that at a time when the Senator from Indiana desires to secure unanimous consent for a vote on this important bill he has taken occasion to follow the bad example of one other Senator on that side of the Chamber and read the Senate a lecture as to its duty.

I have taken practically no time in this debate, and I do not propose to do so. I am quite ready to vote at this very moment if it is thought best, and I feel quite sure that a vote will be taken on the bill at as early a day as the country can reasonably demand. I do not know how tumultuous the country is in its desire to have the bill passed, nor do I believe that the Senator from Indiana will persuade the country that the present industrial disturbance, which is becoming quite widespread, is due to any delay in the passage of this bill.

To me it is a surprising fact that during this entire discussion I have received not one single letter from my own State, or from any other State of the American Union, urging speed in the consideration and passage of currency legislation. That may result from the fact that my constituents, as well as people in other parts of the country, may not consider that my influence is of any particular consequence in a matter of this kind; but however that may be, the fact is as I have stated it.

but however that may be, the fact is as I have stated it.

It is becoming a very common thing in the Senate for the minority to be told that the country demands certain things. We were told so in regard to the tariff bill. We were criticized and condemned and almost execrated because we did not force that bill through at railroad speed. Some of us did not think it was desirable to do that, and we discussed it, and to that extent delayed its consideration. The prophecies that were made during that debate are being so completely fulfilled to-day that, to my mind, it is a matter of great regret that the bill was allowed to pass at all.

So in reference to the currency matter I do not believe the country is in a feverish state over the proposed legislation. I have sat here hour by hour and listened to Democratic speeches and Republican speeches, and I have failed to find a single Senator on either side of the Chamber who could give us any assurance as to what the working of the proposed law will be. Whether it will be for good or for bad no one seems to know for a certainty. We all realize that the bill is going to pass. We all realize that it will pass precisely as the Democratic majority has decided it shall pass; but I confess that I for one have very serious apprehensions as to whether the passage of the bill will give the relief that is being promised by certain Senators.

I do not believe this measure has anything to do with, or will have any special result upon, the industrial disturbance that is already upon the country and the increased disturbance that is bound to come during the next 12 months; but I am willing to take my chances on that matter, and shall cast my vote either for or against the bill, as I shall decide; but I am not willing to have this side of the Chamber held up to the country as postponing the bill by making speeches that have been delivered over and over again and which can have no possible influence upon the final result, as suggested by the Senator from Indiana.

I think the debate last evening upon the insurance features

of the bill was most illuminating.

Mr. KERN. Mr. President, did not the Senator understand me as distinctly stating that that was my opinion of the debate

Mr. GALLINGER. I did not understand the Senator to say that, but I hope he did. I understood the Senator to say that speeches were being repeated over and over again, and that there is no illuminating thought in the speeches that are being deliv-

ered at the present time.

Mr. KERN. I spoke of the great ability displayed by the different orators who had addressed the Senate, and I also spoke particularly of the instructive character of the debate last night. I did say, however, that much had been said in the last few days that was not to the purpose. I called attention to that, and that has been the subject of very extensive comment on both sides of the Chamber.

Mr. GALLINGER. Mr. President, that may be. During the past two or three days I have sometimes wondered whether or not our Democratic friends were actually filibustering against this bill, in view of the hours and hours they have consumed in its discussion. I do not believe they have been filibustering, however, any more than I believe the Republican Senators have been purposely delaying the consideration of the bill.

What I rose particularly to say, Mr. President, was that when the Senator reads his remarks in the RECORD to-morrow morning I think it will occur to him that when he is asking a favor of the Senate he might well make his remarks somewhat more temporate than he did and free from some of the harsh

criticisms in which he has indulged.

I do not propose to raise any objection to any reasonable unanimous-consent agreement that can be asked for for a vote on this bill. It may be that the agreement the Senator from Indiana has submitted is in good form, but before an agreement is reached I think at least we ought to understand a little more definitely than from a mere reading of the pro-posed agreement precisely what is asked.

I have believed we would vote on this bill before Saturday night of the present week. I think we will do so whether we enter into a unanimous-consent agreement or not. For my-self—and I think I speak largely for my associates on this side of the Chamber—I wish it to be distinctly understood in the Senate, whether anybody outside understands it or not, that Republican Senators are quite as anxious as our Democratic friends to have a final vote on the bill.

Mr. BURTON. Mr. President, it is for each Senator to decide for himself what reflections he shall make upon the remarks of every other Senator; but, as I understand it, this is a Senate in which each Member owes deference and respect to

the words and actions of every other Senator.

Certain questions which I asked were so unfortunate as not to appeal to the Senator from Indiana. I wish to say to him that if he will carefully read those questions and answers he will find that they throw a degree of light upon this bill which

is absolutely essential for its understanding.

Will the Senator from Oklahoma, the chairman of the committee, deny that in that questioning errors in the bill developed which must be corrected? For example, has the Sen-

Indiana read the section which contains a prohibition against dealing with nonmember banks, which would build up a monopoly in banking instead of stabilizing the banking system of the country—a provision which has awakened protest all over the country? My attention was called to it yesterday by the Senator from Iowa in a letter written from that State—a provision which would exclude thousands of banks, hundreds in many States, from continuing their business.

Were these questions absurd because they were revealed to the Senate? Must the Senator from Indiana himself swallow a measure whole, no matter if crude in some of its portions, no matter if unjust in others, simply because a caucus has de-

cided upon it?

It has been said here by Senators on the other side that this is the most important measure since the Civil War. We are holding 11-hour sessions. Everyone is under the stress of this occasion; the impossibility of preparing with care; worse than that, the lack of attention which is inevitably incident to the weariness of the time. Yet here, with this discussion beginning a week ago Monday, we are told that we are indulging in absurd talk and repeating the same thing over and over.

Mr. President, it is better to repeat a hundred times than it is to abandon deliberate and temperate discussion upon this

subject.

It is said that some thousands of men are out of employment in Indiana because this bill does not pass, and that they will be called back into the factories when the bill does pass. Is the Senator from Indiana ignorant of the fact that it must be months before this bill is put in operation? It is not the failure to pass this bill which is causing trouble 'n the country. I think I am right in saying that it is more the apprehension in regard to some of its provisions, and the trouble which will ensue if it shall pass. It is impossible to mask the reasons why these thousands and tens of thousand of men are discharged. One main cause is distrust of the majority in this Congress That is the leading feature. Another fea-House and Senate. ture is the wrench caused by the passage of the tariff bill, which, whether good or ill, shifts centers of production and causes a degree of hesitancy which reflects itself in all our factories and in our whole industrial system. I am not saying now whether the bill is good or bad, but I say you can not pass such a bill as that without creating a certain amount of depression. Not merely thousands but tens of thousands are out of employment. They are waiting not on this banking bill but on what this Congress will do, many of them with fear and with trembling, not very well satisfied with what has been done already.

Now we are told, after 10 days of discussion on this measure, that it must be forced through under whip and spur, that tab must be kept on every Member to see whether he repeats something said by somebody else, and the effort is made to deter us from discussion and analysis of this measure and from pointing out its defects by saying that such analysis is an absurdity.

Mr. President, that is an unprecedented proceeding in the Senate. If the Senator from Indiana desires an agreement, he certainly chose the very worst method to bring it about. Conciliatory words, not censure, not harshness, are the means to be employed in bringing about agreements in the Senate of the United States, where each Member, notwithstanding caucus, notwithstanding the pressure of the administration, has a right to speak for himself.

I speak not for myself, but for the Senate. Must we become here an aggregation of ciphers? Must we accept every measure that is sent in by the executive department? Must we accept without demurrer that which passes the caucus? If so, the Senate sinks from its high estate to a level of uselessness, to a level which will bring upon us not the honor, not the respect of the country, but its deserved contempt.

Mr. President, I have sought to express my opinions upon this bill. I hope briefly to do so in the future. The questions asked, questions on which there was discussion by others occupying more time than I did myself, are proper questions here and necessary to an understanding of the bill.

If the Senator from Indiana had given attention to the subject, I do not believe he would have made the remarks that he did make. His remarks seemed to be prompted by the idea that this measure must be forced through by sessions of 11 hours a day, and that anyone who questions, anyone who seeks to debate, must make himself subject to the accusation that he is wasting time.

Mr. President, we are not wasting time in discussing this bill. ator from Indiana read the paragraph which pertains to the election of directors? Is that clear? Is that consistent? Must occurred in the Senate. Here is a measure that for weal or that go into law in its present form? Has the Senator from for we must affect 100,000,000 people. We are lacking in our duty if we do not give it that careful consideration which the subject deserves

I had hoped to proceed with the discussion to-day, and I am ready now to proceed with a brief discussion of the bill from another standpoint.

The VICE PRESIDENT. Is there any objection to the pro-

posed unanimous-consent agreement?

Mr. BRISTOW. Mr. President, I want to concur in every word that has been uttered by the Senator from Ohio. I think his speech is worthy of this occasion. The Senator from Indiana has consumed an hour's time of the Senate which could have been devoted to a consideration of the bill before us when he knew before he asked for the unanimous consent that it would not be granted.

This bill, in my judgment, will be disposed of by the Senate before Saturday night. I do not believe there is a Senator on this side of the Chamber who has not an earnest desire that that may be accomplished. Then we will see if the predictions of the Senator from Indiana are fulfilled, so far as the returning to work of the thousands of men who are out of employment is concerned. If the Senator from Indiana will inquire at the factories in his State where employees have been discharged, he will find that it is not because the proprietors of these factories could not borrow money, but because they did not have the orders for the goods that were necessary to keep the men employed in the factory. What the manufacturers of the United States need to-day is not money that they can borrow but orders for goods that the men can make.

Mr. President, I object to the unanimous consent.
The VICE PRESIDENT. The Senator from Ohio will proceed. Mr. President, I desire to speak briefly upon the essential qualities of currency and credit and their relation to capital. These are the central features in all banking opera-Prevalent misapprehensions regarding them always threaten the adoption of erroneous policies. Exaggerated ideas exist as to the importance of currency questions and the functions of money, which is merely a tool in industrial and commercial activities. For a thorough understanding of the subject it is essential to have in mind certain fundamental facts and principles. It is especially desirable to have accurate defini-We may begin with capital.

Capital, briefly defined, is wealth withheld from immediate consumption for the purpose of producing wealth in the future. Wealth comprises all things which are alike useful, limited in supply, capable of individual appropriation, and transferable. It is produced from or created by land, labor, or capital. Land includes every form of nature in earth or seas, together with the natural forces which may be set at work. It is the source of our so-called raw materials. A nation may, however, have an immense supply of wealth which remains unutilized, such as mines undeveloped or lands unused, because capital is not applied to them. Capital includes food, clothing, and fuel for the support of those engaged in the production of wealth, necessary specified for planting manufactures of the second sec sary seeding for planting, raw material for the finished products of manufacture, money for wages and for the purchase of supplies. These are generally termed circulating capital. There is also fixed capital, which includes more permanent forms of property, such as buildings, machinery, and factories occupied or used by those engaged in productive employment. It includes all improvements upon land, and also ships and railways with all their equipment.

Nations are rich or poor, progressive or inert, not in proportion to the abundance of land or natural resources which they possess, but according as they have an abundance or dearth of capital. The productiveness of mines and of agricultural lands can not be augmented except by the application of capital and labor to derive or extract wealth from them. The utilization of capital and consequent creation of wealth upon any considerable scale requires the cooperation of labor and capital. To use a familiar comparison, they are like the two blades of a pair of scissors—the one ineffective without the other. Labor works upon land. It includes physical strength and exertion, together with the mental qualities which furnish them with method and ingenuity. Without the assistance which capital affords, labor could gain no material increase in efficiency.

Capital, on the other hand, with the cooperation of labor and with land to work upon, is capable of indefinite increase. Upon its expansion depends all increase of wealth. Capital has been termed the handmaid of civilization. Upon its increase and the cooperation of labor depends all improvement in material development and growth. Credit has its field of operation. The essential fact underlying the use of credit is the existence of saved or accumulated capital. The potency of organized credit is found in the facility which it affords for the transfer of capital. It is a natural evolution of the accumulation of saved capital.

The supply of capital has become so great, its increase has gained such momentum, and its development is so connected with all the efforts and aspirations of civilized peoples that there is assured confidence of safe extension of credit in all the varied enterprises of industry and commerce.

Credit affords the means by which those who have capital which they do not desire to use or for which they have no immediate use can transfer their money or stock of useful things to others having employment for them, in reliance that all the varied activities of commerce and industry may succeed and develop without check.

The development of credit from capital has three phases: First, it furnishes the basis for investment banking. made up of the savings of those who do not desire to use their acquisition of capital and who permanently turn it over to

There is, in the second place, the basis of commercial banking, which is the temporary transfer of capital from one to another; that is, its owner may desire to use what he has in the autumn but not in the spring, or vice versa. Thus our commercial banks which afford opportunities for lending money for comparatively short periods have an unfailing resort.

Another point in regard to the use of capital relates to its greater abundance in one section or its greater profitableness in another. That is especially true is new regions. Where there is an opportunity for profitable development, capital is in demand and earns higher rates of interest than prevail in older communities. This explains the great loans which are made to new and undeveloped portions of the earth. These loans usually take the form of commodities which are transferred from an older country to a newer locality.

Why is it safe to extend credit? Billions of dollars are on deposit in our savings institutions and discount banks. are an important form of capital. These savings represent wealth created, for which wages or some other form of compensation have been paid. Presumably they represent houses constructed, work done upon railways, wages earned in the production of clothing, or necessary supplies of food.

For instance, a carpenter at the end of the season deposits a few hundred dollars in a savings bank. That is the result of his abstinence during the season. His work goes into the form of capital in the houses or other structures which he has built, which are useful for human occupancy, and the amount which he is able to save is that which he has retained.

Now, on this reliance that capital which is expended will produce further capital rests the basis of all credit and banking operations. It marks the limit as well. You can not extend credit unless there is assurance that something will be created or produced which may be turned into money. The loan that is made to the farmer in the spring is based on the reliance that when his crop is harvested he will be able to repay what he has borrowed by supplying some object which satisfies a human want. So through the whole field of production there is this relation between present expectations and the realizations of

the future.

The amount of credit which can be extended has well-defined limits. Moreover, it is governed by certain factors. First, the degree of assurance that the amount which is loaned will be paid. This assurance is greater in a season of rising prices and in enterprises well organized and managed than in an era of falling prices or the case of those undertakings that are new and untried.

Uncertainty of returns create an obstacle to the extension of credit. The anticipation of possible failure of crops is an illustration. The nature of the enterprise, whether it is one well established, also presents a question to be considered. Perhaps overshadowing all is the probable demand for the product for the making of which the credit is to be extended.

While all these factors possess their element of uncertainty,

they are, nevertheless, controlled by rules based upon averages and probabilities which govern the action of bankers and those

having funds to loan.

If credit be injudiciously extended, there is a loss and a waste of the capital of the world. In such an event progress which is evident on every hand is liable to meet with a serious check, so that the further extension of credit is discouraged. It is also true that when the supply of capital which has been saved has been largely absorbed additional ventures are subjected to a serious handicap.

There is another feature in the extension of credit which must be taken into account, namely, the promptness of the return. If it be for the raw material, which is very soon transmuted into the finished product and that finished product will find a ready sale, that is one thing. But if it is for a great railway system, one which will consume much time in its construction and which may not be profitable when first used, that is quite another proposition. So in all these alterations of prosperity or depression of activity or sluggishness great importance attaches to the relation between the share of the capital which is expended for that which brings in an immediate return and that which brings in a remote return.

Aside from all this, there is the further factor, dependent largely upon the other two-that of confidence. The confidence may be ill advised or well founded, but in all seasons, either of business activity or depression, the psychological mood of the

people has a very important bearing.

Now, to apply these facts to the pending question, we labor under a delusion if we think the increase of facilities for credit will confer any lasting benefit, unless it is extended for enterprises in which capital will be reproduced and increased. The amount which can be granted is determined by conditions which are well-nigh fixed and invariable. If anyone seeks to eliminate the elements of caution and calculation in making loans, he is guilty of extreme error.

In saying all this I do not mean that it is not desirable to have the best of facilities, so that borrowers may readily obtain what they can profitably use. But over and beyond that is the limit which the utilization of capital and its growth places upon all enterprises, whether made possible by credit or in any other

Now we come to the subject of money. In the original condition of the race there was not even exchange. Rather each man provided for himself. Then developed the custom of barter, by which one who desired an article must find some other person possessing it who would exchange it for something that he could furnish. But with the growth of civilization, which has depended so largely upon science and invention, it was an inevitable evolution that some commodity which could be utilized as a measure of value, a medium of exchange, and a denominator should be generally used. Thus numerous commodities—agricultural products like tobacco; metal like copper, silver, and gold; tokens like wampum—have been employed to supply this want, so that people need no longer depend upon barter merely, but could engage in transactions on a widespread and comprehensive scale.

But let us be careful not to disregard the real nature of money. It is in its essential quality a commodity. It is desirable that it should, as nearly as possible, be uniform in its value in exchange for other things, and that it should be an object of universal desire. Moreover, it should be durable and divisible for the sake of convenience. But whatever its position, it is still a commodity. The amount of credit which can be extended depends ultimately upon the amount of money--basic moneyused by the different communities and nations.

Basic money is a form of capital set apart from all other commodities for a particular purpose. It furnishes a barometer of conditions in indicating whether there is abundance of wealth

and whether credit can be readily extended.

So, Mr. President, we can not ignore the fact that all substitutes in the form of paper notes for circulation are but tools used for the convenience of the people. The value of circulating notes must depend upon their ready convertibility. An increase in their number can do no good unless they are readily transferable into that which has intrinsic value, and unless they keep pace with the varying demands of trade and industry.

Mr. President, I have thought it worth while to speak along this line of elementary facts, not because my fellow Senators are ignorant of them, but because among the people there exist many grave misapprehensions upon the subject. Many entertain the idea that prosperity can be created as with a magician's wand, by multiplying the quantity of paper money and making it more readily available. If every man in this hall were to engage in the work of printing paper money, with all the printing presses in existence, not one dollar would be added to the wealth of the world; but if men or boys should set to work with their jackknives and pieces of wood, they might by merely whittling make something which had some value, something useful, or something desirable for amusement. So it is desirable that we should be on our guard in every paragraph of this bill against the idea that we can issue paper money or create facilities for credit which will work out independently by themselves, which will be independent of those great forces and events in the industrial and commercial world

Attention has oftentimes been called to the great disparity between deposits and capital, which is in evidence in our banks. What is the real basic reason for that? It is that, fortunately, the turnover, if it may be called that, is more frequent than it

of markets, commodities find a readier sale than they formerly did; the interval between production and consumption is not so great. But even this should not deceive us into departing from the path of safety which limits the extension of credit and the facilities for it to the prompt reproduction of capital and the realization upon the efforts and the investments which borrowers may make.

Mr. McCUMBER. Mr. President, I shall not reiterate the arguments that have been made for nearly a month against the Bill supported by the majority. The pages of the Congressional Record have been filled with these arguments, as a rule, each day's proceedings being but a repetition of the objections urged on the previous days. I have no inclination to use my own time or take up that of the Senate in a reiteration of these arguments. I have convictions of my own on the merits of these measures which will govern my action—reasons which have not been touched upon or but lightly considered so far in debates.

I shall cast my vote against the bill known as the Owen substitute, and were an opportunity offered I should also cast my vote against the Hitchcock substitute, which is supported generally by this side of the Chamber. As between the two, I regard the Hitchcock amendment, though very imperfect from my standpoint, far better than the Owen substitute. I shall very briefly record my opposition to both of these proposed

measures.

Mr. President, I favor a change in our present currency plan. I agree with all Senators that our present system lacks proper elasticity and that we ought to enact a measure that would secure that most needed element. But inflation is not elasticity. A currency that is easily expanded without provision for automatic contraction is not an elastic currency, but an inflatable currency. A currency that will expand, but will not contract to its original dimensions, is not an elastic currency, but a debased currency indicable to the extent of the difference. its original dimensions, is not an elastic currency, but a debased currency, inflatable to the extent of the difference between its expansive and contractive capability. A currency whose expansion is not limited by the act of law creating it, but by the will or discretion of a board, will always result in general inflation for reasons which I shall explain.

Mr. President, I have either read or listened to about all the

divers arguments concerning the merits and demerits of the two propositions, and I have been reimpressed by that discussion with the danger that a too close attention to detail is most

liable to obscure the general features of any proposed measure.

When I first read the House bill I was impressed with one great weakness in it—the weakness of an undue expansion of With waning hopes I have been waiting until the currency. With waning hopes I have been waiting until this great feature might possibly be changed. In the earnest and heated condemnation of certain rather unimportant provisions by the ardent supporters of one or the other of these substitutes what I believe to be the greater evils of both have been nearly lost sight of. Only since the address of the Senator from New York [Mr. Root] last Saturday has the element of inflation been seriously debated.

Both these substitutes for the House bill omit proper provisions against inflation. Both of them introduce a pernicious element of paternalism into their proposed currency reforms.

I favor a bill which will authorize the increase in the volume of currency to meet the Leavy demands for its use at particular seasons and in particular sections. But I want a currency that will be forced to retire immediately after the necessity for its expansion has been fulfilled and which will then leave the volume unchanged and uninflated.

I oppose a law that will enable any particular people, in any section of the country or any season of the year, to indulge their speculative propensities by an assurance that if times become close they can bolster up their speculative or watered properties until they can be unloaded on the public by putting in motion the Government printing presses and turning out ad-

ditional paper dollars.

Mr. President, both of these measures make it most easy and simple to expand our currency. Neither of them makes contraction as certain. The speculative spirit of the American people will be a sufficient force to draw the expansive quality of their provisions to the limit. There is only one power that can equalize the tendency to expand, and that is the power of taxation, a power which you have actually eliminated from this bill. If you make these Federal reserve dollars legal tender and redeemable in gold, they will remain in circulation unless the tax on their use be equal to the profits obtainable from their use. Their speedy redemption could be easily and properly secured by a graduated tax on the issue or on a depletion of the reserve on which they are based. The discretionary power of a board, while it may, never will so operate as to completely redeem any was formerly, that we have readier facilities for communication and exchange. With all the improvements which come issue of this new paper currency. The pressure everywhere for from the better utilization of capital, and with the extension currency in a country whose resources are undeveloped will overcome the inclination of any board to force contraction. The power to compel contraction should be in the bill itself. It should be a tax that would not allow a single dollar of this emergency currency, for that is what it is, to remain in exist-

ence for longer than three to six months.

Mr. President, a gradual inflation of currency, while unfair and unjust, may be partially met by a gradual adjustment of business to correspond with the inflation. We have been adapting ourselves to a rapid depreciation in the value of our circulating medium for the past quarter of a century, due to the rapid increase in volume. In 1899 the volume of all our currency amounted to approximately \$1,700,000,000. In November of 1913, just 14 years later, \$3,700,000,000. This vast increase in volume means a corresponding decrease in purchasing value. It means that a man who took out a 20-year endowment policy and who has lived to draw it has been paid in dollars that have about 60 per cent the purchasing value of the dollars he originally paid on that policy; that the frugal citizen who has for 20 or 25 years deposited his little savings in a bank at 3 or 4 per cent interest will find that the dollars which he put into the bank, with all their accumulation of interest, have a less purchasing value than the original dollars had when deposited.

This condition is bad enough, it is unjust enough; but it affects only the creditor class, those who have something coming, whether a fixed income from property or a salary. It does not seriously affect physical property. Physical property can always be marked up or down to correspond with the standard of measurement. The clothing merchant can mark his \$20 overcoat to \$21 overnight and he can mark it up to \$22 the next night. You can not mark up the dollar which you have already earned to pay for it. But by this bill you make it possible to add about 50 per cent to the volume of currency of the country in a single year. You admit that it is possible to issue \$1,200, 000,000 of Federal currency if the national banks only come into the system, and much more if State banks and trust companies accept your invitation. You make it possible to inflate in one year what has taken 20 years in the ordinary increase of our

No one can minimize the dangers of this inflation, and no one can excuse a measure which intensifies or increases or encourages our speculative tendencies. A great proportion of the business of this country is to-day done on borrowed capital. If every business man were compelled to operate on his own capital, if he were compelled to assume all the responsibilities of his business, this would tend to promote conservatism. nearly every promoter who follows the rainbow of business promise does so on the capital of others. If he succeeds, the pot of gold is his; if he loses, the loss must be borne by those who have trusted him with their savings. This method of business is a constant persuasive influence toward speculation. This opportunity to secure credit is sufficient to keep alive the flame of uncertain business venture, and that flame is only kept within bounds by the known limitation of credit. You accentuate the desire by creating the opportunity to reach for a new supply of paper currency; you invite the people to leap beyond the bounds of proper conservative business discretion; you court the inevitable result-catastrophe.

Mr. President, there is a very close relation between the pur-pose of this legislation and the form the measure assumes. Its real purpose is to meet a condition that is already upon us, to overcome business depression by a currency inflation. The haste with which it is being pressed, the long day and night sessions, indicate the particular purpose it is to subserve. As long as we can borrow, as long as we can increase our debts, we can live quite comfortably even though our business has been de-The natural result of business depression is conserva-To-day the people of the United States are becoming exceedingly conservative. Credits are not expanding but contract-We are not building for the future; we are simply trying to protect the present. Before that depression becomes too marked, before disaster and want shall follow in its wake, you want to be able to revive the speculative spirit of the country, to engender business confidence by an assurance of a prospect of an inexhaustible supply of credit. You want to say to the man who is in a condition of fear and trembling, lest he may not be able to continue his business, "Here are our printing presses ready to be started; here is the machinery ready to put them in motion making dollars for your use. Have no fear; just as long as you can give a note to your banker, just as long as you can present your I. O. U. to a committee for \$1,000 the Government will issue its I. O. U. to you for \$1,000, and when your obligation matures just create another." And as no administration will bring on a catastrophe, it will be compelled to keep this thing going until conditions force a final payment, and it hopes to carry that over to another administration, to postpone the inevitable.

We can all live quite easily so long as we can create debts. You do not seek to remedy, but postpone an evil, to pass it along to a future day when its power for disaster will be increased.

You talk about easy money. There is nothing in this world that is easy unless it be sliding down hill, and that must be inevitably followed by the harder struggle of climbing up the hill again. There is a bottom to every toboggan slide, no matter how easy the descent. There will come a time of payment, and

then the catastrophe.

We have but recently passed through a panic produced by overspeculation, by the overextension of credits, the panic of That was not a hard-time panic; it was a prosperity The revival of business coming on with a rush in 1908 carried the speculative spirit of the American people to an excess never before paralleled in the history of the country. Inherent values of all kinds of property were lost sight of; all forms of real property doubled, trebled, and quadrupled in price, each purchase being followed by a sale at a profitable increase until it reached a price far above its producing value. Industrials of all kinds were watered and diluted and rediluted, and still the eager public purchased. There were no bears in the vineyard of prosperity, and the bulls tore wildly through the cornfields. Credits were enormously swollen in volume. But as people will always come back to their sober senses, as property will always, sooner or later, be forced down to an income basis, so this speculative wave subsided, and the people began to consider the question of paying their debts. No normal amount of money could possibly respond to the immediate demand for cash, and so the virtual closing of every bank for a period, and so the Government itself was compelled to open its vaults to meet that demand.

Mr. President, the trouble with both of these bills is that they seek only to meet the contingency of overcredit by issuing a new currency to obviate the necessity of calling on the Government to supply the demand. The Federal reserve bank takes the place of the Government. Neither bill goes to the root of the evil—the prevention of undue speculation. But worse than this, both of them invite extravagance and speculation by making what you call easy credit for the time being.

Neither of these bills has proper provision for reducing the surplus of money which it will create. We are to-day doing business under a constantly increasing currency inflation. Knowing the rapid increase of money far beyond the increase of population, we are able to discount the future. But we can not anticipate and meet the possibilities of these measures.

The only real money we have in the United States is gold.

We have to-day in that yellow metal approximately \$615,000,000. On that gold we have a credit currency amounting in all to approximately \$3,105,000,000, all payable in this particular gold. Every dollar in gold floats \$5 in currency and silver. If all were presented at one time for redemption, of course we could not meet the demand. Knowing that this paper will not be presented for exchange for the inconvenient, heavy gold, we have no fear of that credit being suddenly called in. And, Mr. President, if we can make \$1 of gold float \$5 of inflation we can undoubtedly make it float \$10 of inflation, and your measures will make it inflate to whatever this speculative demand of

the country may be at any time in the future.

Nor is this assured inflation, this assured debasement of our money, with its wrongs to the industries, the only vice of these measures. Both of them send us a long way into the realm of ultimate paternalism. The Government forces a partnership with every national bank in the country. It says to every bank: "You must go into the partnership with me whether you like it or not, or go out of business. Your answer that going out of business would entail great losses to each of you will be of no avail. When the Government wishes to go into business for profit, the right of the individual citizen must be subservient to national interest. Not only will I compel you to go into a business copartnership with me, but I will compel you to furnish all the capital. Not only will I compel you to furnish all the capital, but I will compel you to assume all the responsi-bilities of business, all the losses, if it is not a success; not only will I compel you to furnish all the capital and assume all the responsibilities, suffer all the loss, if any accrues, but I will limit your profits to 5 or 6 per cent, and I, who have furnished no capital, have assumed no responsibility, will pocket the rest. Though you take the chance of losing 200 per cent on your investment, you can not under any circumstances reap above 6 per cent, and all above that will be my share in the profits of this forced partnership."

With all due respect to the divers authors of these substi-tutes, I insist that this is an act of astounding governmental If this is a fair example of what we may expect of tyranny.

paternalism, I do not want to take the first step.

Mr. President, I am opposed to taking the money out of the banks of my State and sending it to Chicago to help meet the extraordinary demands of the business investments of the great cities. We need every dollar in our own State. We can use it in our own State to advantage. It is worth more to us for use in the State than 5 per cent. We know that it will make money more easy in these sections of the country where values are swollen already to an unfair and unjust limit.

Mr. President, this ought to be a bill to create an elastic currency, and not an act to compel any citizen to enter into a partnership with his Government. The proper function and duty of government is to create business opportunities for its people and not to grasp those opportunities for its own profit.

Mr. SHAFROTH. Mr. President, will the Senator yield to

Mr. McCUMBER. Certainly.

Mr. SHAFROTH. I wish to ask him a question in relation to the statement he has just made, that he wants to keep this money at home and use it there instead of sending it to Chicago.

Does not the Senator recognize that when the reserve requirement is reduced from 15 per cent to 12 per cent of its deposits, of which, as the law is at present, 9 per cent goes to a reserve city, which I suppose would take the money of North Dakota to Chicago or to some other reserve city, it releases 3 per cent of its deposits, which amounts to considerably more than the capital which is subscribed to the Federal reserve bank? Does he not realize that by releasing that money fully five times as much money remains at home in the State of North Dakota as remains there under the present law?

Mr. McCUMBER. No; I do not recognize it. That matter was argued out yesterday and Saturday between the Senator from New York and the Senator from Colorado, and has been discussed almost for hours upon this floor. It is not my purpose to go into it. I think it was fully answered, and it would take some time to reiterate the statements and the arguments that have been made; and after all they would be a reiteration, which I promised myself and promised the Senate I would not

indulge in.

I would favor a bill providing for the Government guaranteeing every piece of paper used as money. I have no quarrel with those who prefer to make these bank reserve bills Government money rather than bank money, provided that paper money is redeemed in proper season and eliminated from the volume of the currency of the country. I have no fear whatever of the Government guaranteeing bank deposits. It may, as suggested, induce carelessness on the part of depositors, but with close and proper governmental supervision any injuries resulting from this tendency may be checked or, at least, greatly mini-

I am not blind to the claim that there are many provisions in these substitutes that may result in partially calling in these bank issues of Federal reserve money, but it ought not to be a case of possible contraction, it should be a case of assured contraction, and the contraction equivalent to every inch of expansion. That, in my opinion, will not be the operation of either of these contemplated substitutes. Under their provisions the disease of inflation will become and remain a chronic condition. You can not change human nature by law. You can not curb the speculative impulses of a people by law. That spirit, with all its dangers, will continue to long as hope is a dominant element in human nature, so long as dreams are dreamed. But you can close the gates to an undue opportunity to extend eredits, which is the basis of all speculative excess. In these bills you open these gates wide, and sooner or later you will pay a dire penalty for that indiscretion, a penalty that will far outweigh the temporary benefit which you may hope to accomplish by diluting and debasing the people's money.

For the reasons I have thus very briefly expressed, I shall

under no circumstances vote for either of these bills presented

for consideration to the Senate.

Mr. President, I had not intended to make any remarks on the pending measure, especially in view of the fact that the minds of Senators on this bill have been foreclosed against conviction and the fate of the measure was predetermined before it ever came up for discussion, but I can not forbear to make a few observations on one or two features of this bill, even though I know beforehand that the majority of this Chamber are irredeemably committed to a measure the wisdom of the provisions of which many of them are in doubt, and in the framing of the fundamentals of which the men in this Chamber who are responsible for currency legislation had no voice. I am not going to criticize harshly those members of the majority party whose stand is responsible for the passing by this Congress of a measure which had its origin elsewhere and which, I believe I am safe in saying, would not pass in its

present form if it were not for the insistence of a certain dictatorial mind.

I believe I can understand to some extent why some Senators who are doubtful as to the wisdom of this measure would yield their opinions rather than insist on them in view of probably future results resulting from impatient intolerance of independent views in other places. But I confess that I can not understand how the Senators of the majority party can consider this bill in the spirit of reckless optimism, which has become apparent, the spirit apparently of considering it the acme of perfection merely because its passage is insisted on by a Democratic President. While I presume my Democratic brethren would not openly state that the party label will make black white, yet Senators are now supporting as a progressive measure a bill which if it had been proposed by the opposing party would have been denounced by those same Senators in unmeasured terms as an attempt to surrender the business of the country to the tender mercies of Wall Street and fasten the tentacles of the octopus on all the industries of the Nation.

Mr. President, there has been a widespread belief in recent years that, along with the other trusts with which we have had to contend, there has also been a Money Trust. It is hardly necessary for me to remind Senators of the appointment of a committee by the House to investigate this matter, and the report that the committee made last winter. The hearings brought out that there was a concentration of the control of the volume of money used in business, with a consequent control of credit. Most witnesses before the committee agreed that there was such a concentration, and many of them agreed that the concentration had proceeded to such an extent that the power, if in the hands of unscrupulous men, would be dangerous to the business interests of the country. I might call attention at this point to the fact that this concentration of control was distinguished from the control of the volume of money in the central reserve cities, and ultimately in New York, due to the fact that banks are permitted to keep part of their lawful reserves on

deposit in reserve and central reserve cities.

The committee did not investigate this latter condition. With the fact granted that such a concentration of control does exist, it hardly seems necessary to call the attention of anyone to the potentialities of such a control, to what it means to have a small group of men with the credit of the business of the country in their grasp-with these men, not by any means the most unselfish of the community, able to dictate to industrial and commercial firms, and, as is natural, with their beliefs as to what is best for the welfare of the business of the country influenced by their conception of what will add to their own individual fortunes and prosperity. In view of these facts it would seem that any financial legislation, even if it was not enacted with the particular end in view of curbing the power of those in whose hands this control is concentrated and preventing the further concentration of such control, at least would be drafted so as not to make the acquirement of such control easier or to encourage it or legalize activities which were for-merely extralegal, if not illegal. In place of this, however, we find the majority party apparently determined on the passage of a measure which will legalize money trusts and credit trusts in the different sections of the country-not more than 12 nor less than 8. The 8 or 12 regional banks established will have a monopoly of the rediscounting of commercial paper in their respective districts, and will have a monopoly on the receiving of the reserves of the banks in their respective districts, and combined these 8 or 12 banks will have a similar monopoly extending all over the country. I do not believe it the part of wisdom to provide for the enormous aggregation of power in the different districts and leave this power in private control. There has been a well-founded distrust and opposition throughout the country to the establishment of a central bank, privately owned and controlled, because of the enormous power that would be vested in such a bank and a fear that the men in control of such banks, however honest and conscientious in the performance of their duties, would be swayed by their own interests and those of what is commonly known as big business in the performance of their duties, and would consequently direct the business of such a bank into such channels as would not be to the benefit of the people generally but to such interested parties. I believe this opposition has been well grounded, and that no such privately controlled bank should be established, but I am unable to see why the establishment of eight great banks, each a central, privately owned, and privately controlled bank for its area of operation, is free from the objections to the one central bank. You have merely apportioned the different sections of the country among the different banks; in its region of operations each regional central bank has as much power over the business as a national central bank would

have. And there is nothing to prevent these eight regional banks from combining into one great system; and when they do you have just as effective control over the business of the country by this combination of banks as you would have if there were one great privately controlled central bank. For this reason I believe that the control of these regional reserve banks should be in the hands of the Government, and I believe it to be of the utmost importance that they be so controlled. Of course there is the central reserve board appointed by the Government, but I do not presume anyone believes that this board will really control these banks. The regional banks will be controlled and run by their boards of directors, and six out of nine of these directors will be named by the banks.

The excuse for giving the control of the Federal reserve banks to the bankers has been that as the member banks are required to furnish the capital required for the establishment of the reserve banks it would be unjust to deprive them of the control of their own capital. If that is the only reason, it can very easily be avoided by adopting the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK] for the sale of this stock to the public. I do not apprehend that there would be any difficulty in disposing of this stock, as the rate of dividends will be much greater than the interest now received by many people on their savings, whether those savings are deposited in savings banks or invested in industrial or railroad bonds, and the safety, if anything, will be greater than the same investors and depositors now have. I do not believe anyone can maintain that this stock will not be attractive enough to attract all the capital that is required for the establishment of these banks. But even if it should be decided that for one reason or another it is not advisable to dispose of this stock to the public, I do not see that it necessarily follows that the control of these regional central banks should therefore be in the hands of the We must not forget that in providing for the establishment of these banks we are providing instrumentalities of great power, and that it is the duty of the Government to see that such instrumentalities created by the Government are used to benefit the people and not to injure them in order that a few of them may prosper, and I believe it has been found by experience that effective control by the Government must be otherwise than merely by moral suasion. It is the duty of the Government, in creating these banks, to see that the public interest does not suffer, and even if it were believed that the safeguarding of the public interest might mean a little smaller profit, a little smaller dividend, to the bankers holding stock in the Federal reserve banks, I do not consider that sufficient reason for surrendering the control of these banks over to the bankers. I do not mean to say that these bankers would necessarily conspire against the public interest, but bankers are but human, banks are established for profit and are conducted for profit, and a banker's view of what the public interest requires and what must be done to meet the requirements of legitimate business is necessarily more or less tinged with the benefit that he will derive from those operations personally. The Pujo committee found that there was already a dangerous concentration of the control of money in this country, and we must remember that this concentration had been brought about through the efforts of private individuals, and while the operations of these individuals were in all probability not contrary to any existing law, at least there was no law imposing on them a duty to bring about such concentration or providing an organization for them in order to make their efforts more ef-The pending bill provides for a concentration of the control of money and credit within the eight districts provided for, and hands this concentrated control over to the bankers that district. If the interests of the banks of that district and the interests of the people and business in that district conflict, does anyone doubt what interests the reserve banks so controlled will take care of? Or if a condition should arise when men would differ as to the proper course to pursue and the view of a person as to the better course would depend on his training and association, does anyone maintain that a reserve bank controlled by the bankers of the district would not be likely to adopt the course most favorable to the bankers? In creating this powerful instrumentality I believe the Government becomes responsible for the way the power is exercised, and being responsible it should control the operations of those instrumentalities. If we pass this bill, we provide for eight different money and credit trusts, each with its distinct territory of operations marked out for it-precisely similar to the ancient gentlemen's agreements and pooling contracts among the railroad companies in former days, which were prohibited by law; instead of prohibiting these by law we provide organiza-tions for them, compel all national banks to be members, pro-

vide a capital for them, provide for their control of a large part of the reserves of the banks of the country, deposit the Government funds with them instead of keeping them in the Treasury as formerly, and, in fact, aid them in every way to become powerfully exclusive trusts within the limits of their respective districts.

And does anyone believe that they will stop there; that they will be content with controlling separately the credit system within their respective districts? What is there to prevent these eight Federal reserve banks from a practical combination, extending all over the country and controlling the business of the Nation as a whole as completely and as harmoniously as each of them does within its own district, from becoming, in fact, one large central bank controlled by bankers and not by the Government and dominating the banking and currency and credit system of the country? If there has been possible a dangerous concentration of control of money and credit under our present system, what is going to happen under a system where such concentration of control is encouraged by law? And let me remind Senators that such control need not necessarily be where the banking reserves of the country are held. By dividing the country into eight districts, you may prevent that part of the money forming part of the reserves required to be held by banks, but permitted to be held in other vaults than their own, from gravitating to New York; but that does not necessarily mean that you scatter the control of the money market and the credit market over the country in the same manner that you distribute the reserves. It almost seems that, the word having gone forth from the White House, Senators have lost all sense of responsibility and are willing to enter on any path of legislation, with the blind hope that, somehow or other, it will prove a safe one. Is it possible that there is any Senator on this floor who, if voting his own convictions, would vote to create such an enormous power and then hand it over into private hands, into the hands of those who may in time of dire stress find themselves in a position where their sense of duty toward the banks in the district will conflict with their sense of duty toward the public and with the knowledge that if they do not place the interest of the banks foremost others will be found to take their places who will? And is this the new freedom to which business in this country is to be introduced? Is the business of this country to be made to carry on its back an organization ostensibly organized for the benefit of business, but controlled in its operations by those whose primary aim it is to make profits from its operations? What would Senators think and what would the country think if it were proposed to divide the country into districts and give the railroads in each district the right, or, rather, impose on them the duty to form similar organizations, each with a board of directors completely under their control and having absolute power to carry on their business without any restraint? What would be thought of Congress in case it should be proposed that any other industries should be required by law to form similar organizations the operations of which were to be entirely within the control of those engaged in those industries? What reason is there for making such a distinction between banking and other industries in favor of the former? If there is too much unified control of money and credit at the present time, what will happen if we pass this bill providing for the complete and unrestrained unification within eight separate districts, with every incentive for those eight separate organizations to combine and with nothing to prevent their doing so?

Mr. President, others have called attention to the danger of currency and credit inflation resulting from the currency provision of this bill. It does not appear to me there is any to the amount of currency that may be issued under it than whatever difficulty there might be encountered in securing the gold required as a reserve against the currency so issued. The gold coin and bullion in circulation and in the Treasury, exclusive of the reserve held against the greenbacks, amounts to about \$1,700,000,000. If this gold can all be obtained to be used as a reserve against currency-and there does not appear to be any insuperable obstacle to it-currency can be issued to the extent of \$5,100,000,000. I believe it must be admitted that this would be an undue inflation of the currency. And with an inflation of the currency follows an inflation of credit. For every inflated dollar there may be from six to eight dollars of inflated credit, as the reserve requirements are from 12 to 18 per cent. not to be expected that this inflation will all be brought about at once. It is the natural course, however, for inflation to demand more inflation. As the currency is increased beyond the rightful demands of business, money becomes more plentiful, prices rise, speculation is encouraged, business is extended, the demand for currency increases, both because the rising prices necessitate more money in order to carry on the same amount of business

as formerly, and, because of the demands for credit made by new and extended enterprises resulting from a seeming prosperity, more currency is issued, and the cycle is repeated until the inevitable crash comes. While the Federal reserve board nominally has the power to regulate the amount of currency issued, in reality this power will be exercised by the Federal reserve banks.

The board will not be in a position to set up its judgment as to the need of the additional currency as against the demands of the Federal reserve banks. The Federal reserve banks will be controlled by the member banks, and the member banks will naturally demand currency so long as the additional sums which they will be able to loan will bring in a profit. The rising prices and depreciation of money which will follow the inflation of the currency will affect every member of the community, but only one class will have the power to regulate it, and that class will be the very one which will be likely to profit from its inflation. The manufacturer will find that he must pay higher prices for his material and he will demand higher prices for the goods that he sells. The merchant will be similarly affected. Professional men will find that the prices on commodities that they purchase increase, while their compensation remains very much what it was. The wage earner will find that his cost of living is increasing, due to the rising prices; he will be forced to demand higher wages, and may ultimately get it, but as wages is one of the last to respond to the general upward trend, he will be the one that is apt to suffer the most. And this power, to set in motion a series of forces which will affect every person in the land, which will in a large measure determine what the margin is to be between his income and his expenses, is to be given into the hands of one class, and that a class whose view, so long as they remain human, must be more or less affected by the profit which they themselves will make out of those conditions. While the Government will be pretending to issue currency, it will in reality be furnishing capital to the banks in order that they may extend their operations. When the Government issues this currency based on commercial paper and becomes responsible for the redemption of this currency in return for the depositing of this commercial paper, is it not engaged in rediscounting the paper just as much as the Federal reserve bank who takes it from the member bank is? The only difference apparent is that the Government is to perform this service for nothing while the Federal reserve bank will exact a charge for its services. In effect, the Government rediscounts this paper, and by issuing the currency against it it lends to the banks of the country \$500,000,000 or \$1,000,000,000, or whatever the amount may be, in order that they may extend their operations, and for lending this money it does not charge any interest. If the banking business is of such importance that the Government ought to furnish this capital free of charge whenever the banks believe they need it, what about the other businesses and industries of this Nation? Is not the agricultural industry worthy of this support? Is it not a fact that thousands of honest, worthy men have been compelled to surrender their farms and the fruits of years of toil because the money lenders have exacted from them 12 per cent and upward, and they were in the long run unable to wring from the soil sufficient to pay this interest charge and still retain enough to support their families? If the Government is going into the business of lending money free of charge, would not this be a worthy place to place it? And as for safety, what security is safer than good farm land? And is not the same true of manufacturing and other industries? Are not these more fundamentally necessary than banking is? And if you say that this money ultimately finds its way to these industries through the banks, why should not the Government offer it to these industries directly? No complicated machinery would be necessary, and those borrowing would save the profits which the banks under the proposed system will make from lending this money.

Mr. President, I believe it to be fundamentally wrong that the Government is to issue currency on the demand of an interested class and in the amount that this class deems desirable, and do it in such a way that it is free of charge, furnishing this class with capital for the carrying on of a business for profit. I believe that a bank of issue should be fundamentally a Government bank, under the control of the Government, and that any profit which might be made from the issuance of currency should revert to the Government for the benefit of the whole people.

I am opposed to giving into the hands of one class the means of exploiting the other classes for its own profit. I do not believe in giving any bank or series of banks the power to say when the laborer carries home his wages at night how much that money shall purchase on the morrow. I do not believe in a community falls there is at once a suggestion that the other banks way not be safe. Suspicion as to one bank means to some extent a mistrust of the system of banking, and a mistrust of the system means a lack of confidence in other banks. If one bank in a community falls there is at once a suggestion that the other banks are not safe, and the other banks are at once

when the farmer sows his grain how much that grain is to be worth when it is harvested. I do not believe in giving any bank or any system of banks the power to say what return any person, high or low, is to receive for his toil, efforts, or enterprise. I believe stability of currency is more important than elasticity, and especially elasticity of a kind that expands but does not contract; and I am opposed to the kind of elasticity that expands in response to the demands of those to whose interest it is to have it expand.

Mr. President, I favor a provision setting apart a fund for the payment of depositors in insolvent banks. In the last 43 years creditors of insolvent national banks have lost approximately \$38,000,000. This does not, of course, include what the stockholders in such banks lost. It would not require a large yearly tax to provide a fund which would be sufficient to enable depositors in all banks the doors of which were closed to be paid promptly. Under the present system, even when depositors are paid in full, they must wait a number of years for the money that is rightly theirs. For instance, during the year ending October 31, 1913, the affairs of eight insolvent banks were closed. In the case of two of these—the Minot National Bank, of Minot, N. Dak., and the National Bank of Beattyville, Ky.—the creditors were paid in full. The receiver for the former was appointed September 19, 1905; for the latter, October 15, 1910. In the case of small depositors a delay of two or three years in the payment of the money is often as much of a burden as the total loss of the money would be. Even if such a fund would do nothing more than make provision for the prompt payment of what the insolvent bank would ultimately be able to pay its creditors, this alone would justify the establishment of such a fund.

The proposal to establish a fund for the protection of bank depositors has been attacked at various times and various places. It has been urged that such action would encourage wildcat banking, and that it would result in people depositing their money in any bank that offers to take it without inquiring into the solvency and methods of doing business of that bank. The inference is that it is the duty of the average person who makes a deposit in a bank to inquire into those matters, and also that he has means of acquiring definite and reliable information in regard to those matters. It is, however, a fact that the average depositor does not know how the affairs of the bank with which he does business are conducted, and that he has no means of obtaining definite and reliable information relative to this. If he had, under the present system how many depositors would be likely to leave their money in a bank until its doors are closed? How many of the 55,000 depositors in the United States Trust Co. in this city knew a week before the run on that bank occurred that it would in all probability have to close its doors unless some one came to its rescue? Undoubtedly some people knew, but they were the large depositors who are engaged in business in this city and have means of keeping in touch with such matters. It is cruel mockery to say to the depositor in an insolvent bank that he should have kept his money in another bank when he had no means of knowing which bank was the safer.

I would call to the attention of Senators the fact that we have made it the duty of the Comptroller of the Currency to examine the affairs of national banks, but that even the comptroller and his examiners with their means of information are not always able to determine whether or not a bank is safely conducted. If they can not find it out, how is the average depositor going to? Are you not going a little too far when you demand of him knowledge in regard to the affairs of a bank that the officers of the Government, with means at their command that he does not have, are unable to learn? And is it just to fix as a penalty for his failure to know what he has practically no way to learn the loss of a greater or less part of his earnings and savings? The way to prevent wildcat banking is by a rigid Government supervision and thorough examination into the way the affairs of the banks are conducted.

There are some who apparently believe that the creation of a fund for the protection of bank depositors will benefit only those depositors. I believe that the creation of such a fund would benefit all classes, and not least of them the bankers themselves. When there is lack of confidence, when the depositor is always in more or less doubt as to the safety of his deposits, everything that happens to suggest a doubt as to the solvency of one bank necessarily reacts to the detriment of the others and carries with it a suggestion that the other banks may not be safe. Suspicion as to one bank means to some extent a mistrust of the system of banking, and a mistrust of the system means a lack of confidence in other banks. If one bank in a community falls there is at once a suggestion that perhaps the other banks are not safe, and the other banks are at once

in danger of a run on their deposits. If the United States Trust Co. in this city had had to close its doors, do you doubt that there would have been a run on the other banks in the city; and in the event of such a run, can there be any doubt that perfectly solvent banks, unable to meet the sudden demands of the depositors, would have been forced to close their doors? If, on the other hand, there had been such an insurance fund as is proposed, the fact that one bank has to close its doors will not affect the confidence of the depositors in other banks, knowing that in the vent of the bank having to close its doors their deposits will not only be paid but that they will be paid promptly. The safe and conservative banker would not then live in perpetual fear that some other bank which had for some reason become insolvent would pull him down in its fall. In times of money stringency he would not have to hoard money in his vaults in order to protect himself in the event of a dreaded run. The keystone in any banking system must be confidence; without confidence no bank can carry on its business; and I do not know of anything that will strengthen the confidence of the depositors in our banks to a greater extent than the knowledge that their deposits are safe, no matter what errors of judgment the individual banker may commit. And it will be a confidence born of the knowledge that the deposits are safe, and not merely a feeling that, as the proportion of failing banks is comparatively small, the chances are one in several hundred that any given bank will fail during any one year and that the money deposited in any bank is therefore comparatively safe.

Mr. President, of the two bills before us, the one presented by the Senator from Nebraska [Mr. HITCHCOCK] is, according to my views, far preferable. It provides for Government control of the Federal reserve banks, and I do not believe it to be a safe policy to let them be otherwise controlled. It contains more safeguards against the inflation of the currency in that the reserve required against the currency issued is made higher, and further, in that boards of directors controlled by the Government, and not by the banks, will determine the amount of currency to be issued. It also provides that the Federal reserve banks must redeem this currency in gold, which I believe would also to some extent prove a safeguard against inflation. I do not see why, as is provided in the caucus bill, the Treasury should be required to redeem this currency in gold and the Federal reserve banks be given the option of redeeming it in gold or in other lawful money. I do not see why the burden of securing the gold necessary should be placed on the Treasury, especially as it is apparently the intention to deposit practically all the Government funds in these Federal reserve banks, and it is therefore to be presumed that these banks would sooner or later have as deposits practically all the gold except that held in the Treasury as a reserve fund against gold certificates and against greenbacks. I take it for granted that those responsible for this measure have carefully considered the possibilities resulting from handing over to privately controlled banks and subjecting to private control practically all of the gold used as money, the money on which all of our other money is based. I believe it would be advisable to provide that the Federal reserve banks should pay interest on the reserves that the member banks deposit with them, at least that portion which they are required to so deposit. I do not see any objection to their paying such interest, and as the Federal reserve banks will have the use of this money it would seem no more than just that they should pay for such use. This is only a minor feature, however, and I shall not dwell on this point. The grave dangers in the proposed system, as I view it, con-

sist in the legalizing of a number of privately controlled money trusts, in the possible, even probable, inflation of our currency, and in the fact that such currency may be used to draw gold from the Treasury to such an extent that the Treasury would be forced to sell bonds to replenish its supply.

Mr. BURTON. Mr. President, I can not favor these provisions in the form in which they now appear in either the Hitchcock bill or the Owen bill. In the first place, I differ very materially from my friend the Senator from Mississippi [Mr. WILLIAMS] regarding the effect of this insurance clause. I understand, it is his contention that this paragraph provides for setting aside a limited amount of the surplus earnings of the regional banks with no expectation that such amount would be sufficient to pay in full the loss of depositors. In this regard he differed very materially from the Senators who yesterday supported this proposed insurance plan. The Senator from Kansas [Mr. Bristow] seemed to consider that such a provision would take care of all losses, and the Senator from Minnesota [Mr. NELSON] went even further than that, and said that it would prevent runs upon the banks.

What is the essence of this provision? What would depositors expect from it? I can read it in only one way. expectation would be that all depositors would be secured against loss. Is the Government of the United States to gather an insurance fund against the losses of depositors, and then, when the loss occurs, say, "We will pay you only a part of that loss"? Must the man who comes to the Treasury be confronted with the statement, "This is not an indemnity for you; it is merely a partial provision for your loss"? If it is not the intention of this insurance plan to make good the entire losses of those who suffer from the failure of banks, then this provision is a snare and a delusion.

Mr. NELSON. Why does the Senator assume, Mr. President,

that it is not the intention-

Mr. BURTON. The Senator from Mississippi [Mr. WIL-LIAMS] last evening said, as I understood him, that he did not expect it would amount to a full and ample guaranty of the loss, but would be a sort of solace, holding out an expectation

which might not be fulfilled.

Mr. President, I am opposed to the guaranty of deposits of this nature. Such a plan imposes a regulation on bankers which would be absolutely fatal to success in any and every other line of business. It would ignore and obliterate the difference between those who are worthy to be successful, those who are to be trusted, and those who are not entirely to be trusted and not fully worthy to succeed. In addition, it would violate that cardinal principle of all business operations that authority must accompany responsibility. The substantial banker would have no means or method of supervising the operations of other bankers, and yet he is compelled to stand as guarantor for the dishonest and the blundering.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER (Mr. MARTIN of Virginia in the chair). Does the Senator from Ohio yield to the Senator from Nebraska?

Mr. BURTON. If the Senator from Nebraska will kindly excuse me until I merely finish this paragraph, I shall yield

Nothing is so fatal in successful business as an indefinite and uncertain risk. Fire and life insurance are successful, but insurance against theft is not. Guaranty against banking loss is more impracticable, because it involves more elements of uncertainty. The variety of mistakes which can be made by a blundering, careless, and incapable banker, who really intends to be honest, is perhaps only exceeded by the variety of ways in which an unscrupulous banker can manipulate the funds intrusted to his care.

Now I shall be glad to yield to the Senator from Nebraska.

Mr. HITCHCOCK. Mr. President, I am not able to recall exactly what language the Senator from Ohio used, but it was to the purport that the safe and conservative banker, under the terms of this bill, would be required to guarantee the deposits of the careless and unwise banker. That is not provided. The provision in either of these bills is similar, although the bill which I have reported is, I think, better, that after the payment of the expense of the member and the reserve banks, after the payment of dividends, after the accumulation each year of a small surplus, the remaining profits, instead of being given to the stockholders, who are not entitled to them, instead of being paid to the Government of the United States, which is already sufficiently recompensed, shall be paid into an insurance fund for the recompense of those depositors of failed banks who would otherwise lose their money.

That is not a tax on the judicious banker; that is not a burden upon the people of the United States. It is simply using some of the surplus profits of depositors, moneys of the reserves that have come into the reserve banks from the former deposits of depositors-it is simply using some of those profits to pay those depositors who, unfortunately, have had their money in banks which for some reason have failed in spite of

the legislation of Congress.

The Senator from Ohio recognizes that this legislation is for the purpose in part of preventing bank failures; it is for the purpose in part of preventing bank runs; it is for the purpose in part of protecting the depositors. I can therefore see no reason why, in carrying out that purpose, the deposits on those rare occasions where a bank fails shall not be made good.

Congress is undertaking in this legislation to protect them; it is compelling the banks in which they deposit to put their reserves in a certain place, to submit to certain regulations, to submit to additional inspections, and when Congress takes this responsibility as to those banks, why can it not justly go further and recompense those depositors in banks that may in spite of this legislation fail?

I know the Senator from Ohio [Mr. Burron] and the Senator from Massachusetts [Mr. Weeks] have argued that depositors should make wise selections of their banks. The Senator from Ohio, as a depositor, is capable of doing so; I am capable of doing so; the other Senators here are capable of doing so; the Members of the House of Representatives are capable of doing so; and so are those people who belong to that class of society that can take a bank statement, read it, and discover for them-selves whether or not a bank is safe. Even then they will make mistakes; even then I may lose my money in a bank; but aside from the class to which I have referred, there are millions of people in the United States, as the Senator from Ohio well knows, who are not capable of discriminating between one bank statement and another. They see a sign upon a building, "First National Bank" or "Dayton State Bank." They know that the Government is permitting that bank to run; they know the Government, either State or National, or both, is inspecting that bank; they know that that bank could not run without Government permission; and in their ignorance, in their inability to understand bank statements, such people, sometimes laborers, sometimes wage earners, sometimes clerks, sometimes widows, without any adequate or sufficient business knowledge, put their money into those banks. Such banks do not often fail, fortunately; but I ask the Senator from Ohio, is it not the duty of the Government, when they do fail, to give some form of protection to those depositors?

It is not simply the depositor who is interested in the matter; the borrower is interested, for every time the depositors in a community become uneasy and line up as they recently lined up in this city before the United States Trust Co. and its branches, the borrowing world is made to suffer. When the depositors raid a bank, that bank must compel the borrowing public to pay in money, and it is not only the borrowing public that is affected, but it is those who work for the business

men who borrow.

All the legitimate banks in the same community are interested, because it is not possible to start a bank uneasiness, it is not possible to have a bank run, either upon a weak bank or upon a strong bank, without worrying the depositors in the other banks and alarming the directors of the sound banks. They are interested also in such legislation as

will do away with the alarm among the depositors

I know it is a familiar argument-and I think the Senator has used it; certainly the Senator from Massachusetts [Mr. Weeks] has used it—that this may be a permission to the rascals and the fools to go into the banking business. But what business has the Government to permit them to do so? It has power to exclude them; it has power to make laws that will render it impossible for banking of that sort. Those laws exist in Massachusetts, they exist in other States, and they can be passed by Congress for national banks and, in the main, they have been passed. It is not for the responsible Government of the Nation or of the States to say to the undiscriminating masses of the American people, "You deposit in banks at your peril." It is the business of the Government to make the banks safe, just as it is the business of the Government to make travel on the railroads safe.

Mr. BURTON. Mr. President, I will say to the Senator from Nebraska that I want to touch on some of the points that he has made. I do not yield to him or to any man in my desire that the rights of the depositors shall be safeguarded, but here you are attempting to do it in the wrong way. One of two things must happen, either you are taking the money of the depositors of that bank to pay or you are imposing a burden

on the Federal Government.

Let us recall the history of this bill. As it came to us from the House it provided that a certain share of the profits above 5 or 6 per cent-I have forgotten which was the rate for dividends—should go to member or deposit banks in proportion to the amount that they deposited. It contained no provision for the insurance of deposits. I think that proposed division of profits was injudicious, and I am glad to say that it has been stricken out in the committee, because in the same bill there would have been a prohibition of interest on deposits, and yet another provision which would virtually amount to interest on deposits, because dividends would be increased in proportion to the balances lodged by member banks in the regional banks.

Now, let us consider this from the standpoint of the Govern-Is it proposed that the Federal Government shall tax itself to pay these depositors? Why, Mr. President, the loss to our people from fraudulent schemes conducted through the mails, estimated at from \$100,000,000 to \$200,000,000 a year, is greater than that of the depositors of our banks. The credulous, those who desire excessive or unusual profits, are attracted by advertisements of high rates of interest on this, that, and the other

scheme which promise to pay an abnormal or unusual return. An official of the Post Office Department told me several years ago that they could estimate with approximate accuracy the amount realized by one of these fraudulent concerns before it was closed down by the officials of the Post Office Department. The general average was from \$25,000 to \$30,000. That fraud. which touches the people of the United States just as much as does the loss of bank deposits, is made possible by the utilization of the agencies of the Government-that is, the postal facilities. If you are logical and the Government is to pay the losses of bank depositors, you should also pass a law that when anyone, either through his credulity or cupidity, seeks to obtain these undue returns upon his investment made through the mails, he also must be paid,

The second point I wish to urge against this general principle is that the inevitable result of making the banks responsible for the losses of others over whom they have no control will be an increase in the rate of interest to borrowers which the bank must charge on loans and a diminished rate of interest which they will pay to the depositors. The cost of insurance of deposits will have to be repaid by borrowers in higher rates of interest or borne by the depositors, who will receive a smaller return. That is the general principle pertaining to this sub-

ject of insurance of deposits;

Moreover, this is a broad, comprehensive provision. its wording it seems to me to apply to the whole United States; to all banks which become members of the new system. Another interpretation has been placed upon it by others to the effect that each district or region is a separate entity and stands by itself; that is, if there are losses in district No. 1, the insurance fund in that district is confined entirely to the payment

of those losses.

Consider, then, what you would include here under this bill. whether it pertains to the whole United States or whether it relates to 4 or 8 or 12 different districts. Different banks would charge different rates of interest on loans and they would allow different rates of interest on deposits. Those who had funds could deposit them in any one of these banks whether at home or in some remote place, whether at a high or low rate of interest, with an equal degree of certainty or security. The inevitable effect would be that capital which belonged to one community would emigrate to others where it did not belong, because through speculation or injudicious investments higher rates of interest were charged to borrowers and promised to lenders.

Mr. NELSON. Mr. President—
The PRESIDING OFFICER (Mr. SHEPPARD in the chair), Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. Certainly.'
Mr. NELSON. Why does the Senator assume that the wise men who are so competent to take care of themselves that they can select the good banks a avoid the bad ones will do

Mr. BURTON. It is not a quadion of that; it is a question of absolutely wiping out all distinction between different institutions, making them all equally able to pay depositors, whatever be the character of the men in charge of them, whatever be the quality of the investments which they may make.

Now I wish to pass on to another subject-Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Doo yield to the Senator from Nebraska? Does the Senator from Ohio

Mr. BURTON. In just a moment; I want to mature this a little more. I am not ready to favor this plan providing for the guaranty of deposits; but I recognize as forcibly as anyone the frightful suffering imposed by the failure of a trusted banking institution. I remember one instance which has always been an object lesson to me. A woman 70 years of age, in the most humble circumstances of life, had been exceedingly thrifty for years and had deposited her money in a certain bank; she had even walked instead of paying street car fare, in order, as she said, to save something for her old age: and when she had reached the age of 70 years a trusted institution, of which men prominent in the community had control, closed its doors. Her all or her little, but to her it was all-was wiped out because the bank had engaged in injudicious speculation.

What is the way to remedy this situation? A number of plans have been suggested for the purpose of giving greater A number of stability to banking. The old English system was to make every stockholder individually liable to the last dollar of his assets for the payment of the debts of the bank in which he

owned stock.

I have seen it stated that when the Glasgow Bank failed so disastrously in 1878 the Queen of England was a stockholder in

that institution, and that she would have been responsible for the payment of the last dollar of the losses of depositors and That regulation, however, has been regarded as too drastic, and not only in England but also in other countries the general tendency has been to limit the liability of the individual, with the idea that unless this is done investors will not put their funds into banking stock.

Mr. GALLINGER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from New Hampshire?

Mr. BURTON. Certainly.

Mr. GALLINGER. I would ask the Senator how he differentiates between depositors in banks and people of moderate means who invest in the stocks of corporations such as railroad corporations, where their earnings are wiped out by mismanagement. The Senator is familiar with the situation in New Eng-At the present time there are thousands and thousands of poor people who purchased stock in railroad corporations when the stock was considered gilt-edged, and by mismanagement of the corporation, or, from some other cause, they have practically lost all they have invested. I for myself in studying this matter somewhat have failed to see why we should particularly protect depositors in national banks and make an assessment upon well-managed banks, or upon the depositors in the well-managed banks, taking some of their funds to pay for the losses that have been sustained in badly managed banks.

Mr. BURTON. Mr. President, I think the principle is the same, although there is a difference in this regard: The bank has unusual prestige in the community and the number of its depositors is very much greater than the number of those who invest in stocks. According to the last statement, the amount of deposits in the savings banks in the United States was \$4,450,000,000, and that great mass of deposits was held by 10,010,000 people. The magnitude of the proposition, the very great number of people concerned, creates a distinction, although

there is no difference in principle.

Another way in which to give greater stability to the banks is by the organization of a branch banking system. I was present at a meeting of the American Bankers' Association in 1902 at New Orleans, in which a banker argued against a branch banking system, and nothing that was said at that gathering elicited quite so much applause as his argument. He maintained that our whole banking system was built up with a view to giving to each individual the opportunity to participate in it, and that the close association between communities, including all their borrowers and those who owned the funds, was an unanswerable argument for the individual system which prevails in this country. Nevertheless, I am far from saying that the time may not come when we shall make a radical change in that regard, so that the policy shall be adopted of great central institutions with branches throughout the country. That is the custom in almost every other country on the globe. The arguments for and against the branch banking system are stated with a remarkable degree of clearness by Mr. Vander-

lip in the hearings before the Banking and Currency Committee.

I read from page 2034 of the Senate hearings:

The whole question of the respective merits of a general branch banking system and the present Democratic principle is a clearly debatable one, with some excellent reasons on each side. The branch system will tend to equalize rates. It will take the funds of a low-interest community into a high-interest community. It tends toward stability. It gives to a new community a sound bank. It gives to the managers of branches experience that would be valuable in a new community, where otherwise a bank might be organized by people without banking experience.

Those are the arguments for it.

The Democratic principle gives a local interest in the bank, gives the management to people who thoroughly understand local conditions and local character, and keeps the money of the community in the community where it originates, which may be good for the particular community, but is not, I would say, for the best good of the whole country if there is a surplus of funds there. Those, I think, are the chief arguments on each side.

There is another way to safeguard the funds of depositors, and that is to provide the strictest regulation for the management of banks. Failures in this country have been due to several well-ascertained causes. One reason is the dishonesty of officials, some of whom have made speculative investments in stocks or securities and have lost, and by reason of their position have been able to cover and indeed to continue their defalcation. Another reason has been the making of injudicious investments by the banks themselves. A bank naturally rises or falls in its prosperity with the community in which it is located. When there is a succession of bad crops, or when the development of the community proves disappointing and its general wealth is diminished or lost, the bank is likely to fail. A third reason, and one which, I think, we should regulate by

legislation, is to be found in making loans to directors or to those who have a controlling influence in the bank with less careful scrutiny than that which is exercised in the business of the institution with the outside public.

I would not make an absolute rule that no director shall borrow of his own bank; but I would make an invariable rule that no loan shall be made by a bank to one of its directors except perhaps by the unanimous vote of all the directors. must have stricter regulation. We probably would stop short of the Chinese rule that the banker who fails shall be beheaded, but we can provide regulations which will not only in a great degree assure the communities but will also add to the safety of banks.

What kind of a guaranty system ought to be worked out? Not a nation-wide system; not one that includes many States, because then you throw into one melting pot bankers good, bad, and indifferent; institutions of large capital and of small capital as well; the honest along with the dishonest. You spread your system over so broad an area that I may almost say it is unjust to all parts. You include bankers who, feeling that the deposits of the bank will be repaid to their depositors whether they manage the bank well or ill, will not renounce speculation, but will be constantly open to the temptations of recklessness and perhaps dishonesty. The proper method is one like that suggested in Kansas, a voluntary arrangement-

Mr. GRONNA. Mr. President—
The PRESIDING OFFICER (Mr. Lewis in the chair). Does the Senator from Ohio yield to the Senator from North Dakota?

Mr. BURTON. Yes; certainly. Mr. GRONNA. Does the Senator from Ohio believe that

could be overcome by rigid, thorough examination?

Mr. BURTON. I think that would go a good way. I do not believe it would entirely accomplish the desired result. Banks will fail once in a while, even with the most rigid examiners.

Mr. GRONNA. I was just about to make the observation that in States where they have a banking board of long experience I believe it is safe to say that there is less failure among State banks, in proportion to the number, than there is in national banks. I believe that is due mainly to a failure to have a thoroughgoing examination of the national banks. As a rule, they are examined only twice or, at the utmost. four times a year.

In our States, for instance, the State banks are examined every month. A most thorough examination is made of ail their paper, their cash, and all their assets, and that report goes to the banking committee. If there is an overdraft, the officers of the bank are immediately notified to make it good.

I believe the objection of the Senator from Ohio can be greatly

overcome by strict supervision.

Mr. BURTON. I think that is true; in fact, I have already said so; but I repeat what I have already stated, that that will

not prevent failures in sporadic cases.

I will continue what I was saying with regard to the quality of men that would go into the business. The very best illustra-tion may be found in the operation of the Oklahoma law. I have before me the report of the bank commissioner of the State of Oklahoma. I have said that if you have a bankguaranty system, the dishonest man, the scoundrel, will be more likely than otherwise to start a bank. To illustrate that I turn, in this book, to the first two banks that failed. Let us see what is stated in this report.

The first is the Bank of Commerce of Geary, Okla. Here are

the comments of the bank commissioner on it:

The president of the above-mentioned bank was indicted in connection with the failure of said institution, and the bank commissioner recovered \$2,500 on his surety bond.

With regard to the second one, the Citizens' Bank of Mountain Park, Okla., the report says:

The banking board took over \$25,690 in notes of the failed bank on which it will not be able to realize anything, as they represented fraudulent transactions of the officers of the bank who have been arrested and are now under bond awaiting trial.

I pick up that book and out of 22 failed banks I find that the first 2 failed because of the dishonesty of the managers-dishonesty so marked that in both cases they are under indict-

Under such a system, without scrutiny, without concert of action among those who are interested in the banks, there is a lack of care and precaution in making deposits, and men enter the business who would not be thought of as bankers under other circumstances.

What is the essential obstacle to any system of guaranty of deposits? The law of the Nation and of the States in the very strongest language provides against combinations or associations. That is our ideal of the manner in which business should be transacted, as expressed in the Sherman antitrust law and

in numerous statutes of nearly all the States.

There is a sacredness ascribed to the law of competition and of independence under our present ideals of corporate management. If, however, you ask one bank to guarantee the de-posits of another, there must be affiliation between them, because otherwise it is entirely unsafe. The same demand which would require them to keep separate and apart, to engage in no combination as to rates of interest or as to borrowing, would logically result in their entire independence of each other.

There is the vital fact about the matter, and there you find the essential objection to the plans for guaranty of deposits which have been propounded in this country. If you allow them, however, to work in unison, if you have special examiners to look after the affairs of each bank in the system, that ob-

jection disappears.

The clearing-house associations of numerous cities in the country now have a system of bank examination which is more adequate, because more intimate, than that of the National Government or of the States. An outcry has been raised before committees of Congress against this plan of examination by clearing houses. I think that is most unjust. There have been occasional instances in which a bank has been told, "You must either reform your practices or get out of the clearing-house system"; but it has been because the bank was not managed in a careful, conservative manner.

I have no objection to a system of guaranty of deposits which is voluntary, under which one bank may join with others and impose certain uniform rules and regulations-uniform rules as to the rate of interest which shall be paid to depositors, uniform rules as to capital and surplus, regulations which maintain a proportion between the capital and the deposits, so that the degree of danger may be kept within defined limits; but that is not in accordance with the prevalent ideas concerning the guaranty of deposits. That idea demands that irrespective of stability, irrespective of honesty or of the risks involved, a law shall be passed which shall join them all together and make each responsible for the delinquencies of any of the rest.

Such a plan as that strikes at the very foundation of wise and just principles of banking. It would hurt depositors and borrowers more than it would benefit those who are so unfortunate as to lose under the present system. It would destroy the necessity for safeguards. It would throw the doors wide open and invite anyone, whatever his standards of honesty might be, to enter the banking business. A man might go to one bank on one side of the street to deposit his money—this is no fanciful case; it would occur every day—the bank would say to him, "We can pay you 3 per cent." A bank just across the way would say, "We can pay you 5 per cent." Why can they pay 5 per cent? Because the funds are put out at high rates of interest in all sorts of speculative enterprises which are sure to be disastrous. Mr. GRONNA. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from North Dakota?

Mr. BURTON. In just a moment I will yield. Mr. GRONNA. I wanted to ask the Senator from Ohio a question just in that connection.

Mr. BURTON. All right.

Mr. GRONNA. Does the Senator from Ohio believe a banker of that sort would be taken into an association and allowed to

get the benefits of a guaranty?

Mr. BURTON. There are two answers to that suggestion. In the first place, I was speaking of the general idea in regard to a guaranty of deposits, which means there shall be an omnibus provision that everyone who gets into the list of bankers shall stand on an equality as to the security of his deposits. The next answer is that you can not always determine how the directors of a bank are going to manage the institution by an examination made before they start the business. They may be very honest men, they may be very excellent men in other lines of business, but when they undertake the operation of a bank they may prove to be entirely lacking in that kind of ability.

Under any system which is fair, judicious, and workable, it is necessary that there should be a degree of combination which is counter to prevalent ideas concerning the management of business. It involves similar regulations, binding upon them all. It involves a measure of cooperation which probably would affect rates of interest and exclude a certain class of borrowers. If there were a system of guaranty, and a man had gone to bank A, on one side of the street, and had been declined a line of credit, he could not so easily go over to bank B and get his notes discounted as he could without the cooperation necessary to insure stability.

Mr. GRONNA. Mr. President—
The PRESIDING OFFICER. Does the Senator from Ohio further yield to the Senator from North Dakota?

Mr. BURTON. Certainly.
Mr. GRONNA. But if we had a board that insisted upon a strict supervision of the banks, I can not see how it would be possible for a bank even to attempt to pay a rate higher than that paid by its neighbor in the same locality. It is possible to compel every banker in this country to report to the State officials, to the board, the transactions of every day; and, with

this knowledge, I can not see where there would be any danger.

Mr. BURTON. That is exactly what I am contending for, I
will say to the Senator from North Dakota—uniform regulations, uniform rates of interest, a concert of action among them. But has the Senator from North Dakota ever thought that that is in opposition, at least to the spirit if not the letter,

of the laws of some of our States?

Mr. GRONNA. No. Mr. President. I will says that it is a common practice among bankers, I believe I can say, in every State in the Union. They have no agreement as to the amount of interest to be paid; but if I run a bank in a certain locality and the banker across the street from me knows the rate I pay, which he will know, he is not going to pay any more interest than I pay. No bank in that locality is going to pay any more interest than the regular rate that is going.

Mr. BURTON. Ah, but that is not in accordance with the facts. There are different institutions in the same town, if it is one of any considerable size, which do pay different rates of

interest.

Mr. GRONNA. Those instances, I think, are very rare.
Mr. BURTON. Oh, no; they are not rare. They frequently Take, for instance, the rates of interest they charge, one bank charging 5 per cent, another 6, another 7; and suppose a concert of action should be secured as the basis of the guaranty of deposits; would it be quite fair that one bank should guarantee the deposits of another, where they are made at such different rates of interest? On the other hand, if it appears

that they are bound by some agreement among themselves, or by some rule, that they will all charge the same rate of interest, you will be violating the laws of the State.

Mr. BRISTOW. Mr. President—

The PRESIDING OFFICER. Does the Senator from Ohio

yield to the Senator from Kansas?

Mr. BURTON. Yes. Mr. BRISTOW. It is hard for me to understand the objection which the Senator from Ohio has presented. The national banking law now requires that the banks shall submit to examination. The comptroller's office has under its direction a large force of examiners. These examiners visit every bank in the United States once or twice a year and investigate its affairs. The law requires the bank to pay the examiner for such investigation. The same complaint can be made: "Here, I am running a bank along legitimate lines. I am not violating the national banking laws. I have been in this community for This bank of mine has been in operation all that time. It has the finest reputation, and connected with it are the best men in the community. Now, because some other banker may be carrying on some dishonest practices you have established this system and are taxing me." The tax during the year, by the way, probably will be more than the assessments for a guaranty fund would be. "You are taxing me, when I do not need any examination, because some scoundrel in some other bank may be in the business." The two things are exactly in harmony.

Mr. BURTON. Oh, no. That is a matter of administration

absolutely necessary for the management of any banking system. It is provided that there shall be an examination, just as there is an examination for life insurance. That is the com-

parison usually made.

Mr. BRISTOW. Let me ask the Senator why is it necessary to have these examinations?

Mr. BURTON. To prevent bad banking practices, injudicious loans, and so forth.

Mr. BRISTOW. What is the difference if there are bad banking practices? Who is hurt by them?

Mr. BURTON. Why, the stockholders of the community—

everybody

Mr. BRISTOW. Yes; if the bank fails, everybody is hurt. Is not everybody hurt if the bank fails from any other cause than bad banking practices?

Mr. BURTON. I suppose so; yes. Mr. BRISTOW. If it is necessary to maintain a corps of bank examiners in order to prevent bad banking practices which would result in failures and loss to the community, and tax all of the banks in order to detect some scoundrel who might be in

the business, and therefore protect the community from failure, why is it not just as well to establish an association which shall guarantee to the depositors who go into the banks that they

shall not lose their money when they put it in?

Mr. BURTON. I have not opposed an association if it is a voluntary one, though I do not follow the argument of the Sena-tor from Kansas that the expense of providing for examination is logically succeeded by a regulation that one bank shall pay for the losses of another. That is an entirely different proposition. In the first place, there is a great difference in the magnitude of the loss and of the risk. In the next place, one is an examination, which should be uniform and general, in order to make sure that all banks are properly managed and comply with the law, while the other is an insurance against losses suffered by it, which may or may not be due to dis-

Mr. BRISTOW. Is not all insurance based upon the principle that one man must pay for the losses of another? The Senator from Ohio may own a building and carry fire insurance. That building may stand there for 50 years and never burn, and in the meantime he has helped pay for a thousand buildings that have burned. His building may never burn. He is being assessed to pay for the losses of somebody else.

The Senator may be in the mercantile business. He may own a store. Right by the side of him may be another merchant, in the same line of business, in a building of the same character. Under those circumstances the insurance rate is exactly the same. That merchant may burn his store and destroy The Senator would be an honest storekeeper and his goods. would not do such a thing, and possibly a fire would not occur in his store in 50 years; yet he is taxed to pay for the dis-honesty of his neighbor if he is in the mercantile business.

We are applying exactly that principle and no other to the insurance of deposits or the insuring of depositors of the banks.

Mr. BURTON. Mr. President, there are well-established lines of insurance against loss by fire. Those losses are unequal under different circumstances, but you can compute them with a degree of accuracy. That is one thing—insurance against loss by fire-where it is not presumed that anyone will burn down his own premises.

Suppose, however, you extend that to an insurance fund against theft. You then go outside of the legitimate field of insurance, because you enter a domain of uncertainty, and you guarantee against losses which may be caused by the assured You can not compute the losses under any general himself.

Thus we have had well-established lines of insurance limited to life and to fire. It was stated here last night that the principle of life insurance was that there would be an average number of deaths of persons of a certain age, and that all were insured at the same rate, but that overlooks the fact that there is a strict medical examination and, naturally, some inquiry regarding the character and the environment of the man who is

So if you have an insurance of bank deposits, no system is adequate unless there is an opportunity to exercise scrutiny over the character, the prospects, and the stability of a bank before it enters any association in which there is a guaranty.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Ohio further yield to the Senator from Kansas?

Mr. BURTON. Certainly. Mr. BRISTOW. The Sens The Senator certainly knows that it never has been proposed that any bank should become a member of an insurance association without a critical examination into its affairs and strict requirements as to its methods of doing

Mr. BURTON. Mr. President, I regret to differ from the Senator from Kansas in that regard. The general proposition has been for insurance on banks as banks. That is the one that gained such vitality in the country five years ago, and

still has very many supporters.

Perhaps I have not made myself clear to the Senator from Kansas. I am not opposing a guaranty association where it is voluntary and where the banks are allowed to act in con-cert along certain lines and subject themselves to uniform regulations with a view to their safety. Such a regulation would do away with the awful consequences which sometimes ensue upon the failure of a bank, whereby every poor man in the community receives a frightful blow.

Mr. BRISTOW. If the Senator will permit me, though I regret to interrupt him as much as I have done—

Mr. BURTON. That is all right.
Mr. BRISTOW. The provisions that I, of course, have in my mind are those of the Kansas law more than any other, because

I am more familiar with that. The provisions of the Kansas law which relate to the insurance of bank deposits are safer than any life insurance risk that can be accepted. I may be examined for life insurance and be accepted, as are practically all men who apply for insurance. I carry life insurance. When I am accepted and the policy is written, the company does not presume to prescribe to me my methods of life. It does not tell me what I can eat or what I can not eat. It does not undertake to say how I shall expose myself to the elements of the weather or how I shall not. I may be careless as to my health. I may stay in the Senate Chamber 13 hours a day.

Mr. BURTON. Under compulsion.
Mr. BRISTOW. If the laws in regard to life insurance were as they are in regard to banks, that could not be permitted, because it is endangering my life and thereby causing the company to run a risk. The policy of the Kansas statute for the insurance of deposits is a safer risk than any life insurance policy that can be written or any proposition that ever has been sub-mitted by any life insurance company. A man can insure his life, and then within a few years he may commit suicide, and still the policy will be paid.

When we hear it argued that this proposition of insuring the deposits in a bank would be reckless and uncertain business methods, to me it is amazing when it comes from a Senator of

great intelligence.

Mr. BURTON. I fear the Senator from Kansas has not heard all that I have said. I have said this plan should be worked out on a line of cooperation, and with certain qualifications I expressed approval of the Kansas act.

Mr. BRISTOW. I am glad indeed that the Senator has taken

that position.

Mr. BURTON. You can not tell how numerous or how severe the losses are going to be until we try it a little longer. I have said is that you have to run against the current of legislation on this subject, which in the strongest terms forbids concert of action between independent establishments, before you can have any safe system for the guaranty of banking de-

Mr. BRISTOW. Without interrupting the Senator further, I desire to state, with his permission, that the Kansas statute has now been in operation almost five years and there are approximately 600 banks in the association. During that period there has been but one failure, and the general methods of the banks who are members of this association in conducting their business are as high, as professional, as free from criticism as any banks that are run or ever have been run in the history of civilization.

Mr. BURTON. I do not mean to contradict what the Senator from Kansas has said. I do not think, however, that even the period he names is quite adequate to sustain or reject the plan. It is to be hoped that, year by year, the scrutiny which the examiners representing the association exercise over each other will be increased, that there will be more careful banking, and that men who are dishonest and unscrupulous will not enter the I trust it will not result in their going across the line business. to a neighboring State, where some of them seem to have entered the banking business and made very bad progress in it.

There is just one more word that I want to say. You can not quite compare the banking business with that of life insurance. Life insurance is based on tables of mortality which have been gathered for 200 years. Take a hundred men of a certain age; they have a well-ascertained probable average of life. Life insurance is granted by companies to individuals based on those calculations. It is certain that a man will die, for death is the common lot of all, and the amount of the policy will be paid. It is only a question as to how much ought to be paid for the insurance.

But in the banking business there are far greater degrees of uncertainty. You may be running through favorable seas for a long while, with no failures at all, when along will come such uncertainty. an event as the panic of 1893 and failures will be very numerous. In the one case you are providing compensation to be paid to the heirs of a man who will die after a certain number of years. In the other case you would be paying a compensation to guard against the loss of depositors, which it is trusted may never have to be paid.

If this plan is to be made successful, it must be restricted to a comparatively small area. I do not believe it is possible for one banking institution to have that intimate knowledge of another outside of the State which is essential for joint action. Whether this bill takes in the whole country or a region, it provides for a much larger area, a greater variety of character and quality, and a wider diversity of operations. Consequently the risk is so great that it can not be safely enacted.

The PRESIDING OFFICER. The question is upon the amendment proposed by the Senator from Nebraska [Mr.

Mr. HITCHCOCK obtained the floor.

VARDAMAN. I suggest the absence of a quorum, Mr.

The PRESIDING OFFICER. The suggestion of the absence of a quorum having been made, there will be a call of the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	du Pont	Myers	Sherman
Bacon	Gallinger	Nelson	Shively
Borah	Gore	Newlands	Simmons
Bradley	Gronna	Norris	Smith, Ariz.
Brady	Hitchcock	O'Gorman	Smith, Ga.
Brandegee	Hollis	Oliver	Smith, Md.
Bristow	Hughes	Overman	Smith, S. C.
Bryan	James	Owen	Stephenson
Burton	Jones	Page	Sterling
Catron	Kenvon	Perkins	Sutherland
Chamberlain	Kern	Pittman	Swanson
Chilton	Lane	Poindexter	Thompson
Clapp	Lea	Pomerene	Tillman
Clark, Wyo.	Lewis	Ransdell	Townsend
Clarke, Ark.	Lippitt	Reed	Vardaman
Colt	McCumber	Robinson	Walsh
Crawford	McLean	Root	Weeks
Cummins	Martin, Va.	Saulsbury	Williams
Dillingham	Martine, N. J.	Sheppard	Works

Mr. REED. I renew the announcement I made this morning that my colleague [Mr. STONE] is confined to his room by an indisposition, which I trust will not be serious. He will be unable to attend the session of the Senate to-day and perhaps to-morrow. I make this announcement for the day.

The PRESIDING OFFICER. There being 76 Senators present, as shown by the roll call, a quorum is present. The Sen-

ator from Nebraska is entitled to the floor.

Mr. HITCHCOCK. Mr. President, the amendment which is before the Senate was offered as a substitute for section 7 of the House bill, but as the Senate has pretty well indicated by its votes heretofore that it proposes to adhere closely to the Owen draft of the pending bill, it has occurred to me that it would be better for me to present this amendment, and probably others, as proposals to amend the draft by Senator Owen, so as to avoid the necessity of going over the matter again.

Therefore, with the consent of the Senate, I will so modify my motion as to move to strike out the last three words on line 22, page 19, and down to and including the word "Treasury," on line 3, page 20, of the Owen draft, and insert the following:

Into a trust fund-

I may say that this is the provision that certain of the surplus earnings shall be used to build up an insurance fund. There is no such provision in the House bill. The draft by Senator Owen provides that the trust fund shall be paid into the Treasury of the United States and administered by the United States to recompense the depositors in national banks. The amendment which I propose to Senator Owen's draft is that the money shall be paid into a trust fund held by the reserve bank and shall be used to recompense the depositors in all member banks. I see no reason why there should be a discrimination against the depositors in State banks that become members of this new system, and it seems to me manifestly-

Mr. WILLIAMS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ne-

braska yield to the Senator from Mississippi?

Mr. HITCHCOCK. I will yield in a moment. It seems to me manifestly unjust that the earnings of the reserves of all banks belonging to the system-State banks as well as National banks—should be confined to recompense the depositors in National banks and not be extended to depositors of State banks, they being members of the system.

In order to bring the matter properly before the Senate I will send the amendment to the desk to be read, and then yield to

the Senator from Mississippi.

The PRESIDING OFFICER. The Chair wishes definitely to ascertain the policy of the Senate. The amendment formerly proposed to the House text has been withdrawn, the Chair understands.

Mr. HITCHCOCK. It is withdrawn. The PRESIDING OFFICER. The Chair hearing no objection, the amendment will be considered as now withdrawn. The amendment now proposed by the Senator from Nebraska will be read, after which the Senator from Nebraska yields to the Senator from Mississippi.

Mr. HITCHCOCK. I will state that this is an amendment to Senator Owen's draft of the bill.

The PRESIDING OFFICER. The amendment will be read.

The Secretary. Strike out the last three words on line 22, and down to and including the word "Treasury," on line 3, page 20, of the Owen draft, and insert:

Into a trust fund to be held by the reserve bank as the depositors' insurance fund, which shall be used for the payment of the depositors of insolvent member banks in said district under rules and regulations made by the board.

The PRESIDING OFFICER. The Senator from Nebraska now yields to the Senator from Mississippi?

Mr. HITCHCOCK. I yield to the Senator. Mr. WILLIAMS. The Senator from Nebraska has asked, first, why this money should be deposited in the Treasury rather than with the regional bank. That was done because the indemnity fund has always been held in the Treasury, and because the Treasury deals with all the national banks, whereas the reserve board deals with the regional banks. It was thought better to follow the analogy of the old indemnity fund.

The Senator has, furthermore, asked why the Owen amendment dealt only with national banks. If the Senator will follow me a moment, he will see a plain and obvious reason for that. In all insurance ventures of every description the character of the risk is considered. The Federal Government has not only the right of examination, as has the reserve board, over national banks, which right of examination is extended to all member banks under this bill, but the Comptroller of the Currency has certain powers in regard to national banks that can not be vested by us in him with regard to State banks as member banks, even if we wanted to do so.

Now, the risk is the thing to be considered. How far to ascertain the risk and to know the risk and control the risk are to be considered. When the Comptroller of the Currency finds, through the national-bank examiners, that a national bank is in a condition where it is not doing a profitable business, sometimes that it is upon the very verge of failure, he can order it to close and liquidate before it fails; he can order it to take steps to prevent its becoming insolvent, or else he can liquidate it as a failed bank at a time when none of the depositors will suffer and only the stockholders will suffer. That power as to member banks which are not national banks the Comptroller of the Currency has not nor could we give it to him if we wanted to.

If the method of mutual insurance for the protection of depositors is to succeed at all, we must be careful that there shall not be too many failed banks resorting to the fund. very danger of the scheme, and the only way in which it can be controlled is to see to it that the risk is a reasonable one.

As long as we have this national power of supervision, examination, and control of power over national banks the risk is a reasonable one, provided the Comptroller of the Currency does his duty and provided the bank examiners do theirs. Of course that must be presumed. Even if those two things were provided with regard to the member banks, we would have no way of making a bank settle at a time when it still could pay its depositors without throwing the burden upon the insurance

That is the reason why it was confined to national banks. The motion was made to let it apply to all member banks, but after full discussion it was thought wise by us not to do it, and principally for that reason.

Mr. HITCHCOCK. I am glad to know what the reason was. I was unable to see any. As a matter of fact, the Comptroller of the Currency has little to do with the system that we are establishing. It is not to be confined to national banks. It is to take in State banks.

Mr. WILLIAMS. Does the Senator contend that we are repealing by this act a single power of the Comptroller of the Currency with regard to the national banks of the United States, except in so far as this regional system is applied to

member banks?

Mr. HITCHCOCK. No; the Senator misunderstood me in what I said. I implied nothing of that sert. I say the fact that the powers of the Comptroller of the Currency are limited to national banks has nothing to do with this question, because the powers of the Federal board and the jurisdiction of the reserve banks and the extent of this system go far beyond the power and the jurisdiction of the Comptroller of the Currency. We are proposing to take in State banks. We hope to get in 7,000 national banks, and we hope to get in 7,000 State banks. Most of the State banks which will come in are in States where a system of examination already exists, a system in some cases even superior to our national system of examination.

The bill as it has been prepared by the committee as a whole, and by both branches of the committee, provides for a careful power of supervision over State as well as national banks, for the inspection of State as well as national banks. The conditions are imposed upon State as well as national banks. The State banks are contributing probably to as large a degree as the national banks the reserve which will earn the profits to

be used as an insurance fund.

It seems to me to be manifestly an unfair and an unreasonable discrimination to make against the State banks and to make against the depositors in the State banks. I think it would be an obstacle to State banks coming into the system. Certainly it would add something as an inducement to State banks to come into the system if they were to be given, as they should be given, all the privileges and advantages which belong to national banks.

Mr. TOWNSEND. Mr. President—
The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Michigan?

Mr. HITCHCOCK. I do. Mr. TOWNSEND. Does the Senator from Nebraska understand that it is possible, in the discretion of the reserve board, that any national bank shall continue in business, under any conditions, which does not become a member bank of some reserve association?

Mr. HITCHCOCK. Not after a limited time.

Mr. TOWNSEND. Suppose in the meanwhile one of those banks, not a member, should fail; would this fund which had been set aside be used to pay the losses sustained by that

Mr. HITCHCOCK. As a practical proposition I will say to the Senator that the time is so limited that any national bank falling within it would not receive any of the benefits of the insurance fund, because

Mr. TOWNSEND. There would be no fund.
Mr. HITCHCOCK. There would be no time to create a fund.
Mr. TOWNSEND. The bill provides, does it not, that trust companies, in the District of Columbia at least, shall be forced into this reserve association?

Mr. HITCHCOCK. Yes. Mr. TOWNSEND. Suppose it falls; do its depositors receive any benefit from this fund?

Mr. OWEN. Mr. President— Mr. HITCHCOCK. The Senator from Oklahoma can answer

that question better than I.

Mr. OWEN. I had intended to move an amendment to the prior section on page 19 to cover such cases, and I will do it as soon as the amendment of the Senator from Nebraska is disposed of.

Mr. HITCHCOCK. Do I understand that the Senator from Oklahoma opposes extending to State banks the benefits of the

insurance fund?

Mr. OWEN. No; I do not personally oppose it. I rather think it more equitable to permit the State banks to have a part of this insurance. But my associates thought otherwise and they made this provision. I should be perfectly willing to submit that question, as far as I am concerned, to the Senate for its determination, but perhaps I am obliged by the action of my associates to adhere to the present form. I have ex-pressed that opinion, and it is my personal opinion about it, I have exbut I had intended to offer as an amendment or failed member trust company of the District of Columbia," which we did not provide for.

Mr. WILLIAMS. That was intended?
Mr. OWEN. Yes. I do not of course recall the entire argument referred to by the Scnator from Mississippi with regard to it. This fund, which is required under the operation of this system and which goes to the United States in the way of recompense to the United States, first, as a franchise tax, and, second, because the United States is putting into these banks \$200,000,000, and in addition is lending its credit in the form of these reserve notes-the United States really earns these payments which will be made to the United States.

Mr. HITCHCOCK. I agree to that.

Mr. OWEN. I think it is a fair statement to say that the Government earns that money, that it belongs to the Government, and does not in reality belong to the banks, even in an equitable sense. So that was one of the reasons which justified confining it to national banks, and a further reason was that the Comptroller of the Currency deals with insolvent banks, winds them up, appoints receivers, takes charge of their affairs in his bureau, and administers insolvent bank matters; and since the Secretary of the Treasury is his chief, we use the term "Secretary of the Treasury." I thought when the matter went into conference this would be thrashed out more fully, because it is difficult on the floor to work in the verbiage that just exactly right and desirable. I had intended to cover the point suggested by the Senator from Michigan and had pre-

pared an interlineation, which I had intended to ask might be inserted, to provide for failed member trust companies in the District of Columbia, the term "national banks" covering the other institutions in the District, of which the United States

Mr. HITCHCOCK. I am very glad to hear the Senator from Oklahoma say that personally he is in favor of extending these benefits of the insurance of depositors in failed banks to all member banks of the system. I can not conceive how anything else would be either logical or just. To take the earnings that are contributed by all the banks and set them aside for a favored class of these banks is so manifestly illogical and so unjust that it strikes me that not only the Senator from Oklahoma, but other Senators, without regard to any consideration of a caucus that may have passed upon it under a misconcention would concede that it should be remedied if this bill is to be made fair, and if it is to be made attractive to the State banks of the country.

Mr. WILLIAMS. If the Senator will pardon me a mo-

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Mississippi?

Mr. HITCHCOCK. I do.

Mr. OWEN. Will the Senator from Mississippi yield to me

just a moment?

The PRESIDING OFFICER. Does the Senator from Mississippi yield?

Mr. OWEN. I merely want to respond for a moment to the

Senator from Nebraska.

Mr. WILLIAMS. So do I.

Mr. OWEN. I yield to the Senator from Mississippi. Mr. WILLIAMS. Will the Senator from Nebraska tell me what fairness there is in requiring banks that are subject to the control and to the compulsion of liquidation by the Federal Government to submit to losses because of payments made to member banks over which the Federal Government has no such Will the Senator tell me how the Federal Government could force the liquidation of a State bank in the condition of failing or carrying on business in such a bad way as that any man, equipped as a bank examiner is supposed to be, with mathematical and financial knowledge of the ordinary would know must fail after a short while, and in that way must become a burden upon this fund? The Senator surely must agree that the comptroller can prevent that if men do their duty with regard to national banks, and that we can not even give him the power to do it with regard to these other banks which become members of that system. The hardship would be just as great in one case as in the other.

That is not all. I warn the Senator that if this system is ever inaugurated without a sufficient consideration of the risk and a sufficient control of the character of the risk it is doomed

Mr. HITCHCOCK. Mr. President, the Senator from Mississippi is going on the theory that State banks are more likely to fail than are national banks, which is not true.

Mr. WILLIAMS. No; I am not. I am going on the theory that they are equally liable to fail, but that the Comptroller of the Currency can stop the process of failure in regard to a national bank at a time when the depositors may be paid in full, when no draft would be made on this insurance fund, and the only losers would be the stockholders, whereas he can not stop the process at any stage when the process is going on

with regard to a State bank. He has no power to do so.
Mr. HITCHCOCK. Well, Mr. President, the Senator falls into another inconsistency. It is too late for him, at this stage of the game, to raise the question that the State banks taken into this system will not be under the complete control of the Federal Government. The fact is that they are to be taken in, their paper is to be received, the system is to give them credit, and the system is to be interested in their welfare. The reserve bank, when it discounts the paper of a State bank has no more power over that State bank than it has in the matter of insuring its deposits; yet it takes a risk of that State bank, it takes the judgment of that State bank as to commercial paper, it takes the responsibility of the officers of the State bank that made it and accepted it, it takes the liability of the stockholders of the State bank, and it is too late for the Senator now, after we propose to take these State banks into the system on a parity with the national banks, to raise the point that we have not as a national organization full control over the State banks. We know we have not full control over them, but the investigations of the committee indicated that in almost every State of the Union State banks are upon a safe and sound system, and that failures are no more frequent with them than they are with national banks. The inspection in some States is better than the inspection under the national-bank system, and the national-bank system is by no means perfect.

This bill gives to the officers of the reserve bank and it gives to the members of the reserve board a control, to a certain extent, over the member banks; it gives them a right of inspection of the member banks; it gives them the power to require certain reserves of the member banks; it gives them the power to require a certain capital of the member banks; and doing all those things and making the same requirement of the State banks that it makes of the national banks, it is manifestly illogical, unjust, and unreasonable to deny to those State banks and to their depositors the right of participation in this insurance fund.

We have heard a good deal about the safety and the stability of the national banks, and we have been perhaps too prone to figure that there is no danger of the failure of banks except of the State banks, but the record of the national-bank system, excellent as it is, reveals the fact that national banks as well as State banks may fail. I have not here before me the complete record of the national-bank failures. I have it, however, as it appears in the report of the Comptroller of the Currency for the year 1912. Down to the end of the year 1911 the number of national banks in the United States which had failed was 525 since the foundation of the system. These figures show that those 525 banks failed for various causes, causes that could not in many cases have been known to the average depositors in them.

Mr. BORAH. Mr. President—— The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. HITCHCOCK. I do. Mr. BORAH. Has the Senator from Nebraska the figures showing the amount of loss to the depositors by reason of those failures?

Mr. HITCHCOCK. I am not able to put my hand on them, though I looked a short time ago through the report I have here, and I wish to read from it some of the causes which led Twenty national banks failed because of the to these failures. defalcation of officers and fraudulent management; 17 of them failed by reason of the depreciation of securities; 30 of them failed by reason of excessive loans to others, injudicious banking, and depreciation of securities; 31 of them failed by reason of excessive loans to officers and directors and depreciation of securities; 17 of them failed by reason of excessive loans to officers and directors; 12 of them failed by reason of the failure of large debtors; 24 of them failed by fraudulent management; 16 of them failed by fraudulent management, by excessive loans to officers and directors, and by the depreciation of securities; 31 of them failed by reason of fraudulent management and injudicious banking; 29 of them failed by injudicious banking; 66 of them failed by reason of injudicious banking and the depreciation of securities; and 37 of them failed because they were wrecked by their cashiers.

So I might go on through the list showing the details of failures of all of these national banks. These were not all young banks; some of them had been established a good many years. One of them had been established 29 years; one of them was 49 years old; one of them was 27 years old; one of them was 45 years old; one of them was 43 years old. These banks were not all small banks. Here was the Globe National Bank, of Boston, which had a capital of \$1,000,000; here was the Federal National Bank, of Pittsburgh, which only recently failed, which had a capital of \$2,000,000. So I might go on through this list if I were justified in taking up time to show that the national-bank system, excellent as it is, is subject to failure occasionally, just as the State-bank system is subject to failure occasionally. But in this bill we have sought to put the two systems of banks upon a parity, and it certainly is a great mistake to take such action, either in caucus or anywhere else, as will be a discrimination against the State banks of the country and in favor of the national banks and their depositors.

Mr. TOWNSEND. Mr. President, has the Senator from Nebraska finished his statement?

Mr. HITCHCOCK. I have. Mr. TOWNSEND. I wish I wish to ask a question. I am very much in sympathy with the proposition that if we are going to have insurance of bank deposits, certainly all of the banks and the depositors of those banks who contribute to the fund from which the insurance is paid, especially when it is possible that their assets may have been taken by the Federal reserve banks as security, should participate in whatever insurance is granted. But what I wanted to ask—for I could not quite understand what was said on account of the confusion in the Chamber-was

whether the Senator from Oklahoma had said that he was in favor of that measure and would support it possibly if, after conference, the conference agreed to it? Did I understand him correctly on that proposition?

Mr. OWEN. Is the Senator from Michigan speaking to the

Senator from Oklahoma?

Mr. TOWNSEND. Yes, sir. Mr. OWEN. If I understand the question, it was what the action of the Senator from Oklahoma would be. The action of the Senator from Oklahoma on this bill in every instance will be to support the action of the Democratic conference. Does that answer the Senator's question? Mr. TOWNSEND. Very, very clearly.

Mr. OWEN. I am glad of that.

Mr. TOWNSEND. I was hoping that I had understood him to say differently, because I recall that but recently on the floor of the Senate he declared his independence and threatened the two parties in case they failed to fulfill the desire of the people. Assuming that he was speaking for the people a moment ago when he said that a provision of this kind calculated for the benefit of the depositors of all the banks who contributed the money was in the interest of the people, I had hoped that he would stand for that measure now, since, if he will stand for it with other Senators on the other side who are in favor of it, there is no question about its being adopted.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK].

Mr. OWEN. In lieu of the amendment offered by the Senator from Nebraska, I move to insert in line 24, on page 19, after the word "banks

Mr. HITCHCOCK. What print?

Mr. OWEN. The print of December 1, 1913, the same print as the Senator is using. On page 19, line 24, after the word "banks," I move to insert the words "or failed member trust companies in the District of Columbia."

Mr. WEEKS. Mr. President— Mr. OWEN. Perhaps the Senator from Nebraska will agree to the amendment as an amendment to his amendment.

Mr. HITCHCOCK. I will accept that as an amendment to mine, and I think it may be included.

Mr. OWEN. On second thought, I think, really I had better not try to offer that as an amendment to the amendment of the Senator from Nebraska. I withdraw the proposed amendment, and I move to lay on the table the amendment of the Senator from Nebraska.

Mr. CLARKE of Arkansas. Mr. President, Lefore that motion is put I want to make a suggestion to the Senator from Oklahoma [Mr. Owen], which might possibly be more properly made

to the Senator from Nebraska [Mr. HITCHCOCK].

I quite agree with the Senator from Nebraska that there should be no distinction in the member banks after they once qualify as member banks. They must make the same contribution to the capital stock and subject themselves to the same inspection and regulation as banks organized under national authority. If they make the same contribution and are subject to the same regulations, there is not any reason why they should not enjoy the same benefits. It is hard for me to understand that the explanation made by the Senator from Mississippi [Mr. Williams] is a satisfactory one. Whilst I am going to abide by the action of my associates on this side of the Chamber, I want to give it as my personal opinion that a case has been made that very strongly appeals to affirmative action on the part of the conference when we come to consider this matter with a view of fixing its final terms.

Mr. OWEN. I think, Mr. President, that this is one of the items which should go to a conference of the Democrats in this

body before final action is taken on this bill.

I do not at all agree with the Senator from Michigan [Mr. TOWNSEND] that the time has yet arrived in the United States when we can absolutely disregard party responsibility and transfer that responsibility to individual Members of this body or of the House of Representatives. I think the time will come in the United States when Senators are elected by the people of the States on their individual attitude before the people, when they will not present themselves as candidates of a party; but when they present themselves as the candidates of a party they get party votes; the party vote elects them to this body, and there is an implied contract between a man who becomes the candidate of a party and the party itself as an organized party attempting to carry on general policies of government. So that, since the party as a body of organized men assumes certain responsibility, and since it can only discharge its responsibility as an organization, representatives of the party must cooperate in an organized body in order to bring that about and discharge the duty which they assumed as a party. In that way individuals become obliged to respect party action, and in that way they submerge to some extent their personal opinions in order to cohere with the body of the opinion of the party with which they are affiliated. That is what has made necessary conferences of the Democrats of the House, conferences of the Republicans of the House, conferences of the Democrats of the Senate, and conferences of the Republicans of the Senate.

It does not at all argue that by participating in such a conference a Senator relinquishes his personal responsibility or his personal views, except to that limited extent which is justified in order to obtain harmonious action among a group of men who in the main agree with each other and who prefer party solidarity in order that they may discharge party responsibility, rather than to set up individual opinion and make party responsibility impossible of performance.

That is a very simple thing. It is well understood by the country, and no sophistry on this floor or any mere twitting of individuals back and forth across this aisle will in the least abate the plain, common-sense truth of the observations which I submit to the Senator from Michigan.

Mr. GALLINGER. Mr. President, will the Senator permit

I vield to the Senator.

Mr. GALLINGER. I want to say to the Senator that, so far as I know, Republican Senators have never had a conference to discuss the provisions of the bill.

Mr. OWEN. Mr. President, that is a very illuminating observation, but I will say to the Senator that, if I understand correctly, the organization of the Republicans in this body during a long period of years have acted with great party solidarity. and even on this bill they have not budged a hairbreadth from party solidarity, but have voted to a man upon every proposition brought up.

Mr. GALLINGER. The Senator's remark goes beyond being illuminating-it is offensive.

Mr. OWEN. Well, I withdraw my remark, if it is offensive to the Senator.

Mr. GALLINGER. I will say again, Mr. President, that the Republicans have never had a caucus in 22 years where they undertook to bind Senators to act as a unit or undertook to control in any way the vote of any Member.

Mr. OWEN. Then, it is obvious that a caucus has not been necessary, because the members of the Republican Party have acted with great unanimity and have seemingly acted as if there were a complete understanding among them. I am not informed as to their caucus action, and I do not know anything about that. I merely assumed that that was the case because of what I had observed in the voting, and since "actions speak louder than words," it is obvious that no caucus is necessary on the other side of the Chamber.

Mr. TOWNSEND. Mr. President, the Senator from Oklahoma suggests that the time will come when party action will not be binding, because Senators will be elected by the people. should like to ask him if he is in sympathy with the caucus action on this and other bills in the House of Representatives?

Mr. OWEN. Mr. President, I do not feel that I am called upon to be catechized by the Senator from Michigan on such a

Mr. TOWNSEND. The Members of the House of Representatives are, of course, elected by the people. But I want to ask the Senator another question, because he did not quite finish the answer to the question which I asked him a little while ago. I understand him to say that he is in favor of the proposition suggested by the Senator from Nebraska?

Mr. OWEN. Mr. President, in answer to the question the Senator asks, I will say that I am not in favor of the arguments made by the Senator from Nebraska. I expressed the opinion that extending this privilege to member banks might be a better policy. You may look at that in two ways. If it reit is, it would have a tendency to make State banks, which desired the benefit of this provision, become national banks, and would strengthen the national-bank system. Another thing is that leaving it as it is would give the national banks some slight additional advantage, which they ought to have in order to put them more nearly upon a parity of advantage with the State banks, because the State banks have some privileges which the national banks do not have. It is for that reason that there are 18,000 State banks and only 7,000 national banks. It is because the State banking system, being somewhat more liberal, has attracted a larger number of groups of men who have organized individual banks; and the question has arisen whether it would not be wise to give the national banks some additional advantages in their competition with the State banking system.

This is one of the slight advantages which was given, and it was not thought inequitable to give the advantage to the national banks, because this fund rightfully belongs to the United States and because the United States, having supervision of the national banking system and having charge of insolvent banks. can administer their affairs under the existing law, while they can not administer the affairs of the State banks, and there would arise confusion in the administration. But, because of my own liberality of sentiment toward the State banks, believing that they have just as valuable a function to perform as have the national banks, I was willing to have this fund distributed to them, and let it be distributed to them through the officers of the States, which would have to be the method of administration. I also thought that that question would arise in conference and might be worked out, for obviously the language of the provision as it is now is very brief; it is not worked out fully, but only lays down a principle.

I have expressed my own opinion with regard to it very frankly and very freely; and Senators have made the most of it by attempting to put me in the attitude of being under slavish servility to the Democratic conference. has been made, thinking it would embarrass the Senator from Oklahoma. It does not embarrass him in the least. He is perfectly willing to lay aside his opinion upon a matter of this kind, which delicately hinges upon one policy or the other. and to yield to the wishes of his party colleagues, and he does so without feeling that he has sacrificed his opinion or any of his rights. He is exercising his rights in the best possible form by cooperating with his party colleagues. This is a matter which I think ought to be further considered by the Democratic conference before final action is taken upon this bill, and, as we will have a conference at 6 o'clock p. m., I think we may

Mr. TOWNSEND. I think, after his long explanation, I understand where the Senator stands. I wish to state now that I have no disposition to embarrass the Senator from Oklahoma, but I did want to call attention to the condition which confronts us. I did want the country to understand-I do not know that the country cares anything about it or will know anything about it-but I should like to have it understood under exactly what conditions we are legislating. If I understand the Senator from Oklahoma correctly, if left alone he would support the principles embodied in the amendment just offered by the Senator from Nebraska. He has given much attention and study

Mr. OWEN. That is not-

Mr. TOWNSEND. Just let me finish now. He has given much study and attention to this bill and understands it. I think he understands it very well. He knows, in my judgment. that this is a just proposition and that it involves no party It can not be construed as embodying a party principle. He also knows that if that measure were submitted to the vote of the Senate without regard to caucus action it would carry. He could help to perfect the amendment if it does not suit him, but he would carry out that principle and engraft the idea on this bill; yet he practically admits that if a majority, a bare majority, of the majority in caucus assembled shall decide that that provision shall not go into the bill, then he will not vote for it, will not press it upon the Senate. would seem to me that after making the declarations he has made on this floor he would be the very first to take the lead in putting into this bill a provision which he admits would make it better.

Mr. OWEN. Mr. President, I understand the Senator's attltude perfectly well. It needs no diagram to explain it to the Senator from Oklahoma; but the Senator from Michigan also fails to comprehend the scope of what he himself did say, nor did he permit me to interrupt him to show him that he did not know what he was saying when he charged the Senator from Oklahoma, even in that minute particular, with some inconsistency of conduct, because the proposition of the Senator from Nebraska involves other considerations to which I am strongly opposed and to which the Senator from Michigan pays no attention and does not perceive.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The question is on the amendment of the Senator from Ne-

Mr. HITCHCOCK. I ask for the yeas and nays.

The PRESIDING OFFICER. As the Chair understands, the
Senator from Oklahoma [Mr. Owen] has moved to lay the amendment on the table.

Mr. OWEN. I have moved to lay the amendment of the Senator from Nebraska on the table.

The PRESIDING OFFICER. The Chair understood that the

motion was withheld and that debate has ensued. The question

is on the motion of the Senator from Oklahoma [Mr. Owen] to lay the amendment of the Senator from Nebraska [Mr. HITCHCOCK] on the table.

Mr. ASHURST. May I not ask that the amendment be again stated?

The PRESIDING OFFICER. Without objection, the Chair will ask the Secretary to state the amendment, inasmuch as there was some confusion as to where it should go in.

The Secretary. The pending amendment of the Senator from Nebraska is offered to the pending amendment of the Senator Nebraska is offered to the pending amendment of the Senator from Oklahoma as it appears in the print of December 1, 1913. It is to the part that is proposed to be inserted by the Senator from Oklahoma, and is found on page 19 of that print, line 22. After the word "paid," it is proposed to strike out all of the bill down to and including the words "Secretary of the Treasury," on lines 2 and 3, page 20. The amendment of the Senator from Oklahoma reads-

As a franchise tax, and 50 per cent shall be paid-

After the word "paid," in lieu of the words stricken out, it is proposed to insert-

into a trust fund to be held by the reserve bank as the depositors' insurance fund, which shall be used for the payment of the depositors of insolvent member banks in said district, under rules and regulations made by the board.

Mr. SHAFROTH. Mr. President, inasmuch as we are about to take a vote, and it takes considerable time for Members to come from the Senate Office Building-

Mr. GALLINGER. The matter is not debatable, Mr. President.

Mr. SHAFROTH (continuing). To the Senate Chamber, I

The PRESIDING OFFICER. The Senator from Colorado suggests the absence of a quorum.

The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

Gallinger Goff Gore Gronna Hitchcock Hollis Ashurst Bacon Bankhead Simmons Newlands Norris O'Gorman Simmons
Smith, Ariz.
Smith, Md.
Smith, Mich.
Smith, S. C.

Mr. BRISTOW. I desire to state that the senior Senator
from Wisconsin [Mr. La Follette] has been detained from the Chamber.

Champer.

The VICE PRESIDENT. Seventy-six Senators have answered to the roll call. There is a quorum present. The Senator from Nebraska [Mr. Hirchcock] has called for the yeas and nays on the motion to lay on the table.

The yeas and nays were ordered.

Mr. OWEN. Before the roll is called I should like to have

the question stated to the Senate.

The VICE PRESIDENT. The question is on the motion of the Senator from Oklahoma [Mr. Owen] to lay upon the table the amendment proposed by the Senator from Nebraska [Mr.

the amendment proposed by the Senator from Nedraska [Mr. Hitchcock]. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a pair with the junior Senator from Maryland [Mr. Jackson]. If he were present, I would vote "yea" and he would vote "nay."

Owing to his absence, I withhold my vote.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson] and therefore withhold my vote. If he were present, I should

Mr. SMITH of Georgia (after having voted in the affirmative). I have a pair with the senior Senator from Massachusetts [Mr. Lodge] and therefore withdraw my vote.

Mr. STERLING (when his name was called). I announce my pair with the senior Senator from Louisana [Mr. Thornton]. If I were to vote, I should vote "nay."

The roll call was concluded.

Mr. BRISTOW. I desire to state that the senior Senator from Wisconsin [Mr. La Follette] is unavoidably detained from the Chamber. If he were present, he would vote "nay."

Mr. GALLINGER. I am requested to announce a pair between the junior Senator from Maine [Mr. Burleigh] and the

senior Senator from Colorado [Mr. THOMAS].

Mr. CLARK of Wyoming (after having voted in the negative), I inquire whether the senior Senator from Missouri [Mr. Stone] has voted?

The VICE PRESIDENT. He has not. Mr. CLARK of Wyoming. Having a general pair with that

Senator, I withdraw my vote.

Mr. WILLIAMS. Upon the roll call I voted "yea." Learning of the absence of the senior Senator from Pennsylvania [Mr. Penrose], with whom I have a pair, I wish to withdraw my vote.

Mr. SMITH of Arizona. I have a pair with the senior Senator from New Mexico [Mr. Fall]. I transfer that pair to the senior Senator from Maryland [Mr. SMITH] and will vote. I vote "yea."

Mr. REED. I repeat the announcement I made with reference to the enforced absence of my colleague [Mr. Stone]. If he were present, he would vote "yea." In his absence he is paired with the senior Senator from Wyoming [Mr. CLARK].

Mr. BANKHEAD (after having voted in the affirmative). have a pair with the junior Senator from West Virginia [Mr. Goff], and he is absent from the Chamber. I therefore desire to withdraw my vote.

Mr. SHAFROTH. I wish to announce that my colleague [Mr. THOMAS I is necessarily absent from the Senate to-day. If he were present, he would vote "yea." He is paired with the junior Senator from Maine [Mr. Burleigh].

Mr. CHILTON. I have made an arrangement with the senior Senator from Wyoming [Mr. CLARK] by which we may transfer our pairs, and both of us may vote. I have a pair with the junior Senator from Maryland [Mr. Jackson], who is absent; and the Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior Senator from Wyoming has a pair with the senior senator from Wyoming has a pair with t ator from Missouri [Mr. Stone], who is absent. With that arrangement, with the transfer of pairs, he and I may vote. I vote "yea."

Mr. CLARK of Wyoming. I vote "nay."

The result was announced-yeas 41, nays 37, as follows:

YEAS-41.

NOT VOTING-17. Bankbead Burleigh Culberson du Pont Fall Goff Smith, Ga. Smith, Md. Jackson La Follette Sterling

Lodge Penrose Stone Thomas

So the motion to lay Mr. HITCHCOCK's amendment on the table was agreed to.

Mr. HITCHCOCK. I am glad, now that Senators have voted on this amendment, that they are going to refer it to the Democratic caucus. I have another matter here which I shall present to the Senate in the hope that it also will be taken up by the caucus at 6 o'clock.

On page 42 of the draft of the bill reported by Mr. Owen, I offer an amendment to section 13 or 14, as the case may be. I send the amendment to the desk.

The VICE PRESIDENT. To what section of the bill is the amendment proposed?

Mr. HITCHCOCK. The section is given as both 13 and 14. It starts on page 41. The amendment is on page 42, beginning in section 13.

The VICE PRESIDENT. Of what print?

Mr. HITCHCOCK. The print of December 1.
The VICE PRESIDENT. The Chair will state that the Secretary is unable to find where the amendment is proposed to be made.

Mr. HITCHCOCK. Has the Secretary the print of Decem-

The VICE PRESIDENT. He has,

The Secretary. It is proposed to strike out "90 days" and

One hundred and eighty days: Provided, however, That not more than 50 per cent of the paper discounted for any member bank shall have a maturity exceeding 90 days, and in no case shall any member bank have more than \$200,000 of rediscounts having a maturity longer than 90 days.

Mr. HITCHCOCK. Mr. President, as the bill came from the House and as it has been presented by the Senator from Oklahoma, it strictly limited the right of discount to paper having a maturity of not over 90 days. The testimony before our committee showed that there are thousands of banks in the United States, both national banks and State banks, particularly in the Southern States—in North Carolina, South Carolina, Florida, Georgia, Arkansas, Nebraska, Kansas, and, in short, in all of the Middle and Western States-for the most part small banks in agricultural regions, which loan their money almost exclusively upon six months' paper. Much of that paper is as legitimate a subject for banking business as the 30, 60, and 90 day paper of banks in the large cities.

When a merchant borrows money upon his note for 60 or 90 days, he does so in payment for goods. As those goods are sold, he receives the money with which he liquidates his obligations. It is the self-liquidating character of paper which makes it prime commercial paper. In the regions of the East, devoted largely to mercantile enterprises and manufacturing, that paper rarely has a maturity greater than 90 days; and therefore the banks that come into the system from the Eastern States will be amply accommodated if permitted to use 90-day

If, however, you take the paper of banks in the South and West, you find an entirely different condition if you go outside of the cities. You find banks which lend money to men engaged in the stock business, or in the grain business, or in some agricultural process which involves the borrowing of money, not for 30, 60, or 90 days, but for 6 months, and yet that paper is just as legitimate for its purpose as the manufacturing and commercial paper of the East.

Take the man who borrows a reasonable amount of money when he enters upon a season of feeding and fattening cattle. He borrows it for six months. He borrows it in part to make a payment upon the cattle or to buy feed for them for the winter. When the season is over and the cattle go to market his paper is liquidated just as automatically and just as certainly as the paper running for 60 days issued by the mer-

thants and manufacturers of the East.

The fact of the matter is that if you are to invite the western and southern banks into this system, you must give them an opportunity to use the legitimate commercial paper they take from their customers. If you do not do it, they will not enter your system. If you force some of them that are national banks to come in by reason of the power of Congress over national banks, and then deny them the right to use the paper of their neighborhood-the accustomed commercial paper of the region in which they do business-you perpetrate a monstrous outrage upon them.

One of the reasons for the unpopularity of this bill in the West as it came from the House of Representatives, and one of the reasons for its abhorrence by the bankers of the South, was that it proposed to take a large part of their capital and to impound their reserves and then to refuse to accept the

paper in which they dealt.

Mr. President, this seems to me a self-evident proposition. We have had before us some academic theorists who have argued that this six-months' paper was not the proper basis for currency, and they have pointed to the experience of Europe to show that paper there, when discounted at the great banks, has an average maturity of, perhaps, only 30 days; but a very large part of these discounts will be made by the reserve banks for their member banks, not by issuing currency to those banks, but by using the capital and the reserves which those banks themselves have provided. This reserve system ought not to mean, under proper limitations, an inflation of the currency to any extent. It ought to mean only a mobilization of the reserves and their efficient use for discounting the paper of member banks.

Mr. TOWNSEND. Mr. President, may I ask the Senator a question?

Mr. HITCHCOCK. Certainly.

Mr. TOWNSEND. Suppose a bank had some six-months paper, but it had run three months: Could not that paper be used under the provisions of the Owen bill?

Mr. HITCHCOCK. Yes; it could.

Mr. TOWNSEND. After the paper had run a portion of its

Mr. HITCHCOCK. It could; that is true. But, Mr. President, the testimony before the committee shows that when the demand came upon banks for loans in Western and Southern States it all came at the same time, and that testimony shows that the banks were not able to meet it; and it was then, at the very inception of the business, that they often found necessity for securing rediscounts. They are securing these rediscounts now. The banks in my own town rediscount six-months paper for their country customers. The banks do it in Kansas City; they do it in all the great centers of the country.

Six-months paper is a legitimate subject of discount when it

comes from banks, when the six-months paper is in a legitimate line of business, and to provide a limitation of 90 days simply means that you will bar these banks from the legitimate benefits of this new system; that you will render it difficult for men in the South and the West to secure their discounts and their loans when they need them; that you will force the country banks in those districts still to depend upon the big city banks of the country, that will not discriminate against six-months paper; that you will start your system crippled at the outset, without the membership or the adherence of these country banks

in the West and the South.

Of course I know from what the Senator from Oklahoma has said that even if he were convinced that this is a desirable amendment he still is not at liberty to vote for it until the caucus gives him permission, but I do hope that when the caucus meets at 6 o'clock to-night it will take into consideration the thousands of State and National banks in the West and South that are doing a legitimate business and are entitled to have their legitimate business recognized as a part of the business of

the new system.

Mr. CRAWFORD. Mr. President, we are now dealing with a provision of the bill in which the smaller banks, known as the country banks, have a very keen and lively interest. small banks scattered through the West and through the South in the smaller towns of the country, with capital running from \$25,000 to \$100,000, loaning their money to the stock raiser and the farmer and the small retail merchant, are not in the swift-moving currents that were in immediate contemplation by the framers of this bill. Their business is distinctively a business of a small character and is confined to small operations. It is apparent from the beginning of this bill to the end that it was not drawn with their interest in view except as that interest was a mere incident.

The main purpose for which this bill was framed was to meet a larger situation than the environment of these small country banks, who are being coerced in this bill against their will and against their protest to round out a system the main purpose of which is to accommodate big banks, great financial interests

in great centers.

While I make that charge, and make it earnestly and with emphasis, I admit that two of the main purposes of the large banking interests, who are primarily back of this bill, are good purposes. I am willing to go far enough to admit that there may be an element of patriotism back of the motive of the representatives of the large financial interests that started the propaganda and built up the sentiment for this legislation; that that we might have a law which would place the reserves of the banks of the country in a centralized reservoir, so that the combined weight of that power could be brought to bear on short notice to help weak spots in time of stress. That is a good purpose. Also that a method might be established under the framework of this bill whereby the assets of banks that are liquid in form may be brought forward and made the basis for emergency currency, to be issued for relief to a locality needing it in time of stress

But the big banks and the interests that need that relief are large enterprises and great financial concerns of concentrated power, such as we find in New York City and in Chicago and

other great centers.

Now, I want to be heard here, and I insist that Senators shall give some attention to the interests of these smaller banking concerns. Is legislation always to be framed here from the standpoint of the men who are sitting in the counting houses and directly interested in the great structure that depends for its foundations upon smaller communities and producers, without giving any ear whatever to their complaints and their reasonable demands? It would seem so from the way this legislation is framed. When it comes to the importing merchant in New York or elsewhere who wants to get money upon an acceptance which does not mature until six months, a member bank can take his paper over to the reserve bank and deposit it and can get a credit or get currency for it. when it comes to a little country bank out in my State which

has farmer's paper that runs for six months, taken in a transaction where cattle were bought or where some local transaction occurred in a farming community, liquid paper just as good as this paper of the importer, and a country bank in time of stress wants to get a credit in a reserve bank or to get some of these notes upon this collateral, it is told, "No; you can not have it, because the paper presented matures in more than 90 days."

Now, I want to ask upon what basis of justice or equity or right is this discrimination made against these small banks? Are they not just as good and just as deserving of recognition and accommodation in time of stress as the banks that are dealing in acceptances in New York or in Chicago and in paper connected with the importation or exportation of goods and which matures after six months? What reason is there for this dis-

crimination against us?

You say their paper is not liquid. Their commercial paper, the term of which matures in six months, is paid upon the sale of a commodity from the farm, and it is of exactly the same character, when you consider the payment of it out of consumption, as the paper that we call prime commercial paper, maturing in 60 days and 90 days, which the great banks are handling in amounts running up into millions of dollars, and which they can take from their portfolio and go to these reserve banks and get accommodation upon. This paper is of the same character. Yet this paper is not recognized if the term of its maturity runs beyond 90 days.

Upon what ground is this discrimination made against these country banks? It is not likely that they, except in times of stress like that in 1907, will want accommodations from these reserve banks. As a rule they tell me they will have little occasion to go to these reserve banks for favors of this kind, because they are not in the habit of rediscounting their paper.

When John Brown or John Smith or John Jones gives his note to one of these country national banks for \$1.000 or \$1,500 or \$2,000, due in six months or in one year, renewed from time to time, and keeps his interest paid upon it, his note is kept right there where he left it. They do not go and rediscount it and hawk it around or send it to Minneapolis or to Sloux City or Chicago. It is there, and he goes there and pays it. That is the rule. If these banks need a loan, if they need a little money, they have correspondents in these reserve cities who are glad to extend favors to them.

But in time of stress, when the pinch comes, when unusual circumstances exist, when credit is weakened, then you expect this law to do some good. That is the principal reason it is being proposed. It is being enacted to be of some use to the people in a time like that, and when that time comes you have provided for your large banker and the banking institutions in the cities, in the financial centers, but where are you leaving

these small country banks?

Right where they are now, practically, except that you are forcing them to furnish capital for this system against their Then you are discriminating against them in regard to the class of paper which they will want to take over to one of these reserve banks and get accommodation on. It is no idle complaint that comes from these country banks. They began protesting against this discrimination the first time they had an opportunity to examine the bill. They have been protesting

against it ever since. The other day my colleague Mr. STERLING put letter after letter into the RECORD from bankers in the State which we have the honor to represent in which that was their principal objection. They are not to have any benefit. This bill denies to them the benefit which those who favor the legislation maintain is its principal purpose; that is, to have a system that will readily extend relief to the banks of the country at a time when relief is imperative. That is the very time and the only time these people will want to use these banks. And when that time comes you have so restricted the class of paper that shall be recognized that they will be denied any benefit from it. I pro-

test against this as unjust.

Mr. President, I have not talked very much upon this bill; it is probably entirely futile to do it; but I want to call attention to the provision upon this point which is in the Hitchcock draft. It contains an amendment in which I was especially interested in the committee, because it touches most directly and closely the interests of the banks of the State I have the honor in part to represent. You will find the amendment proposed in the Hitchcock draft on pages 40 and 41, in that part dealing with the class of paper that may be recognized for discount. The Hitchcock draft says:

Notes and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 180 days.

That is six-months' paper. Now, to prevent their being loaded down with six-months' paper here is the limitation:

Provided, however, That not more than 50 per cent of the paper discounted for any member bank shall have a maturity exceeding 90 days and in no case shall any member bank have more than \$200,000 of rediscounts having a maturity longer than 90 days.

Mr. President, the banks who have been laboring to build up this system are banks which will go daily to the reserve bank and present for discount paper amounting to millions and That class of banks will have no occasionmillions of dollars. and that appeared from the testimony of a great banker before the committee-to present for discount paper running longer than 90 days, but these small banks who must have the privilege of presenting this kind of paper or be denied any direct benefit from this new scheme, ask that as to them they shall have the privilege to rediscount paper having six months maturity, the accommodation not to exceed \$200,000.

It would not be unsafe with a limitation of that kind in it. There can not be any possible danger of the reserve bank being loaded down with paper having six months' maturity. Two hundred thousand dollars is the limit for any bank. One of these little country banks asks for accommodation upon a paper maturing not longer than six months to an amount not exceeding \$200,000 and is treated here with indifference and

almost with contempt.

I am justified in saying that the request for this amendment is treated with both indifference and contempt because it comes from banks which are in small towns in the country and which are regarded as not of great importance, and this is a system built for large banking institutions who are to enjoy its benefits exclusively. Will this amendment hurt anybody? It will help the small banks in time of stress if stress comes. Will it injure the system to give these small country banks the privilege of presenting and having rediscounted commercial paper maturing in six months, with a limitation that no bank shall have more than \$200,000? It will not. But the request is not to be recognized. The claim for an amendment of that kind is not even to receive upon the floor of the Senate respectful consideration,

How have the great bankers of the country made their money? One of the gentlemen who appeared before the committee told about sending a man out through the West, just as commercial travelers go from one town to another drumming up trade. The representative of this great bank went out through the West from one town to another soliciting these country banks to keep their balances with it, to keep their reserves there, Those reserves make the capital which is loaned by that great

The same is the case in New York. I read the history of one of these banks—the First National Bank, as I remember it. It started in the later sixties with a capital of half a million dollars, but it was loaning money deposited by these country banks from all over the United States.

A few years since it had \$10,000,000 in surplus, with which it organized a trust company. A short time afterwards it divided up \$10,000,000 more, and when the president of it was asked, when before the Pujo committee, what its shares were worth, he said he could not put a price on them. When he was pressed to name some value for that stock, be finally said \$2,000 per share. I am not making any accusation against the officers of that bank. This money sense is a wonderful gift. That is a manifestation of genius when a bank can start in with a half million dollars of capital and pile up profits like these in legitimate banking business in the United States.

The banks in reserve centers have done this business with deposits left with them by the country banks; they hold them to-day from the small country banks of North Dakota, South Dakota, Kansas, Nebraska, and all through the West. seems that these country banks are not entitled to any consideration here. Accommodations to them in rediscounts are not given any attention whatever. They are the banks which have been furnishing the deposits whose balances have been used in these great transactions which have brought such enormous returns to the big banks which have so prospered under this prectice of pyramiding reserves and all that sort of thing; big banks which are to be accommodated here in a new system which is said openly upon the floor of the Senate to be intended not as a bank to deal with the people of the United States, but as a bank for banks, owned by banks, controlled by banks, limited to banks.

They want the little fish in the net. It is the small banks that have made profits for the large banks by the use of their balances and the reserves left with them, which they want to hold in here. So they put into this bill a provision compelling them to come in over their protest, requiring them to contribute

to this capital. Over 3,000 small banks, in the 7,500 national banks which are to be brought into this system, are compelled to come in and compelled to take the stock, the public being excluded and the benefits being given to big banks, and the little banks forced to take it. And when they ask the privilege of having their paper maturing in six months recognized at the counter of one of these reserve banks in a time of panic, when they may be unable to realize, as they can do in normal conditions, upon this paper, when they need the funds to pay depositors, to keep their doors open, to maintain their credit, when they are facing a dire necessity, when they are facing a situation which may destroy the accumulations of a lifetime in those little communities, when they want accommodation at the reserve bank and come with the paper of the cattleman, of the farmer, and of the merchant—a security the value of which and the quality of which no one questions, except that it maand the quality of which no one questions, except that it matures in more than 90 days, but within 6 months—they are turned away; they are not recognized.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER (Mr. POMERENE in the chair).

Does the Senator from South Dakota yield to the Senator from Nebraska?

Mr. CRAWFORD. I do. Mr. HITCHCOCK. I want to call the attention of the Senator also to the fact that this discrimination against these banks does not stop there. It is a discrimination against the whole country in which the banks do business and is a handicap on the people.

Mr. CRAWFORD. Certainly. Where the accommodation is denied the First National Bank of Huron, the town in which I live, it is denied as a necessary sequence to all the people in that community who have their funds in that bank and who have been doing business with and depending upon it for credit and for accommodation for many years. You may flatter yourselves on the other side of the Chamber

that you can stand up with supercilious air, with a sneer, and meet this complaint in jocular fashion with quips and quirks, but I want to say to you, do not be too vain and self-satisfied; there is a great jury outside of the city of Washington which finally passes upon these matters, and the intoxication that comes with the exercise of power often indicates the beginning of the end.

This request is reasonable and fair and just, yet it is dismissed because the conference has not seen fit to recognize it. I know what I am talking about; I am not an expert banker; I do not claim to have given profound study to all of the technical intricacies of our financial system; but I know one thing, and so does every man with a grain of common sense, and that is that these people-I am acquainted with them; I mingle with them; they are my neighbors; I have lived with them all my life—say to me, "We protest against being required to take stock in this bank when, after we have paid our money and got our shares, you are putting restrictions around its transactions, so that when we, in a time of stress, need help from it we can not get it." I say it is unfair, unjust, and so do you, and so does every other fair-minded man say it is unfair and unjust.

It is said that it is the maturity of the paper which determines its eligibility to discount and not the time named on the face of the paper. That is true; but what proportion of the paper of these little country banks could be sifted out, if you were required to pick out only that portion of it that matures in 30 days, 60 days, or 90 days? A small percentage, they all tell me; that is the testimony of the bankers with whom I have

talked.

I am discussing what I suppose the great financial students of this body who know all about it think is a very small and immaterial part of this bill, the question of considering the rights of 3,000 or 4,000 small country banks in the United States in time of need and stress when they want some accommodation. That is a very puny, small, secondary matter to be considered here, in the eyes of some people, but to the people throughout the United States in the country districts and to the country banks with which they deal it is a question of some importance. I think it is entitled to some consideration.

I am not going to quote any names, but a good friend on the other side of the Chamber from one of the agricultural districts of the South said to me the other day that this bill was practically of no benefit to his community, because it did not make provision for the rediscounting of that quality of paper by country banks. I asked him why he would not support this amendment. He replied that the limitations of the Democratic conference stood in the way. Yes; that is the trouble. It stands here as a bar; it stands here as a preventive against an openminded, fair consideration of a clause like this, which the country people and the country banks have a right to have

fairly considered on its merits. It is not to be considered, because it has been ordered otherwise in a way which prevents

Senators from voting their convictions upon it.

I care absolutely nothing about all this little play for strategic political advantage in the consideration of this bill. It does not make any particular difference to my constituents or to me personally what the outcome of that kind of a performance is. I am talking about a provision which should be considered regardless of party and as a mere matter of justice to the small banks and the country people who borrow small amounts and give paper that is, in nine hundred and ninety-nine cases out of a thousand, just as good as you will find anywhere under the shining sun, but which runs for six months and then is renewed for six months more. That constitutes the general volume of the banking paper in the community which I represent. I am speaking for those people and asking that they have some fair recognition in this bill when they are being compelled-held up at the point of the bayonet, as it were

to take stock in reserve banks or go out of business.

You may think that is speaking too plainly, but I insist that it is not. You are practically saying to them—for they are the stockholders—and to these banks, "Come forward here with your cash and take this stock or go out of business," and yet I defy Senators to point out how, except in the general way that in panicky times you may prevent a panic, this great framework of legislation is to help these country banks unless you will allow them to bring their portfolios—that is a term which has come into the discussion; I do not know where we got it, but I suppose from some of the foreign countries—their portfolios, filled with this good paper maturing in six months, and go back with reserve notes to loan out to their people or with a credit on the books of a reserve bank which they can utilize. These small banks would like to utilize the notes of the cattleman, the local merchant, and the local farmer, which mature in six months, at a time when the clouds are lowering, when the storm is about to break, and when depositors may in a few hours be at the bank's door clamoring for money. They would like to have the privilege, if such a time as that comes to them, to take their portfolios with this class of paper and go over to a reserve bank and get some of these notes. But no; they are not to have that privilege under this law.

Mr. WALSH, Mr. President-

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Montana?

Mr. CRAWFORD. Certainly. Mr. WALSH. I am very much interested in the remarks of the Senator, because the conditions in my State are very similar to those in his own, and the considerations which he is now addressing to the Senate of course have directed themselves to my mind. I had a letter a very short while ago from a very intelligent and discriminating banker in my State who was objecting to the bill upon the same grounds now urged so earnestly by the Senator from South Daketa. He complained that they would not have available for discount the kind of paper required by the bill, and therefore it would be of no value to them, although he recognized that it would be of great value, as he said, to the banks in reserve cities. I invited his attention to the fact, however, that the bill makes available paper which has 90 days or less to run to reach its maturity, what-ever the length of time may have been between the date when the note was given and the maturity. I wrote him a letter in which, among other things, I said:

I should imagine that after the 1st of February you would have available six-months' paper given in the fall and early winter for money to buy stock to be fed in the winter and marketed in the spring.

That is to say, paper given for six months originally, but three months having elapsed, that paper would be available by the 1st of February

Later on, say by the 1st of March or the 1st of April, you would have paper such as our companies give you, maturing from the 1st of July to the 1st of August, to be liquidated from the sale of the wool clip. Following upon that you would have paper maturing from the 1st of August to the 1st of October and later, in anticipation of cattle shipments. Subsequently you would have paper maturing from the 1st of October to the 1st of January, anticipating shipments of mutton and, of course, of grain products, so it does seem to me that there would be hardly a season in the year when you would not have available an abundance of paper eligible for discount.

That condition of affairs seems to be admitted by him. should like to ask the Senator whether the banks in his State

will not be in practically the same situation?

Mr. CRAWFORD. They will not. I put that situation clearly to them. In the first conversation I had with them it was brought up. It does not make any difference if, on the face of this paper, it is drawn for one year or two years, for that matter, in the class of paper that is recognized in rediscounts. It is a question of the maturity of the paper. If the

paper will fall due in 60 days or 90 days you can use it, yes; but the proportion of such paper falling due in a bank of \$20,000 or \$50,000 capital is too uncertain. It is only a proportionate amount of the bank's paper, and under the limitations of the bill we are not given the relief which in time of serious

danger we would require.

Why should this bill limit the farmer's paper, the cattleman's paper, the local merchant's paper to 90 days maturity, and then right over on the opposite page of the House bill, in a clause dealing with acceptances based on the exportation or domestic shipment of goods, extend the maturity of such paper to six months? Are the people whose paper is based on the exportation or domestic shipment of goods—whatever domestic shipment means there-to have accommodations on paper that does not mature for six months while the same privilege is denied to people in my town and in towns similarly situated all through the country on paper just as good and based upon a similar transaction? The privilege is only extended to them on 90-day paper. I want to know why that discrimination is made against the people in the rural communities?

Mr. POMERENE. Mr. President— Mr. CRAWFORD. I want to call attention to another matter, and then I will yield to the Senator. Here is a provision

Any national bank may accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation, exporta-tion, or domestic shipment of goods having not more than six months' sight to run.

Then the amount is limited, but nevertheless, up to one-half of the capital and surplus, that six months' paper is recognized when it is a draft or a bill of exchange, but my good old farmer friend who has come in and given his note over at the bank, which would take his note at any time without any security, because it knows him and knows what is back of him-his note, due in six months, has no standing whatever in this reserve bank.

Mr. POMERENE. Mr. President-

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Ohio?

Mr. CRAWFORD. I do. Mr. POMERENE. Mr. President, if the effect of this bill were such as the Senator from South Dakota anticipates, then it might be subject to criticism; but it seems to me he has been misinformed by some of his banking friends as to the

The Senator has stated that in his community the paper was nearly all six-months paper, and we will assume that to be so. If this paper is issued or given to the banks in equal amounts each month-and I will assume that for the sake of the illus-

Mr. CRAWFORD. No; I do not think the Senator can as-

Mr. POMERENE. I am assuming that for my illustration, and we will go ahead and develop the matter later. Assuming the facts as stated for the sake of the illustration, then there would be no time when at least one-half of the paper would not fall within the terms of the bill, as it would be due within 90 days or a shorter period.

Mr. CRAWFORD. That is true if the Senator's assumption

Mr. POMERENE. I understand that. That being so, it certainly must follow that they could take half of their paper to this bank for rediscount.

Let us assume, on the other hand, that all of this paper is executed and delivered to the bank, say, in one month, January. That is the worst possible condition the bank can be in, under the statement of facts given by the Senator from South Dakota. Then if in February they should want to discount or rediscount their paper at the regional bank, and it would be five months before it became due, there is a provision in the bill whereby they can serve their purpose quite as well.

The bank can execute and deliver its own note to the regional reserve bank in any amount it desires, and the regional bank will accept it for 30 days, for 60 days, or for 90 days; and at the same time the bank executes and delivers this note it sends to the regional bank this farmer's paper as collateral. In that case it serves the same purpose that would be served if the statute should allow six-months paper to be rediscounted, and it is not

going to embarrass the bank in the least.

If the bank takes a six-months note of a farmer to the regional bank, the note must be indorsed by the member bank. If the bank executes its own note for a given amount, it can hypothecate with it the farmer's paper. Each method of business serves the same purpose, and the member bank has this authority under the bill.

I read from page 44 of the print of December 1, 1913:

The Federal reserve board may authorize the reserve bank of the district to discount the direct obligations of member banks, secured by the pledge and deposit of satisfactory securities; but in no case shall the amount so loaned by a Federal reserve bank exceed three-fourths of the actual value of the securities so pledged.

So that under the Owen bill the member bank can rediscount all its paper maturing within 90 days, and if it needs additional accommodations it can execute and deliver its own note to the reserve bank and hypothecate with it farmer's paper or other acceptable security, even if it has 90 days, 6 months, or longer

to run till the date of maturity.

Mr. CRAWFORD. That is relief a long way off. relief to which a country bank is not likely to resort. think that before the country banks would do that they would do as they did in 1907-persuade their depositors to leave their money in the bank and rely upon the confidence which exists between them and the banks to a larger extent in the rural communities than anywhere else, because with that provision the bank would have to come down here and get the consent of the Federal board, and this would draw the attention of the public to that bank and be embarrassing to it. The fact that there is a doubtful remedy like that, to be resorted to in extremis, does not for one moment furnish a satisfactory explanation for this discrimination against the country banks.

I want to say to the Senator that his assumption that onehalf of this paper is due at one time and one-half at another time, or that it comes due proportionately every three months, so that it can be divided into four parts, does not square at all with the situation in these communities. Their paper usually falls due at two periods in the year. During the rest of the year there might be a part of the time when the greater quantity would mature within 90 days and another part when practically all of it would not mature until more than 90 days. Who knows when a panic is going to occur or a stringency is going to come, when one of these banks will be obliged to apply

to a reserve bank for relief?

I protest against this discrimination because I think it is my duty to do so, representing the people I do here. I want to say that I think it is unjust and unfair. I recognize the good things this bill proposes to accomplish. While I make this protest with all the earnestness I have, I expect to vote for the bill, because I think in the main the provisions for averting panies to the country generally are sufficient justification for it. I think my people expect me to vote for the bill. They protest, however, and have protested from the start, against this dis-You are smiting with your open hand the people who have been most generous here toward you, and who have been the most willing to accept and give full credit to the purposes you have in view in this legislation. Yet in regard to the one request they make in this bill they are ignored and treated with indifference. Your ears are open to the big bankers, who want to retain control of the banks and have their paper recognized here and have the system constructed for their accommodation, so that you can truthfully call it a bank of banks. It is that, and more; it is a bank for big banks. These generous, open-hearted people who are taking you at your word, and believe that you are offering some legislation that is good for the whole country, have a grievance in regard to this section of the bill about which they are sincere and earnest. make their protest, and yet they are treated with indifference, and almost with contempt.

Mr. BRISTOW. Mr. President-

Mr. CRAWFORD. I yield to the Senator from Kansas.

Mr. BRISTOW. I wish to ask the Senator if, to speak concisely, the bill as reported by Senator Owen does not extend the six months' privilege to the notes of the men who handle the products of the farm, but denies the six months' privilege to the notes of the men who produce the products of the farm? Mr. CRAWFORD. Certainly. We had that matter up the

other day. That is what the bill does.

I want to know, and I am going to wait with some curiosity to see, whether you are going in the conference to night to turn this amendment down because it happens to be in what is called the Hitchcock bill and because some of us over here favor it. You may condemn us, but I assure you that you will be condemned, and the country will condemn you, if, simply from the vain desire to have your way about everything and not yielding anything to us, you turn a deaf ear to that request. I make it here in behalf of the country people, the farmers, the small business men, and the country banks of the United States. I ask that it shall receive fair and just consideration on the floor of the Senate and in a conference of Senators. No good explanation has been given for this discrimination, and I do not believe any sufficient explanation

can be given for it.

Shall the great bankers dictate the provisions of this bill and shall we ignore the small bank and the country man who is carrying some of the burdens, assuming some of the responsibilities of citizenship, and performing some of the duties and obligations of the community which entitle him to respectful consideration? I leave it to you. We do not want spectful consideration? I leave it to you. We do not want to have the mere question whether it has the color and the backing of a conference, political in character, determine whether this amendment is to be considered or not.

I protest against its being passed upon from any such stand-point. That is not fair. It is not just. It is not the right kind of recognition to the communities in the agricultural States and to the small banks who lend and their customers who borrow on paper maturing in periods of six months and more, to have their requests, their protests, and their appeals determined upon such partisanship considerations as that.

These country banks are not making an idle request. are making a serious, earnest request. They must take this stock; they must make payment for it in gold. They must see these contributions made against their wish pass under the control of great bankers who will select the boards of directors. They are to see all the national banks tied together in one great combination. Then they are to be denied its accommodations upon such commercial paper as comes into their port-

As I said the other night, it is un-American to do that. These small banks are entitled to some consideration for the environment in which they are placed, the paper which they take, the accommodations which they need, and the necessity of having a way open to them for relief when panic comes and disaster threatens.

I protest against the rejection of this amendment.

Mr. McCUMBER. Mr. President, the question so often asked by the Senator from South Dakota has not yet been answered. I have seen no disposition to answer it. I might make a suggestion, therefore, that will give an opportunity for an answer on the other side.

I assume that one of the purposes for restricting the assets to those which have a maturity of 90 days or less is to secure liquid assets, to secure assets that may be cashed in a very short time. That is the only suggestion I have heard made at all as to why the six months' paper of the northwestern farmer could not be utilized in cases of this kind.

The object of securing what are called liquid assets is to get something that you can convert into cash in the very shortest possible time under panicky conditions, under conditions in which loans are not being extended. In order to accomplish that, so far as the securities of the entire Northwest are concerned, you eliminate the very class upon which you can at all times realize and you take in the class upon which it is most difficult to realize, and why?

I have had some observation and some experience in the matter of closing up banks of the Northwest that have gone into bankruptcy. Those banks hold the paper of both the merchant and the farmer—the merchant's 90-day paper and the farmer's paper due in six months or in nine months. I think you will find that four-fifths of all the paper from the farm held in the banks in my State is paper that will be due in the month of November, no matter what might have been its date. The merchant's paper is of a different class, but it is often based upon the farmer's paper, and often becomes due when he can realize upon it.

Take your merchant's paper. How can he pay it in times of stress? He can meet his obligations only in one of two ways—either by turning something else into cash or by borrowing the cash. He can not turn other things into cash in days of distress and disaster. He can not borrow during panicky

The farmer's paper, however, is good at all times. Notwithstanding the mistakes of any administration, notwithstanding any character of blight that may fall upon the general business of the country, the soil, if there is rain, will keep on producing and human stomachs will keep on digesting, and the law of supply and demand is always working upon the farmer's product. There is always a demand, at some price, for his product. He can always realize upon it. That is why, when there is a dissolution of any bank, you go in and look over its securities, you put them up for sale, and the thing that will always sell for its full face value will be the farmer's paper. The thing that finally goes down into the wastebasket is your 60 and 90 day mercantile paper that has become worthless because of bankruptcy.

That is not all, Mr. President. We have in the great newly developing sections of the Northwest no great individual wealth. Bankers must be conservative. They do not loan very much to these men upon the bare name as security. In nearly every instance there is collateral—a mortgage upon chattels, upon the growing crop, or upon the farm. There is something back of growing crop, or upon the farm. There is something back of it besides the name, and that of itself gives it a value, so that in times of stress you can put that paper up to the market, and though there may not be a dollar in the bank there is some one who has a little saving who is always ready to invest it in a good farm mortgage or in a mortgage secured by farmer's paper and which will be good as long as the soil will produce the necessaries of life.

Now, you are cutting out the most essential liquidating paper Now, you are cutting out the most essential liquidating paper that we have in the entire Northwest, paper that can always be sold for cash and can always be realized upon, and you are offering to take in its place a character of paper that is not worth, upon the average, 50 cents upon the dollar compared with what the farmer's paper is worth.

When the bankers of the Northwest have good paper, reliable paper, paper that they can turn and are daily turning over to little investors in all those Fastern States for 6 and 8 per cent

little investors in all these Eastern States for 6 and 8 per cent, and upon which they can always realize the face value, you are eliminating that paper for a class of paper that has nowhere near the same inherent value. You are turning away the liquid assets for the doubtful assets which are dependent upon commercial or industrial success.

So I join with the Senator from my neighboring State in protesting, in the name of these banks and in the name of the people of these States that are subserved by these banks, against any system which will discredit the best paper there is in the

United States for all practical selling purposes,
Mr. SHAFROTH. Mr. President, it is strange that the Senator, after having this morning delivered a speech on inflation, in which he made the statement that under this system there could be built up to the extent of 10 to 1 upon the gold a circulating medium, yet proposes here to increase the very basis upon which paper money can be issued. It seems strange, when he takes that view of the system, that he should want to enlarge the very paper that can produce the inflation which he claims will take place.

Mr. McCUMBER. Does the Senator desire to inflate only in

the cities and not in the country?

Mr. SHAFROTH. I will answer that by saying that this is a bill that had to have checks in it.

Mr. CRAWFORD. Mr. President—
The PRESIDING OFFICER. Does the Senator from Colorado vield to the Senator from South Dakota?

Mr. SHAFROTH. Let me get through, and then I will yield to the Senator.

Mr. CRAWFORD. Certainly; I will wait.
Mr. SHAFROTH. When we have in a pill a system such as this there must be a good many checks to bring about a conservative use of the powers that are given in the bill. one would like to see paper of any kind subject to use by any kind of a bank if it did not have any bad effect, but we have to throw some checks upon the system in order to prevent a

good many abuses of it.

We have never had this system of banks in this country. We have never had this right to rediscount. Consequently, we looked around the world for the purpose of ascertaining what is the experience in other countries. We do not want to rush into something that upon the one hand, according to the Senater from North Dakota, would produce an unlimited inflation, nor do we want to run into something that will produce a contraction. Therefore it was necessary that certain things should be done in order to be sure that we will have a safe and a fair When we look around in the history of the world we find that there are banks of this kind; that is, discount banks; and when we find that in England the paper must run only 28 days, when we find that in France it runs but 26 days, when we find that in Germany it does not exceed 90 days, and that there is no bank in the world which discounts paper in excess of 90 days, does it not become us, in the interest of caution, to say that until it is demonstrated the other way we had better adhere to 90-day paper?
When we find, also, that the bill which was presented to the

Senate by the National Monetary Commission, which received the assent of a great many upon the other side of the Chamber, provided that only paper could be discounted having a maturity of 28 days, it seems to me it comes with poor grace from the other side of the Chamber to talk about an inflation and then to claim that 90 days in the paper that is to be discounted are not enough. It seems to me that these gentlemen who were so eager for the Aldrich bill and wanted 28 days to prevail should not have given their allegiance to that bill nor voted for it. We must take into consideration that there is not one of the great banks of Europe that exceeds 90 days in the discount on paper, but the very largest banks in the world limit it to 26 and 28 days. It does seem to me that Senators upon the other side can not complain that we have not been liberal because of the fact that we have said we do not want to limit it to your Aldrich bill; we do not want to limit it even to the system of the Bank of England, but we want to treble it and give three times the

amount of time to the paper that may be discounted.

Of course, some Senators may say it ought to be 180 days, other Senators may say it ought to be a year, and other Senators might say it should be two years. It is a subject of compromise. It is a subject of getting together and seeing what is the experience of the world and what is safe to be done. We do not want a wildcat system here. The object of short-time paper is that it shall be liquid, that it shall mature at quick intervals and put the bank that does the discounting in a position to advance the money and to have it ready at hand to advance

Senators talk about 180 days. That might work, and if it would work and the other things of an evil nature did not run into it we would say all right. But there has to be some kind of a compromise, and when we see as a matter of fact great banks have limited it to 28 days, and the very system that you gentlemen upon the other side so much admired made it 28 days, it does not seem to me that we should go in haste to make such an enormous increase, but that when the increase we have made is three times the amount fixed in the Aldrich bill it ought

to be satisfactory.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. SHAFROTH. Yes, sir.
Mr. HITCHCOCK. The Senator from Colorado is correct in saying that the average maturity of paper which is discounted by the central banks of Europe for their individual banks is 28 days; but the Senator from Colorado, of course, appreciates the fact that the conditions in Europe are entirely different from the conditions which prevail in the southern and western parts of the United States. They are not raising cattle there and fattening them; they are not buying grain and holding it. That portion of the world consists of a densely populated country, in which the business transacted by the banks is largely connected with mercantile and manufacturing processes, which absorb only one or two months, possibly three months. this country have an entirely different condition. In the Senator's own State and in my State and in many of the Southern and Western States our agricultural processes, our stock-raising industries, and the natural occupations of our people producing the food of the world require a greater length of time.

Can the Senator not see that there is the same propriety in adapting our discount provisions to the conditions of our country that there is in accommodating the discount provisions of the European banks to the conditions which prevail in Europe? The Senator surely will not contend that we are making a system to operate under European conditions. Why, then, does he constantly cite the conditions in Europe? Why does he refer to the Aldrich bill which he condemns? Why does he not engage in the constructive work of forming this bill so as to meet the needs of the country in the manufacturing country, in the mercantile country, saying to the whole country in which these small banks are spread out, those above all others need a rediscounting privilege? They are the ones which use it to the largest extent now, and yet by the bill which he supports the very paper which they legitimately use is barred and blacklisted by the terms of the bill.

The PRESIDING OFFICER. Does the Senator from Colo-

rado now yield to the Senator from South Dakota?

Mr. SHAFROTH. Let me first answer the question that has been presented by the Senator from Nebraska. The Senator there is no comparison to be made between this system and the European system, because those countries are very densely settled, and that, consequently, there are not the same conditions prevailing there; that they do not raise cattle and do not do various other things. We have taken that into consideration; and that is one of the reasons why we said that 28 days But when you treble that amount and say 90 days, the question is whether you are not nearing dangers which may arise from the other features of the bill. I recognize that it would not do to have 28-day paper as the time of maturity of the notes that may be presented, but when we treble that in a system that has never been tried in this country, when the ex-

perience of European banks in relation to their countries is that the paper should be 28 days, it seems to me that we are pretty liberal; at least until it is demonstrated the other way. Then if it is demonstrated the other way, of course a change ought to be made.

Then we must take into view the facts that these little banks are not confined to the Federal reserve banks in discounting their paper. They will have the right under this system, just the same as they have now, to go to any New York bank or Chicago bank or St. Louis bank or Minneapolis bank and discount six-months' paper if they want to do it. This limitation is fixed at 90 days, in view of the difficulties that might arise from other features of the bill.

We have put into the bill a provision that national tanks may loan money upon a five-year farm mortgage. posed to be to the interests of the farmer. We That is sup-We increase that from one year to five years. The national banks are not permitted at the present time to loan any money upon farms, and yet we have done that, but we have limited the amount of the loan which the banks can make, and consequently it is safeguarded there.

Everyone knows that a farm mortgage is just as good, if not better, paper than pretty nearly any other kind, but it is not liquid, so the limitation as to the amount that the national banks can loan on farms is properly made. It is supposed to create a market for farm loans. It is supposed that the banks will establish the buying of mortgages and then resell them and thereby get a lower rate of interest for loaning purposes. But these little banks are not confined to the Federal reserve banks in making their discounts.

As has been said here, this six-months paper does not all mature at the same time. The cotton crop does not come in at the same time that the wheat crop is marketed. The wheat crop does not come in at the same time that the sale of cattle These things are diversified, and consequently takes place. a bank in one part of the United States that is subject to a large amount of paper falling due at a certain time is relieved by the fact that there is a surplus of funds in another part of the United States, and they can get it, and we have provided that they can get it.

Then, again, it has been provided in the bill, as the Senator from Ohio [Mr. Pomerene] said, that the farmers' six-months or one-year paper can be taken by a member bank, and it can be not discounted, but money can be borrowed upon it from the Federal reserve bank. Now, that being the case, it seems to me there can be no hardship. I suppose that the majority of the Senators would say that if this paper were permitted to be discounted at a maturity of one year there would be danger that

the entire system would break down.

Now, then, when the experience has been that 28 days The PRESIDING OFFICER. The Chair reminds the Senator from Colorado that the Senator from South Dakota [Mr. CRAW-FORD] asked the courtesy of addressing the Senate some time since.

Mr. CRAWFORD. I am perfectly willing to wait.
Mr. SHAFROTH. Very well; I will yield to the Senator.
Mr. CRAWFORD. I would rather the Senator would make

his observations before I proceed.

Mr. SHAFROTH. Very well. I submit, Mr. President, that every provision made in this bill has to be viewed with regard to its effect upon other provisions of the bill. I have not any doubt if paper of a year's maturity could be taken to the Federal reserve bank and rediscounted and money issued upon it the Senator from North Dakota would simply rave about the inflation that would take place; and I have no doubt the Senator from New York [Mr. Root] would insist that it was the most diabolical system in the wide world that would permit inflation of that kind on one-year paper.

Where are you going to limit the matter? A great deal more money can be issued upon 6-months paper than can be issued upon 90-day paper; a great deal less can be issued on 28-day

paper than can be issued on 90-day paper.

Mr. HITCHCOCK. A strict limitation is to be imposed on

discounts upon the six months' paper.

Mr. SHAFROTH. I understand that there are some limitations proposed, but as it is now these gentlemen just simply almost burst with eloquence to show that even as it is now in the bill it is subject to an inflation that is perfectly enormous. But you propose to add this to it. I do not know how you can consistently support the provision.

Mr. HITCHCOCK. The inflation is not due to the limitation

Mr. SHAFROTH. Yes it is. Mr. HITCHCOCK. Not at all.

Mr. SHAFROTH. The more paper you have available for the purpose the more money you can issue upon it, and consequently the more money, according to their theory, will be is-

Mr. HITCHCOCK. No. Mr. President, the amount of rediscounts can be limited, and in the bill which the Senator from South Dakota [Mr. Chawford] and others and I stand for they are limited. We not only limit the rediscounting of six months paper, but we limit the rediscount of all kinds of commercial paper. It is not the length of time that paper runs which makes it an available subject for rediscount in the reserve banks. It is the question whether or not it is self-liquidating and legitimate six months paper. It may be just as self-liquidating as paper which is only for 90 days.

Mr. SHAFROTH. No, it can not be, because in 90 days it is paid, and in the other case in 180 days it is paid. Consequently it is not as liquid because the time of maturity makes the difference between the liquid character of the two kinds of

The Senator seems to think that this is a discrimination against one class of banks. There is not any question that if this six months' paper gets into a city bank, the city bank can not go and discount that paper at the Federal reserve bank any more than can a country bank. There is no discrimination, no matter who holds the paper and no matter what it is. the country bank goes to the city bank, and either in the discharge of its debt to the city bank by discounting or in any other way gets that paper into the hands of the city bank, that city bank has got to wait until the 90 days or the 180 days have expired before it can get money from the Federal reserve bank. It seems to me that when we consider this bill must be framed with a view to special conditions, inasmuch as it is an experiment in this country, we could not go to extremes one way or the other; and inasmuch as the European banks are 28-day banks, it seems to me that when we treble the amount of time we are doing a great deal in behalf of the people who desire discounts.

Mr. CRAWFORD. Mr. President—
The PRESIDING OFFICER Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. SHAFROTH. Yes.

I merely desire to make a few observa-Mr. CRAWFORD. tions about what the Senator from Colorado has said. I do not

desire to interrogate him.

Mr. President, what the Senator from Colorado has said has emphasized the objection that the communities and banks in whose behalf I undertook to speak have against this section of the bill. The big banks in the cities are wholly indifferent about the recognition of six-months paper, except that they express some apprehension that that class of paper may overload the reserve banks with what they call unliquid assets. They do not claim to have need for asking the Federal reserve bank to rediscount that kind of paper. Nine-tenths of their paper which comes within the class of commercial paper and which will be recognized in the central reserve banks is 28-day paper, 30-day paper, or 60-day paper, and, at the outside, 90-day paper, which this bill recognizes. They have no need whatever for asking that six-months paper be recognized, because the portion of their paper which falls within that class is negligible; but when you come to the country banks practically all of their paper which falls in the class of commercial paper is paper which matures between the 90-day period and the 6-months period and beyond that to one year. If the Senator is concerned about a fear that there will be inflation and wants to put a limitation somewhere, why does he not seek to put the limita-tion upon too liberal a rediscounting of 28, 60, and 90 day paper, so that the limitation will fall upon big banks who have their portfolios filled with that class of paper, instead of outlawing the paper that these country banks, if they have occasion to use the reserve banks, may desire to present?

I say it intensifies and emphasizes the objection and shows the

injustice of the discrimination.

All of the latitude, all of the favors, all of the privileges for discounting paper are to be enjoyed by the big banks, whose portfolios are filled with 28-day paper, 60-day paper, and 90-day paper, and not a bit of recognition is to be given to the 3,500 country banks, whose capital runs from \$25,000 to \$50,000, and the great bulk of whose paper matures in periods longer than 90 days.

The Senator undertakes to justify this discrimination by saying that these country banks, if they can not deal with the reserve banks, can deal with outside banks. How generous that is, how magnanimous toward the country banks! other words, it is telling them to go to thunder; to go and deal with other people if they do not want to deal with the reserve

banks. You do not say that, you do not talk in that way to the big banks, whose portfolios, I repeat, are full of 30-day paper, 60-day paper, and 90-day paper, who will go there with millions and millions of dollars of that kind of paper in a pinch to get accommodations to ease the situation so far as they are concerned. Why do you not say to them, "Go to thunder"? Why do you not say to them, "Go somewhere else and get your accommodations"? You are going to say that to the country banks; you are proposing here on the floor of the Senate to say that if they do not like these provisions they may go elsewhere and get their accommodations. That is a fine defense for this

kind of discrimination.

Mr. SHAFROTH. I will say to the Senator from South
Dakota that every time a city bank presents a piece of six
months' paper it does say to them that it can not discount it.

Mr. CRAWFORD. Exactly; but their portfolios, as I have just said, are filled with short-time paper—28-day paper, 30-day paper, 60-day paper, and 90-day paper. That constitutes the great bulk of their commercial paper, which they can make available and put into the reserve bank and get accommodations upon, and the six months' paper which they have, falling within the class called commercial paper, is negligible, while it represents the great bulk of the paper held by the country banks. Three thousand five hundred of the banks, practically one-half of all the national banks in the United States, are the country banks with \$25,000 and \$50,000 capital, and their portfolios are

filled with six months' paper.

When the pinch comes to them and they go and take out these notes which mature in six months—the best paper in the world, the best security in the world, liquidated out of con-sumption, making the circuit with the raising of crops and the selling of live stock-and they want some accommodation from a reserve bank, though they were held up by the strong arm of the Government, as I said awhile ago, and told "You get in here, put up of your money, take stock in this reserve bank, put your reserves in it without interest, or we will take your charter away from you." When for the first time in their history they want some of these reserve notes and go into their vaults and bring out these six-months maturing notes and go over to the reserve bank, to whose capital they were forced to subscribe or give up their very existence—when they come to that reserve bank and say, "We are in dire need; here is good paper maturing in six months, good farmers' paper, the best in the country, and we want some of your reserve notes or we want some credit; things are going to pieces; we are liable to have a run on our bank to-morrow; we have this paper here; our portfolio is full of it," the Senator from Colorado says to tell them to go elsewhere; "there are other banks they can go to and deal with, as they always have done; they have gotten along up to this time by dealing with other banks;" tell them "go and deal with them; we can not recognize your paper," while here come Mr. Reynolds and Mr. Forgan and Mr. Vanderlip, who has been so denounced upon the floor of the Senate, and Mr. Hepburn, representing great banks in the cities of Chicago and New York with a capitalization that reaches into the millions-\$25,000,000-and deposits of \$200,000,000, loaded up with acceptances from the importers, loaded up with prime commerial paper from the merchants, loaded up with paper of the great manufacturing barons. They are afraid of a run; they are afraid of a panic, and they bring these fat pertfolios, stuffed with this prime commercial paper maturing in 30, 60, and 90 days, and go back with reserve notes issued by the Government of the United States, with millions of dollars of reserve notes

given under the authority of the Federal Government.

They receive these notes for their paper, and go back and loan or pay it to their depositors, or get credit to tide them over the difficulty; but when Mr. Brown or Mr. Smith or Mr. Jones or Mr. Robinson out in my country, with his little bank at Aberdeen or Huron or Sioux Falls or Chamberlain or Deadwood, with his little capital of \$50,000 instead of \$25,000,000, with his deposits of a half million dollars or a million dollars instead of \$200,000,000, with his portfolio of farmers' notes maturing in six months, back of which are the fat hogs and the cattle and the sheep and the tilled acres of an agricultural State, wants some accommodation, because there is danger and there may be a run on his bank and he remembers how, under a law passed here over his protest, it was made a condition that he take stock in the reserve bank or give up his charter, and he took the stock and paid his money and has his shares there in the vault to show that his bank owns the stock—when he takes his portfolio and rushes over to the Federal reserve agent with this paper—no better in the world, maturing in six months—if the Senator from Colorado were the Federal reserve agent, he would tell him to go to thunder or "go and deal with some other bank, as you have been doing all these years; you

are not in the class that we are going to help here. We will help Vanderlip and Cannon and Hepburn and Reynolds and Forgan, but no Brown, Smith, Jones, or Robinson, from a little country bank in South Dakota, with a capital of \$25,000 or \$50,000, with their portfolios filled with good farmers' paper maturing in six months, need apply."

Thirty-five hundred of the seven thousand and odd national

banks in the country are just such banks as that. You are afraid if you accommodate them that you will inflate the currency. If you deny them recognition here, if you reject this amendment and the fundamental principle of equity and justice that their request demands, you will be inflated, and I do not know but that you will be translated. There is no equity in this discrimination; there is no justice in it. When you get right down to the bottom of it, after all your talk, if you do not put in a provision here recognizing the 3,500 country banks in a fair, just way, so that in a time of pinch they can have some recognition and can feel confident that they will have an avenue of escape and a place to go for relief, such as you are going to give to the Vanderlips and to the Forgans and the Reynoldses and the Hepburns and to the Cannons, we shall see who is really championing the rights of the people and who are really against special privilege

A bank of banks! Yes; and you ought to put in an adjective, a bank of big banks for big banks to relieve big banks, to accommodate big banks, and which uses little banks to secure the capital and makes them come in, so as to make a system of the proper territorial extent and to supply the proper amount of feeders out through the country to sustain it. That is all they are asked to come in for, simply to have the sweet privilege of carrying wood and water and making bricks without straw.

Now, we will put you to the test. I say to the Senator from Colorado that it will not answer the country people and these little banks for him to go on record here and to give out to the country that if they have not got paper that matures in 60 or

90 days they may go elsewhere.

Mr. BRISTOW. Mr. President—

Mr. CRAWFORD. I yield to the Senator.

Mr. BRISTOW. I want to call the attention of the Senator from South Dakota to the fact that it is an element of value to commercial paper to have the privilege of rediscount. That makes the paper more valuable, and therefore will result in a reduced rate, just as the privilege of issuing notes upon 2 per cent Government bonds made the bonds sell above par, when, if the note privilege had not been attached to them, they probably would have sold for 75 per cent. This privilege adds to the

would not be 90-day paper.

Mr. CRAWFORD. Certainly.

Mr. BRISTOW. And it detracts from the value of the six months' paper, because it is not so useful; but as soon as the farm products get into commerce and are handled by the big men in the cities and that paper gets into the large banks in domestic commerce or in foreign commerce, six months' paper based on such transactions gets the privilege of rediscount.

Mr. CRAWFORD. Certainly; I will call attention to that.

Mr. President, there were three features which I had hoped would be put in this bill, because it would make it much better This amendment is one of them; a decent prothan it is now. vision in the bill by which depositors in banks might have for their protection an insurance fund is another; and a provision against interlocking directorates in competing banks is another.

Go down to New York and see what they have been doing with insurance companies, with the funds belonging to the policyholders and the manipulation of stock, and then leave out a sentence and a half which, if put in this bill, would prevent that thing from happening again. You do not do that, but you give over the control of the board of directors to these big banks; then you treat the country people in agricultural communities and the little \$25,000 and \$50,000 banks as they are being treated in the bill as it is submitted here now; and when we protest against it we are met with supreme indifference and It makes one rather heartsick. I know it is simply shouting in the air and having one's voice come back to him so far as getting consideration for this amendment is concerned, but we shall have the satisfaction of having done what it is our duty to do here toward our own people in stating their case to the Senate.

Mr. McCUMBER. Mr. President, the Senator from Colorado [Mr. Shafroth] for the first time in this debate has admitted the real purpose of this bill, the purpose being for inflation; and he has freely admitted that these who are championing the bill proposed by the majority have seen fit to draw the line and make a limit to the extent of that inflation; that they can inflate as far as the 60 and 90 day paper of the cities will allow them to inflate, but that they could not afford to allow the inflation to run so far as to go into the 120-day paper or the 6-months paper as a basis for the issuance of currency.

I thank and congratulate the Senator from Colorado for his candor. Others upon that side of the Chamber have denied that the purpose of this bill was, or would be, inflation. is the main purpose of the bill. I am not criticizing it for that alone. Any bill that has the element of elasticity in it, any bill which provides for an elastic currency, must necessarily mean an inflated currency at some time.

My objection to these bills, and to both of them, is that while they provide for inflation to meet the exigencies of trade they do not provide for a contraction that will reduce the volume of

currency to its normal condition.

How does this inflation begin? It does not begin on the farm. It is not supported by farm conditions. Inflation is always the offspring of speculation. Speculation always comes from activity in the sale of industrials, in the promotion of new

enterprises, in putting beams, the currency of the entire country.

The currency of the entire country.

The current cities of the c flate for the purpose of speculation in the great cities of the country; but you have drawn the line. You say: "While we can and will inflate the currency of the country, while we allow this to be done throughout the great cities and for the purposes of speculation in those cities, we draw the line against the country section, which has practically nothing but the paper which matures in six months and longer." In other words, you subject those sections of the country to all the evils of your inflation, with the higher prices that result from it, in your great cities; but you give them none of the benefits which are supposed to flow from all evils, because all of them are supposed to have some element of benefit. In this case there is an element of benefit in inflation. It is a temporary benefit, and it will be paid for many times over in the final result.

I insist that this bill does open the door to a vast inflation of our currency; but I assert that giving to the banks of the Northwest, four-fifths of whose paper matures in a longer time than 90 days, the right to rediscount that paper, with the limitations that are in the bill itself as to the amount of discounts, will not tend to inflate the currency any more than it will be inflated with 90-day paper. There is probably enough of that throughout the entire country to produce all the currency that will be needed; but the bill denies to those sections of the coun-

try equal rights and privileges.

I do not care whether your bill inflates or whether it does not. If it produces inflation, then those sections have an equal right to join in the condition that exists over the country generally at the time. If it does not produce inflation, then they are entitled to all the privileges and benefits that accrue from the discount and rediscount of their paper, whether it is 6-months'

paper or 90-day paper.

The Senator quotes the conditions in France and Germany, and likens the conditions of the Dakotas, Minnesota, and the Northwest to theirs. Why, Mr. President, the conditions are so entirely different that it would be impossible to apply the same kind of legislation or to apply the same kind of remedies to any allment. France is not a country of farms; France is a country of vegetable gardens. The crops they raise are crops that are raised from early spring until fall. They are salable at all seasons of the year. There is a constant income coming to the gardener in France. In the Northwest, on the other hand, you turn your cattle once a year. You turn your cereal crop once a year. All commercial paper must adapt itself to that condition, and all must become due at the time the crop is harvested and put on the market. Therefore that leaves nothing but that character of paper upon which any benefit can be derived, if it can be derived, under this bill. For that reason we certainly are entitled to the privileges that are granted generally in the rediscounting of paper in the regional banks.

Mr. OWEN obtained the floor.

Mr. KERN. Mr. President-Mr. OWEN.

I yield to the Senator from Indiana, who desires to make a motion for unanimous consent.

Mr. KERN. Mr. President, I desire to state that after a conference with Senators on both sides, the unanimous-consent agreement which I send to the desk seems to be acceptable, and

hope it will be agreed to.

The VICE PRESIDENT. The Secretary will read the proposed unanimous-consent agreement.

The Secretary read as follows:

It is agreed by unanimous consent that on Thursday, December 18, 1913, immediately after the routine morning business, the Senate will proceed to the consideration of the bill H. R. 7837, commonly called the currency bill, and any amendments that may be offered to the same; that in the debate no Senator shall speak more than 15 minutes on the bill itself and not more than 15 minutes on any amendment thereto;

and that a final vote upon the bill and all pending amendments will be taken on the legislative day of Friday next, December 19, before adjournment on that day.

The VICE PRESIDENT. Is there any objection?
Mr. HITCHCOCK. Mr. President, I should like to inquire whether "before adjournment on that day" means that legis-

The VICE PRESIDENT. It is so understood.

Mr. HITCHCOCK. All right.
The VICE PRESIDENT. Is there any objection?

Mr. BRISTOW. Mr. President, the present order for adjournment at 11 o'clock on Friday would not in any way terminate the legislative day, would it? If we should be pressing an amendment, say, and 11 o'clock should come, the legislative

an amendment, say, and if o'clock shound come, the registative day could run right over, could it not?

Mr. KERN. That is the understanding.

Mr. BRISTOW. With that understanding, I offer no objection. That is, we will run the legislative day right on until midnight or until Saturday morning or Saturday night.

Mr. KERN. The Senate is to remain in continuous session

until the bill has been passed.

Mr. BURTON. Do I understand that to mean that when the hour of 11 o'clock on Friday night is reached we shall remain in continuous session through the night?

Mr. KERN. If it is desired, as I understand. Mr. BURTON. Or can we adjourn until the following day at 11?

Mr. OWEN. The legislative day could be extended to the next day, of course, under the usual practice.

Mr. SHIVELY. Yes; by a recess.

Mr. HITCHCOCK. I think there should be added to the proposed unanimous-consent agreement a provision that a recess on the last legislative day shall be taken not later than 11 p. m. I do not think we want to involve ourselves in any all-night

Mr. NELSON. Mr. President, unless the order of the Senate is changed-and I take it there is no purpose on the other side to change it-we would automatically take a recess at 11 o'clock until 10 o'clock the next day.

Mr. HITCHCOCK. No. I call the attention of the Senator to the fact that that would not be a recess. The present order is

for an adjournment at 11 o'clock.

The VICE PRESIDENT. And, according to the view of the

Chair, the legislative day will end at 11 o'clock

Mr. BRISTOW. I did not understand the ruling of the Chair. The VICE PRESIDENT. According to the view of the Chair, unless some other arrangement is made, the legislative day will end at 11 o'clock under the present order.

Mr. HITCHCOCK. I think so; and for that reason I think it ought to be provided that a recess shall be taken not later than

11 o'clock p. m. of the legislative day. Mr. BRISTOW. The calendar day.

Mr. SUTHERLAND. Mr. President, I think the ruling of the Chair is clearly right. We have an order that provides the Chair is clearly right. We have an order that provides that an adjournment shall be taken at 11 o'clock every day. That automatically brings to an end not only the calendar day, but the legislative day. If this unanimous-consent agreement is made and it is expected that the legislative day will run beyond the calendar day of Friday, it seems to me the only thing to do is to rescind the order in so far as it contemplates an adjournment at 11 o'clock.

Mr. SHIVELY. Does not the unanimous-consent agreement vacate the former order in that respect?

Mr. SUTHERLAND. The unanimous-consent agreement

would have nothing whatever to do with it.

Mr. OWEN. That order could be vacated by unanimous consent. . We could add to the unanimous-consent agreement the vacation of that order.

Mr. SUTHERLAND. No, Mr. President; I think not. The unanimous-consent agreement is that we shall take a vote upon the legislative day of Friday. The order of the Senate, unless some other order is made, is that the legislative day of

Friday automatically comes to an end at 11 o'clock.

Mr. BRISTOW. Mr. President, would it be agreeable to the Senator from Indiana to add to that a further provision that on Friday the present order of the Senate as to meeting

and adjourning shall be vacated?

Mr. KERN. How would it do to add "and the legislative day of Friday shall not end at 11 o'clock"?

Mr. BRISTOW. That would cover it. Mr. HITCHCOCK. Of course that would result in an allnight session Friday night.

Mr. KERN. That would be in the power of the Senate to

Mr. SUTHERLAND. Oh, no; we could take a recess.

Mr. HITCHCOCK. If it is stipulated that we shall take a recess at 11 o'clock Friday, very well; but I do not want to be involved in any all-night sessions after the protracted work we have had. I should like to have a stipulation that when 11 o'clock on Friday comes we shall take a recess until the next calendar day.

That would extend the matter indefinitely, and was not within the scope of our agreement. I think if we add a provision that the legislative day shall not end at 11 o'clock, and leave the matter in the control of the Senate, it will an-

swer the purpose.

Mr. BRISTOW. If the Senator will permit me, I will suggest that if on Friday this order is vacated, it will then be in the power of the Senate to do as it pleases-either to adjourn or to take a recess.

Mr. KERN. Certainly.
Mr. OVERMAN. Let us vacate the order.
Mr. BRISTOW. If the order were to be vacated on Friday, would that be satisfactory?

Mr. OVERMAN. That is the best suggestion, because then the Senate will have it in its power to do as it pleases, except that by unanimous consent it must vote during that legislative day. If we vacate the order for Friday, that will settle it. Mr. BRISTOW. Would that be satisfactory to the Senator

from Nebraska?

Mr. HITCHCOCK. Well, I am strongly opposed to an all-night session on Friday; but if others are willing to take

their chances on it, I shall not object.

Mr. BRISTOW. I do not believe the Senate will sit all night when it is not necessary. We can finish then without any doubt on Saturday, and with only 15-minute speeches we can transact business rapidly. We can adjourn at 11, or even at 12, on Friday night, and come back the next day and finish up in three or four hours. It seems to me sensible men would do that.

It seems to me that if we add to the agreement Mr. KERN. a stipulation that the legislative day shall not end at 11 o'clock

p. m. on Friday that will answer all purposes.

Mr. SUTHERLAND. Why not amend the unanimous-consent agreement by adding to it a provision that the previous order of the Senate, in so far as it contemplates an adjournment at

 o'clock on Friday, is vacated?
 Mr. KERN. That is all right. That was my proposition.
 Mr. TOWNSEND. Mr. President, do I understand that the order we have adopted to meet at 10 and continue until 11 shall continue right through?

Mr. KERN. Yes; except that on that day the order, in so far as it relates to adjournment at 11 o'clock, is to be vacated. It

covers a period of only two days.

I will state that the proposition as to hours came from the other side. I am entirely willing to accommodate myself, within the scope of the agreement, to the wishes of Senators on that

side. Mr. BURTON. Mr. President, I am as anxious to see the bill finished as anyone; and I think if we proceed in an orderly manner, on a rule that the length of speeches shall be limited to 15 minutes, we shall finish this week. The chances are, perhaps, that we shall finish by Friday night. I am unwilling, however, to agree to an order under which we can be kept here all of Friday night. That would mean that the discussion after the usual time of adjournment would be a perfect farce. The Members would be so exhausted that no careful attention would be given to the arguments. It would be very difficult, in fact, to make any arguments. I am perfectly willing to agree that we shall go on for the hours we have been in session under this order—from 10 to 11—to-morrow and the next day

Mr. KERN. That would not be any change at all.

Mr. BURTON. And then, if the bill is not disposed of by 11 o'clock on Friday, if we could finish its consideration by sitting a little later then, or in any event in a few hours on the

following day, I should be willing to agree to that.

Mr. WEEKS. Mr. President, I hope the Senator from Ohio will not object to the tentative arrangement which has been made. When the ordinary hour for adjournment is reached on Fridayat 11 o'clock-it seems to me the good sense of the Senate will determine whether we shall continue in session an hour or two longer or whether we shall then take a recess until the next day. If there should be pending at that time a number of amendments which were going to produce controversy, naturally we should take a recess until 10 o'clock the next day.

But if we have completed the amendments, and it will not take more than an hour or such a matter to conclude the bill, then I think the Senate would desire to vote on the bill that night. I think it ought to be left to the good sense and judgment of the Senate when we reach that hour to determine what its course shall be.

Mr. BURTON. I am perfectly willing to stay here on Friday night until 12 or 1 o'clock to complete the bill. I am satisfied I am expressing the opinion of others. I do not feel like opposing what seems to be the general desire to finish the bill. I am willing to stay here until 12 o'clock or 1 o'clock on Friday night; but to stay here all that night when important amendments may remain to be considered I am unwilling to consent to.

I think we might have here an understanding, as a modification, that if at 1 o'clock the bill was undisposed of we shall recess until 10 o'clock. I am perfectly willing to consent to the proposed agreement as it stands if we can receive an assurance that if anything is unfinished we are not to sit here all night and indulge in the farce of discussing a bill where exhaustion will compel the adoption of provisions which may be objectionable and which should be discussed. I do not feel willing to agree to that.

Mr. McCUMBER. Mr. President, I want to suggest to the Senator from Indiana—and it is only, of course, the conclusion of one—that if he would modify his agreement and get consent that we should proceed with the bill to-morrow morning, and that no Senator should speak more than 15 minutes upon the bill or upon any amendment and not more than once on the bill or upon any one amendment, we will get through with the bill long before 11 o'clock Friday night. If we could get an agree-ment of that kind, I think the debate would be very limited, and that we would make much more headway than in attempting to drive us beyond certain hours of the night. We will certainly get through more quickly. I feel positive we will get through before 11 o'clock on Friday night.

Mr. KERN. Permit me to say to the Senator from Ohio that this proposition for a unanimous-consent agreement came to me from the other side of the Chamber, and it was with some diffi-culty that I procured the consent of Members on this side to the agreement for the legislative day instead of the calendar day. I proposed to cut out the 11 o'clock limitation, not think-ing there would be an all-night session. After the earnest effort which has been made on both sides to have this agreement made I hope that an objection will not be interposed to it.

As stated by the Senator from Massachusetts, if it should As stated by the Senator from Massachusetts, if it should appear on Friday night that there is no prospect of a final vote, I think the good sense and the good judgment of the Senate may be trusted. This agreement has been entered into in a perfect spirit of good feeling. The only purpose of it is to limit the time within which the bill shall be passed. Fixing it on the legislative day instead of the calendar day extends the time rather indefinitely, but still we have the agreement so made up at this time; and I sincerely hope that the earnest efforts which have been made by Members on the other side will not be thwarted by the Senator from Ohio and the Senator from North Dakota. I think they may safely trust to the Senate and trust us to do the right thing.

Mr. BURTON. May I ask the Senator from Indiana a ques-Suppose, however, the hour of 1 o'clock should be reached on Friday night, would he then vote in favor of a motion to recess until 10 o'clock or 11 o'clock on the following day?

Mr. KERN. That would depend altogether upon the parliamentary and legislative situation at that time. If we were about to pass the bill, if it could be passed within an hour or two, I think I should insist upon the Senate remaining an hour or two longer. If there was no prospect of that, I have no more desire to continue the strain upon myself than has the Senator from Ohio. I have been here constantly in attendance upon this body for a good many months, and probably the wear and strain on me has been as great as it has been on any other Member of the Senate.

Mr. WEEKS. May I ask the Senator from Indiana a question?

KERN. Certainly. WEEKS. If at 11 o'clock Friday night it appeared that there was no prospect of passing the bill within two or three hours, would not the Senstor at that time be willing that the Senate should take a recess until the next day?

Mr. KERN. Personally I would.

Mr. KERN. Personally I would.

Mr. TOWNSEND. Would there have to be caucus action on that? Could we not determine it now?

Mr. KERN. I can not say now, because the agreement has been entered into on a general understanding. Its terms have been submitted to Members on this side, and with some difficulty. culty I have gotten their consent. I can not make a new agreement now.

Mr. McCUMBER. I should like to hear the order read, if the Senator please.

The VICE PRESIDENT. The proposed agreement will be

The Secretary read as follows:

It is agreed, by unanimous consent, that on Thursday next, December 18, 1913, immediately after the routine morning business, the Senate will proceed to the consideration of the bill (H. R. 7837) commonly called the currency bill and any amendments that may be offered to the same; that in the debate no Senator shall speak more than 15 minutes on the bill itself and not more than 15 minutes on any amendment thereto; and that a final vote upon the bill and all pending amendments will be taken on the legislative day of Friday next, December 19, before adjournment on that day.

Mr. MGCUMBERD, I should like to each the Seventor from

Mr. McCUMBER. I should like to ask the Senator from Indiana if he would construe the provision that no Senator shall speak more than 15 minutes on the bill and not more than 15 minutes on any amendment as meaning that a Senator can not speak more than once for 15 minutes or more than 15 minutes altogether. Suppose, for instance, a Senator should speak 15 minutes and then another Senator speaks upon another phase of the question and he seeks to answer, would the Chair permit him to take another 15 minutes upon another phase of it? If that is the understanding, I certainly would not want to consent to it.

Mr. KERN. I submit to the Senator from North Dakota, I do not think that is the proper construction to be placed upon it. Mr. OWEN. The language of the agreement obviously means

that a Senator can speak on any amendment at least 15 minutes. Mr. McCUMBER. And not more.

Mr. OWEN. Not more than 15 minutes on any one amend-

ment; but there may be many amendments he may speak on.
Mr. McCUMBER. That is true. With that general view of the construction, I shall not object to it.

Mr. BURTON. There is one further point in regard to it. Suppose a Member of the Senate speaks for five minutes on an amendment and then a response is made. Does the agreement contemplate that he shall speak but one time or that he shall speak 15 minutes in all?

Mr. KERN. Fifteen minutes is what it says.

Mr. BURTON. And speak but once? Mr. KERN. It does not say that.

Mr. BURTON. He can not speak more than 15 minutes. want to ask the Senator from Indiana again, suppose the debate should run until 11 or 12 o'clock, or even 1 o'clock, Friday night, and important amendments remained undisposed of, is he, so far as he is personally concerned, in favor of recessing until the hour of daylight on the following day?

Mr. KERN. If there was no immediate prospect of voting

on the amendment without cutting off debate.

Mr. BURTON. If there is something important to be discussed?

Mr. KERN. Yes. There is no desire certainly-

Mr. BURTON. Then the Senator from Indiana would favor recessing until the following day?

Mr. KERN. I should, if there was no prospect of a vote upon an important amendment.

Mr. BRISTOW. Mr. President, I hope the Senator will add to the statement which has been read that the order to adjourn at 11 o'clock Friday night shall be vacated, so as to leave the matter in the hands of the Senate.

Mr. KERN. Very well. But is not that covered by the suggestion as to the legislative day of Friday-that it will not

end at 11 o'clock? Mr. BRISTOW. I think that it ought to be incorporated in the agreement.

Mr. KERN. Let that be put in.
Mr. BRISTOW. Let the agreement read as thus modified.
The VICE PRESIDENT. The agreement will be read as modified.

The Secretary read as follows:

UNANIMOUS-CONSENT AGREEMENT.

It is agreed by unanimous consent that on Thursday next, December 18, 1913, immediately after the routine morning business, the Senate will proceed to the consideration of the bill H. R. 7857, commonly called the currency bill, and any amendments that may be offered to the same; that in the debate no Senator shall speak more than 15 minntes on the bill itself and not more than 15 minutes on any amendment thereto; and that a final vote upon the bill and all pending amendments will be taken on the legislative day of Friday next, December 19, before adjournment on that day, and the previous order as to adjournment shall, as to Friday, December 19, 1913, be vacated.

Mr. M. E.D.N. Thete is all right

That is all right. Mr. KERN.

The VICE PRESIDENT. Is there any objection? Chair hears none, and the unanimous-consent agreement is entered into.

Mr. OWEN. Mr. President, the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] changes the time of the maturity of paper submitted to the Federal reserve banks for discount from 90 days to 180 days, with a proviso-

SEVERAL SENATORS. Let us have order.

The VICE PRESIDENT rapped with his gavel.

Mr. CLAPP. Will the Senator from Oklahoma yield to me for a moment?

Mr. OWEN. I yield to the Senator. Mr. CLAPP. I did not object to the unanimous-consent agree ment, as an objection would place one perhaps in a false attitude, but we see now the effect of it. The moment it was entered into the interest in this matter practically ceased. The Senator from Oklahoma has been upon the floor for five or six minutes, I believe, but unable to proceed because of the confusion in the Chamber. It is a striking lesson, it strikes me, as showing the folly of entering into such agreements.

Mr. LEWIS. There was a much less attendance when we had no agreement. The lack of interest is, I think, because of

fatigue on both sides

The VICE PRESIDENT. The Senator from Oklahoma will

Mr. OWEN. Mr. President, the average length of time of the paper held by the Bank of France, which practically carries the reserves of the French bank system, is 28 days. The Bank of Germany carries a large volume of its paper within the 30-day limit. It has no paper in its portfolio longer than 90 days. The Bank of England carries its commercial bills also of short maturities. The reason for this practice by those banks is because they are reserve banks. Our laws in the American system require reserves to be carried in cash, in order to respond to any demand which may be made by a depositor who wants The reserves ought to be carried in cash or the equivalent of cash; and short-time, self-liquidating paper is regarded as the equivalent of cash, especially where you have an open discount market established, as we hope to establish an open discount market in this country through the processes of this

Obviously if we should pursue another rule and allow the reserves of all the banks of the country to be tied up in the Federal reserve bank by being invested in stocks and bonds or in real estate or in any other form of nonliquid securities, when a bank came asking for its reserves in cash the Federal reserve bank, the proper custodian of those reserves, would not be able to respond. That is the reason why the policy has been established of short-time maturing paper based on actual commercial transactions, because paper of that kind not only has short maturities but it also is self-liquidating in character that is, it will attract from the pockets of the people the currency which is in the pockets of the people and will bring cash into the bank through those bills. That is a very important consideration.

All the stricture upon this Federal reserve system because it does not carry these reserves in six-months farm paper is a misconception due to the fact that those who are advocating that have had in their minds the establishment of a central Government-controlled bank, extending accommodation to the private citizen, just as the Bank of France does with its clientele, and forgetting that this is a bankers' bank, a bank established to enable the 25,000 banks in this Nation to have the independence they ought to have to be able to compete with each other in a competitive banking system, which we have tried to establish in the United States by the processes which have led to independent banks rather than gigantic banks with branches everywhere through the country.

The branch bank system is forbidden in the United States, because it is the policy of our banking system that each bank should be independent and competing with other banks, and obviously if you had a few big banks, with thousands of branches, the competition between the branches of the blg banks would be controlled by a few men at headquarters. We have pursued a different policy, and when we place these reserves, which are the equivalent of cash, we must keep them

equivalent to cash,

In the Aldrich bill, so called, which was approved by the American Bankers' Association, it was provided that the discount should have 28 days' maturity.

Such notes and bills-

I read from Senate bill No. 7, introduced by the Senator from Massachusetts [Mr. WEEKS]-

Such notes and bills must have a maturity of not more than 28 days. Why? Because it was intended these notes should be equivalent to cash, because the reserves are expected to be kept in cash, and it is hazardous to use that which is cash by investing it in long-time securities and in that way take away from it its liquid character.

Mr. WEEKS. Mr. President-

Mr. OWEN. I yield to the Senator from Massachusetts.

Mr. WEEKS. I should like to call the Senator's attention to the fact that in the Monetary Commission bill there were other methods provided for banks borrowing in addition to redis-

Mr. OWEN. Yes; but I am only showing the argument which led the framers of the Aldrich bill, so called, to put this 28-day limit in the bill. In the bill which we have drawn we provide that a bank may obtain accommodation upon paper of any length of time, for that matter. They may come in case of need and get a straight discount from the Federal reserve bank upon their own paper secured by any kind of collateral they have. Ordinarily the agricultural banks in the country will not have any need for such discounts. Ordinarily under this system the banks of agricultural communities will be able to get all the accommodation they want from other banks, who will be in a position now to extend them the accommodations they need, just as the banks of Minnesota now send into the Dakotas large quantities of their surplus funds for investment in the Dakotas because of the higher interest rates which are obtainable in that section, and which are let out through the banks of the Dakotas.

Now, Mr. President, I do not intend to take the time of the

Senate

Mr. GRONNA. Mr. President—
The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I yield to the Senator from North Dakota. Mr. GRONNA. I want to ask the Senator from Oklahoma a

question for information. I find on page 67 of the Owen bill, after the word "surplus," in line 21, this language—

Mr. OWEN. The Senator from North Dakota has some print which I have not in my hand. What is the date of the

print he has?

The print of December 1, 1913. I will quote Mr GRONNA the language to the Senator, though I am sure he is familiar with it. The bill provides:

No member bank shall extend, directly or indirectly, the benefits of this system to a nonmember bank, except upon written permission of the Federal reserve board, under penalty of suspension.

Now, as I understand-

Mr. OWEN. That is not now before the Senate. I will be glad to answer the question, however, and to tell the Senator from North Dakota that that was intended to prevent banks who were qualified to come into the system from remaining out of the system without contributing to it and at the same time getting the benefits.

Mr. GRONNA. Mr. President, in view of the statement which the Senator from Oklahoma has made, I shall not press him to give an answer now; but I shall take the matter up a little

Mr. OWEN. I think it would be a little better to do so. will say to the Senator, however, in that connection, that we thought that was one of the cases where the bill ought to be amended, so as to take care of the banks which did not have the capital to enable them to come in. We think that can be covered to the satisfaction of all the banks which have a just right to ask that they be protected under the measure.

Mr. GRONNA. As I understand that it is desired to take a vote on the pending matter before a recess is taken, I shall not

ask for any further information at this time.

Mr. OWEN. I move to lay the amendment on the table. The VICE PRESIDENT. The question is on the motion of the Senator from Oklahoma to lay the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] on the table.

Mr. HITCHCOCK. On that I call for the yeas and nays.

The yeas and nays were ordered.

Mr. OWEN. I make the point of no quorum. There are some Senators over in the Senate Office Building who will not

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bacon Brady Brandegee Bristow Bryan Burton Catron Chamberlain Chilton app arke, Ark. Clarke, Ark.
Colt
Crawford
Cummins
Dillingham
Fletcher
Gore

Gronna Hitchcock Hollis Hughes James Jones Kenyon Kenyon Kern Lane Lane Lea Lewis Lippitt McCumber Martin, Va. Martine, N. J.

Newlands Shively Sinvery Simmons Smith, Arlz. Smith, Ga. Smith, Mich. Stephenson Sterling Norris Oliver Oliver Overman Owen Page Penrose Perkins Pomerene Ransdell Reed Robinson Saulsbury Shafroth Sheppard Sherman Shields Sterling Sutherland Swanson Thompson Tillman Townsend Vardaman Walsh Warren Weeks Shields Williams

Mr. WARREN. My colleague [Mr. Clark of Wyoming] is unavoidably detained from the Chamber. He is paired with the Senator from Missouri [Mr. STONE].

The VICE PRESIDENT. Sixty-eight Senators have answered

to the roll call. There is a quorum present.

The question now is upon the motion of the Schatch Oklahoma [Mr. Owen] to lay the amendment proposed by the Oklahoma [Mr. Huguegork] upon the table. The Secretary will call the roll.

The Secretary proceeded to call the roll.
Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. JACK-

son]. In his absence I withhold my vote.

Mr. BRISTOW (when Mr. La Follette's name was called). I desire to state that the senior Senator from Wisconsin [Mr. LA FOLLETTE] is unavoidably detained from the Chamber. he were present, he would vote "nay."

Mr. SMITH of Arizona (when his name was called). nounce my pair with the Senator from New Mexico [Mr. Fall], and therefore withhold my vote. If he were present, I should vote " vea.

Mr. STERLING (when his name was called). my pair with the senior Senator from Louisiana [Mr. Thorn-TON]; but I transfer that pair to the senior Senator from Idaho [Mr. BORAH] and vote "nay."

Mr. REED (when Mr. STONE's name was called). announce the necessary absence on account of illness of my colleague [Mr. Stone]; the fact that he is paired with the Senator from Wyoming-[Mr. CLARK], and that, if my colleague were present, he would vote "yea."

Mr. SHAFROTH (when the name of Mr. Thomas was called).

I wish to announce that the senior Senator from Colorado [Mr. THOMAS] is necessarily absent from the Senate to-day. He is paired with the junior Senator from Maine [Mr. Burleigh].

The roll call was concluded. Mr. SMITH of Georgia (after having voted in the affirmative). I voted inadvertently. I desire to withdraw my vote, as I am paired with the senior Senator from Massachusetts [Mr. LODGE]

Mr. BANKHEAD. I have a pair with the junior Senator from West Virginia [Mr. Goff] and therefore withhold my vote. Were he present, I should vote "yea."

Mr. O'GORMAN (after having voted in the affirmative). I

have a pair with the Senator from New Hampshire [Mr. GAL-

have a pair with the Schatter from New Hampshire [Mr. Gal-LINGER]. In his absence I withdraw my vote. Mr. WARREN. I wish to say that my colleague [Mr. Clark of Wyoming] is unavoidably detained from the Chamber. He is paired with the senior Senator from Missouri [Mr. STONE]. If my colleague were present, he would vote "nay.

The result was announced-year 39, nays 34, as follows: YEAS-39

Ashurst Bacon Bryan Chamberlain Pittman Pomerene Ransdell Johnson Kern Lea Lewis Smith, Md. Smith, S. C. Swanson Thompson Tillman Reed Robinson Saulsbury Shafroth Martin, Va. Martine, N. J. Smoot So the motion of Mr. Owen to lay the amendment of Mr. HITCHCOCK on the table was agreed to.

Mr. HITCHCOCK. I offer an amendment to section 4 of Senator Owen's draft of the bill, upon page 12, beginning on line 10.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 12, beginning with line 10, it is proposed to strike out, beginning with the words "shall subject," down to the end of the paragraph and to insert-

Mr. BURTON. Mr. President, from which print is the Secretary reading—the one marked "December 1, 1913, ordered reserve currency."

printed showing changes proposed by the modified amendment of Senator OWEN"

The VICE PRESIDENT. The print of December 1.

Mr. BURTON. The one containing the Glass bill with interlineations of the original?

The VICE PRESIDENT. No; the Owen amendment; the substitute

Mr. BURTON. On what page does the amendment come in? The VICE PRESIDENT. Page 12, line 10.
Mr. CRAWFORD. I ask that the amendment be read.

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. On page 12, beginning in line 10, it is proposed to strike out "shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks," and insert

Mr. CRAWFORD. Mr. President, let me interrupt the reading. There is something wrong here. I have in my hand the Owen draft, print of December 1. I turn to page 12, where the Vice President has indicated the Secretary is reading, and turning to line 10 I find there is no such language at that place. I should like to know from what print the Secretary is reading? I have the draft of December 1, submitted by Senator Owen.

Mr. HITCHCOCK. Mr. President, this whole matter can be straightened out if the attendants will distribute among the Senators the Owen draft as used by myself and as used by the Secretary. It is the dr "Print of December 1." It is the draft which has across the top the words

Mr. SHAFROTH. It is the bill of November 22.

Mr. HITCHCOCK. As a matter of fact, it is the bill of November 22; but the offer made by Senator Owen is not the offer of the bill as finally printed December 1, but it is the one of November 22, but kept by the officials at the Secretary's desk as the print of December 1. I do not know why this

should be so, but they have given me this print.

Mr. CRAWFORD. I have another draft, and it is an altogether different thing. This is the amendment of the print of

December 1, which is an altogether different thing.

The Secretary. It is proposed to insert the following words: The Secretary. It is proposed to insert the following words: Each member bank shall be entitled as a matter of right to the rediscount of eligible paper to the full amount of its capital stock upon the lowest current rate of discount, and no member bank shall be permitted to discount an amount of paper exceeding the amount of its capital stock except upon payment of a higher rate of discount, the increase in rate of discount to be 1 per cent for an additional 50 per cent of discounts or part thereof and 2 per cent for all in excess. In no case shall a Federal reserve bank discount paper for a n.mber bank in excess of twice the amount of its capital stock without special authority by the board. by the board.

Mr. HITCHCOCK. Mr. President, in the Owen draft of the bill no limit is placed upon the amount of discounts that a reserve bank can make for a member bank. It may discount the paper of a member bank to the amount of its capital stock, or to the amount of twice its capital stock, or to the amount of three times its capital stock, or it may discount the whole port-

folio of its loans. There is no limit.

In the provision which has been read we seek to provide a We say that a reserve bank shall not discount the paper of a member bank to a greater extent than twice the amount of its capital stock, and that is not all. One of the serious needs of this legislation is to provide some automatic check upon the discounting of paper. We do not believe it is check upon the discounting of paper. We do not believe it is wise to leave the matter wholly within the discretion of the Federal reserve banks nor of the Federal reserve banks. believe that the result of leaving it in anybody's discretion is to provide for possible inflation. We have therefore provided in the amendment which has been offered that whenever a reserve bank shall discount the paper of a member bank to an amount greater than its capital stock, a higher rate of discount shall be charged. Any member bank shall be entitled to discounts to the amount of its capital stock at the lowest rate of discount. but if the Federal bank permits a bank to discount above that amount it shall charge a higher rate of discount.

Mr. President, we believe that is a wise provision. It inserts an automatic check so that banks will not seek to discount paper to an amount greater than their capital except in cases of importance and of real necessity. We believe that a bank that discounts paper only to the extent of its capital should not be charged as high a rate as a bank which is permitted to go beyond that point. We believe that by providing that auto-matic check we have provided a protection against the inflation of bank credits and also against possible inflation of the

But, Mr. President, there is another virtue in this provision of ours. Under the bill as it came from the House and under the bill as presented by Senator Owen it is possible for the reserve bank in any district to refuse to discount the paper of a member bank. It can even refuse to discount the paper of the member banks of a whole town. It can even go further, and it can refuse to discount the paper of all the banks in a State.

It may be said that there is no danger of any such thing; but in framing this legislation I do not think the Congress of the United States should give too large discretionary powers. I believe it is a matter of importance that the banks which are required to go into it should be told exactly what they may expect from it.

Suppose a number of customers come to a bank for loans, and suppose the bank is down to a point near its legal reserve limit. That bank is not in a position to make those loans unless it knows absolutely what it can expect in the way of rediscounts from the reserve bank. Therefore to say in this bill that the privilege of discounting paper shall be a matter dependent upon the discretion of the reserve board or the reserve bank is to say that the banks will not be able to answer their customers when they apply for loans in some cases. If, however, you put in the law an exact statement of what a bank is entitled to, as a matter of right, on the presentation of eligible papers, then when the borrowing public applies to a bank for loans the bank will be in a position to say "yes" or "no."

I think in the bill presented by Senator Owen there is too much disposition to leave discretionary power in the hands of the directors of the reserve banks, too much disposition to leave discretionary power in the hands of the members of the reserve board. Congress should act, and discretionary power should be held down to the lowest possible limits.

For that reason this amendment is offered to this section.

Mr. BURTON. Mr. President, will the Senator from Nebraska yield for a question?

Mr. HITCHCOCK. Certainly; I yield.

Mr. BURTON. Does not the expression contained in the proposed amendment, "shall be entitled as a matter of right," entirely deprive the regional bank of the opportunity to use any judgment or discretion as to the quality of the paper? In other words, under that phraseology, if a member bank having a capital of \$100,000 should bring discounts for that sum—good, bad, or indifferent-would not the regional bank be compelled to take

Mr. HITCHCOCK. If the Senator will recall the language exactly, I think he will see that it does not bind the reserve bank to discount any paper that is not eligible under the terms of the bill.

Mr. WEEKS. Mr. President, may we not have order?

The VICE PRESIDENT. There must be a unanimous-consent agreement to maintain order, or the proceedings of the Senate must stop.

Mr. BURTON. Might not paper be eligible under the billthat is, 90-day paper, or paper meeting such other description as is contained in the bill—and yet might not the maker be a person whose solvency was doubtful? Might it not occur that the member bank had taken paper under discount and found that the obligor or maker was in a doubtful position, and then might it not take it to the regional bank?

Mr. HITCHCOCK. Oh, in that case there could be no doubt at all that it would be the duty of the reserve bank to decline to discount the paper. The very purpose is to have discounted only such paper as is good. That is one of the reasons for specifying that it shall be prime commercial paper. That is one of the reasons for providing that it shall be paper which shall liquidate itself. I can hardly consider the possibility that the directors of a reserve bank would not have a right to say to a bank: "This paper is not eligible. It is not good. You must present us good paper, and then you are entitled to discount." There must be, of course, that power in a reserve bank.

Mr. BURTON. The Senator from Nebraska must recognize that the language "shall be entitled as a matter of right" is very strong. So far as the other portion of the amendment is concerned, creating a limitation on the amount and creating a different rate of interest when the member bank applying goes beyond the amount of its capital, it seems to me that is in accordance with good banking principles. The query I raise is whether the interpretation placed upon this other provision would not authorize the bank to present any paper and say: "We are entitled as a matter of right to have this discounted,

whatever its quality. It is our quota."

Mr. HITCHCOCK. I can not conceive that possible. The whole purpose of this bill is that the very best paper in the portfolio of a bank shall be the paper which shall be discounted, and that is not all. The reserve bank is given a supervisory

power over the member banks, and may examine into their condition, and, of course, must have the right to reject paper that is presented for discount; but it is intended that when a bank presents paper for discount which is not acceptable to the oficers, it shall be permitted to present other paper to the amount of its capital stock and otherwise eligible for discount

under the terms of the bill.

Mr. NORRIS, Mr. President—
The VICE PRESIDENT. Does the Senator from Nebraska yield to his colleague?

Mr. HITCHCOCK. I do.

Mr. NORRIS. In order to know just what the amendment is that is offered, I should like to ask my colleague where in his substitute bill will be found the language that he proposes to substitute for the language he seeks to strike out.

Mr. HITCHCOCK. I can tell my colleague in a moment, I think. I think he will find it on page 34 of the comparative

print.

Mr. NORRIS. I have here the print of the bill of November 25, as introduced by the Senator and his colleagues on the committee

Mr. HITCHCOCK. It is in section 14.

Mr. NORRIS. Is that on page 43?

Mr. HITCHCOCK. Section 14.

Mr. NORRIS. I wanted to see if I had the exact language, and that is why I ask the Senator about it. Is it on page 43? Mr. HITCHCOCK. It is on page 34 of the comparative print,

but in the print the Senator has he will find it in section 14. Mr. NORRIS. In the comparative print the lines are not numbered, and it is difficult to know just where the Senator begins and where he ends. If he will refer to the bill to which I have called his attention, the one which he introduced, and will call my attention to it in that print, I shall be able to tell exactly what the language is. I have had it pointed out to me, but I wish to be certain about it. If I am correct, it is on page 43.

Mr. HITCHCOCK. Yes; that is correct.

Mr. NORRIS. Where does it commence? In what line?

Mr. HITCHCOCK. It begins with the words "and each member bank shall be entitled," on line 23. Of course I have not offered the whole paragraph, because I am offering it as an amendment to Senator Owen's bill.

Mr. NORRIS. I understand, but I wish to get the language.
Mr. HITCHCOCK. The part which I am offering begins on line 23 and reads as follows:

And each member bank shall be entitled as a matter of right to the rediscount of eligible paper to the full amount of its capital stock upon the lowest current rate of discount, and no member bank shall be permitted to discount an amount of paper exceeding the amount of its capital stock except upon payment of a higher rate of discount, the increase in rate of discount to be 1 per cent for an additional 50 per cent of discounts or part thereof and 2 per cent for all in excess. In no case shall a Federal reserve bank discount paper for a member bank in excess of twice the amount of its capital stock without special authority by the board.

Mr. NORRIS. That makes that matter plain. I wish, now, to ask my colleague about the language-

and each member bank shall be entitled as a matter of right to the rediscount of eligible paper to the full amount of its capital stock.

And so forth.

Would it not follow, if that were incorporated into the law, that you would take away from the board of directors or the managing officials of the regional bank the right to pass on the quality of the paper that was presented for rediscount?

Mr. HITCHCOCK. No, Mr. President; I think not. I think "eligible paper" includes not only the character of paper as to its maturity, but the character of paper as to its fluidity, or as to its excellence.

Mr. NORRIS. If that be true, if that is the construction to be placed on this language, then the managing officers of the bank, regardless of what kind of paper was brought to them, could say, "This paper is not good," if they have a discretionary right to pass on it, and they could accomplish just what the Senator seeks to avoid.

I am not claiming that they ought not to have that discre-tion. I doubt the wisdom of incorporating a provision here, however, that shall compel the officials of this bank to loan their money on security on which they have no right to pass. If it does not mean that, then it seems to me it can not accomplish anything

Mr. HITCHCOCK. Mr. President, I do not think the reserve bank would be without power to reject paper not deemed good.

Mr. NORRIS. Then, if that is true, what could be accomplished by the language I have read?

Mr. HITCHCOCK. If they do reject the paper it will be necessary for them to show, in case of complaint, that the paper was not good. As a matter of fact, the discount of an amount

of paper equal to the capital stock of a bank is a very ordinary proceeding now.

Mr. NORRIS. I concede that.

Mr. HITCHCOCK. It is a reasonable amount of discount.

Mr. NORRIS. I am very much in sympathy with the entire amendment, with the exception I have noted; but I do not believe we can afford to put in something that will take away the discretionary power of the proper officials of a bank to pass on the sufficiency of the security-that is, as to whether it is good or not. If this language does not take away that discretionary power, it seems to me, it does not accomplish anything. The balance of the amendment I would favor very much. It seems to me, however, that what we would be doing here would be to compel the officials of this bank to loan their money on security which, as far as form was concerned, complied with the law, but which, as to security, would be absolutely worthless. That is a step I should not want to take.

Mr. HITCHCOCK. They do not loan their money. They are loaning the money this bank itself has put in there.
Mr. NORRIS. Oh, yes.

RECESS.

The VICE PRESIDENT. The hour of 6 o'clock having arrived, the Senate will stand in recess until 8 o'clock.

The Senate thereupon (at 6 o'clock p. m.) took a recess until 8 o'clock p. m.

EVENING SESSION.

The Senate reassembled at 8 o'clock p. m.

IMPORTATION OF POTATOES.

Mr. BORAH. Mr. President—
Mr. GRONNA. Will the Senator from Idaho yield to me?
Mr. BORAH. I yield to the Senator.
Mr. GRONNA. I ask unanimous consent to have printed in the RECORD a telegram from a citizen of my State in regard to the importation of potatoes. I wish to state in this connection that the regular price of potatoes is at present about 30 cents a bushel. The telegram states that they have in that locality about 100 carloads of selected potatoes fit for seed, and as it is a matter of considerable importance to our part of the country wish to have the telegram printed in the RECORD.

Mr. HITCHCOCK. Mr. President, I suggest the absence of

quorum.

Gronna

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

	Hitchcock	Overman	Contab Co

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present. Is there objection to printing in the RECORD the telegram submitted by the Senator from North Dakota?

Smith, Ariz.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

GRAND FORKS, N. DAK., December 16, 1913.

Hon. A. J. GRONNA, Washington, D. C .:

O'Gorman

Hon. A. J. Gronna, Washington, D. C.:

Understand there is to be a hearing before the Secretary of Agriculture Thursday morning regarding the admission of foreign potatoes from countries where potatoes are infected with disease. I believe a strong protest should be made against the admission of these potatoes. While North Dakota is comparatively a small producer, and the danger of the introduction of the disease here is small, nevertheless the danger is there, and if introduced into the United States would reach us in time. Supplies in the United States as a whole are ample to insure moderate prices. North Dakota potatoes are now absolutely free from scab and other disease, and on this account command a premium for seed, Our Larimore warehouse contains over 100 carloads at this time, all owned by the producers. Market to-day, 45 cents.

O. J. Barnes Co.

O. J. BARNES Co.

BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. BORAH. Mr. President, I desire to submit this evening some views which I entertain upon the question of the legal tender quality of these notes. The power of the Congress the United States to invest the notes of the Government with the legal-tender quality may now be considered a settled question. For many years after the organization of the Government it was believed by the leading lawyers of the country and by those giving consideration to the subject generally that it was not within the power of the Congress to invest the notes of the Government with the legal-tender quality. It was believed that the fathers did not intend to give that power to Congress, and it must be admitted that upon the facts surrounding the adoption of the Constitution and the discussions touching the subject that would seem to be the sounder view. Nevertheless, during the Civil War it became necessary for Congress to consider this proposition for the first time in a way it never had to consider it before, and it assumed the power of giving to the notes of the Government a legal-tender quality.

After the conflict had closed this question was carried to the Supreme Court, and the Supreme Court held against the power of Congress. This opinion, as we are all well aware, was afterwards reversed and the court held with those who contended for this power upon the part of Congress. This opinion, however, was never entirely satisfactory to the lawyers of the country and to most people who had given consideration to the

question.

It was believed that the opinion was rendered under the pressure of imperative necessity, and that under other conditions and at a time when the country was at peace a different conclusion might be reached by the court. In other words, to put it in perhaps a more lawyerlike phrase, it was thought that the court had based the proposition that the Congress had the power really upon the principle of self-preservation. The court, laying great stress upon the war powers of the Government and viewing the emergency as it then existed, arrived at the conclusion that it was one of the sovereign powers of the Government, and established the doctrine that it was within the power of Congress to exercise it in such an emergency.

Later this proposition was carried to the court again and pre-

sented in time of peace, at a time when the conditions did not exist and the emergency did not obtain. So, in 1884, the court again reviewed the question at length, and, with the exception of Justice Field, who was a member of the court at the time the original opinion was rendered, the entire court agreed to the proposition affirmative of the power. It has since that time been considered a settled question, and it is not my purpose

to-night to reopen or discuss it at any length.

But I am going to read a single paragraph from the late opinion, not so much with a view of opening up the legal proposition, as to present the view of the court as to the source of the authority and correspondingly the obligation of the Government to I would like for those who are interested in the subject to observe the nature of the power as viewed by the I read from the Legal Tender case, in One hundred and tenth United States, page 447, where it says:

tenth United States, page 447, where it says:

It appears to us to follow, as a logical and necessary consequence, that Congress has the power to issue the obligations of the United States in such form and to impress upon them such qualities as currency for the purchase of merchandise and the payment of debts as accord with the usage of sovereign governments. The power, as incident to the power of borrowing money and issuing bills or notes of the Government for money borrowed, of impressing upon those bills or notes the quality of being a legal tender for the payment of private debts was a power universally understood to belong to sovereignty, in Europe and America, at the time of the framing and adoption of the Constitution of the United States. The Governments of Europe, acting through the monarch or the legislature, according to the distribution of powers under their respective constitutions, had and have as sovereign a power of issuing paper money as of stamping coin. This power has been distinctly recognized in an important modern case, ably argued and fully considered, in which the Emperor of Austria, as King of Hungary obtained from the English court of chancery an injunction against the issue in England without his license of notes purporting to be public paper money of Hungary. Austria v. Day (2 Giff. 628, and 3 D. F. & J. 217). The power of issuing bills of credit and making them, at the discretion of the legislature, a tender in payment of private debts had long been exercised in this country by the several Colonies and States; and during the Revolutionary War the States, upon the recommendation of the Congress of the Confederation, had made the bills issued by Congress a legal tender. (See Craig v. Missouri, 4 Pet. 435, 453; Briscoe v. Bank of Kentucky, 11 Pet. 257, 313, 334–336; Legal Tender cases, 12 Wall., 557, 558, 622; Phillips on American Paper Currency, passim.) The exercise of this power not being prohibited to Congress by the Constitution, it is included in the power expressly granted to bo

States. This position is fortified by the fact that Congress is vested with the exclusive exercise of the analogous power of coining money and regulating the value of domestic and foreign coin, and also with the paramount power of regulating foreign and interstate commerce. Under the power to borrow money on the credit of the United States and to issue circulating notes for the money borrowed, its power to define the quality and force of those notes as currency is as broad as the like power over a metallic currency under the power to coin money and to regulate the value thereof. Under the two powers, taken together, Congress is

authorized to establish a national currency, either in coin or in paper, and to make that currency lawful money for all purposes, as regards the National Government or private individuals.

It will be observed that the Supreme Court places this among the great and sovereign powers of the Government, and seemingly a power which should be exercised, if exercised at all, for an entire people and not in a way to benefit a class or a particular business. It is a power which, if it exists at all, begets an obligation which is not only commanding but exclusive.

So, it is now purely a question of policy; that is to say, whether it is wise for the Government to issue its notes which are to serve the purposes of money, perform the functions of money, and deprive them of any of the qualities of money which it is within the power of the Government to give them.

I read, Mr. President, from the bill, at page 48, the last print,

I understand, which says:

Sec. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States, and shall be receivable for all taxes, customs, and other public dues.

I have offered an amendment, which reads:

The said notes shall be obligations of the United States, and shall be receivable for all taxes and other public dues and legal tender for all debts, public and private.

Mr. President, according to its express terms, the bill makes these notes obligations of the Government. We will first consider the bill according to its terms, and assume that its authors were not willing that these notes should be mere bank credits, but intended that they should rise to the dignity of Government issue, performing the functions of money and be accepted as It is not only the sovereign function but the sovereign duty of a government to furnish a sound and sufficient volume of money with which to do the business of the country. rency and banking are separate and distinct affairs and belong to separate and distinct fields of activity. It is no part of the function of government and it is a vicious practice to loan its credit to private corporations. After the Government has provided sufficient money, either metal or paper money, redeemable in coin, it is then the business of individuals or corporations to establish their own credit. The business world will determine the form and extent of this-as bills of exchange, checks, and bank notes have grown into use through and because of business The private corporations or the privately owned and controlled banks should never be permitted to issue or provide the money or currency of the country. And, on the other hand, the Government should never enter into the business of providing credit for private corporations or of loaning its credit to those upon whom devolves the building up of our credit sys-

This note, however, is the obligation of the Government and issued by the Government. It is paper money, redeemable in gold by the Government. Yet, sir, this obligation, which is put out supposedly in an emergency, though under the terms of the bill not necessarily so, goes forth discredited and dishonored by

The Government says that it itself will not receive it in payment of customs due it—that, at least, is the house bill—and that no man shall be obliged to accept it in payment of debts. Every creditor in the land may say to every debtor, Go get me gold before I satisfy your debt. If the Government is providing money, it should provide that whatever it puts out as money should perform all the functions of money at all times and under all circumstances. It should either take its name off of this note and relieve itself of this obligation, or it should exercise its full power and discharge its full duty to the people and give it all the functions of money. Upon what theory should this Government assume both the obligation to issue and the obligation to redeem a miserable itinerant in the business world which seems neither willing to nor capable of canceling a mortgage or paying a grocery bill? If it is money, who will argue that it should not be money in all its completeness and power? If it is a mere instrument of bank credit, who will argue that the Government should either issue or redeem it?

We have 10 kinds of money in the United States-somewhat of a medley in the financial world. We have gold, which i full legal tender. We have the standard silver dollar-We have gold, which is legal tender except where the contract otherwise provides. have subsidiary silver-legal tender to any sum not exceeding We have the Treasury notes of the act of July 14, 1890legal tender except where otherwise provided in the contract. We have the greenbacks-legal tender except as to duties on imports and interest on the public debt. We have gold certificates and silver certificates—not legal tender, but receivable for all public dues. We have the national-bank notes—not legal tender, but receivable for all public dues except duties on

imports, but which may be paid out by the Government except for interest upon the public debt and redemption of national We have minor coins-legal tender up to 25 cents. We have foreign coins-not legal tender.

Now, for the purpose of simplifying matters we have added the eleventh, unlike any of the rest, a Government obligation loaned to the banks redeemed by the Government-a kind of pterodactyl in the financial world, at times soaring away on the wings of governmental power and at other times, when in the hands of private citizens, so wretched and worthless that it will not pay a night's lodging if the innkeeper does not like it. The Government degrades its function, its sovereign power, either by refusing to endow its emission of money with all the functions of money or by engaging to furnish credit to private corporations, and becomes a partner of a private institution. Upon which horn of the dilemma do you prefer to be impaled?

It has been said that the Government has assumed to issue this money; that it refuses to yield its sovereign right, to delegate this power to private corporations, but will itself take control and itself provide the money for the people. This is generally believed throughout the country. What will the people say when they find, first, that this money can not be issued except upon the initiative of the bank; and, secondly, that they have not money at all, but some peculiar instrument of bank credit, an evidence of debt with which they can not enforce acceptance for the common necessaries of life. That it will pass in the private affairs of life solely and alone at the option of the creditor world. Will the people not ask, and have a right to ask, why, if you are going into this at all, do you not make this serve all functions of money in all circumstances? This is an emergency currency, it is sometimes said. An emergency is liable to arise any moment when a man has only \$10 in his pocket and can not force his coal dealer to take it for what he owes him. It serves the purpose of extending the credit of the bank and upon which they may collect interest. It answers their purpose in this emergency. But it does not serve the purpose of answering such emergencies as may often arise in the private affairs of life.

Mr. HITCHCOCK, Mr. President——

Mr. HITCHCOCK. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Nebraska?

Mr. BORAH. I yield. Mr. HITCHCOCK. Suppose these Government notes were issued directly by the Treasury Department acting as the reserve agent for the banks and operating to enable the expansion of the currency at seasonable times, does the Senator from Idaho think that that function would come within the power as outlined by the Supreme Court?

Mr. BORAH. I should say so; yes.

Mr. HITCHCOCK. Well, suppose, instead of issuing those notes through the Treasury Department, Congress creates these reserve banks and places them under the control of Government-elected directors, would the Senator not feel that those banks were only a convenient way used by the Government to accomplish the same end through its own officers?

Mr. BORAH. If the reserve banks were under the complete control of the Government, I would regard the issue of notes by the banks under such conditions as really the issue of the notes by the Government, as I regard the issue of the notes of the Reichsbank as really the notes of the German Government, because, while they are bank notes in a technical sense, yet they are issued by what is really the Government's agency of issuing them. If the Government completely controls the bank, then the act of the bank may be said to be the act of the Government. I think all currency in that sense should be issued by a bank, but a bank which is no more than a proper instrumentality by which the Government does its work.

Mr. HITCHCOCK. I make this distinction, Mr. President, because I think there is force in what the Senator from Idaho says, and the bill as prepared by the House of Representatives, or as presented by the Senator from Oklahoma, is open to the objections which he states, because the banks are under the control of private individuals and private interests primarily, and there is some question whether, being so controlled, they should have the issuance of Government notes. The bill prepared by the section of the committee of which I am a member has so arranged it that the banks are under the control of directors a majority of whom are named by the Government.

Mr. BORAH. Of course, my mind was upon the bill pre-sented by the Senator from Oklahoma, because there is some indication that that is the bill that will pass. [Laughter.]

But, Mr. President, I was saying that these notes are the obligations of the Government and redeemable by the Government, and yet they are sent out dishonored and discredited from the beginning. In the first report that was made of the bill they

were not receivable for customs. If my memory serves me correctly, that has been changed.

The Senator is right about that. Mr. NELSON.

Mr. BORAH. But they are still not legal tender for the payment of debts.

There is behind these notes, first, as I have said, the obligation of the Government; second, the gold reserve, which is provided for; third, they are made the prior and paramount lien upon the assets of the bank. Then they have behind them the notes and bills of exchange to the amount of the issue. Yet, Mr. President, these notes, while they may be used by the banks loaning them to the people, upon which interest is to be collected, will not pay an ordinary debt or cancel a mortgage unless by consent of the party to whom it is owed.

Upon what theory does the Government take the responsi-bility for these notes and place behind them the sovereignty of the Government and all the power of the Government, which ought to be exercised by all for all, instead of for a few, unless it is to exercise it in such a way that in whosoever's hands they fall they may feel the benefit and the beneficence of the action of the Government?

We have quite enough precedents in regard to this matter to justify us in imposing the quality of legal tender upon these notes. The Bank of England notes have been legal tender since January 1, 1834. No one in England would to-day entertain a proposition to strip the Bank of England notes of their legaltender quality. I have never understood that there has been any trouble or difficulty arising out of and by reason of the fact that the notes of the Bank of England are legal tender. On the other hand, at the time that Mr. Peel, perhaps the most capable of the public men who dealt with the reorganization, as it were, of the Bank of England, was considering this matter he was particularly desirous of retaining the legal-tender quality of the notes of the Bank of England.

There can certainly be no argument in favor of the legaltender quality of a bank note which does not serve with greater purpose to establish the proposition that Government notes should possess that quality. On the other hand, it might well be argued that bank notes should not be legal tender, but it could scarcely be argued, it seems to me, that the Government itself should enter into the business of issuing notes of a limited legal-tender quality to perform the functions of money.

The Bank of France made its notes legal tender in 1870. The notes of the Bank of France are in fact the notes of the Government of France. While they are issued by the bank and possess the form and go under the name of the bank notes of the Bank of France, that bank is under the absolute control and regulation of the Government, and notes are in fact issued under the strict regulation, control, and direction of the Government and solely at the initiative of the Government. After an experience of some years, and after observing the experience of the great financial nation, England, France came to the con-clusion that she would imbue her notes with the legal-tender quality, and did so. No one to-day among the great financiers of that country contemplates depriving those notes of their legal-tender quality, and I apprehend that such a proposition would not be entertained if seriously urged by the Government of France.

In 1906 and 1907 the German Empire had some trouble, as we had, with a financial crisis, which led to a reinvestigation and a reconsideration of the entire question of the bank charter of the German Bank, a Government bank. After a most complete inquiry, extending through weeks and months in the German fashion of thoroughness, after listening to the experts of the German Empire upon the subject of finance, including the president of the Government bank, and after observing the experience of England, France, Austria-Hungary, Italy, and all of the other great nations of Europe, Germany came to the conclusion that her notes should be legal tender. As a result, they modified the bank's charter and provided that the notes of the bank issued by the Government through the bank should possess the legaltender quality.

I want to take enough time, Mr. President, to read a few paragraphs from that investigation. It was a most thorough investigation. One must conclude that they did not act hastily or without a most searching inquiry. The German Government was, however, after the inquiry, convinced that it was the wise thing to do. Whatever there was of learning to be brought to bear upon the subject they brought to bear upon it; and to-day the leaders of finance in Germany indorse the action of the Government in 1909. The president of the bank, speaking upon this subject, said:

At the hearing of the experts last spring they treated this question almost exclusively from the standpoint of an enlargement of the Reichsbank's stock of gold and with regard to times of peaceful and

normal economic development, and scarcely considered that the legal-tender quality of the bank notes may also perhaps be of importance in protecting the store of gold in possession of the bank, particularly in politically or economically critical periods.

This is the president of the bank speaking, not alone a theorist or a "flatter," but a man who had had years of training in this particular line of intellectual activity and who is speaking both as a theorist and as a practical banker.

speaking both as a theorist and as a practical banker.

And even where one or another did touch upon such critical times, he fixed his attention mostly upon a war, and then only upon the period immediately following its outbreak, pointing out that it was a question at the utmost of only a few critical days, which could be weathered, and that making the notes legal tender and possible the forced circulation of them might then become a necessity, but that it would be time to enact those measures then, and that they could be legally passed in a few days by the Reichstag and the Bundesrath—for the power of issuing an emergency decree is not provided for by the constitution of the Empire. But the possibility that we may have grave political crises when legal measures can not at once be enacted, and that a war does not necessarily break out overnight, but may be impending for weeks and months, producing constantly increasing uneasiness in the business world, hardly one of the gentlemen seemed to have thought about.

But, gentlemen, it is not necessary in this connection to think of war at all; we may go through protracted political or economic hard times in peace also. Are we really so absolutely sure that with us an economic crisis, a failure of confidence, an intense demand for money, a run upon savings or other banks may not, under a conjuncture of unretward circumstances, occur, even though, thanks to the elasticity of our central bank of issue, hardly to the same extent as in the United States?

The question whether we do not need the same defensive apparatus

untoward circumstances, occur, even though, thanks to the elasticity of our central bank of issue, hardly to the same extent as in the United States?

The question whether we do not need the same defensive apparatus with which all our great neighbors, and particularly England and France, have long since provided themselves may, at any rate, be worthy of earnest consideration, even if we leave an actual panic that may seize upon the people at large and the business community entirely out of account. And it is very obvious that at such times every individual strives to put himself into a strong position financially, to have his resources mobile and available that every bank, every public fund, every disbursing officer, savings bank, cooperative institution, and whatever else they may be called, will, or at least may, make a strong effort to secure for themselves the means of meeting all possible demands for payment and therefore for greater amounts than are needed in normal times. It may likewise be assumed as certain that efforts to secure those means to pay on the part of private persons, as well as of the banks and other payment institutions, will be directed toward procuring as much as possible of that kind of money regarding which the possessor is sure that he can use it in payment under all circumstances—that is, money that is legal tender.

Up to the present, however, gentlemen, it is is only gold that plays

the possessor is sure that he can use it in payment under all circumstances—that is, money that is legal tender.

Up to the present, however, gentlemen, it is is only gold that plays this part.

That in such periods of long-continued, steadily aggravated crises an acute feeling of insecurity and unrest may pervade the business community in general, precisely because the creditor demands of his debtor the only unconditional kind of money—that is, gold—is conceivable; that this endeavor, manifested in larger or smaller strata of the population, these necessary efforts of the banks, disbursing offices, savings banks, and so forth, to procure this sole absolutely valid and disposable form of money, gold, may react strongly and, under certain conditions, to a dangerous extent upon the Reichsbank and its stock of gold is at least possible and perhaps probable; and this would happen particularly at a time when it must strive to guard its stock of gold with the utmost care, while as matters now stand it has no means of really protecting it.

Now, it seems plain that the investing of our bank notes with the legal-tender quality would remove the chief motive which, under present conditions, impels great numbers of private individuals and notably banks and disbursing offices to provide themselves specifically with gold, and that in great quantities; and the number of people who will then apply to the bank to have notes redeemed will not, I believe, under any circumstances be a dangerous one, so long, of course, as the credit of the bank is maintained.

Gentlemen, it may be doubted—and I concede this at once—whether

of the bank is maintained.

Gentlemen, it may be doubted—and I concede this at once—whether these possibilities will become realities, and how far the measiness and the imperiling of business and the imperiling of our gold will extend in such crises. But, gentlemen, in forming your decision you will have to put this question to yourselves also; whether the bodies that are responsible for the utmost possible security of business—and for the present you, too, are among them—should not consider, judge, and prepare the measures required for such grave emergencies from the standpoint of the pessimist and of the man who goes, it may be, to the furthest limits of caution.

Again, this same authority says:

Finally, gentlemen, even in times when economic conditions are perfectly normal the banks and other disbursing places would not need to keep as large a stock of gold on hand as they are now obliged to do on account of gold being the only legal tender, and this, gentlemen, might also have the effect of promptly and permanently strengthening the Reichsbank stock of gold.

Dr. Riesser, addressing himself to this question, said:

Dr. Riesser, addressing himself to this question, said:

We find very similar arrangements in countries which adopted the
new system directly after the régime of paper money and forced circulation. France, in the first place; the legal-tender plan did not exist
there either formerly, but, after the war of 1870, which involved
the issuance of a forced circulation, specie payment was resumed which
retained that feature. In Austria-Hungary the same thing obtains, and
likewise in Italy. I mention only the chief countries. In short, we
could point to the fact that it is the almost universal practice of leading nations of Europe as regards their central banks and the notes
issued by them. I would therefore be in favor not of permitting this
measure to be put into force by imperial order, but of establishing it by
law, precisely at the most peaceful time, such as we may look for now.

Mr. Fischel, after referring to the discussion which bad one.

Mr. Fischel, after referring to the discussion which had pre-

with reference to the discussion which had previously in the history of Germany taken place with reference to making the notes legal tender, said:

I believe that if the members of the commission of 1866 had been a little more farseeing the outcome of their discussions would have been that it was desirable to make the bank notes legal tender.

Again, he says:

I consider this matter of such importance that I would believe would simply be deplorable if we were to miss this opportunity, whi I regard as the most opportune one of establishing a normal status.

Dr. Lexis, urging the adoption of the legal-tender clause and referring particularly to the hoarding of gold in times of stress, said .

With the bank notes circulating as legal tender, the situation would in any case be rendered less serious than it would otherwise be.

In the report of the explanatory brief accompanying the proposition to renew the Reichsbank made after this long inquiry, it is said:

The investment of the notes of the Reichsbank with the quality of a legal tender can not possibly result in any harm to the currency system while it has the advantage of preventing trickish behavior on the part of creditors and of securing for critical times a discharge of pecuniary obligation in accordance with existing methods. * * * The conferring of the legal-tender quality upon the Reichsbank notes does not in any way affect the maintenance of the gold standard, as is proved by the example of the Bank of England.

This hobgoblin of legal tender forever roosting on our financial Whatever those fence no longer terrifies the old countries. countries put out to serve the purposes of money redeemable in gold is given all the functions and qualities of gold in the way of debt-paying power. Whatever they put out serves the debtor and creditor alike-serves to pay debts as well as to foment speculation, serves to meet grocery bills as well as banking schemes and stock deals, serves those who want the necessaries of life as well as those who covet the riches of the world. It is a stupendous blunder, if not a political crime, for this Government to issue this money at all unless it gives to it all the functions of money which it is within the power of the Government to give.

It will be seen, therefore, that these financiers advocate making the notes of the Government Bank of Germany legal tender for the purpose of protecting their gold reserve in a financial crisis, and particularly for the purpose of building up their gold reserve. They say, as any man of practical com-mon sense would likely say, that if a man has in his possession a Government note with which he can pay his debt and can-cel his mortgage there is no occasion for him, when the storm begins to brew, to hasten to a point where he can get the kind of money with which he can cancel his mortgage.

Why should a man who possesses money backed by the obligation of the Government, backed by the gold reserve, apply for such gold unless it is because at some time or other the money he has will not serve his purpose or pay his debt? If you endow it with the legal-tender quality, so that his creditor must take it in payment of debts, there will be no occasion for him to hunt the gold reserve when the crisis comes and the storm begins to brew.

So under this very same system the Bank of France built up her gold reserve to its present point of eight hundred millions and holds it there. So they have built up since 1907 in Germany the largest gold reserve they ever have had and are holding it there.

I have been advised since I introduced this amendment by the press of the country that its operation would have a tendency to deplete the gold reserve. Realizing my limited knowledge of these things, I might have been deterred from urging the amendment had I not found upon examination, before I introduced it, that back of the fear and the disturbance of mind in regard to it of the men who say it may deplete the gold reserve is the experience of England, the experience of France, and the experience of Germany, which have been directly to the contrary.

Mr. President, whenever we undertake to discuss the ques-

tion of legal-tender paper money, or paper money in any form, we are confronted with the tremendous figure and the powerful prestige of Daniel Webster. During the discussion of the extension of the charter of the Second Bank of the United States, in 1836, Mr. Webster threw into his argument some views upon paper money which really were not a part of the discussion at that particular time. They are contained in a paragraph which has traveled over the continent several times since, and which is quoted upon every occasion when the subject of the issuance of paper money by the Government, or making it legal tender, is up for consideration.

I am going to quote at length from Mr. Webster on this subject; but first I want to read this paragraph, because I find it in a speech lately delivered upon this particular bill.

This is a quotation from Mr. Webster:

This is a quotation from Mr. Webster:

Of all the contrivances for cheating the laboring classes of mankind none is so effectual as that which deludes them with paper money. It is the most perfect expedient ever invented for fertilizing the rich man's fields by the sweat of the poor man's brow. Ordinary tyranny, oppression, excessive taxation, these bear lightly on the happiness of the community compared with fraudulent currencies and the robberies committed by depreciated paper. Our own history has recorded enough,

and more than enough, of the demoralizing tendency, the injustice, and intolerable oppression on the virtuous and well disposed of a degraded paper currency authorized by law, or in any way countenanced by Government.

So this paragraph, lifted from its context and separated from the argument and the subject matter under consideration, is taken from Mr. Webster's works and constantly iterated and reiterated in the discussion of this subject. We are advised that he was not only opposed to paper money, but that he was one of the great lawyers of this country who was on record against making paper money legal tender.

I am perfectly well aware that Mr. Webster, as a lawyer, believed it was not within the power of the Congress of the United States to make anything legal tender except gold and silver. He placed that interpretation upon the Constitution and repeated it many times. It was his view that you could go no further than that. But since Mr. Webster lived the Supreme Court of the United States has said that the power belongs to Congress, and that power has been exercised and sustained.

What did Mr. Webster say in regard to paper money, and investing it with legal-tender qualities? He said repeatedly that paper money should have all the qualities and functions of money which it was within the power of Congress to give it; that when it was put out to perform the service of gold or silver, as the agent, the aid, and the representative of the gold or silver, all the powers and functions which a sovereign government could give it should be given to such paper money.

If Mr. Webster were alive to-day, with the Supreme Court decision before him, the logic of his argument would drive him to two propositions:

First, a Government-controlled bank. Second, every dollar

of currency issued by the Government and made legal tender.

Any man who will analyze Mr. Webster's views upon this great question can reach no other conclusion. I shall trespass upon the patience of the Senate by quoting at length from Mr. Webster. I would like to discourage these people if I can from quoting him on this subject any longer upon theory of the quotation above made.

Mr. Webster did not leave in doubt what he had reference to when he used the term "paper money," such as he referred to in his bank-charter speech in 1836. It was the kind of money which all now reject, which the experience of mankind has long since put aside as a devastating experiment.

He says:

By paper money in its obnoxious sense, I understand paper, issued on credit alone, without capital, without funds assigned for its payment, resting only on the good faith and the future ability of those who issue it. Such was the paper money of our Revolutionary times; and such, perhaps, may have been the true character of the paper of particular institutions since. But the notes of banks of competent capitals, limited in amount to a due proportion of such capitals, made payable on demand in gold and silver, and always so paid on demand, are paper money in no sense but one; that is to say, they are made of paper, and they circulate as money.

Paper money redeemable in gold is paper money in no sense except that it is made out of paper. It is the representative of gold and is in every sense money, as much so as gold, so long as the redeeming power behind it is sufficient to fulfill the pledge of redemption.

That was quoted from his speech on the specie circular made December 21, 1836. He further says:

But I am also of opinion that an exclusive circulation of gold and silver is a thing absolutely impracticable; and if practicable, not at all to be desired; inasmuch as its effect would be to abolish credit, to repress the enterprise, and diminish the earnings of the industrious classes, and to produce, faster and sooner than anything else in this country can produce, a moneyed aristocracy.

What, then, it will be asked, is a sufficient check? I can only repeat what I have before said, that it is a subject which requires the constant care, watchfulness, and superintendence of government.

The issuance of our currency or paper money, in the mind of Mr. Webster, was just as much an act of the Government, just as much the duty and the obligation of the sovereignty, as to coin gold or silver. He was as much opposed to private individuals controlling the paper currency of the country, based upon gold or silver, as he was opposed to turning over the power of coinage to private corporations.

Again he says, in his great speech upon the currency:

Now, sir, my present purpose is chiefly to maintain two propositions—First. That it is the constitutional duty of this Government to see that a proper currency, suitable to the circumstances of the times and to the wants of trade and business, as well as to the payment of debts due to Government, be maintained and preserved; a currency of general credit and capable of aiding the operations of exchange, so far as those operations may be conducted by means of the circulating medium, and that there are duties, therefore, devolving on Congress in relation to currency beyond the mere regulation of the gold and silver coins.

Second. That the message, the bill, and the proposed amendment, all, in effect, deny any such duty, disclaim all such power, and confine the constitutional obligation of government to the mere regulation of the coin and the care of its own revenues.

There can be no mistake about Mr. Webster's view, first, that it was the constitutional duty and obligation of the Government, through its Congress, to provide a currency; and, second, that it was as much the business and the obligation of the Government to provide the currency as it was to coin gold and silver.

He says:

I have well weighed, Mr. President, and fully considered the first of these propositions-

The one which I have just read-

The one which I have just read—
to wit, that which respects the duty of this Government in regard to
the currency. I mean to stand by it. It expresses, in my judgment, a
principle fully sustained by the Constitution and by the usage of the
Government, and which is of the highest practical importance. With
this proposition, or this principle, I am willing to stand connected, and
to share in the judgment which the community shall ultimately pronounce upon it. If the country shall sustain it, and be ready in due
time to carry it into effect by such means and instruments as the
general opinion shall think best to adopt, I shall cooperate, cheerfully,
in any such undertaking, and shall look again with confidence to prosperity in this branch of our national concerns. On the other hand, if
the country shall reject this proposition, and act on that rejection; if
it shall decide that Congress has no power, and is under no duty. In
relation to the currency, beyond the mere regulation of the coins; then,
upon that construction of the powers and duties of Congress, I am
willing to acknowledge that I do not feel myself competent to render
any substantial service to the public counsels on these great interests.

Again, in the same speech he says:

Again, in the same speech he says:

Again, in the same speech he says:

I be leave to say, sir, with all respect and deference, that funds are transferred from individual to individual usually for the direct purpose of the payment and receipt of debts; that payment and receipt are duties of currency; that, in my opinion, currency is a thing which government is bound to provide for and superintend; that the case, therefore, has not the slightest resemblance to the transportation of merchandise, because the transportation of merchandise is ceause the transportation of merchandise is ceause the transportation of payments of the slightest resemblance to the transportation of by ships and boats, by carts and wagons, and not by the use of currency or anything else over which government has usually exclusive control. These things individuals can provide for themselves. But the transfer of funds is done by credit, and must be so done; and some proper medium for this transfer it is the duty of government to provide, because it belongs to currency, to money, and is therefore beyond the power of individuals.

I think there is another quotation which I shall make and

I think there is another quotation which I shall make and then I will trespass no longer upon the time of the Senate. is in the same speech. He says:

But, sir, as will be seen by the proposition which I have stated, I go further; I insist that the duty of Congress is commensurate with its power.

Now, then, where would Mr. Webster stand to-day if he were here discussing the currency bill of 1913? He has said that the power of controlling the currency, superintending it, and dominating its amount and what it shall be is just as much the duty of the Government as coining gold and silver. He has further said that it is the duty of the Government to exercise the full strength which it has in endowing this currency with the qualities of money:

I insist that the duty of Congress is commensurate with its power; that it has authority not only to regulate and control that which others may put forth as money and currency, but that it has the power, and is bound to perform the duty, of seeing that there is established and maintained at all times a currency of general credit, equivalent in value to specie, adapted to the wants of commerce and the business of the people, and suited to the existing circumstances of the country. Such a currency is an instrument of the first necessity to commerce, according to the commercial system of the present age, and without it commerce can not be conducted to full advantage. It is in the power of Congress to furnish it, and it is in the power of nobody cise.

He did not leave any room for doubt, Mr. President, as to what his views were, both as to the power and as to the duties of the Government with reference to coining gold and silver and with reference to providing the currency which is based upon gold and silver.

If Mr. Webster had had before him the determination of the court that it was within the power of Congress to impose the legal-tender quality upon the notes which it issues, am I not correct in concluding that if that power had been vouchsafed. as he believed at that time, he would have insisted that all the power which Congress had should be exercised in providing a sufficient and sound volume of currency with which to do the business of the country? He did not stop with saying that it was within the power of Congress to do it, and it ought to do it. He went further and said it was not the province of anyone else to do it, and, in effect, that no one else should be permitted to

exercise that power.

Mr. President, so far as I am concerned I would just as soon see the power to coin gold and silver turned over to a private corporation of a western mining camp as to turn over the power

to fix the volume of currency upon which to do the business of the country to private corporations in other parts of the country. Now, Mr. President, as was said by the distinguished Senator from Missouri [Mr. Reed] night before last, this currency is issued alone upon the initiative of the bank. That, of course, is

the plain interpretation of the bill. Nevertheless, if the Government attaches its name and becomes responsible for its redemption it should give it all qualities of money which it is within the power of the Government to give it. I greatly regret that the sole initiative for issuing this currency is with the banks; but, be it so, the Government owns it as its obligation and redeems it, and it has no right to put it out with anything less than all the qualities of money which it can give it.

Why should we issue to the country a note redeemable by the Government, for which the Government is obligated, that may not pay a grocery bill or a night's lodging unless the party is willing to take it? Upon what theory do we exercise the power of the Government except upon the theory that it will redound to the benefit of each and all, one and another alike? If this is sufficient for speculation, if it is sufficient for providing for credit in the hands of private corporations, if it may be offered to individuals as money and interest collected upon it as money, then should it not carry to the borrower, who pays for money, all the virtues of money?

On the other hand, if it is mere bank credit, if refuge is taken in the proposition that these are not really Government notes but bank notes, we do not arrive at any more desirable position in regard to it. It is an unwarranted practice for the Government to loan its credit, to loan its name, and give its authority and its prestige to private corporations to establish credit. Nothing could be more in the interest of a class, nothing more pronounced and repulsive as special privilege, than that of the Government loaning its credits to particular parties or certain corporations. That is special privilege nation wide, and in the end, if allowed to go on, nation wrecking.

My friends on the other side should recall what John C. Calhoun said when he was arguing this precise proposition. What a vast advantage it would be if the Government would go out upon the street and find John Jones and say to John Jones, "I will indorse your note; I will give you my credit; whereever you may go you may exercise that and stand upon it." What a vast advantage it would be to John Jones as against the rest of his neighbors and friends. Yet you take the position of saying to a certain limited class of business men or corporations that we will loan the credit of the Government, the guaranty of the Government, for your benefit in the building up of your credit, and upon that credit you may fix the interest you will charge upon the people of the country.

I think, Mr. President, I am warranted in calling the attention of my friends upon the other side to the fact that this proposition of making these notes legal tender has been a principle advocated by your party for years and years. It has been in your platform; it has been announced from your political rostrum; it has been advocated in your campaigns; it has been advocated almost by everyone now in this Chamber who was here at the time the Vreeland-Aldrich bill was discussed and who participated in that discussion. Time and time again you have taken the position that the Government should issue these notes and should make them legal tender. Not with a view of recalling matters which might seem to be contradictory of your present position, but to call your attention to the fact that you are committed to this proposition and that you now have it within your power to establish the principle, may I be permitted to call attention to some of those declarations?

February 7, 1908, the distinguished Senator from Mississippi [Mr. WILLIAMS] introduced in the lower House of Congress a bill touching the subject of the currency. I am not going to read the whole of the bill, although all of it could be read with considerable interest in view of the pending measure. The bill was prepared apparently with a great deal of care and after much consideration upon the part not only of the Senator but of his associates, both in the House and in the Senate, as I assume from the declarations which he made. There appeared about the time it was introduced an extended editorial in the Commoner, in which it is said:

Hon. John Sharp Williams, Democratic leader of the House of Representatives, has introduced a bill a copy of which will be found upon another page. It was introduced after a conference with other Democrats of the Senate and House—a conference which Mr. Bryan attended—and has the support of practically all the Democrats. The Commoner commends this bill to its readers and to the country as a vast improvement over the present national-bank act and over both the Aldrich and Fowler bills.

Upon page 12 of this bill, section 10, it is said:

That the emergency currency notes provided for in this act shall be a full legal tender for all debts, private and public, and shall conform in size, color, and wording thereon, as nearly as practicable, to the present United States Treasury notes, except each note shall have printed on the face thereof the words: "This note is secured by deposit of bonds with the Treasurer of the United States."

This measure was evidently considered long and in detail before it was introduced. While other parts of the bill are as important, I read only that which bears upon this particular question, the making of these notes legal tender. The distinguished author of this bill in the Senate, Mr. Owen, stated in the hearings that these notes should be made legal tender. He says:

I think these notes ought to be legal tender * * *, because it has been found by England, France, and Germany that legal-tender notes were the better policy.

During the pendency of the Vreeland-Aldrich bill the same Senator offered an amendment to that bill, and the amendment provided-

That the Secretary of the Treasury is hereby directed to have printed and to keep on hand United States Treasury notes under a special account, to be called the emergency-circulation fund. Such notes to be called legal tender, etc.

During the discussion of the Vreeland-Aldrich bill the Senator from Missouri [Mr. STONE] said:

ator from Missouri [Mr. STONE] said:

I regard with extreme disfavor the policy of vesting in banking corporations such power as gives opportunity to unduly influence the financial policy of a great people. I object to giving to banks the power to regulate in any degree the volume of the people's currency by expanding or contracting it as it may happen to suit their whim or their interest.

* * I would have the Government issue the currency full legal fender instead of delegating the power of issuing it to corporations it had created. Why authorize the bank to issue emergency notes, which would not be legal tenders, when the Government might issue a full legal-tender currency, and therefore a more valuable currency, and take securities in its own name sufficient to insure the return of money to the Treasury when the necessity for its issue had passed? (CONGRESSIONAL RECORD, vol. 42, pt. 3, p. 2117.)

I understand also that at one time the committee determined to make these notes legal tender and that was the report at one time agreed upon, but for some reason or other, undoubtedly satisfactory upon reflection, the legal-tender quality was taken

I want to ask you candidly, are you willing to go on record and present yourself to the country upon the proposition that the Government of the United States should issue its currency without the legal-tender quality? Are you willing to invoke the great sovereign power of the Government to put into circu-lation that which shall perform the functions of money, but which will not pay the debts of the debtor unless the creditor agrees?

I am very anxious to see this legal-tender quality given to ese notes. I want to see the Government signature and the these notes. Government obligation taken away from these notes, or I want them to have all the functions of money which the Government can give them. I want them reduced to the status of bank notes, bank credits, or I want them given all the properties which it is possible for the Government to give. I could never get the consent of my mind to vote to put the Government into the business of building up the credit and guaranteeing the standing of private corporations. On the other hand, if it uses its power, it must use it so all may share its benefits. I am quite aware that this is treason in some quarters, but it is my view, nevertheless. I have quoted these matters to refresh the memory of those who have considered this question in times past and to ask in all seriousness why it is that you should hesitate now that you are in power and have some support, at least, from the other side, to do that which you pledged time and time again would be done if the opportunity were given you to do it.

The convention which was presided over in 1896 by the distinguished Senator from Nevada [Mr. Newlands] had a clause it it specifically pledging the party to the proposition that notes issued by the Government to perform the functions of money or currency should be made legal tender.

There is no argument, Mr. President, none will be made upon this floor proposition that the Covernment when the

this floor, against the proposition that the Government when it attaches its name to a note should attach the legal-tender quality to it, so that it will serve every citizen in the land, whether he is paying for the necessaries of life or seeking wealth through the channels of speculation.

You might argue with success that if it were a bank credit it should not possess the legal-tender qualities, and I will agree with you, but when you put the sovereignty of the Government behind the issue and make it the obligation of the Government, I ask you in all sincerity, will you go before the country and say to them that we have exercised this great sovereign power

for a portion of the people? If it is necessary to have the action of the Government, one man has as much right to receive a benefit from it as the other. man has as much right to receive a benefit from it as the other. But you say these notes will pass without any disturbance, that they will be accepted. But, as was said by the great financier at the head of the German bank, if the storm does come and these notes are found in the possession of individuals, they are warned then and there that there may come a time when they will not serve their purpose or pay their debt, and they immediately proceed to the point when they get their bank to take

them up in order to protect themselves in case of a squall. But if they know that wherever they may be found during the storm they can take that note and the man to whom it is tendered must accept it in satisfaction of his debt or his claim, they have no reason to hunt the central bank and call for gold, neither will they be left out in the storm without any means to protect themselves. As is said to me by the distinguished Senator from West Virginia [Mr. Goff], under such circumstances he would rather have the note than the gold; it is more convenient.

With no suggestion that the note would fail him, why would he ever go to hunt that which was more inconvenient and more difficult to take care of? The Chicago Tribune says:

[From the Chicago Tribune.]

BANKERS AGAINST BORAH PROPOSAL.—PLAN TO MAKE FEDERAL RESERVE NOTES LEGAL TENDER NOT LIKED BY FINANCIERS.—DEEMED FURE INFLATION.—PERMISSION TO LOCK UP NOTES AS LEGAL RESERVE WOULD DEFEAT ELASTICITY.

The amendment to the currency bill introduced by Senator Borah yesterday, proposing to make the Federal reserve notes legal tender for all debts, public and private, met with strong disapproval by Chicago bankin; interests. In all drafts of the currency measure beretofore it has been provided that the Federal notes be receivabl; for public dues, but not as legal tender for private debts.

To make the notes legal tender, and also make them available for reserves in banks, would result in pure inflation to the amount of the notes issued. The occasion for Federal notes is to meet emergencies, and with that understanding a small tax was provided and it was made obligatory upon banks receiving them to return them either to the Government or the issuing bank, thus retiring them after they had performed the emergency function for which they were issued. But to make emergency notes legal tender and permit them to be locked up as legal reserve would remove the feature of clasticity and the occasion for their creation.

BANK NOTES OF LEGAL TENDER.

National-bank notes are not legal tender and can not be counted in bank reserve. Still, the popular outcry against national-bank notes, and also the great volume of objections to them by bankers, has been their lack of the quality of elasticity. Buttressed by Government bonds and limited in the amount which could be retired monthly, these national-bank notes have been the butt of all objections to the present currency

bank notes have been the butt of all objections to the present currency system.

In 1896, when the Government's gold reserve was being depleted by the use of greenbacks to extract the metal from the Treasury, the then great outcry against the currency system focused around these United States notes. There are \$346,600,000 outstanding. They are redeemable in gold, with a reserve of \$150,000,000 as redemption fund. The greenbacks also are legal tender for private debts. The Borah resolution proposes to combine in the Federal reserve notes all the objectionable features of the national-bank notes and the greenbacks.

If the only difficulty be that suggested in this article, that could be controlled very easily. In the first place, you might provide against their use as reserves, or you might tax them beyond a certain amount, as the German Government does. The financiers of Europe have found no difficulty along the lines which this paper says the bankers feel that danger may lie.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Does the Senator from Idaho

yield to the Senator from Nebraska?

Mr. BORAH. I do.

Mr. HITCHCOCK. I feel that there is a great deal of force in the Senator's argument, and personally I felt very much doubt on that subject, but I think he should bear in mind that there is a difference between the function which these United States reserve notes are to perform and the function which is performed by our present greenbacks, which are also notes of the Government. The greenbacks, being a part of our permanent currency, have been made and are a legal tender; but the very argument that the Senator states may militate somewhat against his position. He states that if these notes were made against his position. a legal tender people having them will cling to them, and that will have a tendency to prevent them from coming back into the reserve banks for redemption. These notes, unlike the greenbacks, are supposed to be emitted to fill seasonal demands for extra currency, or emergency demands for currency, and it is very strongly desired that every influence should be brought to bear, when the demand subsides, to bring them back for redemption. If they are made a legal tender the very argument which the Senator suggests, that people may cling to them, is

somewhat against the process of contraction.

Mr. BORAH. Mr. President, if these notes are liable to stay out too long, if by making them legal tender it is calculated to leave them in the position longer than they should be, and thereby work inflation, there is a way to prevent that, and that is by taxing them if they are out too long, and let those who are getting the benefit by loaning them out pay for the expense of keeping them out too long, and not charge it up to those who are charged interest upon them when they borrow

them from the bank.

Another thing: If this is an emergency currency, there is an added reason, to my mind, why they should be legal tender, for

the reason that the moment they are issued, if there is an emergency and if there are squally times and people are uneasy, they will re-present them at once to get the gold and deplete the gold just as fast as they can, and they do not stay out to serve the purpose for which they were put out. That was the view of the president of the Bank of Germany, that when a crisis should come be wanted his notes to have such quality that they would not be invited to go back to the bank and hunt for gold. The reason the Bank of England made them a legal tender was to keep their individual holders from hunting gold,

which they wanted to hold in their bank.

If I had \$100 of this reserve money and I knew there was a panic brewing and the Senator from Nebraska knew the same thing, we would hunt a Federal reserve bank and get gold which would serve us while the squall was on; but if the storm is there and you have the money in your pocket and it serves every purpose which gold serves, then there is no occasion for you to

go and hunt gold.

Mr. HITCHCOCK. Mr. President-

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Nebraska?

Mr. BORAH. I do.

Mr. HITCHCOCK. The Senator's argument would be true if it were a fact that in the case of panic and stringency we have difficulty with our currency, but I think the Senator will not claim that to be a fact. The fact is that our stringencies relate only to the volume of currency. People were entirely satisfied during the recent panic to take bank notes which were not a legal tender and were just as content to receive bank notes as to receive legal-tender money. I do not think that our condition, either, is the same as is the condition of Germany, because there is a real scarcity of gold in Germany. Germany produces no gold. All the gold that Germany gets hold of she must get from the United States or from other gold-producing countries. She is practically compelled to pay a premium upon gold; her bank is engaged in a constant struggle for gold; but that condition does not prevail here. We are not compelled to resort to the same devices that the German national bank is compelled to

Mr. BORAH. Let me ask the Senator, would not the same principle which tends to invite gold to Germany and keep it there tend to hold it in the United States when it is already here?

Mr. HITCHCOCK. Yes; I presume that would be true to some extent, but I am pointing out to the Senator that the trouble in the United States has not been a scarcity of gold; it has not been a difficulty in securing legal-tender money. Our trouble has been more a bank trouble than a currency trouble. Our need has been to secure currency of any sort, and that is the need which this bill is primarily intended to satisfy

I am not prepared to say that I shall not vote for the Senator's amendment to make these notes a legal tender, but'I do not think that there is much force in the argument that they should be a legal tender for the purpose of keeping them among the people. I think that it is perhaps more an academic question than it is a practical question, in any event. I think there is force in the Senator's legal argument, and, for myself, I am a little averse to having the United States putting out its own notes which are not a legal tender and not as good as any form of money. The only justification for it is that this particular form of notes is, in fact, little else than bank notes. We call them Federal notes; we compel the reserve banks to redeem them, and we are only putting them out for a temporary purpose, which is the purpose for which the bank notes were

Mr. BORAH. Well, I think there is very much in what the Senator says that these are really bank notes. Fundamentally that would seem true, but you then must accept the proposition that you are loaning the credit of the Government to private Do you want to go on record as doing that?

Mr. HITCHCOCK. If the Senator will permit me to correct him there, the bill for which I stand does not create a private corporation, but it is a corporation controlled by Government

directors

Mr. BORAH. Of course I have constantly in mind the bill which seems more likely to pass, but the fact is that you must take one horn of the dilemma or the other; you must either say that these are Government notes—and if you do, it seems to me that you must endow them with all the functions of money which the Government can give them—or you must take the other view of it, that they are bank notes, and then you are confronted with the proposition that we are engaged here in loaning the credit of the Government to private corporations. As I said a manent ago, to my mind, that is a vicious practice.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Kansas?

Mr. BORAH. I yield.
Mr. BRISTOW. Do not the authors of the Owen bill admit that it is loaning the credit of the Government to private corporations? Is that disputed?

Mr. BORAH. I do not know whether it is admitted or not,

but it will not be any stronger after it is admitted.

Mr. President, the objection to making paper money redeemable in gold, the obligation of the Government and redeemable by the Government legal tender, is to my mind based largely on prejudice, or, rather, perhaps I should say because of the failure to discriminate or distinguish between irredeemable paper money and paper money redeemable on demand in coin. The experience of men with irredeemable paper, such as our colonial money or French assignats or the money at one time of Argentina, has been so full of misery and disaster that we pass its sins and vices over to that money which is the mere representative of coin, and as such should perform as agent all the functions of its principal. Put out to do the service and to aid the cause of its redeemer, it should be endowed with every virtue and every faculty which the reedemer and which a sovereign Government can give it. It should carry no suggestion to its holder when the storm seems to be approaching that it may be rejected or that an emergency may arise in which it will not serve his cause. There is no more reason for making paper money issued by the Government and redeemable in gold limited legal tender than there is in making gold limited legal tender. It is the aid and representative of gold; it is its convenient messenger and agent, and the messenger or agent should not go forth with a lurking limitation behind his ability to represent the principal.

I have not and I am not going to discuss another objection to making paper money legal tender, an objection which we all perfectly understand. It is an old story. It is a subtle form of insatiable greed, a never-ending desire for special advantage and special favor. Such a discussion would only lead to revealing again how much stronger in some quarters is the desire for gain than the desire to serve the public. But in the face of the experience of all the great financial nations of the earth, the experience of those nations where panics are no longer anything more than a reminiscence, in view of the manifest justice and equity of the proposition we ought to write into this law without hesitation and without division in this body in plain and unmistakable terms that that which the Government puts out as money or to serve the purposes of money shall have all the funcmoney or to serve the purposes of money shall have all the runctions and qualities of money which a sovereign government can give it. Unless we do this, this measure will go out to the world wearing the brand which so many measures touching the currency have worn before, of special privilege, the taint of cowardice, the shuffling pretense of what was promised to be a clean, broad measure in the interests of the whole people.

clean, broad measure in the interests of the whole people.

Mr. President, the last 20 years have been portentious years in the history of this Republic. One hundred more of the same drift, and whatever else we may have we will not have a representative Republic. Centralization of industry, centralization of commerce, centralization of banking, centralization of credits, and all in private hands, and the Government yielding to them little by little from time to time its sovereign powers and duties. It may all be in obedience to some sinister law of human progress, but it is to my mind at variance with selfreliant, self-respecting, free, and independent citizenship—the only guaranty under heaven or among men for a Republic. "Is there," asked Lincoln upon an important occasion, "in all republics this inherent and fatal weakness? Must a government of necessity be too strong for the liberties of its own people or too weak to maintain its own existence?" The former can never be true so long as the proper powers of government remain under and in the control of the people. The latter will inevitably be true when these powers have been yielded up to the demands of the few.

There is no inherent weakness in republics. A representative republic is the wisest of all governments. It meets every demand, and responds to every hope and purpose of a justice-loving, orderly, self-respecting, moral people. But it can not be fitted to classes.

It can not adjust itself to an industrial life grounded in inequality; it can not be fitted to monopoly; though strong enough to destroy, it can never be powerful enough to regulate monopoly. These things we cught to realize and cease our efforts to adjust our Government to the centralizing, monopolizing tendencies of business and compel business to adjust itself to the fundamental principles of democracy. This Government should assert its power and exert its prerogatives, and

nowhere is it more essential and vital that it do so than in the complete regulation and control of the money and currency of Everything that performs the functions of money, its people. whether technically money or not, should come under this control. This is the first and indispensable step toward the attainment of that power upon the part of the Government which will enable it to deal with the great financial and industrial combi-nations which now exist. Unless we take this step all efforts to regulate and control other matters will prove futile. should begin now. Every dollar of currency and money should be coined and provided for and controlled exclusively by the Government and then leave to private institutions and individuals to establish credit upon their own responsibilities.

The PRESIDING OFFICER. The question is on the amend-

ment of the Senator from Nebraska [Mr. HITCHCOCK].
Mr. HITCHCOCK. Mr. President, I should like to have the Secretary read the amendment from the desk.

The PRESIDING OFFICER. The Secretary will state the

amendment.

The SECRETARY. In the amendment proposed by Mr. Owen, in section 4, on page 12, beginning at line 10, it is proposed to strike out "shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and de-mands of other member banks," and in lieu thereof to insert:

Each member bank shall be entitled, as a matter of right, to the rediscount of eligible paper, to the full amount of its capital stock, upon the lowest current rate of discount, and no member bank shall be permitted to discount an amount of paper exceeding the amount of its capital stock except upon payment of a higher rate of discount, the increase in rate of discount to be 1 per cent for an additional 50 per cent of discounts or part thereof and 2 per cent for all in excess. In no case shall a Federal reserve bank discount paper for a member bank in excess of twice the amount of its capital stock without special authority by the board.

Mr. KERN. Mr. President, I suggest the absence of a

quorum. The PRESIDING OFFICER. The Senator from Indiana suggests the absence of a quorum. The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

	Com	Norris	Citmonoma
Ashurst	Goff		Simmons
Bankhead	Gronna	O'Gorman	Smith, Ariz.
Borah	Hitchcock	Oliver	Smith, Ga.

Gallinger	Nelson	Shively	
CHAILLIANGE	ATGROVAL	evere i way	

The PRESIDING OFFICER. Seventy-three Senators have answered to their names. A quorum of the Senate is present.

Mr. HOLLIS. I move that the amendment of the Senator from Nebraska be laid on the table.

Mr. BRISTOW. I hope the Senator will withhold that motion for a moment.

Mr. WEEKS. I wish to discuss the amendment for a very few moments.

Mr. HOLLIS. I withdraw the motion.

Mr. WEEKS. I shall certainly keep within the limitation imposed in the unanimous-consent agreement. I should like to explain what this amendment means, because it is pretty important, and I think many may feel that it is an unwise provi-sion unless they have all of the arguments advanced which can be advanced to sustain it.

It is proposed that a member bank desiring rediscounts may go to its reserve bank and, up to a certain limitation, which the capital of the bank, obtain rediscounts as a matter of right. It must be remembered that, among the powers granted to the reserve board, it is to have the power of determining and defining the character of notes which may be rediscounted or which may come within the provisions of the rediscount paragraph of the bill. That is an important power to place in the hands of the reserve board.

It is a pretty difficult thing to define what commercial paper is. It is certainly paper that has originated as the result of a commercial transaction. If the directors of the reserve banks knew the makers of paper under such circumstances and the persons on whom the paper was drawn, they would have no

difficulty in determining whether or not it resulted from a commercial transaction.

For instance, if the paper were in the form of a bill drawn by the raiser of cotton in the South on a cotton broker in the North to whom the cotton had been sold, or through whom it had been sold to a mill, that would be a commercial bill in its best form. Then, when the mill had obtained the cotton, and had converted it into cloth, and had sold that cloth to a commission house, and had drawn for the value of the cloth, that would be a commercial transaction in its best form. If the commission house sold the cloth to a merchant on 30 or 60 days' credit and drew for the money, that, again, would be the best form of a commercial transaction.

That is the kind of paper which it is intended shall be rediscounted by banks under the provisions of this bill. In some way, in some form, it will be the duty of the reserve board to

define and determine what that paper is.

The Hitchcock portion of the Banking and Currency Committee contend that that having been done, it is important that the member bank shall have the right to rediscount that kind of paper up to a certain limitation. If it has not the right to do it, it can not tell how far it can safely accommodate its customers. If it has no paper rediscounted, and it knows that it can rediscount up to some limit, then, when a customer who is entitled to additional credit comes and applies for it, the bank will without hesitation give the credit. If, however, it feels that when it is to present to the reserve bank paper that is entitled to rediscount, and that comes within the qualifications imposed by the reserve board, it can not obtain a rediscount, there will be hesitation which will in a way nullify the effect of this provision in the bill.

It may be possible that we ought not to allow a bank to rediscount as much as its capital stock. Possibly it ought not to discount more than one-half its capital stock; but I think it is a reasonable limitation to make it the amount of its capital stock.

We go further than that. If the bank wishes to rediscount additional paper, it may do so by paying a higher rate of interest. In other words, if a customer really is entitled to credit, and will be embarrassed if he does not obtain credit, he should be willing to pay for it. Therefore, the bank rediscounts up to one-half of its capital stock and is charged 1 per cent more for that rediscount. If there are additional demands, it may rediscount up to twice its capital stock by having charged it on the second half over the original capital stock 1 per cent more. In other words, it pays 2 per cent more for the rediscount.

That seems to me to be reasonable, because, under such circumstances, if a borrower needs additional accommodation, he should be willing to pay an additional rate of interest.

Mr. NORRIS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I do.

Mr. NORRIS. I wish to inquire of the Senator, as I inquired of my colleague before we adjourned for supper, in regard to the particular clause included in this amendment which says that the member bank shall, as a matter of right, be entitled to this discount.

Does that mean, or am I correct in my construction of it that it does mean, that a member bank is entitled to rediscount at a Federal reserve bank, provided it presents that is defined in the amendment as eligible paper, to the extent of the amount of its capital stock without regard to the value of the paper?

Mr. WEEKS. Mr. President, the value of the paper must be determined by its character. The directors of the reserve banks are not going to know the maker of the paper or the person on whom it is drawn, who accepts it. They are going to loan on the credit of the bank. The reserve board and the reserve banks are going to have every opportunity to determine the strength of the banks which are members of the organization. They will have ample opportunity to investigate and to examine, and from time to time that will be done, so that they will be sure that the bank is sound, or they should be sure. Then, if the paper comes within the conditions which will be imposed by the reserve board, we contend that it should have the right to rediscount up to the capital of the member bank.

Mr. NORRIS. The Senator does not directly answer my question. I wish to say to him that I am very much in sympathy with this amendment and favor it very much, with the exception of that one proposition-that it seems to me it takes away from the directors of the regional bank all discretion, to the extent named in the amendment, as to the quality, the

value of the paper presented.

Does the Senator mean to say that these banks, in their ordinary business, will not have the right to inquire of a member bank or to investigate the quality of paper to ascertain whether it is good or worthless?

Mr. WEEKS. If the paper is of the qualified kind, as pre-

scribed by the reserve board, of course it will be good paper.

Mr. NORRIS. Let us see if it will. Take the illustration the Senator gave, where the merchant sells the cotton to the dealer. Suppose he does that. Suppose he sells the cotton on 90 days' time and he gets the paper for the cotton, and two days after the cotton is sold the cotton burns up; and then suppose the man who has bought the cotton is not worth a dollar I want to ask the Senator to assume, for the purpose of the illustration, that the bill or the note, whichever it may be, is absolutely worthless, and that if you had to sue on it in court you could get nothing for the judgment; that the debtor That paper might be eligible and yet was execution proof. might be absolutely valueless.

I should like to know what is the intention of this amendment. Is it the intention that the member bank, without regard to the value of the paper it presents, is entitled to rediscount to the

amount of its capital stock?

Mr. WEEKS. Mr. President, the proposition which the Senator makes is hardly probable under any circumstances. In the first place, the cotton would be insured; and if it burned, the insurance would be available to pay the draft. The grower of the cotton is a planter in the South. His whole value does not depend on the cotton that he ships. More than likely the shipper of the cotton is a cotton factor in the South, and he has other resources. So it would hardly be possible that he would be without value. It is hardly probable that the cotton broker would not have some value in himself. Generally speaking, they are financially well equipped.

But even supposing all the things happened which the Senator has suggested, then the reserve bank, in inquiring about the paper, if it saw fit to do so, would say, "It is not qualified paper; it has ceased to be qualified paper, because the cotton has been burned, and the transaction is not of the character con-templated in the law." But even then suppose the reserve bank did discount the paper. It has the indorsement of the

member bank.

Mr. NORRIS. I understand that. I admit it is an excep tional case. I think those who favor this amendment ought fairly to answer the question I am trying to put. We know there is paper that is worthless. There have been thousands and tens of thousands of judgments and millions of dollars in judgments on paper that would come within the terms of these bills upon which not a dollar could be collected. That has happened, and it will happen again. But what I want to know is. Do those who propose this amendment mean that when the bank presents in form a note or a bill that complies with the law the discretion to reject it on the ground that the paper is no good is taken away from the directors? In the case I put, if it was burned it was a total loss and the man who owed the bill was worthless and judgment and execution proof. That would be an illustration. There are such cases. Have they not a right to inquire whether the paper is good or bad?

Mr. WEEKS. If the provision as presented by the Senator from Nebraska became a law and I were the director of the reserve board, I should say that was not qualified paper as intended by the law, and I would reject it. That would be my

answer to the Senator.

Mr. NELSON. Will the Senator yield for a moment? Mr. WEEKS. I yield to the Senator from Minnesota. Mr. NELSON. I think the meaning is that if the board find

that the paper is of the right kind, then they can not refuse to grant a discount, but it does not take away the power from the board to pass on the paper. It simply means that it is the intention to say to them, "You shall not show any favoritism, and if you, representing the member bank, know the paper that the board wants to be good paper in every respect, you can not say, 'We will not discount the paper.'" The reason why that was put in was to prevent favoritism and discrimination between banks.

Mr. NORRIS. I want to say to the Senator from Minnesota. if the Senator from Massachusetts will permit me, that he has given a very frank answer. That is his opinion, and if that is I can not put that construction on the bill myself. It seems to me that it will not bear that construction. I have talked with members of the committee, and I judge from what they said that they intended that it was to take away the discretion of the board to pass on the value of the paper and when they presented notes that were in form and complied with the law, as

far as the value of those notes was concerned, they had no right to investigate it. If the Senator will permit me, let me read the provision:

And each member bank shall be entitled as a matter of right-

As a matter of right-

to the rediscount of eligible paper to the full amount of its capital.

As I take it, eligible paper is only the first step. It must be eligible in order to have any legal right to take it even though they wanted to take it. They would have no legal right to take it unless it is eligible. There is defined elsewhere the particular kind of paper that is eligible. The officers of the bank would violate the law if they accepted any paper that was not eligible, although the man who signed it might be worth forty times the face amount of the note or bill. But after it is eligible, then they determine whether it is good, I suppose. In the ordinary course of business, if they know the bank is good, they will take it on the strength of the bank, and ninety-nine times out of one hundred that will be all right. But I do not believe we ought to take away from them by law the right to say we will investigate and see whether this paper is any good and we will not give you a loan unless it is good.

Mr. BRISTOW. Mr. President—
Mr. WEEKS. I yield to the Senator from Kansas.
Mr. BRISTOW. I think the question of the Senator from Nebraska is a technical one, and, as far as the practical operation of the law is concerned, it is of no consequence.

Mr. NORRIS. Then, what is the value of the provision?

Why do you put it in here?

Mr. BRISTOW. If the Senator will give me the time, I will explain the value of it. I think it is a violent presumption to suppose that when a note is not worth anything, is absolutely no value, the regional bank is compelled to take it. believes that any such construction as that could possibly be placed upon the language. If it is not eligible, it is not useful;

it is not good for anything.

Mr. NORRIS. It is eligible.

Mr. BRISTOW. I do not think so. I think the Senator is mistaken about that. A bank at McCook, Nebr., has an account with the bank at Omaha and it wants a rediscount. The bank at Omaha that rediscounts the paper for the bank at McCook knows nothing about that paper except the recommendation given by the bank at McCook. I am speaking of the practical operation of business. The bank at McCook will telegraph to Omaha for \$50,000 and the \$50,000 is sent, and on the same day the bank at Omaha gets \$50,000 worth of paper. The bank at Omaha does not presume to pass on the quality of the paper, if I may have the attention of the Senator from Nebraska.

Mr. NORRIS. I am listening to every word the Senator says. Mr. BRISTOW. The bank at Omaha does not pass or single note as to the value or responsibility of the signer. The bank at Omaha does not pass on a takes whatever is sent. If the bank at McCook sends notes that are no good, and the bank finds out it is being imposed upon, it does not discount its paper, and it would not transact business with them any more. If a member bank practiced that kind of a fraud upon the regional bank, that bank then becomes a discredited bank, and the Federal reserve board has power to discipline or punish them or put them out of the association, or the Government can close it up.

Mr. NORRIS. Does the Senator think that would ever

Mr. BRISTOW. If the bank was not good, of course it would. Mr. NORRIS. I thought from what the Senator said a while ago, it never took the paper into consideration, and that that never could happen. That is just where it would happen under the provision.

Mr. BRISTOW. If the bank is not a creditable bank, then, of course, the reserve bank will refuse to rediscount its paper

because it is not doing a creditable business.

Mr. NORRIS. And it finds out it is not a creditable bank by the operation of the very amendment that you are now seek-

Mr. BRISTOW. Certainly. The Senator may have the idea that whether there are 8 or 12, the regional bank is going to investigate the individual character of the paper that is sent to it, but it is a ridiculous idea. That never will be done. When that bank, with all its assets, stands behind its obligation with the regional bank, and that obligation does not exceed its capital stock, if it is not good then it ought not to be admitted

to membership in the association.

Mr. NORRIS. That is true. There is not any doubt about that. I agree fully on that point. I was seeking to ascertain how it would operate. I believe the Senator would also agree that the particular provision he is now seeking by this amendment to put into the bill would not be necessary one time in ten thousand. It would not be necessary if the officials of the regional bank honestly and fairly performed their duty. Is not

Mr. BRISTOW. No; I would not say that.

Mr. WEEKS. When the Senator from Nebraska and the Senator from Kansas have completed their colloquy, I should like to conclude my statement.

Mr. NORRIS. We are, of course, at the mercy of the Senator

from Massachusetts.

Mr. WEEKS. Mr. President, I want to say once more that eligible paper is paper that arises as a result of a commercial transaction, and that it will be so defined by the reserve board. When a member bank goes to the reserve bank to rediscount paper and has not rediscounted up to its capital, that paper will be rediscounted as a matter of course, provided there has not something developed similar to the rather preposterous proposition advanced by the Senator from Nebraska, which would make the paper ineligible. If I were a director of that bank and the conditions obtained which he has named, I should say the paper was ineligible. But it is simply extending the credit of member banks, and through the member banks to the customers of the member banks.

It is not an unusual proposition to say that the reserve bank shall be compelled to rediscount a certain amount of paper for a member bank. That is the process followed in ordinary commercial business. A merchant or a manufacturer goes to a bank and makes a trade with the bank to do certain things. We will say that he agrees to leave with the bank \$10,000 without interest as his deposit, and he will keep an average deposit of \$10,000 on condition that the bank agrees to loan him, at any

time he needs it, \$50,000.

The conditions between the bank and the customer are exactly the same as the conditions which will obtain between the reserve bank and the member bank. The bank in this case knows all about the commercial credit which should be extended to the customer. He has been furnished the financial statement, he has examined that financial statement, and he is satisfied that the customer makes a good note up to \$50,000. Therefore, on condition of his leaving \$10,000 without interest in the bank, he will loan him at any time he wants it \$50,000. That is done every day and every hour in every day, and probably every minute in every day, by every large commercial bank in the country. The borrower comes in; he does not take the trouble even to go to the officers of the bank, but pushes his paper through the teller's window and receives the money as a matter of course. That is practically the same process which we contemplate here. If the member bank is being maintained under conditions which examinations should disclose, and if it has paper which is qualified under the law, then it should have the right to get the rediscounts up to a limitation. There may be disagreement about the limitation; possibly we have placed it too high. There might be arguments on both sides of that question, but that the bank shall have the right to know what it can get from the reserve bank, and in that way be able to know how far it can accommodate its customers, is without question in my mind. That is the purpose of the amendment which has been offered by the Senator from Nebraska.

Mr. NORRIS. Before the Senator sits down, let me ask him a question. Does the Senator have any idea that there will be any necessity for this amendment, except in cases where the officials of the regional bank are trying to impose upon some

member bank?

Mr. WEEKS. I am not disposed to leave too much authority to boards.

Mr. NORRIS. I understand that. Mr. WEEKS. In the Navy—

Mr. NORRIS. I should like to have the Senator answer my

Mr. WEEKS. I am going to answer it. In the Navy they define a board as a long, thin, narrow, wooden thing. While a board is not always of that character, I do not want to leave any more discretion in the reserve board which we are authorizing by this bill or in the board of directors of the reserve

banks than is absolutely essential.

I should like to put provisions, as much as possible, into the law defining their duties and make it a bank of laws rather than a bank of individual judgment. If we qualify the paper and qualify the character of the bank which indorses the paper, and know every day, or as frequently as we want to see what the condition of the bank is, then we have it about right. I do not say that the reserve board, if we did not have this restriction in the law, would impose on the banks. Perhaps they would not, but they would be using their judgment at the same time when it would not be necessary, and possibly

they might embarrass a bank extremely when they intended to do exactly the right thing. I want these member banks to know what they can do, and to know it with certainty; to be able to go somewhere and get the accommodation which will enable them to accommodate their customers who are entitled to it. If they have to depend on the will or whim of the directors of the reserve bank, they can not know. Therefore I think this amendment is justified.

Mr. SHERMAN. May I inquire of the Senator from Massachusetts as to eligible paper? Do I understand that eligible

paper means necessarily paper properly secured?

Mr. WEEKS. I certainly think so. I think the Federal board will define what it is and will define it in such way that it must be paper that is secured as a result of a commercial transaction

Mr. SHERMAN. Would there be any objection to writing that in? It would require only a couple of words. Would it

impair the strength of the amendment?

We asked a dozen or fifteen banking men to Mr. WEEKS. give us a definition which could limit the kind of paper which we wanted to cover by this definition of commercial paper, and no one of them did it. I do not know just exactly how the reserve board will finally conclude to define it, but I assume they will in some form, so that there will be no question about what eligible paper is.

Mr. BRISTOW. I will state that the proposed law provides that the Federal reserve board shall have the right to determine or define the character of the paper that is eligible for discount.

Mr. SHERMAN. Mr. President, that is the very thing I am trying to get at. I do not want to impose any more duties on the Federal reserve board than we have to impose. They will have enough to do likely to keep them out of mischief. If the words "properly secured" would relieve them of the duty of making an additional rule, we would thereby lighten their burden and make exact the law. We are making the law. We are not, so far as we can help, engaged in delegating a power to some board over which we will have no authority after we have created it.

Mr. BRISTOW. Does the Senator from Illinois think that

this would be unsecured paper?

Mr. SHERMAN. I understand it is paper coming from a member bank and it is rediscounted paper, all of it. We do not change the character of the solvency of the maker when the maker of the note or collaterals are good. If there were no banks that made mistakes we would never have any failures. That is one thing that the Senator from Nebraska probably is not satisfied about. This rediscount paper is only described here as eligible paper. That may be a technical meaning in banking circles, around law offices, and with the fraternity we are pledged to deal with a great part of the time. I have not a very clear definition in my mind of what eligible paper is. I know what an eligible candidate is. He is one qualified to run provided he has got enough backing. I want to know if this eligible paper comes under that same definition, if it belongs to that class, provided it has the right kind of backing in the solvency of its maker.

Mr. WEEKS. We provide that it must be commercial paper resulting from a commercial transaction. Then we leave it to the reserve board to make rules and regulations which will

define the kind of paper which shall be accepted.

Mr. NORRIS. Will the Senator permit me there?

Yes. Mr. WEEKS.

Does the board of directors of the regional Mr. NORRIS. bank have the right when this paper is presented and the de-mand made by the member bank to inquire as to the solvency of the maker?

Mr. WEEKS. Of course they would. Now, let me ex-

Mr. NORRIS. Let me finish the question. If that be true, then the purpose which you have here could absolutely be avoided in every instance by the board of directors or managing officers of the bank by simply saying to the member bank, "We reject your application for the reason that your paper is not good; these men are not solvent." That gives them the discretion, and if you do not take that discretion away from them, so that they can get it without exercising that discretion, then you have not accomplished anything by your amendment.

Mr. WEEKS. Now, Mr. President, let me explain further to the Senator from Nebraska. Very frequently brokers make an arrangement similar to the arrangement which I have described might be made by a merchant. The broker arranges with his bank to loan him \$100,000 on collateral at any time he may wish the money, and the kind of collateral is defined, such as railroad stocks and preferred stocks of industrial concerns.

The broker wants to borrow \$50,000 and he sends over the stipulated amount of collateral, railroad stocks and industrial preferred stocks, but among those industrial preferred stocks is a stock which the banker knows to be cornered in the market, he knows that it has not a broad market, and, therefore, if he wished to sell it he could find no good market for it. Generally he would send that stock back to the broker, saying to him: "I do not like that particular stock you have sent over; it comes within our general agreement, but I do not like to have that stock in the bank. Send me over something else." Undoubtedly, under such circumstances, the reserve bank would say to the member bank: "That note of yours seems to comply with the law, but the maker of that note is making notes and they are being sold here, there, and everywhere; in other words he is putting out too much paper. I wish you would send me some other paper in place of that." Undoubtedly that is what would be done

Mr. NORRIS. There they would be acting in good faith. presume the purpose of inserting this amendment here is with the object of permitting the bank to get the money regardless of what the officers of the reserve bank may say. doubt but that, either with or without this amendment, the operation which the Senator has pointed out would be followed in nine hundred and ninety-nine cases out of a thousand; but if this amendment were not incorporated in the bill, there would not be one case in ten thousand where there would be any necessity for it; and if it were incorporated, there would not be one case in ten thousand where it would come into active operation. I concede that, but you have seen fit to put it in. If it has any virtue, then, it seems to me, it is here for the purpose of permitting a member bank to get money when the reserve bank for some motive, whatever it may be, is inclined not to permit that bank to get what it is honestly, rightfully, and legally entitled to. As soon as you give them a discretion, such as you say they will have, then, if they are inclined to try to injure a member bank, they will do so by virtue of the discretion lodged in them. So it seems to me that if the construction which the Senator gives it is the proper one, it would practically be nullified.

Mr. WEEKS. Mr. President, I entirely disagree with the Senator from Nebraska. I do not think what he has said would happen in any form once in a life time, and we can not possibly

legislate against an impossible condition.

Mr. NORRIS. That is just what the Senator is trying to do, I think, in putting that amendment in the bill. He is trying to legislate against what would probably never happen; but it would bring into it the principle that you could say to one man who has money, "You loan this to another man, regardless of the value of the security which he puts up to get it."

Mr. BRISTOW and Mr. HITCHCOCK addressed the Chair.

Mr. WEEKS. I yield the floor, Mr. President. The VICE PRESIDENT. The Senator from Kansas.

Mr. President, I desire to say to the Senator Mr. BRISTOW. from Nebraska that I want this amendment in the bill, because it gives the bank the right to get the money, for the very reason he suggested, namely, that it takes from the bank the power If that bank is not good, if that bank is practically a fraud in the conduct of its business, then that fact should be reported to the Comptroller of the Currency, and the bank should be disciplined according to law, and of course

I do not want the regional banks to have the power to say to one bank. "We will not accept this paper," and, as a result, refuse that bank the credit to which it is entitled. That very

power is the power I am seeking to limit.

Mr. NORRIS. Mr. President, the Senator from Kansas is very frank and he makes plain to me what his intention is and what his theory is, but it is absolutely different from the construction placed on this amendment by the Senator from Massa-

Mr. BRISTOW. It may be different in the mind of the Senator from Nebraska, but I do not think that it is in the mind of

anybody else.

Mr. NORRIS. It differs from the construction placed upon it

by the Senator from Massachusetts.

Mr. BRISTOW. The Senator from Massachusetts and myself are in absolute accord. We are undertaking to accomplish exactly the same thing and we have used the same language. We believe absolutely alike in regard to it.

Mr. NORRIS. You have undertaken to use, and do use, the same language, but the Senator from Kansas says that this will take away the discretionary power of the board of directors. That is what he wants to do Mr. BRISTOW. Exactly.

Mr. NORRIS. While the Senator from Massachusetts says that it will not take away the discretionary power and they will have a right to say "We want real security." That is absolutely the reverse of the construction which the Senator from Kansas places on it. I believe the Senator from Kansas has put the right construction on it, as I understand the matter,

and I agree with him.

Mr. PAGE. Mr. President, this discussion has opened up some fresh points in reference to this bill, about which I should like some information. So far as the country banks in my State are concerned, they have very little, indeed, of the kind or class of paper described by the Senator from Massachusetts [Mr. Weeks]. We do not have bills of exchange drawn against actual existing values, except now and then, perhaps, on a little lumber, sometimes on a carload of potatoes, or sometimes on a carload of hides. Those bills are almost all drawn either on 5 or 10 days' sight, and very rarely for more than 30 days. I am, in my own mind, trying to see how the country banks of my State can avail themselves of the benefits of this bill in case

our national banks shall enter this system. I confess I do not understand the meaning of this language:

The rediscount by any Federal reserve bank of any bills receivable-

I can not understand why the words "bills receivable" should be limited in the way they are limited by the Senator from Mas-We regard bills receivable as promissory notes. Take, for instance, a note signed by a merchant who goes to Boston to buy his goods. He wants to get cash so as to pay cash for his goods in order to get the discount, and he comes to the bank with a thousand dollars of town bonds-the very best class of securities—and says, "I want my money on this col-lateral." Now, I want to know, if the Senator from Massachusetts is correct in his definition of the meaning of these bills receivable, why the term "bills receivable" is used on page 35?

Mr. WEEKS. I did not intend to limit what the definition of the reserve board would be as to commercial paper. I said the ideal commercial paper would result as I instanced by the illustration which I gave, but that would not forbid some other form of paper being commercial paper, coming within the definition which the reserve board will give. For instance, a farmer might be sowing 10 acres of vheat and expect a harvest from it, and he might draw on his bank for six months or give a note for six months, to be paid when the wheat is harvested and marketed. That might be within the definition which the reserve board will impose as to commercial paper and that would come within the limitations which the Senator from Vermont suggests. I am not attempting to cover all of the limitations which the reserve board may impose or define as to commercial paper; I am simply giving what I consider an ideal definition of commercial paper.

Mr. PAGE. Mr. President, with that understanding I feel perfectly content; but I was trying in my own mind, to conceive why this language should be used if you meant to restrict it to the ideal paper, because you use the language "bills receiv-

able and domestic and foreign bills of exchange."

The VICE PRESIDENT. The question is on the amendment of the Senator from Nebraska [Mr. Hitchcock].

Mr. SHAFROTH. I move that the amendment offered by the Senator from Nebraska be laid on the table.

Mr. HITCHCOCK. On that I ask for the year and nays.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on the motion of the Senator from Colorado [Mr. SHAFROTH] to lay on the table the amendment proposed by the Senator from Nebraska [Mr. Hitchcook]. The Secretary will call the roll.

Mr. SHERMAN. Mr. President, before the roll is called on

this amendment-

The VICE PRESIDENT. The Chair will be compelled to rule that the motion is not debatable.

Mr. SHERMAN. Very well, I can be heard later.

The Secretary proceeded to call the roll. Mr. JACKSON (when his name was called). I inquire whether the senior Senator from West Virginia [Mr. Chilton] has voted?

The VICE PRESIDENT. The Chair is informed that he has not.

As he has not voted and I have a general Mr. JACKSON. pair with him, I withhold my vote.

Mr. NELSON (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. BACON]. transfer that pair to the junior Senator from Wisconsin [Mr. STEPHENSON] and vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from California [Mr. Perkins].

I transfer that pair to the senior Senator from South Carolina [Mr. TILLMAN], and vote "yea."

Mr. SMITH of Arizona (when his name was called). I announce my pair with the Senator from New Mexico [Mr. Fall].

If he were present, I should vote "yea."

Mr. STERLING (when his name was called). nounce my pair with the senior Senator from Louisiana [Mr. Thornton] and the transfer of that pair to the junior Senator from California [Mr. Works]. I vote "nay." Mr. REED (when Mr. Stone's name was called).

announce the necessary absence on account of illness of my colleague [Mr. Stone]. He is paired with the Senator from Wyoming [Mr. CLARK]. If my colleague were present, he would vote "yea."

Mr. SHAFROTH (when the name of Mr. Thomas was called). I desire to announce that my colleague [Mr. Thomas] is absent on account of illness and that he is paired with the junior Senator from Maine [Mr. BURLEIGH]. If my colleague were present, he would vote "yea."

Mr. WALSH (when his name was called). I have a general pair with the Senator from Rhode Island [Mr. Lippitt]. He appears to be absent from the Chamber, and I therefore with-hold my vote. If I were at liberty to vote, I should vote yea."
The roll call was concluded.

Mr. CRAWFORD (after having voted in the negative). I inquire whether the Senator from Tennessee [Mr. Lea] has voted?

The VICE PRESIDENT. The Chair is informed that he has not.

Mr. CRAWFORD. I have a general pair with that Senator,

and in his absence withdraw my vote.

Mr. BRISTOW. I desire to state that the Senator from Wis-Mr. BRISTOW. I desire to state that the Senator from Wisconsin [Mr. La Follette] is unavoidably detained from the

Chamber. If he were present, he would vote "nay."

Mr. WARREN. My colleague [Mr. CLARK of Wyoming] is detained unavoidably from the Chamber. He is paired with the Senator from Missouri [Mr. STONE].

Mr. MYERS. I have a pair with the Senator from Connecticut [Mr. MCLARK]. In his absence I withhold my vote. If at

Mr. MYERS. I have a pair with the Schator from Connecticut [Mr. McLean]. In his absence, I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. MARTIN of Virginia. The senior Senator from West Virginia [Mr. Chilton] is unavoidably absent. He is paired with the junior Senator from Maryland [Mr. Jackson].

Mr. KERN. I desire to announce that the junior Senator from Geograph [Mr. Sayrill] is pravaidably absent and is mired.

from Georgia [Mr. SMITH] is unavoidably absent and is paired with the senior Senator from Massachusetts [Mr. Lodge]. If he were present, the Senator from Georgia would vote "yea."

The result was announced-yeas 37, nays 31, as follows:

YEAS-37.

Culberson

Mr. HITCHCOCK. Mr. President, I now move to increase the provision in the Owen bill for a gold reserve against notes from 33½ per cent to 45 per cent. I send the amendment to the desk to be read.

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. On page 39, in line 3, after the word "and" and central reserve cities that and before the word "its," it is proposed to insert "a reserve in or a total of \$1,854,827.52.

gold or gold certificates of not less than 45 per cent against," so that, if amended, the paragraph at the top of page 39 will read:

Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and a reserve in gold or gold certificates of not less than 45 per cent against its Federal reserve notes in actual circulation, etc.

Mr. HITCHCOCK. Mr. President, I understand the Senator from Illinois [Mr. Sherman] desires to address the Senate.

shall be very glad to yield to him.

Mr. SHERMAN. Mr. President, before we start toward the conclusion of this bill I wish to place in the Record the practical effect it will have on the areas in which the three central reserve cities are located.

I have taken the divisions of the Census Bureau. They are the North, the South, and the West.

The North contains the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

The South contains the States of Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas, and the District of Columbia.

The West contains the States of Montana, Idaho, Wyoming,

Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California,

Following the subdivision of the States, and basing the calculation on the last report of the Comptroller of the Currency, dated November 20, 1913, I consider, first, the capital and surplus in the northern subdivision.

The capital consists of \$735,504,616, the surplus of \$562,776,-774.16. In this division the total capitalization and surplus is \$1,298,281,390.16. Under the proposed bill it would require 6 per cent of the capital and surplus to capitalize all of the regional banks in the northern division, or \$77,896,883.41

The southern division contains capital in the national banks of \$213,858,535, and a surplus of \$112,524,659.95, making a total capitalization and surplus of \$326,383,194.95. The Owen caucus bill would require from this division the compulsory contribution of \$19,582,991.70 as capital to the reserve banks that would constitute the system for that area.

The West contains a capital of \$109,310,105, with a surplus of \$53,665,521.77, making a total capital and surplus of \$162,975,-626.77, of which 6 per cent would be required for the capital of the regional banks, making a total capitalization for the Western States of \$9,778,537.61.

I will now put it in another way.

Under the bill named, the Northern States would contribute 72.7 per cent of the total reserve bank capitalization. If the bill were applied in the actual administration of affairs, the South would contribute 18.27 per cent of the total capitalization of all the national banks in the country. The Western States subdivision would contribute 9.10 per cent of the capital.

Passing from the capital and surplus that will together furnish the capitalization of the proposed regional banks, of whatever number they may be—say, a minimum of 8 or a maximum of 12—to the total deposits, I consider first the country banks.

The northern country banks have total deposits of \$2,569,-

501,425.01. A 5 per cent contribution of these deposits from the northern area would require, from the country banks alone, \$128,475,071.25.

The South has deposits of \$730,200,381.25. Contributing a like proportion, 5 per cent, it would give to the deposits of the regional banks in that area \$36,510,019.06.

The West, out of its deposits of \$338,690,242.41, would contribute a like 5 per cent, or a total of \$16,934,512.12.

These are entirely the figures of the banks outside of the reserve and central reserve cities.

In the northern division the total deposits in the reserve and central reserve cities, less the time certificates, making what is left the demand liabilities, aggregate \$1,903,533,901.19; and in this area there would be contributed, under the provisions of the bill named, 6 per cent, making a total of \$114.212,034.07 involuntarily contributed from those cities in that area.

The South would contribute, from its total of demand liabilities in its reserve and central reserve cities of \$107,863,039.97, per cent, or a total of \$6.471,782.40.

The West would contribute, from her demand liabilities in

its reserve and central reserve cities of \$244,878,104.53, 6 per cent, or a total of \$14,692,686.27.

Of the time deposits of \$37,096,550.41 in the northern reserve and central reserve cities there would be 5 per cent contributed,

The South would contribute, from time deposits in reserve and central reserve cities of \$8,466,609.87, 5 per cent, or \$423,330.49.

The West, with time deposits in the same class of cities of \$25,449,596.66, would contribute 5 per cent, or a total of \$1,272,474.83.

The total contributions from their deposits of both the country banks and the reserve-city and central reserve city banks in the northern States, following the subdivision made by the census returns, would be \$322.438.816.25.

The South would contribute toward the total deposits of the regional banks to serve those areas a total of \$62,988,123.65. The West would contribute \$42,678,210.83.

The total, on the basis of these reports, is \$428,105,150.73.

The percentages run as follows:

Of the deposits on which the regional banks would transact business, the North would furnish 75.2 per cent. The South would furnish 14.7 per cent.

The West would furnish 9.9 per cent.

In the report of the Secretary of the Treasury for the fiscal year ending the 30th day of June, 1913, a report is made of the distribution of \$46,500,000, distributed to the corp-raising areas of the country. This went to the South and the Southwest, to the Middle West and Northwest, and to the Pacific Coast and Rocky Mountain States. The subdivision is made in that way and the distributions are given to cover those areas.

I have collected the crop values for 1909, which is the year

preceding 1910, the last census.

The crops of the Northern States for that year had a total

value of \$3,120,454,108.

The crops of the Southern States had a total value of \$1,921,-730.571.

The crops of the Western States had a total value of \$444,-976.544.

This makes a total of \$5,487,161,223.

The following are the percentages of crop production in the areas named:

The North produces nearly 57 per cent of the total crop production. The South produces 35 per cent. The West produces 8.1 per cent.

Bearing in mind the percentage of capitalization contributed to regional banks, the percentage of deposits contributed to the same banks, and the percentage of crop production, I wish to place them alongside of the distribution of \$46,500,000 through the summer and fall of 1913 for the seasonal crop movement.

The distribution shown by the report of the Secretary of the Treasury at the date named allotted to the South and Southwest \$22,550,000,000 of the funds; to the Middle West and Northwest, \$19,000,000; to the Pacific and Rocky Mountain area, \$4,950, 000,000; and the latter answered very nearly, with very little geographical change, to the western division. The South and Southwest correspond, with the exception of two States that are negligible in their crop productions, to the Southern States. Middle West and Northwest answer almost exactly to the Northern States, comprising the great grain-producing areas of the northern Mississippi Valley and of the Middle West and North-

This distribution of funds shows that to the South and Southwest went 48.4 per cent of the total distribution of \$46,500,000; to the great middle Mississippi Valley country, or the great confolds and related to the south and southfields and wheatfields of the West and Middle West and the Northwest, there went only a total of 40.6 per cent of this dis-tribution; and to the Pacific coast and Rocky Mountain country

there went only a total of 10.6 per cent.

In other words, the part of the United States that will contribute a smaller proportion of the capital and deposits for the regional banks and that produced, as compared with the northern section, a minimum of the crop got a maximum of the distribution of funds from the Federal Treasury.

I am not making complaint of that fact. I am only stating

the facts. I am only showing that the Government is called on, through the agency of the Secretary of the Treasury, to use a very large proportion of the Government surplus for the South and Southwest, showing what the actual application of this bill will be. This caucus bill, or the Owen bill, can be worked out in its actual application, and a fair forecast can be made of how it will operate when we look at the distribution of this \$46,500,000.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). The hour of 11 o'clock having arrived, in pursuance of the or der previously made, the Senate stands adjourned until 10 o'clock a. m. to-morrow.

The Senate thereupon (at 11 o'clock p. m.) adjourned until to-morrow, Thursday, December 18, 1913, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

Wednesday, December 17, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Hear us, O Father, when we pray for a spirit so pure, so noble, so generous, so broad, that we can live our convictions without intolerance, bigotry, or scorn for those who may differ from us in their convictions. The world is large enough for us all, and there is always room enough on top for those who are willing to climb.

"Nor deem the irrevocable past As wholly wasted-wholly vain-If, rising on its wrecks, at last To something nobler we attain.'

"Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you. For everyone that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened." "Therefore all things whatsoever ye would that men should do to you, do ye even so to them, for this is the law and the prophets." Amen.

The Journal of the proceedings of yesterday was read and

approved.

CHANGE OF REFERENCE-LETTER OF SECRETARY OF WAR.

The SPEAKER. There was a letter filed from the Secretary of War as to claims against the United States adjusted by the chief engineers of the United States Army. This letter was referred to the Committee on Rivers and Harbors, but ought to have been referred to the Committee on Appropriations. Without objection, it will be referred to the latter committee.

There was no objection.

LEAVE OF ABSENCE.

Mr. Buchanan of Illinois, by unanimous consent, was granted leave of absence indefinitely on account of illness.

BILLS INTRODUCED WITHOUT SIGNATURE OF MEMBERS.

The SPEAKER. There are a number of bills here on which Members have neglected to put their names. The Clerk will announce them, and in the meantime the House will be in order so that the Members can hear.

The Clerk read as follows:

The Clerk read as follows:

A bill granting an increase of pension to Hannah A. Brigham;
A bill granting an increase of pension to Henrietta Lee Coulling;
A bill granting an increase of pension to Benjamin F. Morgan;
A bill granting an increase of pension to Frederick C. Hammetter;
A bill granting a pension to August A. Bemtgen;
A bill granting a pension to Elizabeth Elliott;
A bill granting a pension to Elizabeth Elliott;
A bill granting a pension to Ernest Oberkirk;
A bill granting a pension to James Ashby;
A bill granting a pension to Mary J. Brophy;
A bill granting a pension to Carrie Stevens;
A bill granting a pension to Carrie Stevens;
A bill granting a pension to Wary E. Burg;
A bill granting a pension to Mary E. Burg;
A bill granting an increase of pension to Edward Brady;
A bill granting an increase of pension to Edward Brady;
A bill granting an increase of pension to George Gans;
A bill granting an increase of pension to George Gans;
A bill granting a pension to Mary F. Robinson;
Petition to Congress of Louisa Stone and 15 others, residents of Vermont, that complete separation of State and church be assured;
and

Resolutions from Massachusetts Peace Society for international action. and Resolutions from Massachusetts Peace Society for international action for the suspension of naval construction programs.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 165. Joint resolution for recognition of the services of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis Gaillard.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 2689. An act to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings, and for other purposes.

RAILROADS IN ALASKA.

The SPEAKER. This is Calendar Wednesday, and the unfinished business is the bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes. The

House will resolve itself into the Committee of the Whole House on the state of the Union, with the gentleman from Mississippi [Mr. Harrison] in the chair.

Mr. HOUSTON. Mr. Speaker, pending that I desire to ask unanimous consent that we agree upon a limitation for general debate on this bill. If we can reach an agreement about that, I think it would be very well, and I suggest that five hours on a side would be satisfactory to both sides, from what I have understood

Mr. MURDOCK. You intend, then, to run over until next

Wednesday?

Mr. HOUSTON. Yes, sir.

Mr. DAVENPORT. Yes, sir. Five hours will be satisfactory so far as the minority members of the committee who are opposing the bill are concerned, and those who have spoken regarding time.

Mr. LENROOT. Will the gentleman yield?

Mr. HOUSTON. Tes.
Mr. LENROOT. I would like to ask the gentleman how many

requests for time he has.

Mr. HOUSTON. I will say I can not tell definitely, but about 12 or 14 requests have been made-something like that.

Mr. MURDOCK. Will the gentleman yield?
The SPEAKER. Will the gentleman from Tennessee yield to the gentleman from Kansas?

Mr. HOUSTON. Yes, sir. Mr. MURDOCK, I would like to add to the gentleman's list of requests three more Members, who will be on his side of the proposition.

Mr. HOUSTON. I think perhaps I have one or two of those.

Mr. MURDOCK. I think I have one or two besides that.

Two others? Mr. HOUSTON. Two others Mr. MURDOCK.

I should think that five hours on a side Mr. HOUSTON. ought to accommodate those who desire to be heard on the question.

Mr. MANN. Mr. Speaker, I would suggest to the gentleman that he let the debate run to-day without attempting to fix a limit of time. It probably could be done later without any difficulty, but the gentleman's own proposition would carry it

Well, it has been thought better to try to Mr. HOUSTON. fix a limitation to debate to-day. I thought so from conferences I have had with a number of gentlemen who are interested in the matter. I do not know that it is especially important to fix the limitation to-day, because I am sure we can not get through to-day, but if we can reach an agreement as to the time I would be very glad.

I think it would be better to let the debate run Mr. MANN.

to-day.

Mr. DAVENPORT. I will say, Mr. Speaker, that that is very satisfactory to me.

Mr. McKENZIE rose.

The SPEAKER. For what purpose does the gentleman from

Illinois rise

Mr. McKENZIE. Reserving the right to object, Mr. Speaker, it seems to me that this is perhaps one of the most important bills that we shall have to consider at this session, and it does seem to me that there ought not to be any attempt to limit discussion upon it, especially at this time. I think there ought to be a free and open discussion of the question, because it is very important one.

Mr. HOUSTON. There is no disposition, I will say to the gentleman, on the part of the committee reporting the bill, and those in charge of it, or anyone, to limit the debate. That is true with respect to all those advocating the passage of the bill. We thought that would be satisfactory and would give ample time for all. However, if it is thought desirable to go on to-day without fixing the limitation, I shall be willing to do that.

Mr. MANN. You can tell better as to what time will be re-

quired after to-day.

Mr. Speaker, will the gentleman yield? Mr. MURDOCK.

The SPEAKER. Does the gentleman from Tennessee yield the gentleman from Kansas?

Mr. HOUSTON. I do. Mr. MURDOCK. Those who are in favor of the proposition Mr. MURDOCK. will get their time from the gentleman from Tennessee?

Mr. HOUSTON. After the limitation is fixed and it is determined who will control the time, that would be true.

Mr. MURDOCK. Otherwise gentlemen would get recognition

from the Chair?

Mr. HOUSTON. It is assumed that they will get recognition from the Chair, unless there is an equal division of time.

Mr. FERRIS and Mr. BORLAND rose.

The SPEAKER. To whom does the gentleman yield?

Mr. HOUSTON. I will yield to the gentleman from Oklahoma

Mr. FERRIS. Mr. Speaker, I overheard a suggestion made by the gentleman from New York [Mr. FITZGERALD] to the chairman of the committee [Mr. Houston], and I am inclined to think we would work along better, even if there were no limitation of time, if we were to allow the chairman of the committee to control the time in favor of the bill and the gentleman from Oklahoma [Mr. Davenport], representing the opposition, to control the time for those opposed to the bill, so that we could keep track of the division of time.

Mr. MANN. Mr. Speaker, no doubt that proposition would be enticing to that side of the House, although I have no doubt that both gentlemen would be absolutely fair, and I would not

be inclined to agree to it.

Mr. FERRIS. Then, Mr. Speaker, I will withdraw my sug-

Mr. HOUSTON. Mr. Speaker, I withdraw my request for unanimous consent.

CHANGE OF REFERENCE,

The SPEAKER. Before the House goes into Committee of the Whole House on the state of the Union, the Chair would state that yesterday there was received a letter from the Secretary of the Treasury (H. Doc. No. 479), transmitting a copy of a communication from the Secretary of State, submitting an estimate of appropriation, in the sum of \$5,000, for the expenses of the representatives of the United States at the International Maritime Conference for Safety of Life at Sea, now in session at London, in addition to the appropriation of \$10,000 made in the joint resolution approved June 28, 1912, entitled Joint resolution proposing an international maritime conference," and the Chair referred it to the Committee on Foreign It is one of those things that fall within the jurisdiction of two committees, and the chairman of the Committee on Appropriations has called the attention of the Chair to the fact that a deficiency appropriation will be required. Therefore, without objection, the Chair will rerefer that letter back to the Committee on Appropriations, Is there objection? [After a pause.] The Chair hears none, and the reference is changed.

RAILROADS IN ALASKA.

The SPEAKER. The House will now automatically resolve itself into Committee of the Whole House on the state of the Union for the consideration of the Alaskan railroad bill, and the gentleman from Mississippi [Mr. Harrison] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration

of the bill H. R. 1739, with Mr. Harrison in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 1739, and the Clerk will report the bill by title. The Clerk read the title of the bill, as follows:

A bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. HOUSTON. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Tennessee Houston] asks unanimous consent that the first reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The gentleman from Tennessee [Mr. Houston] is recognized for one hour.

Mr. HOUSTON.

Mr. Chairman—
Mr. Chairman, before the gentleman from Mr. FERRIS. Tennessee [Mr. Houston] begins, I would like to have the House know that there are two reports on the bill-the majority report and the minority report-and they are not printed together. I would like to ask the House to consider the minority report in conjunction with the other report, although the two are not reported together.

Mr. HOUSTON. Mr. Chairman, the general purpose and scope of this bill can be stated in a very few sentences. It provides that the President of the United States shall build a railroad or railroads from the southern coast of Alaska into the interior, connecting the roads with the coal fields in Alaska. It provides also that the President shall select the route or routes of this road or these roads, and it provides for and contemplates the building of not more than 733 miles of railroad.

It contemplates, furthermore, that not exceeding \$35,000,000 shall be the amount expended. It further provides that this road may be leased or may be operated by the President, as he sees proper.

The purpose of the bill is to develop the Territory of Alaska, to develop our great resources there, to open up the interior agricultural section of that country to settlement and to home builders. That is the general purpose of the bill,

In the consideration of this measure the question arises, Is that country worth developing, and are the conditions such that the Government should do this or wait for private enterprise to accomplish it? We have the answer to the first question in the written reports of the Government officials in the Department of Agriculture and in the Department of the Interior. The testimony is ample, setting forth the almost unlimited resources of this country, and shows the demand for development, these reports and the reports of the Alaskan Railroad Commission the conclusion is inevitable that in order to have that country developed as it should be the Government must take the matter in hand. Private enterprise might develop certain mines and certain interests, but it would only be the exploitation of private interest and furnish an opportunity for the building up of monopolies that could further fasten their hold upon these vast resources; but the development that will open up this country to home seekers and home builders and provide settlement of American citizens will only be done by the Government itself.

We have owned Alaska since 1867. The population that has gone there, in the main, has been led by the discovery of gold. People have gone there hunting for gold and other minerals, and they have discovered other things than the wealth of the mines, and I believe the future of Alaska is not to be simply as a mining country but as an agricultural country as well, and one that will develop the best attributes of the Anglo-Saxon race

Under the provisions of an act passed August 12, 1912, President Taft appointed a commission to conduct an examination into the transportation question in the Territory of Alaska; to examine railroad routes from the seaboard to the coal fields and to the interior and navigable waterways; to secure surveys and other information with respect to railroads, including cost of construction and operation, together with their conclusions and recommendations in respect to the best and most available routes for railroads in Alaska which would develop the country and the resources there for the use of the people of the United States.

This commission was composed of an officer of the Engineer Corps of the United States Army, a geologist in charge of Alaskan surveys, and an officer in the Engineer Corps of the United States Navy, and a civil engineer who had practical experience in railroad construction and has not been connected with any railroad enterprise in said Territory. This commission has made a very thorough and comprehensive report upon the questions submitted to them. In submitting this report and its recommendation to Congress President Taft urged its prompt and earnest consideration.

The commission recommends the construction of two roads and their extension as set out in the report, and it concludes with the statement that-

It is unanimously of the opinion that this development should be undertaken at once and prosecuted with vigor; that it can not be accomplished without providing the railroads herein recommended under some system which will insure low transportation charges and the consequent rapid settlement of this new land and the utilization of its

President Taft said, in submitting this report-

if the Government is to guarantee the principal and interest of the construction bonds, it seems clear that it should own the roads, the cost of which it really pays.

Secretary Lane, in a letter to the chairman of the Senate Committee on Territories, comes out in strong terms in favor of this proposition. He says:

I favor the adoption of this policy. I believe it to be that under which Alaska will develop most safely and most speedily and under which the resources of that Territory will most certainly become available to the whole people.

The Committee on the Territories has given much time to the consideration of all data and information available on this subject, and the majority of the committee strongly favor the building of a road, or roads, by the Government.

Platforms of all political parties have for years indorsed and pledged themselves to the development of Alaska, and the last Democratic platform favored the immediate undertaking of this

President Wilson, in his great message to Congress submitted on December 2, 1913, comes out with characteristic boldness and clearness in advocacy of the Government building rallroads to develop Alaska. He says:

A duty faces us with regard to Alaska which seems to me very pressing and very imperative: perhaps I should say a double duty, for it concerns both the political and the material development of that Territory. The people of Alaska should be given the full Territorial form of government, and Alaska, as a storehouse, should be unlocked. One key to it is a system of railways. These the Government should itself

build and administer, and the ports and terminals it should itself control in the interest of all who wish to use them for the service and development of the country and its people.

But the construction of railways is only the first step; is only thrusting in the key to the storehouse and throwing back the lock and opening the door. How the tempting resources of the country are to be exploited is another matter to which I shall take the liberty of from time to time calling your attention, for it is a policy which must be worked out by well-considered stages; not upon theory, but upon lines of practical expediency. It is part of our general problem of conservation. We have a freer hand in working out the problem in Alaska than in the States of the Union; and yet the principle and the object are the same wherever we touch it. We must use the resources of the country; not lock them up. There need be no conflict or jealousy as between State and Federal authorities, for there can be no essential difference of purpose between them. The resources in question must be used, but not destroyed or wasted; used, but not monopolized upon any narrow idea of individual rights as against the abiding interests of communities. That a policy can be worked out by conference and concession which will release these resources and yet not jeopard or dissipate them I for one have no doubt; and it can be done on lines of regulation which need be no less acceptable to the people and governments of the States concerned than to the people and Government of the Nation at large, whose heritage these resources are. We must bend our counsels to this end. A common purpose ought to make agreement easy.

This bill provides that the President shall determine the loca-

This bill provides that the President shall determine the location of these roads and whether one or more shall be built. He will be limited as to the number of miles to be constructed and as to the amount of money that shall be expended.

Mr. Chairman, it was contemplated by the committee, as I stated in the beginning, that the amount expended should be only \$35,000,000. Since the bill has been reported by the committee I have had a conference with a number of gentlemen on both sides of this House who, while they think perhaps the limitation is expressed, yet would prefer that it be put in stronger terms; and I want to call your attention to the fact that the committee had prepared an amendment and authorized the chairman of the committee to present that amendment, which makes a specific limitation of the sum to be expended to \$35,000,000.

We should not determine or locate routes by legislation. Legislation can do some things well; it can determine policies and provide means, but the executive department can best work out the details. The very size of the legislative body, which by virtue of its numbers gives wisdom in the adoption of policies, constitutes a handicap in the execution of the details of such policies; therefore we have presented to you a bill which de-termines the policy that the Government shall build the road, or roads, and we have left to the Executive details as to the location and construction; and while we think it wise not to undertake the details, Congress retains control through the need of the Executive to obtain the annual appropriation for the continuation of the work.

From the evidence set out in the hearing and from the report of Government officials I am convinced that the agricultural productions of Alaska can be made very great.

These official reports establish the fact that agriculture can prosper there; that they can grow small grain, potatoes, and other vegetables most successfully. We invite your attention to these reports. They furnish evidence co-clusive that the necessities of life in the way of foodstuffs can be grown there in great abundance.

In speaking of the agricultural products, these reports state:

In speaking of the agricultural products, these reports state:

There are large tracts of arable and grazing lands in central Alaska, for the most part unutilized because of the lack of transportation. The census of 1910 shows that there were 2,660 acres of improved farm lands in Alaska, most of which is in the province here under discussion. Up to the present time hay and potatoes, with a variety of garden vegetables, have been the chief crops. In 1910 nearly \$100,000 worth of potatoes and \$100,000 worth of hay were produced. Oats, barley, and rye can be ripened in many parts of the Territory. Up to the present time only a small amount of wheat has been ripened, but it seems certain that this grain cap be successfully raised, at least in the Tanana and Sustina Valleys.

The largest areas of agricultural lands are located in the Sustina, Tanana, and upper Kuskokwim Valleys, and there are smaller tracts in the Copper River Valley and in other parts of the Province. Considerable profitable farming has been carried on near Fairbanks, where a local market is reached by wagon roads. A number of homesteads have been taken up near Knik, in the Susitna region, and more would be entered if there were any means of getting products to market. Agricultural land in Alaska is not likely to yield any crops for export for a long time to come, but with the increase of local markets following the mining development after railway construction farming communities will spring up at many localities.

In addition to the farming lands there are much larger areas of good grassland, and the cattle raising is likely to become an important industry in parts of this field. With the decrease of the western ranges in the States, Alaska may before long be drawn upon for beef and mutton. The reindeer is another source of food supply in Alaska. Domesticated reindeer have been successfully raised in Alaska for upward of 30 years; the herds now aggregate about 40,000 head. The coastal barren grounds of Bering Sea and the Arctic Ocean furnish the

Mr. SWITZER. Mr. Chairman, will the gentleman yield? Mr. HOUSTON. Yes.

Mr. SWITZER. What are the conditions existing at the present time with relation to procuring a homestead in Alaska of 160 acres, or 320 acres?

Mr. HOUSTON. We have homestead laws providing for the entry of homesteads there, each entry being limited to 320

Mr. SWITZER. At how much per acre?
Mr. HOUSTON. I am not familiar with the details of that;
but the laws are very liberal in that respect, as is shown by the size of the homestead that is permitted.

Mr. SWITZER. How many homesteads have been taken up

to this time?

Mr. HOUSTON. I can not inform the gentleman of that. can furnish him that information though, but I do not have it at hand.

Mr. HAMILTON of Michigan. Will the gentleman permit an interruption?

Mr. HOUSTON. Yes. Mr. HAMILTON of Michigan. The gentleman speaks of good grass land?

Mr. HOUSTON. Yes.

Mr. HAMILTON of Michigan. Will the gentleman tell the House the kinds of grass that are grown in the interior of Alaska? As I remember, blue grass, which has been mentioned, is not the kind grown in Kentucky. I wish the gentleman would tell the House something about the possibilities of grass growing.

Mr. HOUSTON. The grass that seems to thrive and be most profitable is timothy. It seems that that is the character of grass that grows in greatest abundance, according to my recol-

lection.

Mr. HAMILTON of Michigan. That must have been im-

ported recently.

Mr. HOUSTON. It has been imported there, and in fact it was found out by droppings along the roadside how it would prosper and grow.

I think the most favorable report is made in regard to the growth of timothy. However, blue grass grows there very well. Mr. HAMILTON of Michigan. It is not the kind of blue

grass that we know about.

Mr. WICKERSHAM. The Kentucky blue grass.

Mr. HOUSTON. I understood it is very much the same kind of grass, making allowance for the difference in climate and

HUMPHREY of Washington. Before the gentleman leaves that subject, will he yield for a question?

Mr. HOUSTON. Yes.

Mr. HUMPHREY of Washington. Will the gentleman state where this navigation is? In the report of the committee I think there is a mistake. It says 500 miles of navigable rivers.

Mr. HOUSTON. That is a mistake. That 500 should be

Mr. HUMPHREY of Washington. I noticed the mistake. Will the gentleman state what the principal rivers are that are

Mr. HOUSTON. The Yukon River is the longest and great-

est, and the Tanana and the Kuskokwim.

Mr. HUMPHREY of Washington. The Kuskokwim is about

500 miles in itself, is it not?
Mr. HOUSTON. Yes; I believe it is. The Kuskokwim and the river adjacent to it, the name of which I do not now remember, give more than 500 miles of navigable water.

Mr. HAMILTON of Michigan. That only makes about 3,000

miles.

Mr. HOUSTON. There are over 5,000 miles— Mr. HAMILTON of Michigan (continuing). The Yukon, 1,500 miles; 1,000 miles from St. Michael to Fairbanks on the Tanana, and 500 miles on the Kuskokwin, if I remember the distances correctly.

Mr. HOUSTON. Yes; and I will state to the gentleman from Michigan that there are a number of rivers running into the Yukon which are navigable for many miles. They go up through

valleys as rich as they can be.

Mr. STAFFORD. Will the gentleman yield?

Mr. HOUSTON. I will yield to the gentleman from Wis-

Mr. STAFFORD. Would it embarrass the continuity of the gentleman's remarks to indicate on the map the location of the navigable streams and agricultural districts that are likely to be developed by the building of this railroad?

Mr. HOUSTON. I can give the gentleman some information in regard to it, but I am not so familiar as is the gentleman from Alaska, who will go into that more fully. The Yukon River begins here [indicating on the map] and runs around in this way. Here is the mouth of it. It takes a circuitous route, such as I indicate on this map, and that is a very long river.

The Tanana runs into it, and down below lies the Kuskokwim, at this point. Near the coast is what is called the Coastal Range of mountains. Over these mountains lies the great in-

terior that we hear so much about as the agricultural section.

Mr. STAFFORD. Will the gentleman indicate the proposed railroads, and particularly the location of the defunct Central Railroad of Alaska that was financed by the Sovereign Bank of

Canada?

Mr. HOUSTON. The roads that have been recommended by the railroad commission that made a survey under the act of Congress passed two years ago have recommended that a road be built from Fairbanks to Chitina. That comes to a point where the Copper River Railroad already runs, starting at Cordova.

Mr. STAFFORD. That is the Guggenheim road, is it not? Mr. HOUSTON. I so understand it. It goes up into the Copper River country where the Guggenheims own the copper

Mr. STAFFORD. Will the gentleman indicate the other proposed railroad?

Mr. HOUSTON. The other railroad goes from Seward, or connects with a road already built from Seward, up the distance of 71 miles; then, where the red line indicates, it goes up into Susquaguim, from which a branch leads to the Matanuska coal fields. The other road connects the Bering River coal fields.

Mr. STAFFORD. Will the gentleman state how much has

been built on this line?

Mr. HOUSTON. Seventy-one miles.

Mr. DAVENPORT. Will the gentleman yield?

Mr. HOUSTON. Certainly.

Mr. DAVENPORT. I would like to ask the gentleman if the road leading from Cordova up to Chitina is not the road that leads up to the Bouanza copper mines owned by the Guggenheims? Did not the hearings show that they were controlled, if not owned, by the Guggenheims?

Mr. HOUSTON. I so understand.

Mr. GOULDEN. Will the gentleman from Tennessee yield?

Mr. HOUSTON. With pleasure.

Mr. GOULDEN. How many miles of railroad are in operation in Alaska

Mr. HOUSTON. Two hundred and twenty-three miles, on several different roads.

Mr. GOULDEN. I understood the gentleman to say that there were only four months of the year in which the rivers were open and navigable?

Mr. HOUSTON. About four months; some seasons a little

more. I am speaking about the Yukon River.

Mr. GOULDEN. How many months would it be possible to

work there building a railroad?

Mr. HOUSTON. Every month in the year. It would be more difficult at times than at others, but there are a great many advantages that they have during the cold weather, when it is frozen-a great many advantages in building and in traveling-that would compensate for other difficulties they would have to encounter.

Mr. GOULDEN. Is the gentleman satisfied that thirty-five millions is more than a beginning in building this road?

Mr. HOUSTON. I am satisfied from the report of the railroad commission that we have submitted to us that these roads can be built for \$48,000 a mile. At that rate, the 733 miles that are recommended by the commission would cost \$35,000,000. That is on the basis that we borrow the money at 6 per cent. If we get it at 3 per cent on Government bonds, it could be built cheaper than that.

The gentleman will realize the fact that if Mr. GOULDEN. the Government begins that road it would be necessary to complete it, no matter how much it cost. That is what many of us

have in mind and fear.

Mr. HOUSTON. I want to state that these roads that are proposed to be built will connect the southern coast with the interior of these two rivers. Now, it is the opinion of the committee, and I am firmly of the opinion, that one road could be built from the southern coast of Alaska into the interior to Fairbanks, that it would constitute such a trunk line as the Government could stop then and there and not build any farther. The benefits would be very great, and it would perhaps not be necessary for the Government to do any more building, because this road would call for branches and spurs, which would naturally be built by private enterprise. connections at Fairbanks.

The chairman has also stated it had the Mr. GOULDEN. approval of the board of railway engineers. I should like to known who constitute this board of railway engineers?

Mr. HOUSTON. One of them is an engineer from the United States Army, another is one from the Navy, and another is Mr. Alfred Brooks, the engineer of the Geological Department. One is Maj. Ingersoll, of New York, a civilian engineer, who was appointed because of his competency as an engineer and because of the fact that he was not connected with any railroad company in Alaska. I have the names here; they are Maj. Jay J. Morrow, United States Army Engineer, and Alfred M. Cox, of the United States Navy.

Mr. GOULDEN. Then, the committee have based their report almost entirely upon the findings of this board of engineers? In view of the past history of similar enterprises, a lack of con-

fidence is felt by many of us in the House.

Mr. HOUSTON. We have not adopted the report of the engineers, nor do we recommend it. We provide in this bill that the President of the United States, with all the light he can get from the commission or the report, and from any englneer he may see fit to employ, shall himself determine the lines that he shall build, or how many of them. He may not build but one line. Right here I want to call attention to this fact: A line from the southern coast could be built straight up to Fairbanks, and in place of having 733 miles of roads we would have perhaps less than 500 miles of road, and that of itself would be a great step toward the development of Alaska. That perhaps might answer the present needs and might be all that the President would see fit to build. I think likely that would be the result.

Mr. TOWNSEND. M Mr. HOUSTON. Yes. Mr. Chairman, will the gentleman yield?

Mr. TOWNSEND. The gentleman spoke of portions of these river routes which are open only four months in the year, approximately?

Mr. HOUSTON. Yes. Mr. TOWNSEND. There are rivers on the southern coast there that are capable of being pavigated a much longer period

Mr. HOUSTON. There certainly are. There are some rivers on the southern coast that never have any trouble with ice at all, where the water is comparatively warm. The ice never blocks up the harbors there, for instance.

Mr. HAMILTON of Michigan. But you do not get very far

inland with those rivers? Mr. HOUSTON. No.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. WINGO. Through what kind of territory would the proposed road which the gentleman suggests from the southern portion to Fairbanks lead?

Mr. HOUSTON. It would go through a mountainous terri-

tory for about 100 miles.

Mr. WINGO. Did I understand the gentleman to say that

such railroad could be constructed for \$48,000 a mile?

Mr. HOUSTON. I stated that the roads recommended by the commission could be built for \$48,000 a mile. A good deal of that, the gentleman knows, is through level country, where the building would be cheap. Of course, when you come to building through a mountainous country that would be more costly.

Mr. WINGO. The gentleman speaks of the road recom-

mended by the commission. What kind of a road did they rec-

ommend, and what kind of steel did they recommend? Mr. HOUSTON. They recommended a standard-gauge road,

and I believe they said something about the steel rails. Mr. WICKERSHAM. I do not remember about that.

Mr. HOUSTON. I am not sure that they gave the weight of the rails.

Mr. WINGO. Has the gentleman or the committee investigated to find out what is the actual cost of material, steel, and ties for a standard-gauge railroad in the United States, per mile?

Mr. HOUSTON. Yes; we I Mr. WINGO. What is it? Yes; we have made some investigation.

Mr. HOUSTON. It varies from \$25,000 a mile up, according to the character of the road built. No figure can be stated. It depends on the kind of road that you are building and the place and conditions under which you build it.

Mr. WINGO. Take the Kansas City Southern, from Kansas City to the Gulf, over a level territory; that cost \$50,000 a mile

to build and equip.

Mr. HOUSTON. There are many roads in the country over level land that cost a good deal more than that. I do not care to take up time in discussing the price of building a road. am not an expert, but I am inclined to believe the evidence that is submitted, together with what this commission states, when they say that this road can be constructed for \$48,000 a mile.

Mr. WINGO. Does the gentleman say that he is satisfied that

the road can be built for \$48,000 a mile in Alaska?

Mr. HOUSTON. In some places I am satisfied that it can be built for a good deal less than that.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. BORLAND. I suggest, in line with this question of the gentleman from Arkansas [Mr. Wingo], that a good deal of the cost of building roads in Missouri and Arkansas is because of the terminals and the right of way, and that there is quite an item in terminals in large cities and other expenses of that kind that now occur in the building of railroads in the States which would probably not be present in the construction of a road in Alaska.

Mr. WINGO. But I was calling the gentleman's attention to the fact that in litigation growing out of what the roads actually cost in the Western States, outside of terminals, and in those States that had the 2-cent passenger and lower freight rates litigation, the evidence showed conclusively that, exclusive of terminals, \$50,000 was the mile average to build and

Mr. BORLAND. I do not know where the gentleman gets the average. I question very seriously whether the roads in Missouri and Arkansas cost \$55,000 outside of the terminals.

Mr. HOUSTON. I want to inject this statement that these

terminals up there are already reserved.

Mr. COOPER. Mr. Chairman—
The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Wisconsin?

Mr. HOUSTON. I do. Mr. COOPER. As I recall the figures, Mr. Chairman, the Government of the United States gave the Pacific railroads \$48,000 a mile only for building the most difficult portion of the roads over the Rocky Mountains; and on the level land, through Kansas, of which the gentleman [Mr. Wingo] spoke, it was very much below that amount-I think, less than \$25,000 a mile, on the average-although their accounts, as the undisputed testimony showed, were padded beyond that amount, but the cost on the average was less than \$25,000 a mile. One of the engineers who assisted in the construction was Mr. Harris, of Kansas, afterwards Senator from that State, and he said that much of it really cost less than half that amount per mile, and that \$48,000 a mile, as I remember, was the maximum amount allowed by the Government for building the most expensive portions of these roads over the Rocky Mountains.

Mr. HOUSTON. Now I yield to the gentleman from Mich-

Mr. HAMILTON of Michigan. I was going to ask the gentleman this question: I understand that it is proposed to supplement the 71 miles of road so far constructed from Seward northward by a road going on farther northward in the general direction, perhaps, of Fairbanks. Gentlemen are talking about the probable cost per mile of constructing roads. that perhaps the best way to ascertain the probable cost per mile of Alaskan railroads will be to ascertain what the cost per mile has been to construct the roads already constructed. For illustration, there are 71 miles of the Alaska Northern Railroad constructed and about 150 miles of the Copper River & Northwestern Railroad, and I have no doubt the gentleman from Tennessee knows what the average cost per mile of the construction of the Copper River & Northwestern and Alaska Northern is, but I want to say this: The 71 miles of Alaska Northern were particularly difficult miles to construct there, and, if I remember the testimony, seven tunnels had to be passed

through in that case.

Mr. HOUSTON. Well, in regard to that, the proof shows that the cost of that road was enormous; it was very great. It is rather strange to understand why so much should have been expended, notwithstanding taking into account the docks and terminals, stations, and things of that sort; but an immense amount of money was spent there. It was the beginning of an enterprise I suppose they intended to carry out, but they expended an enormous amount of money which was way beyond any reason necessary in the course of the construction of the road.

Mr. LENROOT. Will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. LENROOT. Has not the proof shown that the first 20 miles of road cost \$18,000 a mile?

Mr. HOUSTON. That is true.

And that afterwards it went into a Cana-Mr. LENROOT. dian syndicate and there is an utter absence of proof of what the balance cost?

Mr. HOUSTON. That is true.
Mr. HAMILTON of Michigan. I thought perhaps the chairman had some further information in reference to that and the chairman might know about it. Mr. SWITZER. Might I ask the gentleman is it standard-

gauge or narrow-gauge road for the 71 miles?

Mr. HOUSTON. Standard gauge. Mr. WILLIS. Will the gentleman yield?

Mr. HOUSTON. Certainly; with pleasure.

Mr. WILLIS. I do not want to retard the progress of the gentleman's argument. I think he knows from our previous service together I am liberal and somewhat given in favor of

Mr. HOUSTON. I am sure of that.

There are 7,300,000 acres of land available for agricultural development, and a large part of this land lies in the great interior valleys along the great rivers there. I shall here call attention to the 5,000 miles of navigable water on these rivers, on which steamboats of a high class are now in operation for a part of the year. The lands along these great rivers are as rich as the bottoms of the Mississippi River. We know we can not let it remain undeveloped. We can not ignore it, and we can not shirk the responsibility that rests upon us to care for and utilize this great wealth.

Mr. WILLIS. I wanted to ask the gentleman whether his committee in its very elaborate hearings considered the question of building any of these roads contemplated in this bill on any other gauge than standard gauge? Now, why I ask that is because recently I had called to my attention the fact that in Tasmania they had built narrow-gauge roads that cost very little, and yet have opened up the country. Did the committee

consider that at all?

Mr. HOUSTON. The committee did consider that, and the committee is of the opinion that we should build a standard-

gauge road.

Mr. WILLIS. Will the gentleman state the reasons right

there?

Mr. HOUSTON. There are a good many reasons. We ought to build a high-class road and build a good road, and here is a proposition to issue \$35,000,000 of bonds, and I think we could handle the bonds much more advantageously if they were predicated upon a standard-gauge road than if based on a narrowgauge road. The main reason is that we want a high-class road and a good road.

Mr. GRAHAM of Illinois. I would like to ask the gentleman if one gentleman did not testify, or make a statement, before your committee, and told of building several miles of railroad at a 3-foot gauge, at a cost, if I recollect aright, of about \$17,000 a mile, and that it was quite equal to handling all the business the road had to do? He was a Seattle man and had large in-

vestments in that Territory.

Mr. HOUSTON. Yes, sir. But we would not build a road of that character. That kind of a road would not meet the demands that we contemplate are going to be put on a road built up there.

Mr. OGLESBY. Will the gentleman yield?

Mr. HOUSTON. Yes. Mr. OGLESBY. Is it not a fact that the testimony showed that the first road built would be a trunk line, and there would be a reasonable expectation, based on the evidence submitted, that there would be ample freight to be carried over this road not only to justify but to require a standard-gauge, well-built road, and that subsequently laterals would be built which would add to the burden of the freight-carrying requirements and would make it necessary to have such a road?

Mr. HOUSTON. I think that is absolutely correct.

After 15 years in Alaska, Prof. C. C. Georgeson, the superintendent in charge of the Government experimental stations in Alaska, says that-

There are no other resources in Alaska so great as the agricultural. All we need is people to settle upon the country and take advantage of the great opportunities.

Now, Prof. Georgeson has made some statements at an earlier period in regard to the conditions in Alaska and as to agriculture there, and has spoken of the difficulties attending it. He has not gone wild and taken the course of an enthusiast or a dreamer, but he spoke of the difficulties in the way, and discounted the idea of too much encouragement to the beginner to hope for great results at the beginning. Yet, after a long experience there, after opportunity to know thoroughly and fully what the agricultural resources are, these are the statements that he made.

When we think of a country that will produce \$780 worth of potatoes to the acre, and 67 bushels of wheat, and a large number of bushels of barley and of rye, and 115 bushels of oats, we are ready to believe that man will not only make a living, but grow rich, if he can get a footing to utilize and work these lands.

From the president of the Farmers' Association at Fairbanks,

Alaska, we get the following information:

The territory adjacent to Fairbanks produced 300 tons of potatoes in 1912, which were worth \$30,000, and in 1913 400 tons were produced, worth \$40,000, and they expect that 800 tons will be produced in 1914. It is estimated that this amount will be all that the market will

consume. With an increased local demand, we can readily assume that the production will be immensely larger.

The Delegate from Alaska [Mr. WICKERSHAM] sent out a number of packages of sugar-beet seed, which were planted near Fairbanks, and those planting them pronounced the growing of sugar beets a success.

Shall we let this vast area of wealth that belongs to the people lie idle and undeveloped? If so, we are unfaithful to our trust; we are unmindful of our duty to those already there and sluggards in meeting the responsibility that devolves naturally upon us. We absolutely bury our great resources there, or else we allow corporations to monopolize and rob the American people of many of its fairest and greatest treasures.

We have expended large sums in the effort to irrigate the dry lands of the West and make them productive for the benefit of settlers there, and much of this expenditure has been of of settlers there, and much of this expenditure has been of doubtful value; but, nevertheless, the Government has done this work because it believed it was just and due that the Government should perform this function. There will be no need of irrigation in Alaska. That ground, frozen in winter, thaws in the spring to a depth sufficient to grow bountiful crops, and the thawing ground and dissolving ice below furnish moisture sufficient to make the harvest yield in abundance.

In reference to the resources of Alaska, I desire to insert

some extracts from the report of the commission.

The mineral wealth of Alaska is at present its most important resource, but the Territory also includes extensive tracts of farming and grazing lands and many water powers. Excellent timber occurs in southeastern Alaska, while the inland forests are valuable for local use. There are also valuable fisheries along the Pacific seaboard, which, while they will not furnish tonnage for the railway, yet affect the transportation problem by furnishing additional business for the steamers connecting with proposed coastal terminals.

This commission report, after setting forth in detail the productions of different parts of Alaska, says:

To sum up, Alaska has produced to date mineral wealth having an aggregate value of \$229,000,000, of which about \$22,000,000 is to be credited to the year 1912. This output is remarkable, considering that large mining operations are practically confined to the coastal region, easily accessible to ocean transportation, and that the vast mineral wealth of the interior, except the richest of the gold placers, is almost untouched. untouched.

The gold output there now is about \$17,000,000 annually, and it is estimated that if this country is developed with railroads that the output of gold would amount to \$100,000,000 a If the output should fall far short of this estimate, yet it would more than justify the expenditure necessary to build these roads. The increase in gold product alone would justify the cost of the roads provided for in this bill.

The presence of coal of excellent quality and in immense quantity is established beyond cavil or doubt. The saving to the Government in the transportation of coal from the East will be a large item of value to the Government. It would soon

amount to enough to build a dreadnought.

The growing of reindeer in Alaska has been very successful, In 1893 Congress began the work of importing reindeer from Siberia into Alaska. The total number of reindeer thus imported into Alaska up to 1902, when the Russian Government withdrew its permit, was 1,280, and since that time they have increased very rapidly and have proven to be a most profitable business. There are now very nearly 40,000, which estimated at \$25 per head would amount to \$1,000,000 in value. P. P. Claxton, the commissioner of education, in his statement furnished me, says:

Experience has shown that the total number of reindeer in Alaska doubles every four years. Assuming that this rate of increase continues, in 1920 there will probably be in Alaska about 150,000 reindeer.

And he further states-

It is possible that the untimbered grazing lands of Alaska might, in the course of time, support 4,000,000 reindeer, of which 1,000,000 might probably annually furnish a meat supply for exportation to the States.

We find from the report on the Work of the Bureau of Education for the Natives of Alaska, 1911-12, on page 13, the following:

The reports from the reindeer stations for the fiscal year ended June 30, 1912, show a total of 38,476 reindeer distributed among 54 berds. Of the 38,476 reindeer 24,068, or 62.5 per cent, are owned by 633 natives; 3,776, or 9.8 per cent, are owned by the United States; 4,511, or 1.7 per cent, are owned by missions; and 6,121, or 16 per cent, are owned by Lapps.

At an average value of \$25 per head, the 24,068 reindeer owned by the natives represent a capital of \$601,700. The total income of the natives from the reindeer industry during said fiscal year, exclusive of the value of meat and hides used by the natives themselves, was \$44,885.04.

The reindeer industry affects the entire coastal region from Point Barrow to the Alaska Peninsula, a region approximating in length the distance from Maine to South Carolina. A line connecting the 54 herds would be more than 5,000 miles in length.

Thus it will be seen that this industry will soon become a

Thus it will be seen that this industry will soon become a great resource of Alaska, and will furnish food for the people in Alaska and in the States.

Alaska is regarded as a very cold country, and in fact the idea prevails in the minds of many that it is too cold for home dwellers and for the pursuits of the various industries of life, yet the facts show that men can live there in comfort and can carry on industries in comfort and health. Many lock upon it as an arctic province, yet about three-quarters of its area lies within the North Temperate Zone. I want to call your attention to a statement set out in the report of the Alaska Railroad Commission, which says:

The climate of the coastal province is comparable with that of Scotland and the Scandinavian Peninsula, in Europe, but is somewhat warmer. That of the inland region is not unlike the climate of Alberta, Saskatchewan, and Manitoba, in Canada. The northerly Province bordering the Polar Sea is the only one in which arctic conditions

The CHAIRMAN. The time of the gentleman has expired. Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent that the gentleman may be permitted to conclude his remarks.

The CHAIRMAN. The gentleman from New York [Mr. FITZ-GERALD] asks that the gentleman from Tennessee may be permitted to conclude his remarks. Is there objection? [After a pause.] The Chair hears none, and the gentleman will proceed.

Mr. HOUSTON. I thank you. The experience of those who have gone to Alaska, and those who have long resided in that country, shows that the climate is a most healthful one. The report of the commission says that "no extremes of cold or heat occur along the Pacific senboard," also this report states, in speaking of the inland

The aridity of the climate makes the extreme temperatures of winter easy to resist. All who have lived in this inland region are agreed that the winter climate is far more healthful than in many parts of the States where the temperature is higher, but where there is an excess of humidity. Residents of the interior have no fear of the extreme cold that often prevails during the winter months. The winter journey between Fairbanks and Valdez is raide by men, women, and children, and offers no serious hardships except when storms are encountered. encountered.

I call attention to these facts for the purpose of showing that our people can live there in comfort and health.

I want to call attention to the fact of the amount of revenue that Alaska has paid.

Mr. COOPER. Will the gentleman permit an interruption right there?

Mr. HOUSTON.

Mr. COOPER. I dislike very much, indeed, to interrupt the gentleman, but in view of the statement made by the gentleman from Arkansas [Mr. Wingo] that it costs \$55,000 a mile to build a road from St. Joseph or Kansas City south to the Gulf, I desire to call attention to facts which I mentioned a moment ago. I find that my recollection was correct, and I turn to the RECORD of January, 1895, page 327. This is what the Pacific Railroad received, and they built roads right out through the country which the gentleman mentions:

Over the mountains they were allowed \$48,000 a mile by the Government; on other portions of the road \$32,000 a mile, and for all of the road more than \$20,000 a mile and the statement of the commission is that \$22,500 a mile represents the average cost of construction, except under peculiarly difficult circumstances.

These come from the Government, so that when the gentleman says that it costs \$55,000 a mile, with our improved methods of construction, to build a road over that comparatively prairie country from Kansas City south, on the average, I think either he must be mistaken or else the accounts of that particular construction were padded, as the commission found with respect to some accounts in this case.

Mr. FERRIS. Mr. Chairman, I do not care to interrupt the gentleman from Tennessee. I have refrained from doing so thus far. But inasmuch as the question of construction is up as to Arkansas and Kansas and other States, I take it that the House would be glad to know what the estimate for Alaska is on these routes. The railroad commission, according to the majority report and the statement of the chairman, refers to 16 different estimates on 16 different routes. Without reading the routes in detail, let me give you the average estimate for each of the 16 routes.

Mr. HOUSTON. Mr. Chairman, I hope the gentleman will not take up my time for that.

Mr. FERRIS. I shall not take up the gentleman's time.

Mr. HOUSTON. That is an argument that stands in an independent relation. I do not think that belongs to this part

of my argument.
Mr. FERRIS. Then, Mr. Chairman, I will withdraw my suggestion

Mr. HOUSTON. I was calling attention, Mr. Chairman, to be payments that have been made by Alaska. The total rethe payments that have been made by Alaska. The total receipts paid in from customs, internal revenue from the seal islands, sales of public lands, and so forth, was \$853,988.71 for the year 1912,

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman tell us where those revenues came from?

Mr. HOUSTON. From customs duties and internal revenue. and things of that sort.

It is a fact that Alaska has paid more revenue into the Treasury per capita than any people on the face of the earth, and when we contemplate what has been accomplished there we know that it is only a beginning. The history of what has been done and the expectations that this history justifies appear like a dream of Aladdin, but, outside of the wondrous discovery of gold and other minerals which have been discovered there, it has been shown by Government experts and by experimental stations that in the soil there rests the elements to support a hardy race of white men who will be a support in peace and a defense in time of war. It will be a great arm of strength to our United States that will help us to go forward in working out our glorious destiny. And the State or States that will be formed there will in the future be bright and glorious stars in our flag and bright gems in our great sisterhood of States.

Mr. LLOYD. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Certainly.

Mr. LLOYD. Has the gentleman figures there showing what they have paid in revenues for any considerable number of years in the past?

Mr. HOUSTON. I have the general aggregate. I have not

the details here, but I have the aggregate.

Mr. LLOYD. The aggregate in kinds of taxes paid and the amounts paid?

Mr. HOUSTON. I have the sum total of the revenues paid into the Treasury. That statement has been made already.

Mr. LLOYD. I do not want to interrupt the gentleman or

to interfere with his speech; but if he is willing to put those figures in, I would be glad to know what the revenue is.

Mr. HOUSTON. I have stated the amount, and I have not

the figures here in detail.

These are reasonable expectations, and the facts and figures as we get them from Government reports, made by sworn officials, show what we may expect when we unlock the door and open the way to American thrift and energy. The natural resources are there to sustain a large population and furnish a profitable field for American labor and enterprise,

Mr. Chairman, I believe a careful study of this question will convince us that these roads ought to be built by the Government. It is regarded as a new departure, and in some sense it is; but the conditions and exigencies are such that they demand this exercise of governmental power. That we have the power I shall not stop to argue, for that, I think, is beyond question now, in the light of judicial decisions and political sanction of what the Government has done and is doing. A situation con-fronts the American people that calls for this work, and to those who think it a departure from former practice and former notions of the proper exercises of governmental power I would say that the American people are progressive enough in this day, when we hear so much of progressiveness, to face their duty and exercise their power to do a needed and necessary act that is in violation of no sound principle of government, but clearly within the scope of its legitimate and proper function in dealing with the conditions that exist to-day

For the President to build these roads is far better than the system of granting aid to corporations in the way of land There has been much criticism and condemnation of what has been done along this line by the Government here-

Mr. BROCKSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOUSTON. I do.

Mr. BROCKSON. Is it proposed that the Government shall put this road into operation by actually buying rolling stock

and employing men to operate that rolling stock?

Mr. HOUSTON. It is proposed that the Government shall put this road in operation; that the Government shall operate it or lease it; at just what point the President may see proper to execute a lease, before equipment or afterwards, is for him to determine.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Kansas?

Mr. HOUSTON. Yes.

Mr. MURDOCK. I have read the language of the bill very carefully. The language of the bill does not make it mandatory for the President to lease this road?

Mr. HOUSTON. That was not the idea of the committee. The committee's idea was to submit that matter to the discretion of the President, to operate the road or lease it, according as in his wisdom it would seem best.

Mr. SCOTT. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. SCOTT. Is not the language of the bill to the effect that "the President is empowered, authorized, and directed" to do those things?

Mr. HOUSTON. Yes; and then the alternative is stated. Mr. SCOTT. That includes the leasing of the road?

Mr. HOUSTON. Yes; to lease or operate the road if he fails to make an advantageous lease. The building of the Panama Canal has been done by the Government itself, and so far there has been no charge of graft or corruption in the execution of that stupendous work, notwithstanding the millions of dollars

that have been expended in its construction.

We should not fail to observe what our neighbor, the Canadian Government, is doing along the line of building railroads in that country across the border from Alaska. She is building great transcontinental lines. Some are being built by granting aid to corporations, by guaranteeing a part of the bonds, and some the Government itself is building. At this time there are more than 2,000 miles under construction by the Government in Canada. Also, the Government has secured a lease for the operation of 1,800 miles of the new line when finished. And while this work on the Canadian side enhances the necessity and value of similar work on the American side, it further emphasizes the importance of the United States going forward in this work and not being outstripped by our neighbor Government. Canada is not crowded with population, but she is anticipating the needs of her people.

Few people realize that Alaska is one-fifth the size of the United States. It is equal in area to nine average States of

the Union.

This project of developing Alaska is one that the facts and figures justify. In fact, when we contemplate them it seems like a land of wondrous wealth which is lying there ready to be transformed by the hand of labor and energy into wealth

that is past computation.

This is a door of opportunity for our people and a place to rear families of happy and patriotic Americans. The best blood of the world will thrive there. It presents a picture glowing with promise, and if this picture is overdrawn, still we must believe that industrious men can support and maintain their families in comfort and plenty. In countries like this grow the strongest and most virile of the races of men.

We can develop a land there that will be an asset to our Nation and a source of strength, rather than a tax or burden on our hands. We can develop a growing people who will be a help if need be to defend and protect our Nation's honor.

Mr. Speaker, the opportunity is there, and it is ours, and we owe it to our own people to open the door and let them unlock this great storehouse of material wealth.

In the language of the President's message:

A duty faces us with regard to Alaska which seems to me very pressing and very imperative; perhaps I should say a double duty, for it concerns both the political and the material development of the Terri-

To my mind, it will be one of the proudest achievements in our history when we do our duty to this country, or I should

say to this part of our own country.

We made a great trade when we purchased Alaska from Russia. This purchase, which was consummated during the Presidency of that illustrious Tennesseean, Andrew Johnson, will stand out in history as one of the wisest acts performed by an administration since the beginning of our Government.

President Johnson, in his fourth annual message to Congress, said that "the acquisition of Alaska was made with a view to extending national jurisdiction and republican prin-ciples in the American hemisphere." This statement was made The purwith prophetic vision, as subsequent history shows. pose was clearly expressed by him, and great headway has been made by our people in carrying out this purpose. We have

given them a Territorial government of their own.

With a mere handful of Americans there, it has paid \$17,000,000 into our Treasury. True, we have paid out, including the purchase price, \$35,000,000, but this leaves a balance of only a little over \$18,000,000 that we are behind. To offset this \$18,000,000 we have had the benefit of a production in Alaska up to 1911 of nearly \$500,000,000. This sum has not gone into the Treasury of the United States necessarily, but it has become a part of our national wealth. Our people have gotten the benefit of it and are just that much richer. National wealth is not the amount of gold piled in the vaults of our Treasury, but national wealth is the property that the citizens of the Nation own and enjoy.

Figures are often misleading and men often make calculations that do not materialize, yet, while there is room here for great discount of the figures, there will still be a basis for a good living and much prosperity for the industrious and frugal.

We have paid out millions of dollars in the Philippine Islands. The Government has authorized the guaranteeing of the interest on bonds for the building of railroads there to the amount of 4 per cent on an amount not to exceed the sum of \$30,000,000

for a people not of our own race.

Alaska is nearly five times as large as the Philippine Islands and is five times as valuable to this Nation. In fact, Alaska is an asset to our country, and the Philippine Islands are a liability. Shall we hesitate to build a road for our own people in Alaska with the assurance that money invested there will not only be enjoyed by our race, but that the money will bring a return, and will be paid back by revenues that even under present conditions have been great?

Mr. Speaker, it is better that the channels of opportunity for industry and trade be given to our people than that vast sums

of money should be hoarded in the Treasury.

It is true that Alaska is cold, but it has been proven that the people can live in comfort there and the history of the world shows that where men have to battle with the elements and struggle against the difficulties of a rigorous climate they have always developed more strength and virility than those who live in a land of sunshine, fruits, and flowers. The inhospitable character of nature itself makes men grow strong, and there the highest types of nature are produced. Climates like this have produced people among the hardiest and noblest of the earth. Men reared in such conditions have held up the world's best civilization with more strength and courage than those of tropical lands.

Now, Mr. Chairman, this bill is not predicated upon the idea of railroad ownership as a policy for this Government. It rests upon a different basis altogether, and one that is in no way akin to the policy of general Government ownership. It proposes but the exercise of a constitutional power to make improvement in the conditions in the public domain of the United

States.

Now, gentlemen, I do not care to take up time here to discuss that feature, because it was the idea of the committee that this should be submitted to the President, and that he should have the power to operate or lease the road. I think that is the desire of the friends of the measure generally, and if it is not as explicitly expressed in the bill as it ought to be, it is a matter we can consider when we take up the bill for amendment.

The bill proposes to do something for the people of Alaska that they can not do for themselves. It is merely the extension of the hand of the Government to assist in creating conditions that will enable our own people to gain a foothold and to establish themselves in a part of our own country that they can not accomplish without the intervention of Government aid. It is an emergency in a sense, and it is the solving of a difficult problem for our own people that they can not solve by their unaided efforts. It is for the purpose of opening up a vast part of our country to settlement and development by our own people. The exigencies of the situation demand that the Government shall do this, for, as has been pointed out by the railroad commission, this can not be accomplished without providing a railroad such as will insure low transportation charges and the consequent rapid settlement of this new land. That we have the right and power to do this under the Constitution is no longer a question of argument to my mind, nor shall I take up your time in discussing that feature of the bill. The building of these railroads is justifiable upon the same grounds that justified the construction of the Panama Canal. When a great national need is before us to open the way to the great interior of Alaska for the benefit of our people and the material pros-perity of the Nation, we have the right, as it is our duty, to dig a canal or build a railroad, or make such other improvements as the conditions and the welfare and prosperity of our Nation demand.

Some men oppose this measure, because they say it is the opening wedge to Government ownership of railroads by the United States; some men favor it because they regard it as such; but this is not the view that actuates and prompts the building of these roads. It is for the great governmental purpose of opening up our public domain and developing resources that are ours and for opening homes for settlement by our own

people.

When the transportation that this railroad will furnish is provided to our people, then we can solve the problem as best how to conduct these roads, and there need be no fear that the wisdom of the American people and the American Congress can solve this question along lines for the best interests of the Nation. Whether the roads there are to be leased or operated by the Government is a question to be determined by the conditions that will exist and the opportunities for adopting either the one or the other plan. I have full faith that the President will exercise the power given him in this bill with wisdom and statesmanship, and that he will be able to adopt that course as will best promote the interests of all and afford the best service obtain-

The time has come in the progressiveness of the American people that they will not hesitate to do a just and needed thing for its people for fear of controverting some antiquated political maxim. When the necessity confronts us we will exercise the natural and just right to build a road to supply a great need to the people of these United States.

Mr. Chairman, I want to reiterate and to emphasize my profound conviction that the only way to save this country with its immense values from the clutches of monopoly is for the Government to take it in hand and furnish the people a chance to develop it and build it up for our common country. [Applause.]

Private interests, such as the great syndicates that have gobbled up the copper and almost got their clutches on the coal lands, will develop Alaska if you will give them the earth and the fullness thereof. They would like for us to wait in this work until they can have the opportunity to put into their greedy maw the coal, the copper, and all the resources there.

I want to emphasize the point that, notwithstanding the great mineral wealth of this country, the agricultural and farming possibilities are our greatest asset there, because of the fact that the farm is the place to rear children and develop manhood. Let American citizens have a vine and fig tree of their own in this wondrous land, and we can rear men and women more valuable than its vast deposits of gold. [Applause.]

Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. HOUSTON. Certainly.

Mr. FITZGERALD. Will the gentleman state why it is proposed to pay for the building of this road out of the proceeds of

Mr. HOUSTON. That is a question that we have considered and discussed a good deal in the committee, and there has been a difference of opinion. The judgment of the committee was that perhaps it would be the best to provide for a bond issue, and by that means we could very soon collect sufficient revenues from Alaska to meet the expenditure, and in place of being an appropriation that the Government would have to pay finally, as of course it necessarily would, it will put these people on their feet and give them the strength and power to pay off this debt themselves; that Alaska will pay it, and that it will not be a burden or tax upon the people of the United States, but that Alaska, with its vast resources and production, will meet these demands and pay these bonds.

Mr. FITZGERALD. If the reven

If the revenues amount to what is anticipated, they will go into the Treasury anyway and will pay this debt. I see no particular renson why it should be done in the way proposed in the bill. Is there any particular condition of the Treasury that makes it necessary to issue these bonds?

Mr. HOUSTON. No; not that. But it was following out the idea that has been adopted in many enterprises, to issue bonds, to provide the means that way. The fact that the Government could issue bonds at 3 per cent was one fact that was considered. Perhaps it is as broad as it is long, and you might as well pay the money directly out of the Treasury as to issue bonds. I am not very particular which you do. Mr. FITZGERALD. Then I call the attention of the gentle-

man to section 4, which provides in effect for a sinking fund for the payment of the interest and the redemption of the bonds. Why should these bonds be placed upon any different footing, so far as those who invest in them is concerned, as to the security than any other part of the public debt of the United States? Suppose the gentleman should be mistaken as to the revenues of Alaska, and that this fund does not become sufficient to meet the demands that are to be made upon it, is the money then to be supplied out of the general fund in the Treasury?

Mr. HOUSTON. I suppose it would have to be. As a matter of course, that would be left to the discretion of Congress.

Mr. FITZGERALD. I am not so certain-

Mr. HOUSTON. If the Government issues these bonds, I take it the Government would be responsible for them and would have to pay them, of course.

Mr. FITZGERALD. I am not so certain that it would not be construed that this provides an exclusive fund. But what reason is there for taking these bonds out of the scope of the operation of the sinking-fund act, which at present provides a perfectly safe and sure guaranty for the payment of both the

interest and the principal of the bonds? Section 4 is very peculiar, and for my information I should like to know just what it was that resulted in the committee adopting this particular sinking-fund provision for these bonds?

Mr. HOUSTON. I can only say that it just proceeded out of the general idea that with this improvement going on there, and with the development of that country, Alaska would furnish the means and the revenue to pay these bonds, and that the bonds could be met in that way. Perhaps it is no special advantage, because, as I take it, the Government must meet the demands Whether you take the money collected in Alaska and appropriate that to the payment of these bonds or whether you

pay them otherwise, I do not think it is very material.

Mr. FITZGERALD. I hope some member of the committee will discuss this before the discussion goes very far, because I wish to present some phases of it from a different aspect. should like to know the reasons which actuated the committee in creating this special and peculiar sinking-fund provision and why, if they are to be issued at all, the payment should not be provided for under the sinking-fund act, which affects all of the public debt, unless part of it be excluded or taken under some other provision of law, as proposed here. It may be a very important thing, when the attempt is made to dispose of these bonds, as to what provision of law controls the obtaining of money to meet them when they mature and to provide for the payment of the interest.

Will the gentleman yield? Mr. LENROOT.

Mr. HOUSTON. Yes.

Mr. LENROOT. Does not the gentleman think that to create a redemption fund, that hereafter when Congress fixes the price for the lease or otherwise of the road that shall obtain in Alaska it would be more certain to take care of this than if the redemption fund did not exist?

Mr. FITZGERALD. Not at all. If there be some good reason not pointed out for providing for the payment by a redemption fund, and not under the general redemption fund, under the same law that controls all the rest of the public debt of the United States, investors would be very slow to take the bonds until they get some accurate information. They would hesitate to put their funds into a work of this character.

It looks, not being put on the same footing with other bonds. as if it were intended to make them merely Alaskan bonds. That has not been the way we have proceeded heretofore-for instance, in connection with the building of the Panama Canaland I hope some member of the committee will point out some good reason for it.

Mr. MADDEN. Will the gentleman from Tennessee yield? Mr. HOUSTON. Certainly. Mr. MADDEN. How many railroads are there in Alaska

Mr. HOUSTON. I am not sure; but five or six, amounting in the aggregate to about 500 miles.

Mr. MADDEN. What is the total tonnage carried by all the railroads?

Mr. HOUSTON. I am not able to give the gentleman the exact figures. We have an estimate submitted by the commission that this road would probably carry about 50,000 tons.

Mr. MADDEN. Does it not seem that there ought to be some information furnished as to the tonnage now carried over the railroads in Alaska now in existence?

Mr. HOUSTON. We have a report made by a subcommittee, the gentleman from Maine [Mr. GUERNSEY], which is full and complete and very instructive and has all the details of tonnage matters in it.

Mr. MADDEN. What assurance has the committee that there will be any such amount of tonnage carried over this railroad?

Mr. HOUSTON. It has no assurance. We can not prophesy. We believe that with the elements and resources that it is safe to estimate that the tonnage will be large, as this very interesting report shows. It is an estimate based somewhat upon the

present tonnage.

Mr. MADDEN. It is proposed to build about 1,000 miles of railroad?

Mr. HOUSTON. No, sir; not over 733 miles.
Mr. MADDEN. Does it give authority to the President of

the United States to buy any of the existing roads in Alaska?

Mr. HOUSTON. Yes; to buy, lease, or make any other connection.

Mr. MADDEN. To buy any road that exists there now?

Mr. HOUSTON. It does.
Mr. MADDEN. Did it occur to the committee that it might possibly give him the authority to buy the Guggenheim-Morgan

Mr. HOUSTON. If it gives him the power to buy any road it would give him the power to buy the Guggenheim-Morgan road. and I am perfectly willing to trust the President in buying that

Mr. MADDEN. How much is the tonnage carried on that

road?

Mr. HOUSTON. I have not the figures, but they are contained in the report which I have already alluded to and from which the gentleman can get the details.

Mr. MADDEN. Does the committee know how much it is proposed to spend per mile in the construction of this road?

Mr. HOUSTON. Forty-eight thousand dollars a mile.
Mr. MADDEN. Would it not be safer to say \$250,000 a mile?
Mr. HOUSTON. No, sir.
Mr. MADDEN. I think it would.

Mr. WICKERSHAM. That is because the gentleman knows nothing about it.

Mr. COVINGTON. Will the gentleman yield?

Mr. HOUSTON. I will.

Mr. COVINGTON. All these railroads for the development of Alaska have been constructed within 10 or 12 years?

Mr. HOUSTON. Most of them have been within something like that time.

There has been a substantial tonnage Mr. COVINGTON. grown up as the result of the so-called development of Alaska? Yes; a substantial tonnage at times; but Mr. HOUSTON. some of these roads at present are in a state of suspension.

Mr. COVINGTON. At the present time, I presume they are. I understand it has produced an increase of population, and I would like to ask if the gentleman can enlighten the House as to how many thousand people there are in Alaska to-day as the

result of the development of the already existing railroads?

Mr. HOUSTON. There has been very little increase in population there. There has been nothing to call for any increase or to encourage people to go there. The conditions under which they have lived and operated have been the most difficult and They have had to encounter difficulties there of all—the transportation problem chiefly. They have been subjected to outrageous rates when they could get transportation.

Mr. COVINGTON. But it is a fact that within the last 10

or 12 years, notwithstanding the creation of additional lines of railroad for the purpose of opening up the country and transporting to the United States the commercial products of the country, there has been no increase in the population of this

practically arctic territory.

Mr. HOUSTON. There has been little increase during that time, and the reason has been due to the fact that the men who went there had no encouragement or opportunity to contend with the conditions. If you give them a helping hand, they will

increase rapidly.

Mr. COVINGTON. One more question. Mr. HOUSTON. I first want to deny the gentleman's charge that this is an arctic region.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman yield for a question?

Mr. COVINGTON. But I am not through. I want to ask one

final question

The CHAIRMAN. To whom does the gentleman yield?

Mr. HOUSTON. I yield to the gentleman from Maryland. Mr. COVINGTON. Mr. Chairman, I want to ask whether the committee has been able to obtain any thoroughly reliable data showing the probable increase in commercial development by agriculture and otherwise that will be directly incident to the construction of this particular line of railroad?

Mr. HOUSTON. I think we have a good deal of information of that sort, and I think the gentleman will hear a great deal of that and can get a great deal of light on that subject if he

will listen to the speeches.

Mr. COVINGTON. But it would be entirely from the speeches which are to come?

Mr. HOUSTON. Perhaps so. The gentleman may not have

been enlightened by the one he has already heard.

Mr. COVINGTON. Oh, the gentleman did not touch on that

phase of it.

Mr. GRAHAM of Illinois. Mr. Chairman, the gentleman from Maryland asked to what extent the building of railroads has increased that population. Is it not true that the principal railroad in Alaska, the Copper River & Northwestern Rail-road, extending more than 150 miles, is built through what is comparatively a gorge to the Bonanza copper mine and that there is no opportunity for development other than carrying the ore from that mine to the seaboard?

Mr. HOUSTON. That is certainly true.

Mr. GRAHAM of Illinois. Nobody expected that to increase the population except as it would bring men to work in that

Mr. HOUSTON. Yes; that is an improvement and development of just the character that we can expect if we leave it to private interests to develop Alaska. [Applause.]

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman

yield further?

Mr. HOUSTON. Yes. Mr. GRAHAM of Illinois. Is it not also true that nearly all of the existing railroads in Alaska correspond in character to the Copper River Railroad, and that they were not built with a view to developing the agricultural character of the country?

Mr. HOUSTON. That is entirely true as to perhaps every one

of them.

Mr. GRAHAM of Illinois. Is it not also true that if a railroad were constructed through the Chitina region to Fairbanks with a view to developing agricultural possibilities it would undoubtedly increase greatly the population of Alaska?

Mr. HOUSTON. Certainly. You can not expect a private

corporation to be inspired by any altruistic notion to go to work for the country at large. They do not do work in that way.

They exploit private interests, that is all.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HOUSTON. Yes. Mr. HAMILTON of Michigan. I wanted to suggest to my friend that the conclusion of the gentleman from Maryland [Mr. Covington] was based on an erroneous premise. He assumed that a large part of the railroad mileage in Alaska had been constructed in the last 10 or 12 years, but as a matter of fact there has not been a mile of railroad constructed in Alaska within the last 10 years, except, it may be, the finishing of the Copper River & Northwestern Road, so that his reasoning about the increase of population in its relation to railroad mileage was based upon an erroneous conception of the situation.

Mr. HOUSTON. Certainly. Mr. TAYLOR of New York. Suppose this road is built; how many months can you operate it during the year?

Mr. HOUSTON. Twelve months. Mr. TAYLOR of New York. Has private capital ever tried

to get a franchise to build a railroad up there?

Mr. HOUSTON. They have been trying to build railroads in various places, and they have been pretending they have wanted to, but have been very slow about it.

Mr. TAYLOR of New York. Have they ever made applica-

tion for a franchise?

Mr. HOUSTON. They have made many applications. There is nothing in the way of their building a railroad if they want to do it.

Mr. GARD. I wish to know whether the gentleman ! is any reliable data as to the cost of operation of this proposed road?

Mr. HOUSTON. No, sir; I have not. I can not furnish that, I yield the floor now, Mr. Chairman.
The CHAIRMAN. The gentleman from Tennessee declines

to yield further and yields the floor.

Mr. FERRIS. Mr. Chairman, I hope in the interest of fair understanding in the case the committee will permit me to answer the question of the gentleman from Ohio [Mr. GARD] as to what these proposed roads are going to cost per mile.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that he may be permitted to answer the question propounded by the gentleman from Ohio [Mr. GARD]. Is there objection? [After a pause.] The Chair hears none.

Mr. FERRIS. The gentleman spoke of the construction—

No; the operation. Mr. GARD.

Mr. FERRIS. I do not have the cost of operation at hand, but I do desire to put this cost of construction in the RECORD anyway. Mr. GARD. I will be glad to hear the construction cost as

well.

Mr. FERRIS. The Alaskan Railroad Commission was sent up there to make estimates as to the probable cost of these roads and estimated on 16 lines of railroad, different kinds, all standard gauge, over different routes. For instance, proposition No. 1 was the Haines-Fairbanks route. The average cost per mile was \$44,300. No. 2 was the Chitina-Fairbanks route, and the average cost was \$44,000 a mile. The next was No. 3, the Valdez-Fairbanks route; average cost, \$44,800 per mile. 4 was for the Seward-Fairbanks route; average cost, \$45,300 per mile. No. 5, the Seward-Iditarod line; average cost, \$52,300. No. 6, the Iliamna-Kuskokwim route; average cost, \$55,400 per mile. No. 7, the Valdez-Marshall Pass route; average. age cost per mile, \$57,800. No. 8, branch from Bering River

coal field to Cordova, via Katalla; average cost per mile, \$49,000. No. 9, branch from Bering River coal field to Cordova, via Lake Charlotte; average cost per milė, \$54,000. Katalla-Bering River coal field line; average cost, \$55,000. No. 11, Controller Bay-Bering River coal field line; average cost per mile, \$57,000. No. 12, Chitina-Matanuska coal field line; average cost per mile, \$51,700. No. 13, which is the Kern Creek Matanuska coal field line; average cost per mile, \$43,000. No. 14, the Skolai Pass-White River branch line; average cost per mile, \$64,000. No. 15, Fairbanks-Yukon extension; average cost, \$41,000 per mile. This is the lowest estimate. No. 16, cost, \$41,000 per mile. This is the lowest estimate. No. 16, Valdez-Matanuska coal field line; average cost, \$55,000 per mile. The lowest estimate is \$41,000 and some run up as high

Mr. MURDOCK. But the gentleman will acknowledge that the cost is uniform.

Mr. LENROOT. Will the gentleman yield?
The CHAIRMAN. Does the gentleman from Oklahoma yield? Mr. MANN. The gentleman does not have the floor to yield. The CHAIRMAN. The gentleman from Michigan [Mr. FORD-NEY] is recognized for one hour.

Mr. LENROOT. Mr. Chairman, I ask unanimous consent to

ask the gentleman from Oklahoma a question.

The CHAIRMAN. Well, the gentleman from Michigan has been recognized for one hour. Does the gentleman from Michigan yield to the gentleman from Wisconsin to ask a question?

Mr. FORDNEY. Yes, sir, Mr. LENROOT. I desire to ask the gentleman whether or not it is not true that the estimates for these routes included equipment of the road and also 6 per cent upon the cost?

Mr. FERRIS. Well, I do not think so. I have not examined it very carefully, but I do not think that is true. Anyway, it is a very small part of what the road actually will cost.

Mr. MADDEN. Does the gentleman know what the other roads cost?

Mr. FERRIS. Some of them; some of them cost as high as \$72,000 a mile.

Mr. MADDEN. No more than that?
Mr. FERRIS. They may have cost more than that. Figures are easily obtainable, so there can be no mistake as to the roads already there. The figures I gave above are correct, as they come from the railway commission's report as to the proposed

Mr. FORDNEY. Mr. Chairman and gentlemen of the committee, I wish to briefly state at the outset that I would not permit my vote to do anything injurious to the people of Alaska. On the other hand, I am willing at any time to aid in the enactment of laws that will benefit the people of Alaska that, in my judgment, come within the bounds of reason. First, let me say I am unalterably opposed to Government ownership of railroads. [Applause.] I will give you my reason for that

opinion before I conclude my remarks.

I never knew anything built or operated by the Government that, in my opinion, was built or operated for as reasonable a sum as it could be built and operated by private enterprise. And let me cite to you one little illustration which created a very strong impression on my mind that the Government can not build and operate things as cheaply as they can be built and operated by private enterprise. I obtained, through the courtesy of Congress, an appropriation for a Government building within the district which I have the honor to represent here-in part, at least-of \$70,000. Ten thousand dollars of the money was used by the architect and superintendent. A prominent contractor in my home town told me he would take the contract for constructing that building for one-half the money it cost the Government, and believed he could make money out of it at that price. Those things create an impression upon the mind of a man who gives some attention to business affairs.

It has been said here by the gentleman who preceded me that this appropriation of \$35,000,000 was intended to build 733

miles of railroad.

Mr. TAYLOR of New York. Will the gentleman yield for a minute?

Mr. FORDNEY. Yes, sir. Mr. TAYLOR of New York. Was this post-office building erected under contract by the Government or did the Government build it by day work?

Mr. FORDNEY. It was built by contract by the Government, superintended by a Government official and the architect's office, and that superintendent absorbed \$10,000 of the \$70,000 for the construction of that little building, including the plans.

Mr. TAYLOR of New York. How was the architect selected?
Mr. FORDNEY. It was done through the architect's office in the Treasury Department. But that policy has been abandoned, I am glad to say. I know of no reason why there should not be

a plan for the construction of post-office buildings in this country of a given cost and that one plan would suit one city as well as another [applause], and thereby lessen this enormous expense of the architect's office preparing a separate plan for each building.

I want to call the gentleman's attention to the cost of construction of railroads both in this country and in Europe, as given in statistics which I have, and which I believe are official. All will admit, I believe, it will cost more money per mile to build railroads standard gauge with a certain weight of iron and a certain efficiency in rolling stock in Alaska than it has cost or will cost to build railroads in the United States. Statistics show the Government of Germany owns 95 per cent, in round numbers, of all the railroads in that country. Statistics which I have here show that it costs \$113,324 a mile to build and equip the railroads of Germany. Statistics show that the original cost of construction of railroads in the United States is \$60,000, and the present cost of construction of those roads, with their efficient and modern equipment, with Mogul engines and high-class passenger and freight cars, with 90-pound steel, and all those things that go to make up a first-class railroad in the United States, is \$76,130 per mile for the year 1912, based on 248,000 miles of main-line railroads. Statistics show the cost of construction of railroads in all Europe averages \$121,000 per mile. The gentleman says the commission appointed to investigate and make a report on the cost of construction of railroads in Alaska says the roads can be built there for less than \$48,000 per mile.

Mr. HUMPHREY of Washington. Mr. Chairman—

Mr. FORDNEY. Just a minute. Let me conclude this, and

then I will be pleased to yield.

I want to call his attention to a report by ex-Secretary of the Interior Mr. Garfield and Mr. Pinchot, who was Chief of the Bureau of Forestry, under a law providing for the construction of irrigation projects to be begun in this country and paid for out of a certain fund created by receipts of money from the sale of public lands in the various States. The grandest corps of engineers ever gathered together in any country under the sun, so they said, were engaged by the Interior Department to estimate the cost. After the estimates had been completed Messrs. Garfield and Pinchot reported that 32 projects in this country, in the Western States, would cost \$48,000,000. The law provided that no one of those projects could be begun until there was sufficient money in the fund to complete the work. But in-stead, when there was less than \$25,000,000 in the fund, this work was commenced; and later on, when the representatives of those projects came before the committee, they admitted \$75,000,000 had been spent and not a single one of the projects completed, and that it would require \$75,000,000 more to complete the 32 projects estimated by the board of engineers to cost \$48,000,000.

So, if the estimates on your Alaskan railroads are no more valuable than the estimates of those engineers, they are not worth the paper on which they are written, gentlemen. It is an estimate to induce the Government of the United States to begin the project, and no one knows where you are going to land. The Treasury of the United States will show in the end.

Now, let me give you some comparisons as to the cost of hauling freight in the United States on our railroads, owned by individual and corporate interests, as compared with Government-owned railroads of Germany.

But first I will yield to the gentleman from Washington for question before I begin on that subject.

Mr. HUMPHREY of Washington. I simply wanted to ask the gentleman whether or not in those figures he quoted, giving the cost of construction, they included the terminals?

Mr. FORDNEY. They include everything connected with the railroads-the rolling stock, the terminals, and all other prop-

erty owned by the railroads.

Mr. BRYAN. Also the right of way.

Mr. FORDNEY. Yes; right of way and everything connected with the road; and in Alaska you can not build a railroad without terminals and without equipment to operate it.

Mr. TOWNER. Mr. Chairman, will the gentleman yield? Mr. FORDNEY. I will yield to the gentleman in a minute. The initial cost per mile for grading and filling and bridging is only the first cost

low I will yield to the gentleman.

Mr. TOWNER. Just a few years ago the Burlington road through the prairie State of Iowa double-tracked its line, straightening its curves and reducing its grades, and the cost of it was

over \$100,000 a mile through the State of Iowa.

Mr. FORDNEY. Yes, sir. Large amounts of money have been spent recently by railroads in the United States that were constructed many years ago. Of late large sums of money have

been spent in putting heavier steel upon those roads, straightening the curves, lowering the grades, strengthening the bridges, and so on, to enable them to run those great mogul engines that weigh 600,000 pounds as against the 50 or 60 ton engine years ago. It costs money to do those things. It costs money to build a terminal. It costs money to do everything in connection with the equipping of a road in first-class shape.

Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Pennsylvania?

Mr. FORDNEY. I do.

Mr. MOORE. Does the gentleman know how many railroads there are in Alaska now?

Mr. FORDNEY. No; I have not studied that question, depending upon the committee that has given this subject careful study to furnish that information to the House.

Mr. MOORE. I will ask the gentleman this question: If there is such a fine opportunity for profit in that rich, new country, why is it that the railroad men, with all the tendency toward enterprise and even graft, if you please, do not avail themselves of the opportunity offered to build these roads?

Mr. FORDNEY. I do not know. But one gentleman who is in favor of this project told me yesterday that Alaska is one of the garden spots of this earth for truck gardening. heavens, men. [Laughter.] Think of making a truck garden profitable in Alaska when the truck would perish before you could get it to the neighborhood of people who could consume it.

Mr. MURDOCK. Without cold storage? Mr. FORDNEY. Yes; without cold storage.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman vield?

The CHAIRMAN. Does the gentleman yield?
Mr. FORDNEY. Yes.
Mr. GRAHAM of Illinois. I want to ask the gentleman a question in connection with the question asked by the gentleman from Pennsylvania [Mr. Moore].

Mr. FORDNEY. Yes; I yield to the gentleman.

Mr. GRAHAM of Illinois. The gentleman knows that the railroads were very profitable in Illinois. Why did they not build railroads in Illinois before the Government helped them to

Mr. FORDNEY. I will tell my friend. We did not have the money in the United States then. The people in this country, both the Democratic Party and the Republican Party, way back in the fifties and the sixties, could see that, and knew what advantages there would be to this country in the opening up of railroads between the Atlantic and the Pacific coast. Knowing that there was not sufficient private funds in this country to build those great railroads, the Government, through the Congress of the United States, gave aid toward the building of those roads, by appropriating large quantities of public lands instead of cash. The Government then did not have the money, but it had an abundance of land, which it was offering for sale to get money to cover into the Treasury of the United States, and therefore it gave large grants of land to those railroad com-

Now, the question whether that was wise on the part of our fathers or not I am going to leave to you gentlemen, but it certainly did aid in building those great trunk lines across the

Mr. GRAHAM of Illinois. If it was either right or wise to do that for so many others in the past, is it wrong to do it for Alaska now?

Mr. FORDNEY. That is not the proposition here. You do not propose to aid a corporation or private concern by giving it public lands in Alaska. You propose here to issue bonds to raise money and build a railroad by the Government. If you are going to have Government ownership of railroads, it is my candid opinion that Alaska is the proper place to begin it, because it is the one spot on the American Continent where such an enterprise would be an absolute failure, and be more convincing to you, a Representative of this great Government, of your folly. If you vote for this proposition, it will come back to you quickly.

Now, let me go on with this other proposition.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield? Mr. FORDNEY. Yes; but I would like to go on.

Mr. FORDNEY. Yes; but I would like to go on.
Mr. COOPER. The gentleman stated that the Government of the United States did nothing for the transcontinental railroads except to make land grants.

Mr. FORDNEY. The great Union Pacific line was aided by

Mr. COOPER. But the gentleman omitted to say that,

Mr. FORDNEY. I forgot to say that, although I know that is the fact. Later on the Government of the United States settled with that road and took less money on the dollar than it

had advanced. That is my recollection.

Mr. COOPER. On the contrary, they put in a bill here for 80 years at 2 per cent, and we would not accept that, and then they put in another bill for 50 years at 3 per cent, and that was defeated on the floor here. Then the Government got \$58,600,000 cash, principal and interest, in full from the Union Pacific and the Kansas Pacific, and then, the year after that, the Central Pacific entered into an agreement by which they gave the Government a first mortgage and made an agreement for the payment in installments of principal and interest, and paid it all up, dollar for dollar, in full, approximating \$120,-000,000 in the aggregate.

Mr. FORDNEY. It was not my understanding that the Government received back all the money advanced to the Union Pacific, with interest. I may be wrong about that. In order to aid in the building up of Alaska, in order to aid the people of Alaska, I am willing to vote for an appropriation of money to be loaned, to be secured by a first mortgage upon the railroad. I am willing to loan the money to any private corporation or individual that will build a road and they put in the major por-tion of the required money; but I am not willing to vote for this proposition, the beginning of something to which there will

Let me go on as to Germany. I undertook to give you the difference in the cost of construction of railroads by the Government in Germany and by corporations and private interests in the United States, and the difference in the cost of the operation of those roads. I have never been in Germany, but it is my understanding the roads of Germany and their equipment are in

no way comparable in efficiency to the roads of this country.

Mr. DAVENPORT. Has the gentleman any data to show the

cost of building railroads in Canada?

Mr. FORDNEY. Yes. I will give you the cost of construction

in Canada in just a few minutes

The wages paid by the railroads in the United States for the year 1912 averaged \$14.45 a week to all their employees. The wages paid in Germany by the Government for operating German Government railroads were \$7.46 a week to their employees.

The freight charge for carrying 1 ton of freight 1 mile in the United States was 7.41 mills. The cost of carrying freight by the Government in Germany is 1.41 cents per ton per mile, or nearly double the cost of carrying freight on railroads in the United States.

Will the gentleman yield for a suggestion? Mr. BRYAN.

Mr. FORDNEY. Yes.

BRYAN. Is not that great discrepancy because of the magnificent distances in America, whereas in Germany the

distances are not so great.

Mr. FORDNEY. On the other hand, Germany has a population of 1,766 people for every mile of railroad in Germany as against 387 in the United States. It is population and the amount of agricultural and manufactured products that make it possible for your railroads to carry freight cheaply. Talk about cheap freight in Alaska. Why, we produced last year \$10,000,-000,000 worth of agricultural products and \$20,000,000,000 worth of manufactured products in the United States, which were transported chiefly over our railroads. Comparing the value of agricultural, manufactured, and mining products of Alaska with those of the United States and they are a mere flyspeck on the map of the world.

Mr. BORLAND. Speaking about the cost of carrying freight in Germany and in the United States, referring to the question just asked, is it not true that a long haul is carried more

cheaply per ton per mile than a short haul?

Mr. FORDNEY. I believe that is true.

Mr. BORLAND. And is not a large proportion of the cost of carrying freight the cost of loading and unloading, in short hauls?

Mr. FORDNEY. That may be true.

Mr. BORLAND. So that a thickly settled country like Germany, that produces short hauls and small packages, would average higher per ton-mile.

Mr. FORDNEY. It would depend on the cost of operating your road, and I have shown you that we pay twice as much to our labor as they do, but that it costs almost twice as much per mile to construct railroads in Germany under Government control as it does to construct our roads in this country by private enterprise. Much depends upon conditions, my friend.

Mr. McGUIRE of Oklahoma. I should like to ask the gentleman a question on the subject of Government ownership of

railroads.

Mr. FORDNEY. Yes.

Mr. McGUIRE of Oklahoma. I have been present at some of the hearings before the Committee on the Territories, and if there is any one thing that has been developed beyond a doubt it is that if the railroads, which have contemplated building in Alaska, could have secured the grants that they desired from the Government of the United States, the roads would have been built, and the reason they have not been built is because the grants desired by these companies were not secured. Now, if it would pay a railroad company to build these roads provided they could secure these grants, why would it not pay the Government of the United States to build the roads, it already having not only the property wanted by the railroads, but a great amount of natural resources in addition to that?

Mr. FORDNEY. Why is it that no corporation has in many years past asked for Government aid in building a railroad in the United States? It is because there is plenty of capital, plenty of energy, plenty of determination, plenty of go-aheadness, push, pull, or carry, in the American people, to build railroads without Government aid. Why come and ask the Government to aid in the building of roads in Alaska, when there is an abundance of capital in this country that will build railroads in Alaska just as soon as a fair return for the investment can be offered to induce the investment of that capital?

Mr. McGUIRE of Oklahoma. Will the gentleman yield?

Mr. FORDNEY. Yes.

Mr. McGUIRE of Oklahoma. It is true they have made application and want to go into Alaska, but it is also true that they

will not go unless they secure the grants they want.

Mr. FORDNEY. I am willing to vote for Government aid for the construction of roads in Alaska, as I have already stated, but I am not willing to vote for Government ownership of railroads. O my friends, let me say to you that you have heard the old, old story of the man in the hollow log, who had hold of the tail of the bear and he could not let go. is where you are going to place the Government of the United States by building railroads in Alaska under Government ownership. Talk about leasing them! Your bill calls for a lease not to exceed 10 years. Where can you get an intelligent man that will lease a \$35,000,000 property to operate, when he knows that he can not operate it at a profit, especially under that direction and authority given the Interstate Commerce Commission, as to fixing rates, and so on? Where will you get an intelligent man that will take such a lease for 10 years? There is a town up in my State called Kalamazoo, and they have a public institution there, where such men can be found. [Laughter.] It is nonsense to talk about leasing a \$35,000,000 property for 10 years' use.

Mr. GRAHAM of Illinois. That provision of the bill can be

modified when the time comes.

Mr. FORDNEY. I would modify it by striking out all after the enacting clause. Now, the gentleman asked me if I had statistics as to the cost of the construction of railroads in Canada. I have. The construction of all railroads in Canada to 1912 is \$72,129 per mile, a fraction less than the cost of construction of roads in the United States, due largely to the fact, perhaps, of less steel bridges than in the United States. lowering the grades, shortening of bends, where large sums of money were spent, that were found necessary and may not have been done in Canada.

But in England, my friends, the cost of railroad construction and equipment-and I believe it is admitted by everybody that their roads bear no comparison to ours in efficiency and equipment—amounts to \$275,000 for every mile of railroad built there. Talk about building in Alaska for \$48,000 per mile!

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. GRAHAM of Illinois. Is it not true that there is hardly a grade crossing in all England? And does not that materially increase the cost of building? Is it not also true that the cost of terminals add greatly to the cost of the construction of railroads per mile, especially when these terminals have to be obtained in large cities?

Mr. FORDNEY. I believe that is true, but there are no such terminals in England as we have in the city of New York

and in Washington, the District of Columbia.

Mr. GRAHAM of Illinois. Yes; and think of what they cost. Mr. FORDNEY. Yes; they cost a great amount of money. Mr. GRAHAM of Illinois. In the early days terminals cost little or nothing

Mr. FORDNEY. But I am talking about the statistics of

Mr. GRAHAM of Illinois. As I say, in the early days they

Mr. FORDNEY. Oh, you can operate railroads in Alaska without terminals, can you? I think not.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. FORDNEY. I will yield to the gentleman.

Mr. HUMPHREY of Washington. I want to ask the gentleman if he knows the estimated cost of the new Canadian railway being constructed by the Government from ocean to ocean?

Mr. FORDNEY. No, sir; I do not, but I do know that when the Canadian Pacific was built across the great Northwest to the Pacific Ocean the engineers declared that it was impossible, but Mr. Hayes, formerly an Iowa farm boy, who left the farm and was a roustabout around a little railroad station and afterwards became a great railroad man and was employed by the Canadian Pacific Railroad and given a salary of \$50,000 a year, after an inspection, reported to the stockholders that is was possible to build the road, but it would be at great expense. Now, taking into consideration the great cost of construction of these roads, their average cost, as I say, is \$72.000 per mile.

Mr. HUMPHREY of Washington. I saw a statement recently in print that this railroad in Canada that is being constructed was one of the best-constructed roads on the continent, that it had nowhere a grade exceeding 1 per cent, and that the Government has constructed there 3,600 miles of road. I want to ask the gentleman if he does not think that if Canada can afford to construct a road of that length at Government expense. the United States, with its wealth and population, can afford to construct 700 miles of road in Alaska?

Mr. FORDNEY. I will say to the gentleman from Washington that of late I have given considerable thought to railroad matters. I have studied all the information I could get, and especially railroad statistics, and I believe that the Congress of the United States has gone to the extreme in railroad legislation. I am not a stockholder in any railroad, I am not talking from personal interest, but I think for the last few years the people of the United States have become excited beyond reason and gone to the extreme in some respects.

In one respect it is railroad legislation. I am in favor of a fair return on the investment of capital, both to labor and to the men who own the capital. The people of the United States never were, are not now, and never will be prosperous without well-employed and well-paid labor and without capital receiving a fair return for investment and a security in the Government of the United States that they are going to be protected in their rights and not be destroyed by socialism or anarchy, that should not exist in free America. [Applause.]

Mr. LENROOT. Does the gentleman think that the railroads in this country to-day can borrow money at a fair rate of

interest?

Mr. FORDNEY. I question right now whether a railroad, a lumberman, or anyone else can borrow any great amount of money in the United States at this time.

Mr. LENROOT. Then capital is free to invest in Alaska?
Mr. FORDNEY. It is just as free to invest in railroads in

Alaska as it is in a peanut stand on the corner of Pennsylvania Avenue down here, but you must give good security, you must put up substantial collateral or you can not borrow money anywhere. If you can, there is every evidence that you have hoodwinked a cashier into letting you have money without efficient security. I know. I am in business and I know what the conditions of the country are. I only hope that my view of the situation is an exaggerated one, but it is a serious one to me right now. We are facing a period of lower prices and a depression in business that means hard times and distress for the laboring people of this country, and you can not deny it.

I clipped from the Washington Post only yesterday morning

or the day before what purported to be a copy of a telegram sent from Seattle to the gentleman from Washington [Mr. HUMPHREY] asking for Government aid for the distressed and unemployed in the city of Seattle, 5,000 in number; asking for aid from the Government in giving to them 5,000 blankets to care for the unemployed in that city. Whether that is true or not I do not know, but I leave it to you for your consideration. On Friday last I cut from the New York Sun a statement that the municipal lodging houses of New York, taken care of by the city government, were filled to overflowing with hungry, unemployed men, and that paper said it was due to two causes, perhaps; one, the sudden increased cold weather, and the other, the New Freedom-from work. I clipped from a Chicago paper and have on my desk a statement that there are 100,000 unemployed men in the city of Chicago.

Gentlemen, if those statements are correct, it is astounding, and it is evidence of what is coming. What is responsible for it I am not going to say. I have my own notion about it, but I will let you draw your own conclusions, but if you can not

see it to-day, if those statements are correct, it will be as big as a full moon before you inside of another six months.

Mr. McKELLAR. Mr. Chairman, will the gentleman yield?

Mr. FORDNEY. Certainly.

Mr. MCKELLAR. The gentleman spoke of the present prevailing low prices. Does he refer to the low prices of food-

Mr. FORDNEY. Mr. Redfield, Secretary of Commerce, in a paper the day before yesterday, gives statistics on exports and imports. He calls attention to the fact that in October, 1912, there came into this country from abroad, chiefly from Canada, 9,881 bushels of potatoes, and in October, 1913, 472,000 bushels of potatoes, at 43 cents a bushel. Is not that cheap enough to suit you?

Mr. McKELLAR. As I understood the gentleman, however, he stated that there were present prevailing low prices.

Mr. FORDNEY. There are in some things.

Mr. McKELLAR. Not in foodstuffs? Mr. FORDNEY. I believe there are in potatoes. Is not 43 cents a bushel for potatoes cheap enough?

Mr. McKELLAR. Does the gentleman's statement apply

only to potatoes?

FORDNEY. Oh, no; the gentleman would not let me conclude—I will not say that, but I did not conclude. The Secretary of Commerce also showed that for the month of October, 1912, there came into this country from abroad, chiefly from Canada, 52,000 bushels of wheat, and in October, 1913, 233,000 bushels of wheat, and he concludes by saying that there can be no other conclusion drawn from this report than that it has been most beneficial to the industries of the United States. Tell me what comfort a farmer in Michigan can get out of that kind of a report?

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentle-

man yield?

Mr. FORDNEY. Certainly.

Mr. HAMILTON of Michigan. Permit me to remind the gentleman that our Democratic brethren promised the people lower

Mr. FORDNEY. Well, I thank the gentleman for the sugges-

tion. It is true of a good many things

Mr. HAMILTON of Michigan. Are not they gradually accom-

plishing that-

Mr. FORDNEY. It is slow poison, but it is sure death, boys; and it is coming and it is bound to come. Now, I do not know whether you are going to get back to the Democratic prices of 1896 or not. I was a farmer in the State of Michigan at that time, and sold potatoes at 12½ cents a bushel. I sold to a particular grocery store, and the grocer told me "I am specially favoring you because you are a good customer." [Laughter.]

Mr. WINGO. Will the gentleman permit an interruption?

Mr. FORDNEY. Certainly.

Mr. WINGO. The gentleman says potatoes are selling at 43 cents a bushel?

Mr. FORDNEY. That is Secretary Redfield's statement.

Mr. WINGO. Will the gentleman kindly give me the name of e grocery? I am paying 40 cents a peck now.

Mr. HAMILTON of Michigan. One always pays more in a big

city

Mr. FORDNEY. The gentleman must pay it to some Demo-They are cheaper in my State, and there are no Democrats up there. Let me get back to the proposition of railroads;

I am drifting away. 'Laughter.]
Mr. McKELLAR. You want to leave prices?
Mr. FORDNEY. No; I am perfectly willing to speak of a high and low tariff and cheapness in the cost of living. Cheapness cuts no figure in this country when you have not the money to buy things. Potatoes went to 10 cents a bushel, flour to \$4 a barrel, and bread to 3 cents a loaf in 1896, and it never was so far away from the laboring people of this country during your life or their lives as it was at that time, when they had no employment and did not have the 3 cents with which to buy the

I did not mean to get into politics on this subject, but you have forced me into it. [Laughter.] There has been a period of prosperity, which you can not deny, which prevailed in this country for the past 15 or 18 years. I want to see it continue. If you will bring prosperity to the American people, my dear friends—and I am one of them—I am perfectly willing that you shall rule in the majority here for all time to come. [Applause.] But tell me, when Mr. Daniels over at Baltimore last Friday night stated that the consumer must have eggs at a lower price and the farmer must get more for them, how can it be done? [Applause.] A barber in Aberdeen, Wash., this last summer presented that proposition to me when he was cutting my hair in the barber's chair. I said, "Can you work !

out a problem, my friend, that will increase men's pay and lower the cost of the product of their labor?" "Oh, yes; I can do that." I said, "If you can do that, let me ask you a question. You are a barber and know your own business better than anybody else knows it, and you know your business better than anybody else's business." "Yes, sir." "You work 10 hours a day here and you charge me 25 cents for cutting my hair." "Yes." "You are going to work eight hours and cut my hair for 15 cents and increase your income." "Oh, well, that is not fair now; that is not fair," he said. "Well, tell me how you are going to work that out, and then I will tell you something about the lumber business and how it can be

Mr. McKELLAR. Will the gentleman yield? Mr. FORDNEY. Yes; I will yield.

Mr. McKELLAR. Where the middlemen are making enormous profits, profits they are not honestly or justly entitled to, why would it not be better to cut out some of those profits, the improper profits of the middlemen, and give the producer more and let it go to the consumer for less?

Mr. FORDNEY. I am perfectly willing to agree with the gentleman on that proposition, but I am not a middleman.

[Laughter and applause.]

Mr. SHERLEY. Will the gentleman yield for a question?

Mr. FORDNEY. Yes.

Mr. SHERLEY. Is the reason the gentleman agrees with him

because he is not a middleman?

Mr. FORDNEY. Oh, no; not necessarily. I will tell you if you were a manufacturer or producer you ought to look to the American people for the market for your product. Of the \$30,000,000,000 worth of products of this country, agricultural and manufactured, last year, 93 per cent was consumed at home. The best market in the world is right at your door. And let me tell you, my friends, in my opinion, a great mistake on the part of organized labor. I have been petitioned and so have you, every one of you, over and over again to restrict immigration, to make our immigration laws more drastic, to prevent the immigration of labor from foreign countries.

Mr. KINDEL. Mr. Chairman— The CHAIRMAN. Does the gentleman from Michigan [Mr. FORDNEY] yield to the gentleman from Colorado [Mr. KINDEL]? Mr. FORDNEY. Let me answer that statement, and then I will yield, sir, if you please. They want, I say, to restrict immigration. They do not want foreign labor to come in here and compete with their labor, and, on the other hand, they turn around and vote to admit free of duty the product of that foreign labor produced in a foreign land, to come directly in competition with a product of their own labor here, and destroy an American market. Tell me what wisdom there is in such a proposition as that? I can not see it.

Now I yield to the gentleman from Colorado [Mr. KINDEL]. Mr. KINDEL. I wish to ask you how you are going to get the producer and the manufacturer closer to the consumer with the present parcel-post rates? [Laughter.] A 20-pound package will cost from New York to Chicago 64 cents, while by parcel post it vill cost \$1.32. How are you going to get the two together? I want to say that you must base these rates on aeroplane rates rather than railroad rates.

Mr. FORDNEY. I am a producer in the State of Washington, and I am far removed from the Atlantic States, and we can not send our logs or lumber by parcel post.

Mr. HUMPHREY of Washington. Does the gentleman want

to go back to the subject of railroads?

Mr. FORDNEY. I will. I will conclude very soon now.

Mr. HUMPHREY of Washington. You refer to the construction of the Canadian railroad, the Grand Trunk, that the Government is building. I am reading from the hearings before the House committee, in which it was stated that the road would be 3,600 miles long, and that it would cost about \$70,000 a mile. and it says the railroad has less than a half of 1 per cent grade throughout, from ocean to ocean. Now, I will ask the gentleman if he does not think the cost of construction through that section of the country would be about the same as it would be in Alaska? It seems to me the character of the country is about as difficult in one place as in the other.

Mr. FORDNEY. I will say to the gentleman from the State of Washington that I have been trying to make myself clear that my candid opinion is that the difference between the estimate of cost of constructing a thing and the actual cost is very

great.

Mr. HUMPHREY of Washington. That is true, but-Mr. FORDNEY. I showed to you that the most intelligent and efficient body of engineers, 300 in number, gathered together by the Secretary of the Interior and Mr. Pinchot, had made estimates on the irrigation projects to cost \$48,000,000,

but admitted a little later, when they wanted a bond issue to get money to carry on these projects, that it was going to carry over \$152,000,000. Now, take your railroad estimates and the actual cost of construction, and if there is as wide a difference between the estimated and actual cost of constructing that railroad as there was in the irrigation projects by the most efficient body of engineers ever assembled on the face of the earth—as they were called—it is not worth the paper it is written on. That is what I say, Mr. HUMPHREY of Washington. I agree very largely with the gentleman that that is true; but the greater portion of this

Canadian railroad has already been constructed, so that they

are basing their estimate largely upon what has actually taken place as well as upon that which has to be finished.

Mr. FORDNEY. I know and you know that statistics furnished by the Interstate Commerce Commission and the Bureau of Railway Statistics of this country are fairly accurate, and those statistics show that our railroads have cost over \$76,000 a mile in the United States. And you know and I know—not from being in Alaska, but from what we know of general information—that railroads in that frozen country can not be built as cheaply as they can be built in the United States

Mr. MURRAY of Oklahoma. Mr. Chairman, will the gen-

tleman yield for a question?

Mr. FORDNEY. Yes; in just a minute. A minority report on this bill states that some mining company has penetrated the earth in Alaska to a depth of 2,200 feet and finds the ground is frozen harder than the hobs of Jericho at that depth. [Laughter.]

Does the gentleman yield to the gentle-The CHAIRMAN.

man from Oklahoma?

Mr. FORDNEY. How in the name of common sense are you going to raise celery and alfalfa under such conditions. [Laughter.]

Now I will yield to the gentleman.

Mr. MURRAY of Oklahoma. The report of the committee indicates that those proposed railroads are to be pretty straight. The report of the committee Would it not be cheaper per mile if you crooked those roads around the mountains instead of laying them straight?

Mr. FORDNEY. Oh, yes; but you could not run a crooked

road as cheaply as you can run a straight road.

Mr. Chairman, now I wish I had the statistics here to show you how much more it costs per mile to haul a train of cars with a certain amount of freight upon a road that has a certain degree of curve than to haul it over a straight road. I have them somewhere, but I can not lay my hands upon them. In that mountainous country up there, where you have your steep grades from 1 to 5 per cent uphill and downhill, it is going to cost more money to haul freight in a train composed of a certain number of cars than it would cost over a level road.

Mr. TALBOTT of Maryland. Mr. Chairman, will the gen-

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Maryland?

Mr. FORDNEY. Yes.

TALBOTT of Maryland. Is it not also a fact that the cost of maintaining a road, including the cost of the cars and the cost from the wear and tear on machinery, is greater on a

crooked mountain road than on a straight, level road?

Mr. FORDNEY. Oh, yes. I know this much: I have had just enough experience in logging-railroad building to know that with your sharp curves, with heavy locomotives, you must many large support of the property of the spend large sums of money in bracing the rails around the curves, to keep the rails from tipping when a heavy train at a high speed approaches a grade. That costs a great deal of money. A brace on the ties costs 15 to 18 cents. It requires spikes to set that brace, and it costs more for the ties. those things must be taken into consideration. Around sharp curves, where you attain a high rate of speed, there must be many braces of that kind, and the ties themselves must be stronger, and it costs much more to lay the track than it costs to lay down a straight track on a prairie.

Gentlemen, the only country in the world where we can compare the cost of Government operation of railroads with the cost of roads in private ownership is Germany, where, as I stated, 95 per cent of the roads are owned by the Government, and where the wages are one-half those paid by American railroads, and the charge for carrying freight is twice the charge for carrying freight in the United States. That is the best argument to me that can be presented, showing that Government ownership is an undesirable thing, especially with re-

Now, Mr. Chairman, unless some gentleman wants to ask me question, I yield back the remainder of my time. [Applause.] Mr. LENROOT rose.

The CHAIRMAN. The gentleman from Wisconsin [Mr. Len-ROOT] is recognized for an hour.

Mr. LENROOT. Mr. Chairman and gentlemen of the committee, I shall not consider to any great extent the matters that have just been discussed by the gentleman from Michigan relating to the cost of railroads, principally for the reason that it is immaterial to us in the consideration of this bill whether these railroads in Alaska shall cost \$48,000 per mile or \$96,000 a mile, because the resources of Alaska will pay every cent of the cost, no matter what it is. [Applause.] At the same time these railroads will permit the people to use and consume those resources at a very much less price than if the railroads were built under private ownership. [Applause,] Another reason is that as we proceed in this discussion I shall call as witnesses to contradict the gentleman from Michigan [Mr. FORDNEY] the owners, the counsel, and the agents of the Alaskan railroads who are now opposing this bill.

Mr. WINGO. Will the gentleman yield for a question right

there?

Mr. LENROOT. Yes.
Mr. WINGO. For my information—I have not been able to keep up with all this discussion—how many railroads are there in Alaska now

Mr. LENROOT. There are 466 miles of railroad.

Mr. WINGO. How many different roads?

Mr. LENROOT. There are three principal railroads—the Alaska Northern, having a mileage of 71 miles; the Copper River & Northwestern, having a mileage of 195 miles; and the White Pass & Yukon, having a mileage in Alaska of 20 miles and in British territory of 82 miles,

Mr. WINGO. What information has the gentleman with reference to the present financial difficulties of those railroads?

Mr. LENROOT. The Alaska Northern is in financial difficulties, or has been.

Mr. WINGO. How many are in the hands of receivers?

Mr. LENROOT. There are none in the hands of receivers. They were at one time. I will discuss that later in my remarks. The Copper River & Northwestern is a Morgan-Guggenheim road, and is not in financial difficulties at all. The White Pass Yukon road is owned by British interests, who are members of the Alaskan syndicate.

Mr. WINGO. Will the gentleman discuss the freight rates

that they charge on these roads now?
Mr. LENROOT. Only incidentally.

Mr. WINGO. I shall be glad if the gentleman has any information on that subject.

Mr. LENROOT. I will reach that later on.
Mr. Chairman, President Wilson has well said that the railroad is the key to the great storehouse of Alaska. proper railroad transportation that storehouse will never be unlocked. For whose benefit it shall be unlocked depends wholly upon who holds the key. The present bill is based upon the theory that the owner of the storehouse should hold it.

As in the case of the disposition of all natural resources of great value, there are contending interests here-private interests and the public interest. Conservationists contend that this storehouse should be unlocked in the public interest, that the present owners should continue to own and control it and furnish the key. The principal opposition contends that to him who shall furnish the key to unlock it the entire storehouse shall be given. The proposition is not unlike that of a man who has lost the combination of his safe, proposing to a locksmith that if he will unlock it he will make him a present of its contents.

propose to discuss very briefly the present situation in Alaska and the necessity for the prompt enactment of the pending bill, with some modifications which I shall discuss

when the bill is read for amendment.

Great complaint has been made, and just complaint, that the development of Alaska has been practically at a standstill during the past seven years, but the cause of this has long been a matter of dispute. A careful study of the history of Alaska during the past seven years and an examination of the proceedings in Congress will, I believe, convince any unprejudiced mind that the conservationists have urged legislation opening up Alaska with proper safeguards to the public; that special interests, together with some good men who believe that the natural resources of this country belong to the man who is willing to develop them, have opposed this legislation and are opposed to any legislation that will not place these great resources in private hands for private enrichment alone. fortunate Alaska has been caught between the upper and nether millstone of these contending forces and remains where she was seven years ago.

In this connection I can not refrain from saying that the people of Alaska have been themselves somewhat to blame in this matter. There are about 36,000 white people in Alaska. The great majority of these people are opposed to turning over Alaska to the Alaska Syndicate, consisting of the Guggenheims and the house of Morgan, but many insist that it be turned over to them. We are told that on the wharf at Cordova to greet the incoming traveler there is a huge sign containing the words "Let us mine our own coal." At Seward a similar sign The coal in Alaska does not belong to the will be found. 36,000 people who live there any more than it belongs to the Guggenheims. The coal and other mineral resources belong to all the people of the United States, and I am confident that no legislation will pass this Congress or any succeeding Congress that is not based upon that theory. This is not at all inconsistent with the idea that the pioneer who, through sacrifice and hardship, brings about the development of our resources should be amply rewarded. I believe he should be; I believe that any legislation either for Alaska or elsewhere should be so framed as to give the actual prospector, the real pioneer, adequate reward for his toil and hardship. But that is quite a different thing from so legislating that a group of men who never lifted a pick or shovel, who never visited Alaska, except as pleasure-seeking tourists, having an eye to business at the same time, should have the cream of Alaska, leaving to the owners—the people of the United States—nothing, and to the people of Alaska only skimmed milk.

I am glad to observe that the people of Alaska are themselves

beginning to understand that their own best interests, the future prosperity of Alaska, requires legislation of the character of the pending bill, and I am satisfied that at this session of Congress not only will this bill be passed, but other legislation, which will result in opening up the coal fields of Alaska for general use.

That the immediate construction of railroads in Alaska is absolutely necessary for its development I think no one will deny. The minority report of the Committee on the Territories, however, makes a vicious attack upon Government construc-tion and ownership of railways. In many ways this minority report is one of the most remarkable documents ever presented to Congress. I shall take occasion to analyze it later on, and at this time will only say that if we did not know that the men who signed the minority report are among the most respected Members of this House, whose integrity is beyond question, we would be warranted in the suspicion that it was inspired by the Alaskan Syndicate, consisting of Morgan & Co. and the Gugrenheims.

As to whether or not the resources of Alaska justify the proposed railway construction there can be no question. I shall not go into any statistics of the value of those resources, consisting of gold, copper, coal, and many other minerals and rich agricultural lands. They are all familiar to even the most casual student of Alaska. It is enough to say that if those resources belonged to a private individual, not only would there be rapid railroad construction to reach them, but the railroad construction would be carried on by the owner of the resources just as is proposed in the pending bill.

The total railway mileage of Alaska is 466. There are only two standard-gauge lines—the Copper River & Northwestern, 195 miles, and the Alaska Northern, 71 miles. Another narrow gauge, the White Pass & Yukon route, has 20 miles in Alaska and some 82 miles in Canadian territory. These three are the only ones existing at present that affect the interior of Alaska or have any prospect of doing so in the future.

The Copper River & Northwestern is owned outright by the Alaska Syndicate, consisting, as I have stated, of Morgan & Co. and the Guggenheims. The Alaska Northern is claimed to be owned by Canadian interests, the White Pass & Yukon route by British interests.

There has been practically no railway construction in Alaska since the withdrawal of the coal lands from entry.

The history of railway building in Alaska, with one or two honorable exceptions, is a history of lawlessness, murder, high finance, and chicanery. You may pick up the trail of the Alaska Northern, of the White Pass & Yukon, and other projected roads claiming to be independent of the Morgan-Guggenheim interests, and while that trail will be found very difficult to follow at times and will lead one into far countries, sometimes into eastern Canada, sometimes to London, yet, if you will continue patiently to follow it, you will finally arrive at the banking house of Morgan & Co. in New York.

From a careful study of all the testimony before the commit-

tees in both Senate and House I have no hesitation in saying that the Alaska Syndicate now controls the railroad situation in Alaska, and will continue to control it unless the Government itself shall undertake railway construction there.

As illustrative and corroborative of my statement, I will briefly relate the history of the Alaska Northern Railroad. The Alaska Northern is the successor of the Alaska Central Railway Co., organized by John E. Bellaine, of Seattle, Wash., and Seward, Alaska. The original owners of the Alaska Central were Mr. Bellaine and certain capitalists of Seattle, and F. Augustus Heinze, of Butte, Mont. While under this ownership the Alaska Central, through a construction company owned by Mr. Bellaine, built the first 20 miles of road from Seward toward the interior. This 20 miles was built for the sum of \$363,000, or a little over \$18,000 per mile. This cost included a dock, two locomotives, five cars, and a sawmill. The road was then purchased by Frost & Osborne, of Chicago and Toronto, with the intention on their part of building to the Matanuska coal fields. This was in 1903, 1904, and 1905. Immediately upon the purchase of the road Frost and his associates located 63 coal claims in the Matanuska district.

And let me say here, in passing, that wherever you find a railroad projected into any portion of Alaska you will find the capital behind it at the same time attempting to get their hands upon all the resources along the line of that railroad.

Mr. Ballaine testified before the House committee as follows (p. 152):

His plan was to sell the bonds of the railroad company based on a consolidation of the assets of the 63 coal claims and the assets of the railroad company, but he got into financial difficulties with his Chicago and Wisconsin properties and failed.

I may say, in passing, that Mr. Frost was afterwards indicted for these coal-claim transactions, but acquitted. Frost & Osborne, prior to their failure, completed the greater portion of their line to its present eastern terminus, 71 miles from

To carry on their various financial transactions, Frost & Osborne borrowed from the Sovereign Bank of Canada a sum of money said to be two and one-half million dollars, and among the securities put up to secure these loans were bonds of the Alaska Central. Upon the failure of Frost & Osborne the Alaska Central was thrown into court, and the final result was a reorganization of the road by the bondholders under the name of the Alaska Northern, and the shareholders of the Sovereign Bank of Canada are the real owners of the Alaska Northern. It appears from the testimony that Morgan & Co. and allied interests owned a one-third interest in the Sovereign Bank of Canada and was its representative in New York.

The Alaska Northern has not for the past three years been operated as a common carrier. Can there be any question but that the Morgan interests control the Alaska Northern?

The White Pass and Yukon route is owned by the Close Bros. of London, but it also appears that they, too, are members of the Alaska Syndicate and have half a million dollars stock in it.

There have been two or three attempts at railroad construction in Alaska by capital really independent of the Alaska Syndicate.

Mr. Bellaine testified concerning these before the House committee. He stated that while the Alaska Syndicate were build-ing their railroad from Cordova a company of Pittsburgh people, headed by Dr. Bruner, undertook to build a railroad from Martin Islands, at Katalla Bay, into the Bering River fields, with the announced object of going up the Copper River to Eagle. The Alaska Syndicate sent out a force of armed men, attacked them, drove them off the ground, and destroyed their roadbed, and continued their assaults until the work was permanently stopped.

He also testifies that in 1907 the people of Valdez organized the Alaska Home Railroad. They raised \$100,000 and put a force of men to work in the Keystone Canyon, 11 miles from Valdez. While engaged in grading in this caryon the Alaska Syndicate sent a boatload of its employees from Cordova armed with rifles, picks, and shovels. This force attacked the employees of the Alaska Home Railroad, killed one out-right, fatally wounded two others, and wounded several more who recovered. One of the wounded men has since recovered from the Copper River & Northwestern Railroad \$16,000 as damages for the assault upon him, thereby judicially establishing the responsibility of the Alaska Syndicate for this outrage.

Mr. Bellaine, after stating these facts, continued as follows:

When the Alaska Syndicate will exert all its colossal power, as they are doing to prevent the raising of capital, and then if you do happen to raise a little, will go with an armed force and massacre your employees, it is a mighty serious situation, a mighty serious one.

As to the charge that the Alaska Syndicate can prevent and does prevent the raising of capital for independent railway construction in Alaska, Mr. Bellaine gives some startling testimony. I quote Mr. Bellaine very freely, for of all the witnesses who appeared he seemed to be the fairest and most reliable, a practical railroad man himself, having a broad grasp of the Alaska situation, and of all the charges and countercharges made by the contending parties in the hearings no one ventured to reflect upon him in any way.

I shall present his statement in his own words as found on page 164 of the House hearings, and pages 36 and 37 of the

Senate hearings:

I shall present his statement in his own words as found on page 164 of the House hearings, and pages 36 and 37 of the Seinte hearings:

We are asked a great many times why the Government should be called upon to build railroads in Alaska. The reply is sometimes given that it is impossible, absolutely impossible, to raise money to build railroads in that country unless the railroad builders have the privilege of acquiring coal lands in fee, to be used as a part of the assets of the railroad on which to base a bond issue or to show a tonnage for assured earnings. But even that would provide for railroad transportation only to the Bering River and the Matanuska coal fields.

In this connection I am going to give some information for the benefit of the committee. It is information that has never been made public heretofore.

After the Canadian owners of the reorganized Alaska Central had taken over the property I entered into negotiations with J. P. Morgan & Co. to ascertain whether they would back me in a project to build a narrow-gauge railroad, taking over the railroad from Seward, changing it into a narrow gauge, and extending it as a narrow gauge on into the Tannan Valley. I had my negotiations directly with G. W. Perkins, I offered to put up as a basis of security all of my property in Alaska and all of the stock and bonds in the contemplated company, with a bond issue limited to \$20,000 per mile, they to have a voting trustee-ship of all the stock until after the railroad should be completed to the Tannan River, when the bonds might be marketable and I could pay them back. Mr. Perkins agreed to enter into negotiations with the Canadian owners to take over the Alaska Northern with bonds in the proposed new company. Whether he ever did so or not I am not qualified to say. But it was agreed by Mr. Perkins, In the course of our negotiations, that Morgan & Co. should send out an expert to ascertain the amount of resources along the route from Seward, through the Susitin Valley, to Tannang River.

In the summer of

ereign Bank of Canada, which at that time was going through liquidation.

The Sovereign Bank had failed in consequence of the failure of Frost & Osborne. It held nearly all of the bonds of the Alaskan Central Railroad and nearly all of the stock. It was Mr. Perkins's opinion, as he expressed it to me, that through that arrangement they might be enabled to come out whole in their investments in the Sovereign Bank.

By appointment I met Mr. Perkins in New York about the 20th of November, 1909, when I expected to close negotiations. He informed me then that the Canadian owners were having difficulty in getting their bondholders to agree to the proposed exchange.

Later in the winter, or possibly in the spring, Mr. Perkins told me that the Guggenheim brothers had refused to give their consent to the plan for Morgan & Co. to take over the financing of this project as a narrow-gauge railroad from Seward through the Susitna Valley to the Tanana on the ground that they regarded the Tanana Valley as their field.

And yet the Copper River & Northwestern, the only road that they owned at the time, was nowhere near this territory.

Mr. Perkins told me at the same time that Morgan & Co. were not prepared to encourage any more railroad building in Alaska until the Government issued patents to coal claims then pending.

And we all know that the claims then pending were the famous Cunningham claims.

I asked Mr. Perkins: "Do I understand from this that if I or any other individual or any company should go to some other bank or banker to raise money for building a railroad from Seward through the Susitna Valley to the Tanana I should meet with the opposition of the owners of the Alaskan syndicate?"

He replied: "We could not allow a railroad to be built through the Susitna Valley into the Tanana. There will be no more railroad building in Alaska until the coal fields are opened."

Perhaps some gentlemen may not believe this statement, and for their benefit I wish to quote a little further, for it also throws a flood of light on past congressional history concerning Alaska. I quote from pages 37 and 38 of the Senate hearings on bills S. 48 and S. 133. Mr. Bellaine had just made the statement I have quoted, and then continued:

Mr. Bellaine. I made this same statement within 30 days after that interview with Mr. Perkins to the Senate Committee on Territories when Senator Beveridge was chairman. Senator Beveridge, Senator Kenn, of New Jersey, and Senator Dick, of Ohio, were present. I asked permission to have my statement taken down officially, so that it might be an official statement, because legislation was then proposed for the guaranty of interest on the bonds of 1,000 miles of railroad which the Alaskan Syndicate was favoring. The committee refused to allow my statement to be taken by a stenographer and published in the official records. Senator Beveridge called Mr. Perkins by phone in New York,

I am informed, and told him the substance of my statement. I understand that Mr. Perkins denied to Senator Beverlage that he had ever had any negotiations of any kind with me or even had known me.

If Mr. Perkins now will come out with a public denial of the statements I make here as to my negotiations with him, I am prepared to substantiate what I say. I will go further. If Mr. Perkins will give his permission, I will make public a telegram which passed from Mr. Perkins to a broker in New York asking him to call up a member of President Taft's Cabinet and have a certain conversation with him. If it comes to that point, I think we shall be able to contribute some very lurid literature to the discussion of the Alaskan problem.

Senator Walsh. In view of the testimony to which we have just listened, I move that the chairman of the committee be directed to address a communication to Mr. Perkins, saying that the committee would be pleased to have his testimony on this point and asking him if he would attend.

Preceding the making of his statement before the House committee, Mr. Bellaine testified as follows:

mittee, Mr. Bellaine testified as follows:

Now, Mr. Chairman and gentlemen of the committee, I have laid the groundwork so that you may have a clear understanding of the Alaska problem as it bears on the building of railroads in that rich territory.

I am now going to relate to you the personal experience I had with the house of J. P. Morgan & Co., through G. W. Perkins, as proof that those people are preventing the raising of money to build railroads in Alaska by private capital, thereby making it necessary for the Government, and the Government alone, to build them.

I made the same statement before the Senate Committee on Territories on the 2d of May that I am now going to make to you. I afterwards sent my official statement to Mr. George W. Perkins and wrote him a letter requesting him to come before the committee or to write a communication if my statements in any detail deviated from the facts, He made no reply. I wrote another letter, inclosing a copy of the former letter, and had a Senator mail that letter, so that if necessary I shall have a competent witness that the letter was mailed to Mr. Perkins. I received no reply to the second invitation. Both of my letters to him are printed in the Senate committee hearings. A secretary to one of the Senators also wrote him a letter inviting him to appear and answer my statement, and he made no reply to that.

The statements I make here relative to my negotiations with Mr. Perkins are privileged statements. I understand the obligations of privacy that any honorable man is under in a business transaction, but I have been released from those obligations. By what means I shall explain if Mr. Perkins publicly contradicts my statement.

The letters referred to by Mr. Bellaine are as follows: WASHINGTON, D. C., May 10, 1913.

Mr. G. W. PERKINS, New York, N. Y.

Dear Sir: Under separate inclosure I send you by this mail part 1 of the official reports of hearings before the Senate Committee on Territories, which contains a statement by me in relation to my negotiations with you respecting the Alaska Central Railway. If my statement is in any way incorrect, I should be glad if you would present your version to the committee, either by letter or in person.

As I do not know your present address, I am sending this in care of J. P. Morgan & Co., with a request on the envelope that it be forwarded to you.

Very truly, yours,

John E. Bellaine.

WASHINGTON, D. C., May 28, 1913.

Washington, D. C., May 28, 1913.

Mr. G. W. Perrins,
75 Park Avenue, New York, N. Y.

Dear Sir: I forwarded to you on the 10th instant a letter of which the inclosed is a copy. Not knowing your address, I sent it in care of J. P. Morgan & Co., with a request on the envelope that it be forwarded,
Since that date I have been informed that your New York address is 75 Park Avenue. I am accordingly mailing this letter and copy of my letter of May 10 to you at that address. I am sending to you at this address also copy of my statement to the Senate Committee on Territories respecting my negotiations with you. I have stated to the committee only such parts as the subsequent developments, which you will recall, gave me the right to disclose.

In my statement I endeavored to be accurate in every detail. If my statement deviates in any way from your recollection of the circumstances, I should be glad to have you give your version of the negotiations.

statems, I shows stances, I shows tiations. Very truly, yours.

I repeat the last paragraph of Mr. Bellaine's statement: He (Perkins) replied: "We could not allow a railroad to be built through the Susitna Valley into the Tanana."

Now, I have taken this much time upon this principally because of this one particular statement that was made by Mr. Bellaine, which has not been denied by Mr. Perkins, in which he quotes him as saying, "We could not allow a railroad to be built through the Susitna Valley into the Tanana." None has None has been built. None will be built unless by the Alaska Syndicate or the Government.

I now wish to present some further evidence that independent capital can not be secured for the construction of railroads in

Falcon Joslin, of Fairbanks, Alaska, is the president of the Tanana Valley Railroad Co., which has a narrow gauge 45 miles long extending from Fairbanks to Chatanika. He favors this bill and testified before the committee as follows (p. 43):

Obviously I would not support a bill for the Government constructing these railroads if there was any chance for me to continue my business of building railroads by private enterprise. I have despaired of being able to build any more railroads in Alaska by private enterprise; the capital can not be secured for it.

And again, on page 45:

It is now almost impossible, in my experience, to find capital to enter railroad construction. I can not even talk to men for the purpose of securing any more money to build railroads in Alaska.

Again quoting from Mr. Bellaine, on page 159:

The Alaska syndicate, made up of the Guggenheims and the Morgans, not only will prevent any other company from raising money to build a railroad into Alaska, in their attempt to control that rich territory for themselves, but they will employ physical force and arm their employees with rifles to prevent you from doing it if you undertake it, as they did in the Keystone Canyon above Valdez.

O. L. Dickeson is president and general manager of the Pacific & Arctic Railway & Navigation Co., owning and operating the White Pass and Yukon route. The owners of this corporation are Close Bros., of London, who are themselves members of the Alaska Syndicate.

Before the Senate Committee on Territories Mr. Dickeson tes-

tified as follows (p. 154):

I think all the transportation at the present time in Alaska should be consolidated and under one control and management in the interest of the public. I am endeavoring to no small extent to bring this about.

Much has been said and more will be said about the proposition of the Alaska Northern to extend its line to the Matanuska coal fields and its agreement to mine and transport coal for the Navy at a maximum price of \$5.50 per ton without Government aid and \$4.50 per ton with Government aid.

In the first place, it should be noted that the proposed extension would not reach the interior of Alaska at all, and therefore would only deprive the Government of a most profitable business and leave it an unprofitable business for some years if it con-

structed a road to Fairbanks or the Yukon.

In the second place, it should be noted that the proposition was to make a contract for a term of years at a price 10 per cent in increase of actual cost. This cost would include interest upon the investment in the 71 miles already constructed and the cost of completing the road to the coal field. The investment in the portion already constructed they stated to be \$6,400,000, or more than \$90,000 per mile. A reading of all the testimony will convince anyone that this figure is more than \$3,000,000 in excess of the actual cost of the road, yet they would, in estimating this 10 per cent above cost, demand interest upon this \$3,000,000 that never went into the road at all.

It also appears from their communication to the Secretary of the Navy that they would expect to float their bonds at a very large discount, and would expect to figure that into the cost on which they would be entitled to a 10 per cent increase for their

profit.

It is true, before the Senate committee, Mr. Jemmett, the treasurer of the Alaska Northern Railroad Co., undertook to state the conditions under which they would extend their line to Fairbanks. It does not appear that he had any authority to make any proposition at all, but let us examine the conditions which he undertook to make. They were:

First. Abolish the Chugach Forest Reserve.

Second. Abolish the mileage tax of \$100 per mile.

Third. Open the coal lands of Alaska under the present law, which means the Government selling these lands worth millions for \$10 an acre.

Fourth. Have the Interstate Commerce Commission fix a tariff of rates, which shall stand for a fixed term of years without a

Fifth. Exemption of taxes by Alaska for all time to come.

The conditions are to be found on page 375 of the Senate hearings, and Mr. Jemmett states that under all those conditions he thinks they could make an average rate from Fairbanks to the coast of from \$48 per ton up to—he does not state any limit.

Compare this with the estimate made by the Alaska Railroad Commission. Under private ownership, based upon a 6 per cent return on the cost and \$31,300 in taxes, they estimate the average rate would be \$36.94 per ton. Under Government ownership, based upon a 3 per cent return to the Government, they estimate the average rate would be \$24.43 per ton, or just about one-half what the Alaska Northern proposes to charge with all the conditions I have named.

It is a curious fact that while the counsel and representatives of the railroad systems now trying to get Alaska denounced Government ownership and operation in unmeasured terms, claiming that it was extravagant and wasteful, with a beautiful inconsistency contended that Government ownership would ruin

them through their inability to compete with the Government.

Mr. Jemmett, the treasurer of the Alaska Northern, said to
the Senate committee, page 379 of the hearings:

We can not run a litte 72-mile road in Alaska with the rest of it under Government ownership.

Mr. Boland, one of the trustees of the Alaska Northern, testified before the House committee as follows (p. 347, House hear-

No private-owned property could compete with a Government-owned road.

Mr. Richard S. Ryan, president of the Controller Bay Railway & Navigation Co., after attempting to show the excessive cost of operation of Government railways, said:

No private capital will ever compete or go near Government transportation.

Mr. Dickeson, whom I have referred to, of the White Pass & Yukon route, said:

If a line is constructed, as proposed by this commission, in competition with our property, we simply could not earn bond interest and operating expenses.

That does not tally very well with the statements we have just heard from the gentleman from Michigan [Mr. FORDNEY].

It is the statement of every one of these men that they could not compete with a Government railroad; and if they are right in that, it furnishes the strongest kind of an argument why the Government should not only own but operate this road.

But I have not the time to continue this further.

I now wish to direct your attention for just a moment to the report of the Alaska Railroad Commission, on page 117. there and on the following pages give estimates of cost of operation on a basis of 6 per cent on the cost under private ownership and 3 per cent under Government ownership, showing a difference in freight rate from Cordova to Fairbanks of \$12 a ton in favor of Government ownership and a passenger rate of \$31.15 under private ownership as against \$26.70 under Government ownership.

But assuming that capital was free and independent, we all know that it would not build railroads in Alaska for a return of 6 per cent for the simple reason that it can now secure that rate of interest in the States from the best railroads in the country. It is shown in the hearings that bonds issued by private parties to construct railways in Alaska would have to be sold at 75 cents on the dollar, bearing a 6 per cent interest rate, while the Government bonds will sell at par at 3 per cent.

But it is useless to discuss this, for, as I have tried to show.

private capital can not be secured to build railroads in Alaska unless we are willing to turn Alaska over to them; and I shall close this branch of the discussion by calling attention to the hearings, where it is shown that the Alaska syndicate will not consider building a line of road unless they own the resources along the line. The Copper River & Northwestern road runs to the Bonanza Mine. This mine, by the way, has \$25,000,000 of ore in sight, covering a few acres. The Government got \$5 per acre for it. The Havemeyers finally gathered together this property, but before the Alaska syndicate would build a railroad to the mine the owners were compelled to give them 42 per cent of the stock of the mine.

The Alaska Northern, as I have already stated, is the succes-r of the Alaska Central. When Frost & Osborne secured the sor of the Alaska Central. When Frost & Osborne secured the Alaska Central, the first thing they did was to locate 63 claims on the Matanuska coal fields, with the intention of consolidat-

ing the road and coal mines.

It is well known that the Alaska syndicate attempted to secure the Bering field through the purchase of the Cunningham claims.

Mr. Dickeson, of Close Bros., London, who are members of the Alaska syndicate, testified before the Senate committee that they considered building a road over what is known as the Haines route, and the first thing he did was—quoting his language:

I took an option on all of these copper properties that were avail-

Mr. Jemmett, whom I have already referred to, made the following statement before the Senate committee (p. 357):

What is attempted to be done is the creation in Alaska of a system of absentee landlordism, where it will be treated as a great estate owned and managed by the Government and for the benefit not of the people of Alaska, but for the benefit of the people of the United States.

Absentee landlordism! Mr. Jemmett and these other gentlemen opposing this bill would create an absentee landlordism, some of the landlords living in London, some in Canada, and the only American landlords being Morgan & Co. and the Guggenheims. We are going to, in large measure, make a choice of which we will have by our votes on this bill. [Applause.]

Mr. Chairman, how much time have I remaining?
The CHAIRMAN. The gentleman has 15 minutes remaining.
Mr. LENROOT. I now wish to devote my remaining time to a discussion of the minority report of the committee, in opposition to this bill.

I am compelled to believe that the Members signing this minority report, busy as they are, did not have the time to make a careful study of the Alaskan situation, and, indeed, did not have the time to carefully prepare a report upon the views they did entertain.

They divide their report into paragraphs. I quote para-

2. Alaska needs, more than anything else, clear-headed, patriotic attention looking to the early revision of her land and mineral laws, so that the sturdy pioneer may go there and develop Alaska in an honorable, straightforward manner, free from graft and free from monopoly, as other Territories and States have heretofore been settled. The construction of a railroad will in no sense solve this problem, because we think we have the right to assume that the Federal Government is not going to launch into agriculture in Alaska; launch into coal mining in Alaska; launch into logging in Alaska; launch into logging in Alaska; and we are opposed to the Federal Government being committed to any such scheme or propaganda.

Here they make the statement that the construction of a railroad will in no sense solve the problem of the development of Alaska. They want the "sturdy pioneer," to use their language, to go and develop Alaska without the aid of a railroad. Do they seriously mean that? Do they think that Alaska will be say developed by the statement of the control of the statement of th be ever developed by the sturdy pioneer who has to pay \$120 a ton for every pound of groceries that is brought from the States and from \$50 to \$100 a ton for every pound of product the sturdy pioneer ships to the States?

Paragraph 4 reads as follows:

Again, we are opposed to its passage because there are but 35,000 white people in Alaska, and because the appropriation and bond issue provided for in this bill, which we believe to be but a mere start as to what the ultimate cost will be, is more than \$1,000 for each and every white citizen living in Alaska. This sum is all out of proportion to the Federal ald granted to the other sections of the United States for waterways, docks, good roads, rural routes, parcel post, and other internal improvements.

In this paragraph they object to building this road because there are only 35,000 people in Alaska. I had supposed these gentlemen to be greatly in favor of the development of our resources. Here they seem to take the position that railroads should not be built in a new country of undeveloped resources, but we should wait until the people get there before we build railroads, and if they can not get there without railroads the resources should not be developed at all.

The fifth paragraph reads:

We are opposed to the bill and refuse to have the Federal Government committed to it by our consent for the reason that it is undeniably true that construction of any sort by the Federal Government costs more than construction by private individuals; therefore, if the construction of railroads in Alaska is unattractive to private capital there is no appropriate defense to be advanced for the launching of the Federal Government into a scheme of that sort.

This is based upon the supposition that Government construction costs more than construction by private individuals. They stand alone in this contention regarding railroads in Alaska. Even the Alaska syndicate, bitter opponents as they are of Government ownership, admit the Government can build railroads cheaper than they can, and their chief objection is that private capital can not compete with Government ownership.

The sixth paragraph is deserving of special mention. They

say:

We are opposed to launching the Federal Government into private enterprises

Since when did a railroad become a private enterprise? Have these gentlemen been asleep at the switch for the past 20 years? Do they not know that a railroad in a strict sense is not a private enterprise at all? The function of a railway is so elementary that I shall not spend time to discuss it. It is a public highway and not to be classed with purely private enterprises at all.

But to return to the language of paragraph 6 of the minority

report:

We are opposed to launching the Federal Government into private enterprises at all—

What, never? Well hardly ever-

at all-too extensively-

is the language used. Here is evidence that this report was made most hurriedly. The writer first had the view that Le was opposed to launching the Government into private enterprises at all. Then he evidently stopped to reflect, and concluded that language was too strong and he modified it by using the words "too extensively," but in his haste neglected to run his pencil through the words "at all," so both expressions remain in the report, "at all—too extensively," and he goes on to refer to the ship of state and mixes his metaphors somewhat, because he says that such action as is here proposed will affect the ship of state by first undermining it, second, by overloading it, and, third, by capsizing it. [Laughter.] It may be difficult for some of us to appreciate that a thing can undermine a ship and at the same time overload and capsize it.

Paragraph 7 reads:

We are opposed to the bill for the reason that we think the sturdy pioneers, with their teams of mules and oxen and covered wagons, are as essential to the development of Alaska as they were to every one of the other States of the Union, as they were gradually settled and

converted from a wilderness and cow camp into a State of happy homes, and we believe that the launching of the Federal Government into railroad building, which must of necessity mean coal mining, gold mining, logging, and engagement into other enterprises, will be nanseating to the settlers, retard the ultimate development of the Territory, and darken the ray of hope to the settlers, who must in the last analysis solve the problem of developing the West.

Here we again meet the "sturdy pioneers, with their teams of mules and oxen and covered wagons." These railroads are going to be a curse to them, we are told, and without railroads these pioneers are going to convert the wilderness of Alaska "into a State of happy homes." It must be so, because the

minority report tells us so.

Paragraph 8 tells us we do not need the coal in Alaska, anyway. They say we now have 3,076,204,000,000 tons in the United States, which will last us 7,000 years. What do we want to go to Alaska for? Time enough to develop the coal fields of Alaska 7,000 years from now. Of course the fact that we have no naval coal on our western coast is immaterial. Of course we are paying \$8.50 a ton on the Pacific coast now, costing us \$1,360,000 a year, while with these railroads built we can secure the same amount of coal from Alaska at a cost of \$640,000 or less, or a saving of over \$700,000 a year to the Government. But what of it? Better that than building a Government railroad, we are led to infer from the minority report.

Mr. FERRIS. Will the gentleman yield?

Mr. LENROOT. I will, if I have any time left, at the conclusion of my remarks.

Mr. FERRIS. Right at that point I wanted to call the attention of the gentleman-

Mr. LENROOT. If I can have my time extended, I will

Paragraph 9 deals with the present tonnage of Alaska. The only comment I shall make on this paragraph is to ask the gentlemen who signed the minority report what the tonnage of Oklahoma was before any railroads were built in there.

Paragraph 10 is a general exhortation of the stupendous folly of a Government railroad in Alaska.

Paragraph 11 attempts to prove that nothing in the line of agriculture will grow in Alaska. They say:

That the vision of Alaska becoming an agricultural country and being a region of farms is shown to be nothing more than a dream.

Of course, this is a little inconsistent with paragraph 7, where the sturdy pioneers with covered wagons are going to convert Alaska into a State of happy homes, provided a railroad is not forced upon them; but what matters inconsistency be-tween friends? The two statements are in different paragraphs, anyway. [Laughter.]

Paragraph 12 returns to the coal question. The coal probably is not any good for naval purposes, anyway, they say. do admit the coal is good for commercial purposes, and then

If the opportunity be given, private capital would be only too glad to develop and transport the products of the mine.

We know they would-Cunningham, Guggenheim, and their associates would. I wonder if they are the sturdy pioneers referred to in the earlier part of the report. [Laughter.]

In paragraph 13 we are told:

This bill excludes the real development, if development is possible, which can only come by opening to the people the coal and oil lands.

So, the building of a railroad to the coal fields prevents their being developed. So we are told by these gentlemen.

And, finally and lastly, in paragraph 14 the question is asked: What can the Government do for Alaska? It is felt that something should be done.

Now, listen to the remedy:

What the Government can do is to raise the embargo and permit the ople of the United States to acquire title to coal as well as other

Let us stop here a moment-

Permit the people of the United States to acquire the title.

Who has the title now? Is it not in the people of the United States? Yes; all except what the people of the United States have given to the Guggenheims. They continue:

Should the United States Government permit the people of the United States to acquire title to the coal—

"even upon a royalty basis?" They say no doubt the coal would be produced and find its way to the market. With this I thoroughly agree, except to state again that the people of the United States now have the title and, in my judgment, they are going to keep the title for the benefit of people of Alaska, and indirectly the benefit of all the people of the United States. [Applause.] They are going to insist that the Alaskan Syndicate shall not own Alaska, but that the proper rewards of development and exploration shall go to the real miner, the real

prospector, the real pioneer, and those who will put in capital honestly and legitimately without seeking to secure monopoly

And now I must leave this most interesting and illuminating report with a glance at its concluding paragraph. It reads:

We think it is without an economic leg to stand upon; that it is a dream beautiful to look upon, but unsound at the core.

Here, again, our distinguished authors seem to have mixed their metaphors. They say it has not an economic leg to stand upon, implying that it has some corporosity but no economic legs. Next they say it is a beautiful dream. I did not suppose dreams had legs of any kind. And then we are told this beautiful dream is "unsound at the core." When did dreams begin to have cores? [Laughter.]

It is with reluctance that I lay this wonderful report aside,

but time passes and I must conclude.

There is but one question involved in this controversy, and that is whether Alaska shall belong to the people of the United States, its resources developed for the benefit of the people of the United States and for the people who actually live in Alaska,

or whether Alaska shall belong to the Guggenheim-Morgan syndicate, to be developed by and for them. [Applause.]

I am firmly convinced that a vote "aye" on this bill will be the beginning of real development of this vast territory, peopling it with happy and prosperous men and women, enable the receive of the Pacific coast to receive fuel at a reasonable price. people of the Pacific coast to secure fuel at a reasonable price, and conserve in the highest sense for the most beneficial use resources greater than any of us now have any conception of. A vote "nay" means either continued locking up of Alaska or turning it over to a few men to be exploited for their own special benefit and enrichment.

When we vote upon this bill we must choose which we shall serve, the public interest or private monopoly. [Applause.] The gentleman from Oklahoma [Mr.

The CHAIRMAN. DAVENPORT] is recognized for one hour.

Mr. DAVENPORT. Mr. Chairman, I want first to return my thanks to the gentleman from Wisconsin for his kindness in paying his respects to myself and my colleague from Okla-homa in conceding that we are sincere and honest in our position on this bill. I want further to say to him that I listened with profound attention to every word that he uttered, and I challenge the Record to show that he by any word gave to the people of the United States the remedy or reason why the Government should construct a railroad in Alaska in preference to anywhere else, or told them what there was for a railroad

to haul if one should be constructed.

Those of you who have been trying lawsuits in the last few years know that the greatest success you have accomplished is when you get your opponent to argue the lawyer on the opposite side in preference to the facts in the case. That is what the gentleman from Wisconsin has done from the start. After reading into the RECORD that which all the Members on the floor had an opportunity to read, the greater part of Mr. Bellaine's and Mr. Josselyn's testimony before the Committee on Territories, he turns his batteries, so easily fired and so seldom leveled accurately upon my colleague and myself. But, gentle-men, we accomplished one thing, and that is, we got the gentleman from Wisconsin to read the report, whether he found the language to suit him or not. He has read it, and it shows that

we made him sit up and take notice. [Laughter.]

I want to say to the gentleman and others upon this floor that the Guggenheims and Morgans and Josselyns and Bellaines and the Canadian syndicate do not operate very much in Oklahoma, at least not so much as they do in States nearer the Canadian border. For that reason I have no acquaintance with them. I can not speak for my colleague on that question, but I do know that during the hearings before the Committee on Territories the representatives, the lawyers of Guggenheims, attended nearly every meeting and sat silently by and never uttered a word against the passage of this bill. will deny that Mr. Law and his associates, the lawyers of the

Guggenheims, were not present a greater part of the hearings.

The bill now under consideration, which has been reported by the majority of the Committee on Territories, proposes to appropriate the fabulous sum of \$35,000,000 for the purpose of constructing by the Government a railroad in the Territory of Alaska. In presenting my views in opposition to this bill I am not unmindful of the fact that a large majority of the committee from which the bill has been reported filed a report recommending the passage of the bill. It is always unpleasant when you feel yourself compelled, by a sense of right as you see it, to disagree with your fellow members of your committee, but when the time comes and you feel constrained to differ, your duty is fixed and you should pursue the course you believe to be right.

In presenting my opposition to this bill I expect to present it from what I deem to be the business standpoint and the policy of this Government, and only ask of those who may disagree with me that they deal as fairly and kindly with me as I deal with them, and concede that I am honest in my belief and sincere in my opposition to this bill as reported by the com-It is not my intention, nor is it my desire, to do anyone an injustice, nor do I desire to oppose a policy that is right which will be for the betterment of conditions in Alaska, but this bill deals with a subject of great importance, not only to the 64,356 people who live in the Territory of Alaska, but with the 90,000,000 people who live in the United States.

Alaska is not the only Territory in the United States that needs to be developed; it is not the only Territory that needs railroads constructed through it; nor is it the only Territory of the United States that needs highways constructed and farms improved. It has been urged, and will be urged by the advocates of this bill, that for many years the Government of the United States extended aid to the construction of the railroads built by private individuals. That fact will not be denied by me. On the contrary, it will be admitted, and in passing I desire to say that at no time in the history of the country when Government aid was extended to the construction of railroads by private individuals was it necessary, but was extended to them unjustly as a subsidy to get the individuals to construct the roads. That policy of Government aid to railroads was abandoned several years ago, and we are now confronted for the first time in several years with the proposition of giving aid to the railroads or Government construction of the same.

I want to say that it is not because it is Alaska that I oppose this bill, but because of the policy that we will be assuming and adopting. There is no more necessity for the construction of a railroad in Alaska, sparsely settled as it is, than there is in many other sections of the United States. Many States in the United States have vast amounts of territory thickly populated, and yet a long distance from railroads. I say that we should improve the internal roads leading into these parts of the country and aid a great portion of the citizens of the United States.

I have not as yet reached the conclusion that it was wise and proper for the Government of the United States to undertake the construction and the operation of railroads, but this bill will commit the administration and the Government, if it becomes a law, to the policy of Government ownership of railroads and the Government operation of same, because I take the position that if the Government of the United States is going into the construction of railreads it should be required to operate the same and should be safeguarded by such legislation as will properly prohibit it from leasing the roads when constructed.

Now, I can not favor-I do not believe it wise for the Government to build railroads and then lease them in order that a

private company may operate them.

Mr. CALLAWAY. Will the gentleman yield?

Mr. DAVENPORT. I will.

Mr. CALLAWAY. I understood the gentleman from Wisconsin [Mr. Lenkoot] to make a statement that if the Government will this read those its could on a contract them. built this road there, as it could on 3 per cent money, they could deliver coal at the seacoast, or at the ports, for \$22 a ton.

Mr. DAVENPORT. I did not so understand the gentleman. Mr. JOHNSON of Washington. Oh, no; the price now is

about \$22 a ton.

Mr. CALLAWAY. I understood him to say that the present rates were much greater than that. I understood that other people could deliver it now at \$49 a ton, but if the road was built by the Government it could be delivered for \$22 a ton.

Mr. DAVENPORT. I would not undertake to be accurate

as to the gentleman's statement.

Mr. CALLAWAY. Well, does the gentleman from Oklahoma know what the estimated freight rate would be on coal from the coal fields if the Government built this road?

Mr. DAVENPORT. No; I do not. Mr. JOHNSON of Washington. If the gentleman from Oklahoma will pardon me, coal from the coal mines lying back a short distance could be dropped at the seacoast at a low cost above the mining.

Mr. CALLAWAY. That was not what the gentleman from Wisconsin stated a while ago. I supposed that the gentleman from Oklahoma knew what that estimated freight rate was. Now, supposing the gentleman had studied that question, wanted to know what would be the difference between the price of coal delivered by the Government railroad at such a rate that it could pay a dividend on the investment to the people on the Pacific coast where it is needed, because, I take it, there would not be a great necessity for it in Alaska.

Mr. DAVENPORT. I do not think that was brought out in

the hearings.

Mr. CALLAWAY. It occurs to me that this would be a most important proposition, as to how many people are to be conserved by what it will cost the Government, and whether the proposition would be a paying investment.

Mr. DAVENPORT. I expect to discuss that aspect of the matter after a while as to how many will be conserved and as

to what the tonnage will be.

Mr. LENROOT. If the gentleman will pardon me, I understood the gentleman from Texas undertook to quote me a minute

Mr. CALLAWAY. I did; I understood the gentleman from Wisconsin to say that if the Government built the railroad on a 3 per cent basis the coal could be delivered at the seacoast for \$22 per ton.

Mr. LENROOT. From coal? Oh, no; that was from Fair-

It did not refer to coal at all.

Mr. CURRY. That question is fully gone into on page 459 of the House hearings, and it is there shown that it would cost \$1.75 a ton to mine the coal and 50 cents a ton to deliver the coal at Controller Bay.

Mr. DAVENPORT. So I take it that the first proposition for us to determine is the proposition as to whether or not we are willing to commit ourselves to the policy of the Government construction of roads in the United States and the Territories. If we answer this question in the affirmative and agree that we are going to assume that policy in the future, the next question is, Where will we begin? Will it be in Alaska, a yet undeveloped country, or will it be in some of the States where there is a large population, where the climatic conditions are such as to justify the production of all kinds of agricultural products?

I want to be fair with the advocates of this bill and ask the candid consideration of this committee and the Members of the House before they cast their vote and before they expend this enormous sum of \$35,000,000 as a starter in the construction of railroads in Alaska. Thirty-five million dollars will only be a starter, should we undertake to carry out the policy expressed in the bill, to construct railroads in this sparsely settled Terri-

Of course the gentlemen in favor of the bill will present their arguments and insist that it will be sufficient to construct all of the railroads of the United States necessary in Alaska, but granting for the sake of argument-for a moment-it may be sufficient, I ask you, Is the Government under any more obligation to construct a railroad into sparsely settled districts in the Territory of Alaska than it is to construct a railroad into thickly settled sections of the United States, many places being more than 30 or 40 or 50 or 100 miles distant from a railroad? It is not a question so much of what shall be done with the expenditure of the \$35,000,000, but it is the establishment of a policy of what the Government is going to engage in, and the question is, Where are we to begin?

I now desire to call the attention of the committee to the real conditions in Alaska, as disclosed by the report of the Alaska Railroad Commission and the hearings before the Senate and House Committees on Territories. I also desire to give a brief history of Alaska since it was acquired by the United States. It will be remembered that, in round numbers, not being exactly accurate, Alaska embraces about 586,000 square miles, about one-fifth the size of the United States. The United States acquired Alaska, under a treaty with Russia, the 30th of March, 1867, since which time it has been owned and controlled by our The population of the Territory of Alaska, according to the census reports of 1910, including all classes of citizens, was 64,356, 36,000 of this number being whites and the remainder Indians and other nationalities. The population of the Territory of Alaska as shown by the census reports of 1900 shows that there were 63,592 inhabitants. You will note that this shows only an increase of 764 in population in the last 10 years, during which period it will be remembered that the gold agitation had drawn some people, legislation given the Territory increasing its judicial powers, and different parties had begun the construction of railroads in Alaska. Yet, with all of these favorable conditions, within the period of 10 years the population only increased 764, something less than 100 per year.

That is one of the questions which, in my judgment, should be considered when you come to make an appropriation for the construction of a railroad in a country. You should stop and ask yourself the question, Is the population increasing; are the resources being developed? Of course the gentlemen who favor the bill will undertake to say that the conditions have been such up there that they could not develop, that the country had been tied up, that the laws had been so enforced that it was impossible for them to improve the country or for the population to come in there; but I desire to ask this question: Can anyone name another Territory that was ever the possession of the

United States, even though the laws were stringent, even though you could not acquire a deed to property, where the population, if it was suitable for farming products or for mining, did not increase more rapidly than it has increased in the Territory of Alaska in the last 10 years?

The majority members of the committee in their report lay great stress upon the undeveloped resources of the Territory and the great need for the immediate construction of this road at this time. I desire to make the statement that there has never been a time in the history of the United States, if you could convince and show by mathematical conclusion that there was commerce to be handled, that you could not get private capital to construct a road. Alaska does not stand in need of Government funds to construct a railroad, but it has within its borders a number of railroads already constructed, and others under construction, some parts of which have been completed and were in operation for some time, if not in operation now.

The majority report deals to some extent with the legality of this proposition of the Government constructing a railroad in Alaska, and has cited a number of authorities in support of that contention, or at least in support of a contention that a railroad is a post road, and that under the Constitution the Government has a right to construct post roads. I am not going to take issue with the report upon this branch of the question, and only desire to say that the authorities cited all relate to the proposi-tion of "interstate construction" and not "intrastate construction." If this bill becomes a law, this will be an "intrastate construction," and it might be well for the gentlemen to consider the legality of the proposition from that standpoint. We all must admit that the Government can go much further in the construction of "interstate roads" than it can in "intrastate roads.

Up to the present time there have been several companies started in the construction of railroads in Alaska, as follows:

(a) Pacific & Arctic Railway & Navigation Co., from Skag-way, Alaska, 20 miles, to White Pass (international boundary), connecting with Canadian railway to White Horse, Yukon Territory, head of navigation of Yukon River. Length of railway, Canadian and American, 112 miles. From White Horse steamboats are operated to Dawson, Yukon Territory, and Fairbanks, Alaska.

(b) Copper River & Northwestern Railway, from Cordova, Alaska, to Kennicott, 195 miles, where the Bonanza mine of Alaska Syndicate is situated. This is the railway owned by the Morgan-Guggenheim syndicate. If the pending bill becomes a law this will be purchased or paralleled and an extension constructed to Fairbanks, Alaska, according to plans of Alaska Railway Commission.

(c) Yakutat Southern Railway, Yakutat to Situk River, 9

miles.

(d) Alaska Northern Railway, from Seward to a point near

Turnagain Arm, 71 miles.

(e) Tanana Valley Railway, from Fairbanks and Chena, Alaska, to Chatanika, 40 miles.

(f) Seward Peninsular Railway, Nome to Shelton, 80 miles; and Paystreak branch, 6½ miles.

(g) Council City & Solomon River Railway, from Council to Penelope Creek, 32 miles.

(h) Wild Goose Railway, from Council to Ophir Creek, 5 miles. Of these, the Pacific & Arctic Railway & Navigation Co., Copper River & Northwestern Railway, Tanana Railway, Yakutat Southern Railway (Cannery Line), are the only lines now in operation and carrying freight and passengers.

It will be seen that of the number of railroads given but few of them are in operation carrying freight and passengers. It is, indeed, amazing, if this is the land of milk and honey, of climatic conditions that would cause the country to blossom like the rose, that these railroads that have been constructed would cease operation for the reason they have nothing to haul. The truth is, as shown by the hearings of the Senate, and no gentleman can deny, that the greater part of the Territory of Alaska for at least one-half of the year is a frozen country, where improvements can not be carried on. Of the southern portion, of course, it is different.

The railroad commission, in its report, on page 141, recommends the construction of the following lines:

First. Chitina to Fairbanks, 313 miles, \$13,971,000.

Mr. STAFFORD. Mr. Chairman, can the gentleman give the committee the total mileage of the railroads that are now in operation in Alaska?

Mr. DAVENPORT. No; I can not. Four hundred and sixty-odd miles have been constructed, but my recollection is that there are a very much smaller number of miles in operation. If I am incorrect in that, some one will correct me.
Mr. WICKERSHAM. There are 265 miles in operation.

Mr. DAVENPORT (reading)-

Second. Bering River coal branch, via Lake Charlotte, 38 miles, \$2,054,000.

Third. Kern Creek to Susitna Valley, 115 miles, \$5,209,500. Fourth. Matanuska coal branch, 38 miles, \$1,616,000. Fifth. Susitna Valley to Kuskokwim, 229 miles, \$12,760,500.

This line from Chitina to Fairbanks, a distance of 313 miles, will be a connecting line at Chitina with what is known as the Guggenheim line, now in operation from Cordova to Chitina,

or the mines out near that place.

My contention is that the extension of this line, as you leave Chitina, on to Fairbanks will pass over a section of country that will afford no tonnage for the railroad to haul to deep water. Dr. Brooks, of the United States Geological Survey, on page 511 of the Senate hearings, has the following to say about the country through which the road would run from Chitina to Fairbanks:

Chitina to Fairbanks:

Mr. Brooks. Yes, sir. When we leave Chitina, along this proposed route into Fairbanks, we traverse a broad upland, a gravel-filled area, where the rock has been buried to a depth of 200 and perhaps 1,000 feet. Here there is no possibility, so far as I can see, of any mineral resources being developed, because the bedrock has been buried. There may be some lignitic coal possibly under a part of this gravel, but not worthy of consideration here. To the east of that, though, in the so-called Nabesna region and over on the White River, there is another copper belt. In this there have been no extensive developments. The copper and gold prospects both, however, seem to be promising. There is a belt which extends from the White River, near the international boundary, northwest for a distance, say, of 100 miles to the Nabesna River, a tributary of the Tanana. This belt certainly is promising for copper, providing transportation is provided. It also contains some auriferous lodes, which might be of value if they had transportation. These deposits do not lie absolutely on the proposed line from Chitina to Fairbanks, but could be reached by a branch line or could be made tributary to the route I have already described, running from Pyramid Harbor through Canadian territory into Fairbanks. The White River region could be reached by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper River Railroad across the Skolai Pass and the Nabesna region by extending the present Copper R

Senator Walsh. What is that covered with? Is there any vegetation at all?

Mr. Brooks. Yes, sir; there is spruce and some cottonwood, and in the river valleys there is some pretty fair arable land. When I spoke of it as barren ground I meant to speak of it from the standpoint of minerals. It seems to me hopeless from that standpoint, because the bedrock is so deeply buried; but when you get into the mountains here you strike a region somewhat mineralized, and we have not far to go from the route to the so-called Slate Creek district, where some gold placers are found. These are about 30 miles from the main line. We also have the Valdez Creek placer district, lying perhaps 100 miles to the west. There are also some indications of mineralization along the main line as soon as you reach the mountains, so that there is at least promise of some mineral development.

On page 531 he testifies with regard to the quality of the coal from these two fields, with respect to use by the Navy, as follows:

Mr. Wickersham. How does the bituminous coal compare?
Mr. Brooks. Some of the bituminous coal is as good as our best bituminous coal of the East. That is, the famous Pocahontas, New River, and Georges Creek coal of the Eastern States.
Mr. Wickersham. Those are the naval coals?
Mr. Brooks. Those are the naval coals.
Mr. Wickersham. Do you think the coal of Alaska is equal to that standard?

standard?

Mr. Brooks. So far as the chemical composition goes; yes, sir. In the physical composition it leaves much to be desired, so far as we know; that is, the percentage of lump coal would be very much smaller. In regard to Navy use, I will say that if there was a large coalmining industry producing a large quantity of coal, the lump coal could be used by the Navy and the finer other coal consumed by other industries. If you mined only enough for the Navy, you would have to take it as it came, and it might then be found to contain too large a percentage of slack for Navy use.

No one can dispute that Dr. Brooks is an authority upon this question, and no one will undertake to say that the contemplated line from Chitina to Fairbanks connects with the Guggenheim road, now constructed and in operation.

During the hearing before the Senate Committee on Territories, or at least a great portion of the time, the representa-

tives of the Guggenheim interests were present and, so far as the record of the hearings disclose, acquiesced in this bill by

The Bering coal fields, about which we hear so much said regarding the quality of the coal, is only about 25 to 30 miles from Controller Bay, and would only necessitate the construc-

The Matanuska coal fields, according to the reports, are of the same quality of coal as is found in the Bering coal fields. On page 520 of the Senate hearings Dr. Brooks described the only two coal fields producing high-grade coal in Alaska as Matanuska and the Bering fields, and he describes the same in the following language. the following language:

To take up the question of coal first, we have here in the Matanuska Valley a coal field which aggregates 80 and possibly 100 square miles. The coal is of the same general character as that of the Bering River

field. So far as we know, there is little to choose between the two. The analysis would indicate that the Bering River coal might be better for steaming purposes and the Matanuska coal a little better for coking. But I do not believe that the evidence on this is sufficient, because there has not been enough mining to permit of a fair test of the coal. So that from our present consideration we have got to regard the two coal fields as very much on a par as to quality. The Bering River field seems to be somewhat smaller than the Matanuska field so far as the developments have gone. The coal in the Matanuska field is a bituminous—it varies from a low-grade to a high-grade bituminous coal. Also there is some anthracite in the eastern end of the field. Of that we do not know very much, but, in any event, I think the Alaska anthracite is less valuable than the steaming and coking coal.

In order to relieve the mind of the gentleman from Wisconsin [Mr. Stafford] I will state for myself, and I think I can say the same thing for my colleague, that we are not mixed up with the Guggenheims. This proposed road, if constructed from Chitna to Fairbanks, will connect with the Guggenheim road that runs from Cordova to the Bonanza mine, and, as I said a while ago, during the hearings, notwithstanding the fact that Mr. Law, one of their firm, sat in the committee room, he never once opened his mouth in objection to it. That means that just as quickly as this appropriation is made they would try to

get their road taken over.

Mr. STAFFORD. Can the gentleman give any information to the committee as to whether there has been discovered in the Alaskan fields any anthracite coal suitable for commercial

Mr. DAVENPORT. I can not at this time.
Mr. WICKERSHAM. I can give that information. The
Matanuska field has large deposits of anthracite of the very

Mr. DAVENPORT. I was going to answer the gentleman's question and say to him I could not, but the only authority is Dr. Brooks, who belongs to the Geological Survey. He went

there, and I am reading to you what he said about it.

Mr. STAFFORD. Did this representative make an actual survey of both the Matanuska and the Bering coal districts? Mr. DAVENPORT. He says so, and I have just read you a

comparison.

Mr. STAFFORD. From his statement it would seem that the anthracite coal is a somewhat vague proposition.

Mr. DAVENPORT. He leaves it as a matter of doubt, but if you will wait a minute I will read you what the test has been by the naval authorities in the past two months.

Mr. WICKERSHAM. That is in the Bering River field? Mr. DAVENPORT. Yes. I just read you what Dr. Brooks said about Matanuska and the Bering River, where he says the Bering River is the best, in his judgment.

Mr. STAFFORD. And the Bering district, I understand, has

nothing but bituminous coal?

Mr. DAVENPORT. The gentleman heard what the gentleman from Alaska said about that.

It will thus be seen by his statement that he is in doubt as to whether or not the coal in the Matanuska coal fields or the Bering coal fields was of a sufficient grade for use in the Navy. If this coal is unfit for naval use, then one of the great arguments contended by the parties advocating this bill is removed from consideration entirely, for the reason that if the coal is not of the standard required for use in the boilers of our battleships then it would be of no great value to the United States

A test of the coal taken from the Bering fields was made on the U. S. S. Maryland and it was found to be unsuited for naval use. If this be true, why is it that the advocates of this bill will contend that the United States Government needs this coal for use on its battleships? And in order that the committee may have before them the facts as they exist I desire to quote the following letter from the Secretary of the Navy, received by me under date of December 15, 1913:

NAVY DEPARTMENT, Washington, December 15, 1913.

Hon. James S. Davenport,
Committee on the Territories,
House of Representatives, United States.

House of Representatives, United States.

My Dear Mr. Davenport: The report of the coal investigations in the Bering River fields have not yet been completed. At the present time the progress is as follows: The conditions in the Bering River field have been observed and a large sample of coal mined. It has been estimated that the field contains an adequate supply. The sample of run-of-mine coal contained a much larger percentage of ash than former investigations of the field indicated, and possibly on account of this large ash content and the clinkering of the coal the test by the U. S. S. Maryland proved that run-of-mine Bering River coal is unsuitable for naval use. A portion of the coal was screened and washed at the naval engineering experiment station, Annapolis, Md., and an evaporative test will be made on December 17 and 18 to show whether the washed and screened coal from the Bering River field is suitable for naval use.

The department regrets that your letter was not received in time to forward you this information at the hour requested by you.

Sincerely, yours,

JOSEPHUS DANIELS.

That is what the Navy Department has done with the Bering River coal field.

Mr. STAFFORD. Since he testified, has that test been made

and any report made on the tests at Annapolis?

Mr. DAVENPORT. No; because it is to be made to-day and to-morrow, according to Secretary Daniels who signs this. He says it is to be made on the 17th and 18th, which is to-day

and to-morrow, when that test is to be made.

By this you will see that the test was made from the coal in the Bering fields and is unsuited for naval use. On the 17th and 18th of this month there is to be a further test made of the coal at Annapolis, known as an evaporative test, to ascertain whether or not the washed and screened is suitable for use. Should it be demonstrated beyond a doubt that the coal in the Bering fields is suited for naval purposes, it would require only the construction of a railroad of about 25 or 30 miles to reach this field, and there would be no necessity of taking over the road now constructed and in operation from Cordova to Chitina, but a road could be constructed from Controller Bay to the Bering River coal fields.

Of course, it may be argued that the President has discretion to construct or purchase a railroad, or, in other words, the bill gives him unlimited authority to act as he may deem wise and proper for the Government. This, of course, we know he will do, but we also know that the President, if this bill becomes a law, must have this construction made by his representatives, and that in the construction of the road all the local influence possible will be brought to bear to get the representatives to recommend the purchasing of the railroads that have already been constructed and are not paying, and that the parties now interested will be glad, indeed, to dispose of their property, if

possible to do so.

On page 624 of the Senate hearings there is a conference between Senator Nelson, chairman of the committee, and Mr. WICKERSHAM, with reference to the willingness of the Guggen-

Wickersham, with reference to the willingness of the Guggenheims to sell their road, and the report is as follows:

Senator Nelson. I want to say to the committee, and I do not violate any confidence, that Senator Guggenheim told me, shortly before his term was out and he left, that they were quite ready to sell out their road to the Government if they could get back the money they actually put into it, and that they had not done as the other company didpedded any stock. They had gone into their own pockets and put their own money into it, and had not sold stock to Tom, Dick, and Harry. They are willing to sell that road for what it actually cost them.

The Chairman. Do you think they would place an option somewhere so the Government might utilize that option, if it saw fit to do so?

Senator Nelson. I think they would be mighty glad if they could get their money back out of that railroad.

The Chairman. Then what would they do with their copper?

Senator Nelson. Somebody would have to operate the road and they would take their chances.

Mr. Wickersham. The Government would carry their copper for about 90 cents, probably, while they charge, for the same grade, \$33.70 freight per ton.

Senator Nelson. The Government would want to get enough revenue out of the road to pay the operating expenses?

Mr. Wickersham. They do not get it now, I imagine.

Senator Nelson. No; I do not think they do. I think that even if you apply their own rates as you have them there to the traffic they carry, it does not begin to pay the operating expenses. You have traveled over that road. Let me ask you, for information, what freight business do they have of any consequence outside of carrying this ore?

Mr. Wickersham. Of course they carry all the freight up into that country for people who are prospecting.

Senator Nelson. I mean carrying out from there?

Mr. Wickersham. Very little: it is a new road and no sympathetic aid has been given by them to those who wish to do business there.

The next question to be considered is: What is heims to sell their road, and the report is as follows:

The next question to be considered is: What is there to be hauled from the interior in and around Fairbanks should this road be constructed, or what would be carried into the region of Fairbanks, as there is an ample supply of coal in and around Fairbanks which can be used for fuel purposes?

Dr. Brooks again, on page 514 of the Senate hearings, speaking with reference to the Fairbanks district, makes the follow-

ing statement:

In regard to fuel in this district, we have—about 50 miles south of Fairbanks and within 20 or 30 miles of the proposed route from Cordova, or along the proposed route from Seward—the Nenana coal field. The Nenana coal field is a field where there is an enormous amount of lignite coal.

Mr. Wickersham. Have you seen this picture over here [indicating]? Mr. Brooks. I did not take that photograph. I am a little skeptical shout the picture of a coal bed.

Mr. Wickersham. How thick is that bed?

Mr. Brooks. I have measured coal about 20 feet in thickness in this field. That is about the workable limit of commercial mining, so I prefer to think there is no coal quite so thick as indicated by the picture, because I do not think it would be worth much. But whatever may be said about the thickness of any individual bed, there is an enormous amount of coal in the field. Our party made an estimate on the basis of the actual coal in sight—and our surveys were not detailed—of some 9.000,000,000 tons, which is more lignite coal than we estimated in all Alaska at the time we made the reports of the conservation commission. There is an abundant supply of coal there. So far as we know it is all lignite, a fair grade of lignite, and can be used to advantage in local industries. It should be

used, because they need fuel at Fairbanks very badly and will need it much worse before many years have passed, because the timber supply has been rapidly used up by the local needs of the community.

And the next question I want to call your attention to is, What are the opportunities for agricultural pursuits in the Territory of Alaska? On page 550, Prof. Piper, of the Department of Agriculture, makes the following statement:

of Agriculture, makes the following statement:

Prof. Piper, At any rate, whether you put it at \$100 an acre or \$50 an acre, you can still get good farm lands in the United States at \$50 an acre. However, I would not give too much weight to that, because the pioneer is attracted to public land that he can homestead even if it cost \$200 an acre to clear. The \$200 an acre for clearing it is based, I suppose, on wages to the ordinary laboring man of \$5 and \$6 a day, and if a farmer clears the land himself he saves that \$5 or \$6 a day. So that it is really the high cost of labor that makes the apparent high cost of clearing that land.

Mr. Chubbuck, on the basis of his reconnoissance in Alaska, has given expression to conservative views regarding the future possibilities of grain raising in the interior of Alaska very much, I think, like the ideas I have presented.

grain raising in the interior of Alasaa (1). Senator Walsh. Who is Mr. Chubbuck?

Prof. Pipen. Mr. Chubbuck is a member of the Bureau of Plant Industry, and spent the years 1909 and 1910 making an agricultural reconnoissance of Alaska. His report has not yet been published, but will be shortly. Mr. Chubbuck really should have appeared before this committee, because he personally has gone over these lands in the interior of Alaska, and my knowledge is second hand.

Senator JONES. Where is Mr. Chubbuck?

Prof. Pipen. He is out West at the present time.

\$200 per acre is required in order to clear the lands for agricultural purposes.

On page 552 of the Senate hearings he again gives his views

upon the question, as follows:

In general, my impression of the whole interior country is that there will be successful homesteads wherever there is a local market for the produce. I am somewhat skeptical about there being in the near future any surplus produce either of potatoes or potato products or of cereals which will be exported.

And if these views, given by a man who has had experience and has carefully studied the conditions, are to be taken for anything, that conclusively shows that it would be practically impossible for a farmer to go into the Territory of Alaska and make a success farming.

Mr. HAMILTON of Michigan. May I ask the gentleman a

question?

The CHAIRMAN. Does the gentleman from Oklahoma yield

to the gentleman from Michigan?

Mr. DAVENPORT. I do.

Mr. HAMILTON of Michigan. I caught in the reading of the gentleman a statement by Mr. Piper in reference to the cost of clearing lands.

Mr. DAVENPORT. Yes

Mr. HAMILTON of Michigan. I understood the gentleman to read that he stated it cost \$200 an acre to clear the land. Am right in that's

Mr. DAVENPORT. He says it ranges from \$50 to \$200 an acre.

Mr. HAMILTON of Michigan. I assume, speaking of the cost of clearing land there, he means the cost of clearing the land in southeastern Alaska, where it is so very difficult to remove the roots and stumps, does he not? I have not read the context and

I know the gentleman has.

Mr. DAVENPORT. I will say to the gentleman, now, he is speaking generally of Alaska, and if the gentleman will pardon me, I have not got the report before me, but some one I think testified who gave their version of agriculture in Alaska, and they say that after the timber is cleared away then you must clear away the moss, at least in the northern portion of Alaska and central portion, and when you get the ground cleared away the first year the ground would then thaw out 10 or 12 inches, and the next year it would be seeded and then a continuation of plowing the top of the ground would cause the under ground to continue to thaw and that would furnish a kind of sub-irrigation, provided the top did not freeze before the subirrigation set in

Mr. HAMILTON of Michigan. As a matter of fact, it does not cost \$200 to remove the tundra from the land in the Tanana Valley

Mr. DAVENPORT. The testimony, as far as I remember it, before all the committees was that it would take from \$50 to \$200 to get an acre of land in a state of cultivation. the southern portion of Alaska is not frozen up like this region along the Yukon Valley.

Mr. HAMILTON of Michigan. It costs more to clear an acre in the southeastern part of Alaska than the interior of Alaska.

Mr. DAVENPORT. I will say to the gentleman I do not so

understand, for the simple reason that the ground there does thaw at some time, but there is not a word in any report where the ground has ever thawed in northern and central Alaska.

Mr. HAMII/TON of Michigan. It is not a question of thawing, but of removing roots and stumps in southeastern Alaska, and there are none to be removed in the Tanana Valley.

Mr. DAVENPORT. In some portions of the Tanana Valley. Mr. HAMILTON of Michigan. Not so much. Mr. DAVENPORT. At least the report there shows there

is some timber in some portions of the Tanana Valley. Mr. GRAHAM of Illinois. Is it not true in the Chitina portion of Alaska there are no stumps; there is prairie land and nothing

Mr. DAVENPORT. They have a coal field there, I will say to the gentleman from Illinois, and there is a portion of timber that is practically of no value except for local use; and there

are some portions prairie.

Mr. GRAHAM of Illinois. But I am speaking of certain

other portions of it, where there is no timber.

Mr. DAVENPORT. There are some portions where they have some timber and some portions where they have no timber; and some gentlemen say the portion where they have timber is

much more easily cleared than where there is no timber.

The CHAIRMAN. Does the gentleman from Oklahoma [Mr. Davenport] yield to the gentleman from Missouri [Mr.

RUSSELL]?

Mr. DAVENPORT. Yes, sir; with the greatest of pleasure.
Mr. RUSSELL. You wish to provide for the redemption
fund out of lands to be sold and coal to be sold and the profits of running that railroad. Do you anywhere in your speech discuss the probability of development ever having that debt paid in that way'

Mr. DAVENPORT. I think I do later on mention the fact that it will never be repaid in that way; that it will never pay the expenses of maintenance and operating, to say nothing of

disbursing the debt.

Mr. RUSSELL. How about the sale of the public lands there, one-half of the proceeds of which is to go to the Government to

this \$35,000,000?

If we do not build the barn before we Mr. DAVENPORT. buy the horse, we are never going to get any public lands up there. They are urging now the construction of a railroad where you can not get any title or anything else, and yet we have ample land laws and railroad laws to develop that country, if it could be developed, by farmers, according to the

of the proceeds from it should go to the Government for the payment of interest and principal in this business?

Mr. RUSSELL. How about the sale of coal and that a part of the proceeds from it should go to the Government for the payment of interest and principal in this business?

Mr. DAVENPORT. That is a conclusion not sanctioned by the facts. Certain conditions exist there to-day that do not make it probable. However, indeping by the past, you have not make it probable. However, judging by the past, you have no right to presume there will be any sale in that way.

Mr. RUSSELL. Of course, I am asking for information. I know the gentleman is on this committee and has given it much

attention, and I wanted information about it.

Mr. DAVENPORT. There is no revenue-producing basis upon which you can form a correct theory in order to ascertain what the income of the revenue to be raised would be to reimburse these bonds.

Mr. RUSSELL. In your judgment, it was \$35,000,000. will never be repaid from the revenues, but the Government

will have to repay it itself?

Mr. DAVENPORT. I will say to-day that it would be better to give it to the people of Alaska as a subsidy than it would be to appropriate in this way and endeavor to get it back from the revenues from the public resources of that Territory.

Mr. WICKERSHAM. I wanted to correct the gentleman in respect to the matter that you could not take homesteads in

the Tanana Valley

Mr. DAVENPORT. I said you could not get them.
Mr. WICKERSHAM. That is true in the forestry sections,
but not in regard to the interior sections of the Tanana Valley.

Mr. DAVENPORT. I would like to ask the gentleman how many homestead certificates have been issued in Alaska? On the 16th of December the Commissioner of Public Lands informs me that there have been patents issued as follows: Mineral, 311; homestead-including soldiers' additional-162; mission sites, 12; town sites, 7; trade and manufacturing sites, 7; coal, 2; and last, but one of the most useful things in the world to the farmer who goes into Alaska a poor man and undertakes to make a farm out in that cold country, is the one cemetery site that they have issued patents for, thereby providing that

in the Territory of Alaska, there have been reported to the Land Office tracts of 320 acres, just as we do with mining claims, and they have been recorded in the Alaska recorder's office. So the gentleman can not get any statistics as to that which are complete. There are a large number of homesteads in that country

Mr. DAVENPORT. I asked the Public Land Office to furnish me the number, and that is what they furnished me. Whether it is correct or not, I do not know. I am not responsible for that; but they are supposed to be the representatives of the Land Department of our Government. But even if it be true that everyone had homestead patents issued in the Tanana Valley or anywhere else, in the name of God, would anybody wish to stand on the floor and issue \$35,000,000 of bonds when they have only increased 764 in the last 10 years.

Mr. WICKERSHAM. How much territory did Oklahoma have in 1870, after you had started three railroads, the Missouri, Kansas & Texas, the Atlantic & Pacific, and the Galveston?

Mr. DAVENPORT. In what year?

Mr. WICKERSHAM. In 1870. Mr. DAVENPORT. I think it was the act of Congress of

Mr. WICKERSHAM. Eighteen hundred and sixty-six—Mr. DAVENPORT. That provided for the building of the railroad that is called the Missouri, Kansas & Texas Railroad. going through the Indian Territory. I am not positive, but I think it was in the latter part of that year that Congress passed an act permitting what is known as the old Atlantic & Pacific Railroad to come in through that Territory. I would not attempt to state the facts accurately, but, judging from the population of the tribes, the number of people could not have been very great, because at that time there were no white people down there except those fellows that always refused to tell why they had left their former homes, because it was just after reconstruction days. But I am glad that the gentleman from Alaska [Mr. Wickersham] asked that question, because that country down there was a country where no white man could own a dollar's worth of property, and only the Indians could hold and own property. But the Five Civilized Tribes and the Confederated Tribes probably had 60,000 Indians in their country, covering an area now comprising the State of Oklahoma. That was in 1870. The Missouri, Kansas & Texas Railroad, or rather the road of which it is the successor, went through that country in 1872 and 1873. The population gradually kept increasing.

Now, bear in mind the fact that all that time this vast domain of Alaska was owned by the United States, and not a foot of land in that Indian country was owned by the Government of the United States, but by the Indians alone. We went on down the line, and practically no more railroads were built in that country from 1872 up to 1884; and yet we had nearly 300,000 population in 1890, and by 1900 we had climbed up to 400,000, and the population went on increasing without the construction of railroads.

It is true that some railroads were constructed, but the population went on increasing. Why? Because it was God's Garden of Eden, where you could raise every cereal known to the agricultural world on the same farm in that new country, and men went down there and built up their farms and developed them a hundred miles distant from a railroad.

Mr. CLINE. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Oklahoma yield? Mr. DAVENPORT. I want to refer to another thing, and I do it with the profoundest deference; but the granting of the right of way through our country just after reconstruction days was a blot upon the conduct of the Government and was utterly unjust. Our people contributed hundreds of acres through that country as right of way, 200 feet wide, and an additional 200 feet at towns and water stations, without receiving one penny in return, notwithstanding they had the right to exact payment. And it shows conclusively that if there is anything you can produce, if you have a country that the white man can live in, you can develop that country without a railroad coming in and without any aid on your part to back it up.

Now I will yield to the gentleman from Indiana [Mr. CLINE].

Mr. CLINE. What I wanted to suggest was to establish a fair comparison to show, when Oklahoma was thrown open to settlement by homesteaders, what was the increase in popula-

tion in 10 years after it was thrown open?

Mr. DAVENPORT. I will say to the gentleman that what was he may be buried.

Mr. WICKERSHAM. I want to simply say to the gentleman from Oklahoma [Mr. Davenport] that under the homestead laws relating to Alaska there have been few patents issued, it is true, but under the law of 1906, applicable to homesteads and people never did get to owning the land until the treaties were made with the different tribes in 1902 and 1903 and the following years. Of course the old part of Oklahoma would not be a fair comparison, because that was turned loose at once.

Mr. FERRIS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield to his colleague? Mr. DAVENPORT. Certainly.

Mr. FERRIS. I thought there was a possibility of a misunderstanding as to the number of patents that had been issued. What was the date of the letter the gentleman received from the General Land Office?

Mr. DAVENPORT. It is dated December 16, 1913. It was

just brought in to me a few moments ago.

Was it from the Commissioner of the General Mr. FERRIS. Land Office?

Mr. DAVENPORT. It was from the Assistant Commissioner of the General Land Office.

Does that letter purport to show the number Mr. FERRIS. of patents issued to the homesteaders of Alaska?

Mr. DAVENPORT. Perhaps I had better read the letter.

Mr. FERRIS. Does it or does it not? I do not care to have the entire letter read.

Mr. DAVENPORT. Here is the letter. It says:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, December 16, 1913.

ACCOUNTS-STATISTICS.

Hon. James S. Davenport,

United States House of Representatives.

MY Dear Mr. Davenport: In reply to your special inquiry of the 15th instant, you are advised that there have been issued 502 patents in Alaska, to and including June 30, 1913, embracing the following classes:

Homestead (including soldiers' additional) ____ 162 12 7 7 2 1 Mission sites______
Town sites_____
Trade and manufacturing sites____ Cemetery sites -

Total _ Very respectfully,

(Signed) C. M. BRUCE, Assistant Commissioner.

You will notice he puts "cemetery sites" in the plural, although there is only one, but I suppose he thought the total number had died.

Mr. FERRIS. So if the Commissioner of the General Land Office quotes the record correctly, there have been but two coal patents issued, and one hundred and sixty-odd homestead pat-

Mr. DAVENPORT. Yes.

Mr. FERRIS. I take it that the gentleman from Alaska [Mr. WICKERSHAM] wanted to get into the RECORD the fact that there had been some homestead entries made in Alaska on which final proofs had not been made; and it is true, is it not, that

there is no one in Alaska who issues patents?

Mr. WICKERSHAM. The patents have to be issued in the city of Washington from the General Land Office.

Mr. FERRIS. You do not challenge the record, do you, as to the number of patents?

Mr. DAVENPORT. I was only speaking of the number of patents that had been issued, not the homesteads that had been preempted.

Mr. CALLAWAY. I want to ask the gentleman a question about that agricultural land up there. He stated awhile ago that it cost \$200 an acre to clear that land, and then he stated

that the land did not have any timber growth on it.

Mr. DAVENPORT. I also stated to the gentleman from Michigan [Mr. HAMILTON], if you will pardon me, that it had been stated that it was as difficult to get under cultivation the land that had no trees on it as it was to get under cultivation the land where timber grew that had to be cleared off, and the reason that was given in the hearings was that there was a certain kind of moss that they had to break through, and that they had to use a pick, and when they struck the frozen ground

it was like striking a rock.

Mr. CALLAWAY. The clearing of the land then simply

meant that you had to clear off this moss in such a way that the sunlight would get to the ground?

Mr. DAVENPORT. To get the obstructions off from the top.

Mr. CALLAWAY. That was the thing that had to be done in clearing the land and preparing it for cultivation?

Mr. DAVENPORT. Yes.
Mr. CALLAWAY. Does that have to be done every year?
Mr. DAVENPORT. No; the statement was that after the moss was cleared off, the ground would then thaw the first year to a depth of about 12 inches. I may not be stating it exactly

accurately, but it was about that, and that then you could seed it the next year, and the growth of the crop that year and the cultivation would cause the ground to thaw down to a depth of 2 or 3 feet, and that from the melting of the frost in the ground there would be a kind of subirrigation or the formation of moisture that would cause the crop to grow.

Mr. CALLAWAY. What kind of agitation of the soil does there have to be to allow the roots to get down into that

frozen ground?

Mr. DAVENPORT. The Agricultural Department has made some experiments up there and has shown that by proper cultivation certain products can grow. They show that alfalfa is not a success, because the roots get yellow after it grows a while. That is easily explained to a man who understands the growing of alfalfa, because it is well known that the taproots of alfalfa go very deep, and in going down they strike the frozen ground.

Mr. CALLAWAY. I see here from a note on the map that in a part of the year they have only two hours' daylight in that country. Is that true with reference to the entire Territory of

Alaska?

Mr. DAVENPORT. No; it is in the northern part where they have more night in the winter than they do in the southern part, and in the summer they also have more daylight.

Mr. CALLAWAY. What is the average amount of daylight, covering the whole Territory?

Mr. DAVENPORT. I could not answer that accurately. because after I got up into the Yukon Basin my investigation and research gave me to understand that in the growing season they had a total of as many hours of daylight as they have open season. In other words, in the summer the days get longer and the nights get shorter, and during four or five months of the open season there in the northern part of Alaska they have more daylight than they have in the section farther south.

Mr. CALLAWAY. How many days do they have for the grow-

ing season for their crops?

Mr. DAVENPORT. My recollection is that they sow their wheat at the experiment stations in May and harvest it about the 1st of September, if I remember correctly.

Mr. CALLAWAY. Do they have about 100 days? Mr. DAVENPORT. Ninety to one hundred days, or something

like that. I think that is what the report showed.

Mr. CALLAWAY. If that should develop into an agricultural country—which, of course, is absolutely and unqualifiedly impossible—where could they sell their product? There would not be any market up there, because there are no people

there to sell it to, and they could not get it out to any other

country in time to sell it.

Mr. DAVENPORT. If the railroads are constructed as provided for in this bill, they could bring their products from up around Fairbanks, down over this road 313 miles to Chitina and transfer them to the Guggenheims' road, which would bring them to deep water and load them onto a vessel, and they might get them to Seattle, which, according to my recollection, is about 1,400 miles distant by water, and they

might sell their products there.

Mr. CALLAWAY. That frozen region of Alaska could not hope to compete with the splendid climate of Seattle, Wash.,

and California in the growing of truck, could it?

Mr. DAVENPORT. I should not think it could. I have never had experience in that line, but my impression is that it could not. [Laughter.]

The next question to be considered is, What is there to be hauled from the interior, up around Fairbanks, should the railroad be constructed?

Prof. Piper again, on page 556 of the Senate hearings, spoke

further and used the following language:

further and used the following language:

Prof. Piper. I may state briefly in conclusion that my own viewpoint, and I think that is the viewpoint Prof. Chubbuck has taken—and I am sure it is the one Prof. Georgeson takes in all his reports—is conservative as to the future agricultural development of the interior of Alaska. I have no doubt that with the building of the rallways there will be plenty of literature of the boom type published, but I think it would be something of a calamity to induce any large number of homesteaders to go there to-morrow with the idea that it could be developed rapidly, like much of our prairie country was in the West. In the development of a new agricultural region usually the first development is live stock, and the second is grain raising—usually wheat raising. Now, in the development of the live-stock industry in Alaska somewhat different methods will have to be used to those which farmers have been familiar with in the States, and in a way they will have to feel their way along toward the most profitable methods.

In the matter of extensive grain culture, while that may be possible, I feel that the farmer himself will have many problems to solve before the ordinary man can be advised to go into grain farming. That is, in other words, I would fear that the greatest danger to the proper development of the interior of Alaska would be of holding out too roseate hopes of what can be done in the way of its agricultural development.

If these men, who have given the matter deep study, find conditions in Alaska as they have testified, I ask you when could we

hope to get any return for an investment, and is the evidence sufficient to show that it is possible for a farmer of limited means to go into Alaska and successfully improve a farm so as to make himself and family a living, to say nothing of surplus products:

The CHAIRMAN. The time of the gentleman from Oklahoma

has expired.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that

the gentleman may have time to conclude his remarks.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that his colleague may have time in which to conclude his remarks. Is there objection?

There was no objection.

Mr. DAVENPORT. Great stress has been laid by the advocates of this bill upon the future agricultural climate of certain sections of the Territory of Alaska, but I ask you to point out where those sections are and in what manner have they been thoroughly tested to show that farming can be made a suc-

Prof. Piper, on page 548 of the Senate hearings, speaking of these matters, makes the following statement regarding the suc-

cess of certain agricultural products in Alaska:

cess of certain agricultural products in Alaska:

So far as railways into the interior are concerned, any great amount of agricultural freight in the future would have in the main to come from and on account of possible grain production—that is, the production of other things, like dairy products, or even meats, would not yield any very great amount of freight.

The most interesting experiment stations, so far as this problem is concerned, in Alaska are those at Rampart, which has been conducted since about 1900; Fairbanks, where the experiment station has been in existence since 1907, I believe; and Copper Center, on the Copper River, where an experiment station was conducted from 1902 to 1906. At the first two of these interior stations—Rampart and Fairbanks, springsown oats and spring-sown barley have yielded good crops practically every year they have been tested. Fall-sown rye and fall-sown wheat mature, but there is usually considerable winter killing, especially in the wheat, due to too thin snow protection from the severe cold. At both of these stations a large amount of time has been spent in the endeavor to breed up hardler varieties of all these grains better suited to the conditions in Alaska. There can be little doubt that varieties of these cereals will be developed better adapted to the region than any we now possess. However, among the numerous varieties tested, a good many varieties of oats and barley have succeeded, as I have stated. The ryes have done very well, and some fall-sown wheats have given trued. At Copper Center the results have not been as favorable. During the six years that the station was conducted spring-sown grains—that is, oats and barley—matured perfectly only one season.

It will be seen from the map of the Territory of Alaska that it has a large constal region, and wone of the previous of the

It will be seen from the map of the Territory of Alaska that it has a large coastal region, and much of the resources of the Territory are right along the coast and near harbors, and they would furnish no traffic for a railroad should one be constructed.

In 1867, heretofore stated, the Government purchased the Territory of Alaska for the sum of \$7,200,000, since which time, as shown by Appendix B of the report of the Alaska railroad commission, there has been produced from the Territory mineral products, including coal, gypsum, marble, and tin, \$206,813,594; sea food and furs, \$222,710,594; total from all sources, \$429,523,630.

\$429,523,630.
The coast region produced fish, and so forth, \$214,359,476.
Of this total the Pacific coast belt produced \$56,477,875; Copper
River and Cook Inlet, \$4,673,668; Seward Peninsula, \$60,349,700;
Silver, \$1,524,364; making a total of \$337,386,352. This coastal Silver, \$1,524,364; making a total of \$337,386,352. This coastal region will in no way be benefited by the construction of the proposed railroad and its branches. The coastal region's trans-

portation is exclusively by ocean vessels.

The Yukon Basin (the interior of the Territory of Alaska) produced gold during the same period amounting to \$74,108,534. All the Territory of Alaska produced copper, \$8,747,194. The tables given in the report do not differentiate between the coastal region and the interior region as to copper, excepting that produced at the Bonanza Mine. The furs produced from the land animals during the said period amounted to \$8,350,290: Again the tables fail to differentiate between the coastal region and the interior, but the facts disclosed by the tables of the railroad commission show conclusively that about \$80,000,000 of the total amount produced during the period of 1898 to 1911 is all that came from the interior of the Territory of Alaska, and the remainder came from the coastal region; and, further, that more than \$74,000,000 of this commerce was gold, all of which could have been loaded in one standard-gauge box car and brought out at one trip, as gold is so valuable that its

transportation is not very profitable to railroads.

It will further be disclosed by the report of the Alaska railroad commission that the gold in the Yukon Basin has been decreasing or at least it has not increased.

decreasing, or at least it has not increased.

I have gone somewhat into detail in the testimony in order that I might show to the committee that there was no disposition whatever to conceal anything that might be of interest to Alaska and her citizens, but I do desire to place in the Record extracts from the Saturday Blade, by Mr. W. D. Boyce, of Chicago, who accompanied the Scattle Chamber of Commerce

on an excursion trip through Alaska during the summer and fall. These articles appeared in the Blade September 27, 1913, and October 11, 1913.

Mr. Chairman, I ask unanimous consent to extend my remarks in the Record by printing these statements, which I have mailed to every Member of the House, and therefore there is

no need of my reading them at this time.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the Record by print-

ing certain statements. Is there objection?

There was no objection.

The statements are as follows:

[Mr. W. D. Boyce accompanied Seattle Chamber of Commerce excursion through Alaska in July, 1913, and published a series of articles relat-ing to Alaska.]

OCTOBER 11, 1913.

OUR COLONIES.

[Article No. 45.]

(By W. D. Boyce, organizer and leader of the Saturday Blade's South American Expedition, African Balloonograph Expedition, and Old Mexican Research. This is the seventh article of Mr. Boyce's series on Alaska.)

American Expedition, African Balloonograph Expedition, and Old Mexican Research. This is the seventh article of Mr. Boyce's series on Alaska.)

"Gold is where it is found," is an old and true saying. Finding it does not, however, depend on climate, soil, elevation, or favorable natural conditions. This is not true of farming. Agricultural products require congenial surroundings, although through the development of seed and intelligent handling of soil and crop we are now growing grains, fruits, and vegetables in many parts of the world heretofore unthought of. Man can not eat gold, timber, or coal. He must have foodstuff, pienty of it, and cheap.

Before I went to Alaska I knew about the gold and fishing and furs and shooting, but was ignorant as to the agricultural possibilities and products. After covering thousands of miles and seeing nearly every developed spot where anything that grows to eat is at its best I am satisfied that it is a poor country for a farmer and always will be. Should you succeed in getting a small patch cleared up at a place where there was a "boom on," you could get fancy prices for one or two years, until the boom was over. Except for the long summers and nightless days in Alaska, it would be impossible to grow anything. No warmth comes from the soil or beneath the surface. As far down as a shaft has ever been sunk—over 2,000 feet—you find ice. This lee was not made by freezing from the top down. For millions of years the country has been built up from the bottom, ice on ice, that never thawed out in the summer. The moss that grows nearly everywhere is a complete protection from the sun, and when you sink a pick through it you think you have struck rock. Clear off this moss, other vegetation, or scrub timber and you have the frozen earth. The sun will draw out the ice and frost about 1 foot the first year. Break this up and the next year it thaws out deeper, until after a number of down 2 or 3 feet.

Where alfalfa has been tried it turns yellow as soon as the roots strike the ice. Of

LAND LAWS ALL AGAINST FARMERS.

Again, the Government land laws are all against you, and it is practically impossible to secure title to a homestead. Little or no land has been surveyed. You must make at your own expense a private survey: costing from \$300 to \$700 for each claim, and take the chances then of the Government issuing you a deed. I heard nothing but complaints from all the poor people, who had been led to believe Uncle Sam was willing to give them farms in Alaska.

It is possible that the industrious, plodding foreigner from the far north countries of Europe and Asia can work out something in the next century in this land. I here quote the United States homestead law on proving up. Each homesteader may take up 320 acres. Here is how he can prove up:

"That at least one-eighth of the area embraced in the entry was continuously cultivated to agricultural crops other than native grasses, beginning with the second year of entry; and that at least one-fourth of the area embraced in the whole entry was so continuously cultivated with the third year of entry."

Under this law not a whole claim of 320 acres has yet been lawfully proved up in Alaska. One-fourth of 320 acres has yet been lawfully proved up in Alaska. One-fourth of 320 acres is 80 acres; at a cost of \$125 an acre to put in the first crop, the farmer would have invested \$10,000 in clearing the land—the price of a good lowa farm.

As I have heretofore stated, it is impossible for Washington. D. C., to legislate for Alaska. Congress can not enact wise legislation for a country so far away.

Agriculture in Alaska, at its best, should follow as an adjunct to other occupations. Methods suitable in one part of the country was

Agriculture in Alaska, at its best, should follow as an adjunct to other occupations. Methods suitable in one part of the country may be unsuitable in others. Bottom lands producing a rank growth of grass may be too cold and sour for root crops until thoroughly broken up and cultivated so as to let in the air and assist decomposition of the dead vegetation, which takes place but slowly in ground saturated with water. Where drainage is absent or very imperfect the result is swampy ground, known in the North as "tundra" or "muskeg," in which the dead vegetation, instead of being transformed into soil through the process of decay, is slowly converted into peat, or turf, as it is called in Ireland, to become in time an imperfect coal. The best lands are the gently sloping hills composed of silt and fine gravel, which are also those on which the birch makes its best growth, these

lands having been enriched by the leaves of the deciduous trees and drained of standing water.

It should be clearly understood that for the present, at least, farming must partake more or less of the character of market gardening around the mining centers, gradually expanding as these industries also grow; remembering also that on those things which can be grown in Alaska, but if not grown in Alaska must be imported, the cost of transportation will be added to the price the farmer receives.

Northwestern Canada is giving free land, free seeds, and financial assistance during the first year where such aid is wanted. In contrast with these inducements it seems to be our policy to burden the settlers with conditions almost prohibitive in some respects, shutting out many who might otherwise become good and valuable citizens. Certainly our policy has sent many hundreds to countries with more liberal ideas and a better understanding of the early years of pioneer life.

C. C. Georgeson, superintendent of the agricultural experiment sations in Alaska, is a big, six-foot-two native of Denmark, big of body, big of mind. He came from a cold country. He was connected with agricultural colleges in the States of Kanasa, Minnesota, and Washington. The Japanese Government hired him to put its agricultural schools on a good basis, and Japan never engages any but the best experise. If anything can be made out of farming in Alaska, Georgeson will bring it out. He established the first experiment station at Sitka 12 years ago. He now has stations at Rampart and Fairbanks. He was successful in raising cattle on Kodlak Islands until a big volcano covered the 100-mile island with ash and destroyed the grass. He had about 100 head of pure Galloway cattle, and this hardy Scotch breed was doing well until he had to ship them to the State of Washington, as he found it was cheaper to ship cattle to the hay than the hay to the cattle. The grass is growing again on Kodlak Island, and soon the herd will be returned. He is planning to bring

SEPTEMBER 27, 1913.

OUR COLONIES.

(By W. D. Boyce, organizer and leader of the Saturday Blade's South American explorations, African balloonograph expedition, and old Mexico research.)

American explorations, African balloonograph expedition, and old Mexico research.)

Alaska, like all new countries, has her share of boomers and failures. The failures and Government employees all want the Government to spend a lot of money in Alaska building railroads, wagon roads, bridges, and winter trails, and in dredging harbors, etc. In fact, I heard it suggested that, if Canada would permit, it would be a good scheme to pump the Japan current into the source of the Yukon River, and from thence let it flow west down that stream, making a perpetual warm country out of the valley of the Yukon.

This, of course, was objected to by the Alaskans living on the Pacific waters, as it would favor the Yukon Valley and Bering Sea and leave their part of the country frozen 8 months out of the 12. So you see how impossible it is to please or serve more than 3,000 or 4,000 people in Alaska, at less than a cost of several billion dollars without disappointing the other 28,000.

Serlously speaking, the 32,000 white people in Alaska are scattered over a territory one-fifth the size of the United States. The winters, except for a small strip of country along the southeast coast—affected by a warm Japan current—extend over eight months of the year. Nevertheless, Alaska is a wonderful country in many ways, and I have never met with a braver, stronger lot of men—two-thirds of the population are men—any place in the world. They come from everywhere, but especially from the Facific coast and gold-producing States; some from Australia, Canada, and the cold countries of Europe.

SOMETHING UNCLE SAM CAN NOT DO.

SOMETHING UNCLE SAM CAN NOT DO.

SOMETHING UNCLE SAM CAN NOT DO.

Keep in mind all the time, however, that it is over 1,500 miles from Ketchikan, the southeast corner of Alaska, to Cape Prince of Wales, on Bering Strait, northwest of Nome. And, again, it is over 1,500 miles from Unalaska and Dutch Harbor, in the southwest corner of Alaska, to the Arctic Ocean, north of Fort Yukon.

While Alaska is not equal to a country 1,500 miles square, it is just as difficult to serve from a transportation standpoint—and nearly all of its service must be by rail as compared with water, except a few fishing towns and ports on the south and southwest coasts—as the rivers, as well as the Bering Sea and Arctic Ocean, are frozen up for eight months and sometimes more each year.

I traveled over \$,000 miles in Alaska, and found the population of \$2,000 whites pretty evenly divided between the inland and coast, and was impressed with the impossibility of our Government acting fairly toward the whole of Alaska, undertakng the question of transportation, to say nothing about the enormous expense and loss if attempted. As near as I can calculate, it would cost \$200,000,000 to serve 20,000 of the 32,000 Alaskans with railroads, at an annual loss of \$30,000,000 a year, or equal to \$1,500 a year pension for each man, woman, and child brought within the transportation belt.

IMPOSSIBLE TO SERVE THEM ALL.

IMPOSSIBLE TO SERVE THEM ALL.

Of course, for \$50,000,000, 5,000 people could be served; but the rates and percentage would remain the same, and the remainder of the people, entitled to equally as good treatment, would be disappointed, and they would have a just cause to complain.

Now, as to the traffic or tonnage to be developed by the Government in spending millions of dollars for rallroads, it seems doubtful if any great amount of freight could be secured, aside from coal, and the cost of mining the coal (with labor in Alaska from \$4 to \$6 a day),

the quality of the coal, and the long water haul after the railroad has brought it to the Alaskan coast (Alaska's coal is in the interior), must all be considered. Always remember that steam coal at Seattle, the nearest market, 1,200 miles distant by water, is selling at about \$3 a ton; that the only thing Alaska timber is really good for is to be used as firewood, and that the whole northwest Pacific coast has an abundance of such fuel; and, furthermore, that the Panama Canal, from a commercial standpoint, is expected to supply California with cheap coal, in order that vessels may have a cargo both ways and reduce the carrying charges on American bottoms using the canal and loaded with Pacific coast fruits, grains, and lumber for eastern and European ports.

If the Alaska coal fields were fully opened up, and were as extensive and as cheap to mine as claimed, and the rail and water haul as cheap as on the Atlantic coast, then less coal would go through the Panama Canal, and there would be empty bottoms going west and double charges for cargoes going east.

However, I am getting away from Alaska, though not from what affects Alaska. Cut off as it is from the United States, with Canada in between, but with a splendid navigable ocean and an inside course back of islands which enable vessels to sail from Seattle to Skagway on waters equal to a big, deep river that widens out to lakes here and there, the coast town transportation by water from the southeastern port of Ketchikan to Seward, 800 miles to the northwest, is ideal and open the year around.

On this coast line of 800 miles we find more or less prosperous towns, with 50 per cent of the total population of Alaska. In a future article I will tell you what they do; at present I am only treating the transportation question.

Nearly every coast town that has a port open the year around is claiming to be the only point from which to reach the interior of Alaska. It is perfectly natural that each of these points should wish to benefit from the building of a railr

A MONOPOLY THAT MAKES NO MONEY.

although they have never paid the stockholders anything.

A MONOPOLY THAT MAKES NO MONEY.

The White Pass & Yukon route, from Skagway, Alaska, to White Horse, in the Yukon Territory, Canada, is 110 miles in length. Twenty miles of the line is in the United States. In 1897, when the Dawson placer deposits were discovered, thousands of men sailed from all over the world to Skagway, winter and summer alike, and hundreds lost their lives on the White Pass through snowslides and exposure. Then this railroad was quickly and well built by English capital, and the trail destroyed by blasting for its construction. There followed a rate of 20 cents a mile per passenger, with any old rate for freight. The same rates are still in effect, and as this company owns the boats on the Yukon River for some 1,200 miles passengers and shippers are up against the same monopoly of internal traffic, both in the Yukon Territory and Alaska. Yet even at the prices named the company is unable to pay a dividend. The trains and boats are good—the best to be found anywhere in Alaska—and passengers are treated like human being, but there is not enough business.

The Copper River & Northwestern, the only other road in Alaska not in the hands of a receiver, is owned and operated by the Guggenheims and Morgans, and runs from Cordova to Kennicott, 196 miles, to reach a number of rich copper properties, especially the Bonanza group of mines, owned by the same interests. The Copper River & Northwestern road is well kept up and is the only standard 4-foot 8½-inch gauge road in Alaska. All the others are narrow gauge.

Next, we have the many times "busted," failed, and confiscated Alaska Northern. It starts at Seward, and is built north 72 miles to Nowhere. This is known as the Frost Road, not because it was such a "frost," or is located in Alaska, but on account of the promoter's name being Frost. It was built by Canadian capital, and "busted" the bank in Canada that backed it. Frost himself has but recently been tried criminally by the United State

AGAIN, "BOTTLED-UP ALASKA."

Alaska, that he never had a chance to win, even if on the square.

AGAIN, "BOTTLED-UP ALASKA."

Owing to the inability of this road to pay the United States Government tax of \$100 a mile each year, it has been closed down, and about 1,000 people in Seward and along the lines completely put out of business. The road could not earn the tax. The receivers for the railroad company offer to let the people living in Seward and along the line operate it free of rent for tracks and equipment, but the United States Government said, "No taxes, no run," and there you are. No wonder they sing all over Alaska the song, "Bottled-up Alaska."

The Nome & Seward Peninsula Raliroad, the most northerly railway in the world, 104 miles long, is not operated by the receivers; they can not pay the tax. Again, "Bottled-up Alaska."

The Tanana Valley Railroad, 45 miles in length, operates from the Tanana River to Fairbanks and from Fairbanks out to some of the placer creeks. The last receiver has paid the Government tax and is trying to put the road in successful shape. Its equipment and tracks are in rather bad condition, and most of the mining camps on the line still prefer to depend on teams and dogs for their freight.

The Yakutat Road of 12 miles to the salmon cannery is little more than a tramway, while the Cook Inlet Road, 8 miles in length, and Katalla Road, 6 miles long, have been abandoned.

The reader now has the history and condition of the 465 miles of the railroad already constructed in Alaska. These railroads were evidently built long before there was really anything for them to hanl, unless, like the Guggenheims and Morgans, they created their own tonnage by an investment many times the cost of building the railroads.

My theory is that, if Alaska really contains the ore and coal to warrant building railroads, and our Government will take the "lid off" so that capital can invest with reasonable hope of returns, the railroads will follow as a natural result. Otherwise, it is my conviction that they should never be constr

Mr. DAVENPORT. By these articles you will see how the Territory of Alaska appeared to Mr. Boyce on his trip; and no one will question Mr. Boyce's ability to judge or charge him with being unfair to Alaska, as his experience and travels have been such as to make him an authority upon questions about which he writes

In the majority report, on page 9, extracts are published from the Democratic platform adopted at Baltimore. We all must admit that these extracts were published for the purpose of awakening those of us who are Democrats and have been interested in the Democratic party for years; but this provision in the platform is not a declaration to build railroads, even though you may stand upon the legal proposition that courts have held that railroads are post roads. There is no declaration to build, but merely aid in the building. Aid may be furnished in many ways other than in a financial way. No one will dispute the fact that it is not good policy to spend the Government funds unless there is some hopes of improving her citizens and benefiting mankind. If Alaska is the desirable place it has been pletured to build up homes for American citizens, I ask you why it is that from the coastal regions and the waterways of that country so many railroads have started to be constructed, and constructed for some few miles, and yet the population has not increased thereby? Does any Member upon the floor of this House believe that the climatic conditions in Alaska, as shown by the testimony of the representatives of the United States Geological Survey and others, is such as to ever make it a suc-cess from an agricultural standpoint? I do not believe it can be done, nor do I believe that anyone desiring to be fair with himself and his fellow men can urge such an impossibility.

Mr. Chairman, I ask permission to insert as a part of my

remarks an article by Harrington Emerson as to the construction of a railroad and what kind of a railroad should be constructed in Alaska.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to insert a certain extract in the RECORD. Is there objection?

There was no objection. The extract is as follows:

THE ALASKAN BAILWAY PROBLEM.

(By Harrington Emerson.)

It is ridiculous to use a 10-gallon flask as a nursing bottle for a by. It is also not economy to use a steam hammer to drive carpet

Yet Americans in their large enterprises like to do things of this ind. The great national fault is overequipment, not two blades of cass where one grew before, but 6 acres for 160 bushels of corn in-

kind. The great national fault is overequipment, not two blades of grass where one grew before, but 6 acres for 160 bushels of corn instead of 1 acre.

The development of Alaska is being held back on account of the national proclivity to overequip.

Alaska is a land of immense distances, great natural obstacles, sparse population. It is 1,500 miles from Ketchi Rau to Bering Straits. The great fjords, arms of the sea; immense glaciers. Malaspina, 80 miles across; high mountains, Mount St. Elias, 18,000 feet; Mount Denall, 20,000 feet; the volcances, Katmai, whose ashes tinted Algerian sunsets. The wide and turbulent rivers, Copper, Kuskokwim, Yukon; the extreme cold in the interior, 70° below zero; the rainfall and snowfall, 110 inches at Juneau, sufficiently exemplify the natural obstacles. The population is about one to 20 square miles.

In the presence of these tremendous conditions it behooves man to be modest. There were good Roman roads over the Alps 1,800 years before Napoleon built his magnificent wagon roads, and Napoleon's wagon roads served the purpose for 80 years before 10 to 14 mile tunnels were either necessary or remunerative. Any Alaskan railroad building will be hard enough without attempting it on an absurdly overequipped basis.

either necessary or remunerative. Any Alaskan railroad building will be hard enough without attempting it on an absurdly overequipped basis.

Shall we build in Alaska railroads costing \$10,000 a mile or railroads costing, like the New York subway, \$1,000,000 a mile? Even if both kinds of road cost the same, should we put in roads cheap to maintain and operate or roads costing much to maintain and operate?

Some years ago an Alaskan mine owner wanted me to figure on a 14-mile railroad to carry, as he hoped, 10,000 tons of ore a year from mine to water. He wanted a standard. I was able to show that a 2-foot gauge road with 12-pound rails could carry 180,000 tons a year. Many years ago I saw operating in France a 2-foot-gauge passenger road on which the passengers sat back to back on longitudinal seats. Traveling in this way may not be as comfortable as in a Pullman car, but it is an immense improvement over mushing through the snow behind a dog team, which is, however, luxury compared to packing on one's own back a 60-pound load.

In 1902 I ran the preliminary survey for a road from Golovin Bay to Council City. The total population of the Ophir Creek district was about 1,500 people, with a yearly immediate traffic of 1,500 tons, at \$50 a ton, or 5 tons a day, a gross income of \$250 a day, a wheelbarrow or, at best, a mule-cart proposition, yet an engineering lunatic, backed by Wall Street, floated bonds to build a standard gauge road. The bonds were floated on the statement that the road could carry 400,000 tons a year—it was not emphasized that the total actual tonnage was only 1,500 ions.

Thirteen years ago Charles D. Lane set a sane example by building a railroad from Nome to Anvil Creek so cheaply that it earned its first cost in the first 30 days of operation. Later he built a similar road from Council to Ophir which earned its first cost in the first 30 days of operation. Later he built a similar road from Council to Ophir which earned its first cost in the first 30 days of operation. Later he built a simi

Where the total travel might amount to half a dozen persons a day, a full train, with conductor, engineer, fireman, trackman, station agents, and interlocking signals and switches is not necessary. Three or four Ford automobiles, with trailers running on light track, could take care of all the business. Where the freight traffic amounts at most to a few thousand tons, 50-ton freight cars, weighing, empty, 25 tons, are not needed; 3 to 5 ton trucks will do the business, and a string of mules may, for the start, be more economical and more reliable than steam locomotives.

If rivers have to be spanned, mountains tunneled, swamps filled in, hills cut through, snowdrifts dug out, a miniature line with heavy grade and steep curves is far cheaper to build, to operate, and to keep open than a standard gauge.

Cash subsidies may be needed. Land grants are absurd. They do not produce cash when it is wanted. The United States Government could well advance at a low rate of interest \$10,000 a mile on Alaskan roads, demand low rates for transportation of troops, supplies, and mail, and with great economy to itself promote the welfare of that great empire and its pioneers.

One of the fundamental rules, often violated, of sane capital expenditure is that we shall not invest \$1,000,000 to accomplish a result if we can accomplish an equally valuable result from an investment of \$10,000.

Mr. DAVENPORT. Again, the reports show that in order to mine in that territory under the most favorable conditions, especially in the Yukon region, one must mine by steam process. It also shows that in various sections, if you desire to clear a farm and plant crops, you must clear off the ground, and the first year it will thaw about 8 to 12 inches, and by seeding and cultivating it will continue to thaw deeper. The evidence given before the committee shows that for a depth of several hundred feet it was one mass of ice and frozen ground. It may be that this is a kind of subirrigation that the gentlemen who desire to spend \$35,000,000 as a starter believe is the proper kind of irrigation for successful farming.

During this Congress and for many Congresses past, since I have been a Member, I have heard gentlemen on both sides of the aisle stand up and plead for economy and for an equitable expenditure of the Government funds where they will do the greatest good to the greatest number of people. My position is that you may build a railroad into every community where there is a white man living in the Territory of Alaska and you will never make it an agricultural country; that the climatic conditions are such that the best farmers can not go there and successfully farm. This expenditure will be a wanton waste of time trying to make it an agricultural country. You may build a railroad in every community where there is a white settlement in this Territory, and yet there will be insufficient traffic of freight and passengers for the next 50 years to pay the operating expenses of the road, to say nothing about reimbursing the Government for the expenditure of \$35,000,000.

The only possible lines which might pay operating expenses would be those that lead from deep water to the Bering and Matanuska coal fields, and those lines could be constructed for a cost not to exceed \$2,500,000. Again, all the testimony presented to the Senate and House committees shows that the timber back from the coastal region in Alaska has practically no merchantable value; that it is only fit for firewood. There is, however, some timber along the coastal region that can be used, but practically all of it is near deep water and would furnish little or no traffic for the railroad.

I hesitate, when I think of the vast area of country yet undeveloped in the States, that have good climatic conditions, and the poorest man who desires can build himself a home, may work the greater part of the entire year with reasonable comfort, and who is not receiving any aid along the line of that suggested in this bill. Yet there are thousands and thousands of acres of land in the United States undeveloped and unoccupied, quite a distance from railroads, which roads have been built by private capital.

I am in favor of letting Alaska be developed as other sections of the United States have been developed, and that is by giving to the industries in Alaska proper laws and proper protection if they desire to build a road and homes for themselves and family. If you will open up Alaska to settlement and give to any man who will go there and live with his family on a tract of land for 12 months-provided he can stand the climate that long-a patent to his lands, you will within a few years demonstrate the fact as to whether or not Alaska can be made an agricultural country. If you do, and under proper laws you will permit them to settle the lands so that there may be something for railroads to haul, then Alaska will get her just dues.

Gentlemen upon this floor have from time to time fought the appropriations for old soldiers and resisted the same upon the grounds that it was an extravagant expenditure of the Government funds and plead for economy. I for one have always stood for a deserving pension for the needy old soldier, but I ask you, How are you to justify before the people of this country, and how are you to harmonize, if on the one hand you vote against the appropriation for the deserving soldier and on the

other vote to appropriate \$35,000,000 to open up Alaska? Should we not improve the interior of the country, where we have millions of population, needing development before we attempt to develop an untried country? Should we not expend on the roads and highways of the United States many millions before beginning in Alaska, in order that those who have produce to bring to market may do so, instead of providing railroads for a country of such a small population and nothing to haul to market? Should we not improve the interior of the country that is largely populated before improving a country that has practically no population? But some one says that the Government has aided railroads throughout the country; and the answer to that question is that it has; but it was an outrage when the aid was granted, as no man ever saw a country that had produce to haul that individual capital would not construct a road to haul

I ask you to consider this proposition and carefully weigh it before casting your vote. I have tried to study this question and reach a conclusion as to what was best, and I have decided that it is not a wise expenditure of money at this time, as I believe that the funds should be spent in a different manner. Some say that Alaska is a great storehouse, and that the railroad would be the key to that great storehouse. I say to you that the railroad will not open the storehouse of industry, but it is only a means of transporting the products of the storehouse, provided there are any products to be transported, and in all Alaska away from the seaboard and deep water, under the most favorable conditions, the amount contemplated to be expended by this bill of \$35,000,000 would not be reimbursed to the Government for the next century.

I deem it my duty to say to you that I can not reach a conclusion that it is wise at this time to make this appropriation, and I am opposed to the bill, and shall continue to oppose it until it is defeated or passed. I trust that the members of this body will consider these questions. They are not bound to support the measure merely because some one has said it should become a law, but they should consider it from the standpoint of what is right and best for the greater number of their con-The American people not only in Alaska are interested, but the entire population of the United States, and unless it could be more clearly demonstrated than at present I can not say that it would be wise to make the appropriation.

The only just theory that we started out with that might in a way justify the appropriation, was the importance of the Bering River and Matanuska coal fields for naval purposes; but that theory has been exploded and the coal proved to be un-What have you suitable, so that theory is out of the way. left now but a desire to spend the funds of the Government? ask, in conclusion, what have you to justify such an expenditure of the people's money? I answer, in my candid opinion, you

Now, gentlemen, I ask you, in considering this bill, to deal fairly with the American people. I ask you, in case you vote, to cast it in the way it will benefit the greatest number of the American people; and before you vote to expend \$35,000,000 in Alaska, where there is, including all classes, only 64,356 people, to stop and consider the improvements that you could make throughout the entire United States with that sum. Consider the number of good roads that you could build in the populous sections of the United States, from the rural communities into the centers of commerce, where the farmers, who have established farms in the country, have already built their homes, have their families and children, raising and educating them, and the benefit that they could derive from it by connecting them with the markets.

Then, if you can make up your minds that you prefer to expend \$35,000,000 for experiment in Alaska, I say make peace with your own conscience and do so.

Mr. SISSON. Will the gentleman yield? Mr. DAVENPORT. I will yield to the gentleman.

Mr. SISSON. I notice that all members of the committee that have addressed the Committee of the Whole have stated that it will cost \$35,000,000 to build this railroad. Is that an accurate estimate?

Mr. DAVENPORT. That is an estimate by the railroad commission for the construction of 733 miles of road indicated by these heavy lines on the map, running into certain sections of the Territory.

Mr. SISSON. Is it an exhaustive report as to the exact character of the ground and the territory over which the road

Mr. DAVENPORT. The report recommends the advisability of constructing a road and gives the approximate cost.

Mr. SISSON. What I am endeavoring to arrive at is whether this \$35,000,000 is sufficient to complete the road.

Mr. DAVENPORT. The majority of the committee is satisfied that it will, but the gentleman from Oklahoma [Mr. Ferris]

and myself are satisfied that it will not.

Mr. FERRIS. If the gentleman will allow me, Mr. Josselyn, the president of one of these roads, who appears very prominent all through the hearing and is very solicitous about this matter. testified that it would take 10,000 miles of railroad to properly serve Alaska, and that it would cost \$40,000 a mile, which is a lower estimate than any other that is given, and that would amount to over \$400,000,000.

Mr. SISSON. That is what I am trying to arrive at—would the building of this road be anything like the final limit of cost to the Federal Government? The Government might be called upon to construct other railroads in Alaska.

Mr. DAVENPORT. My candid opinion is that this would not be the final limit of cost that the Government would be called upon for the construction of railroads in Alaska. It is simply a starter.

Mr. SISSON. If these roads are built included in this bill, with what sort of grace could Congress deny the building of roads in other sections of Alaska when they have once begun this policy of building railroads?

Mr. DAVENPORT. I do not think it could deny it, and I do not think it could deny it in other States that would have the same right to claim it as has Alaska.

Mr. SISSON. Of course, we would have the power to deny it. Mr. DAVENPORT. Yes; we would have the power, but not the moral right.

Mr. SISSON. Could we logically withdraw from the policy of building railroads?

Mr. DAVENPORT. Not without changing the entire policy.

Mr. O'HAIR. Will the gentleman yield?

Mr. DAVENPORT. Yes.

Mr. O'HAIR. I notice the proposed railroad there seems on the map to connect with railroads that are built inland about 75 or 100 miles. How is it proposed that the Government road shall operate in conjunction with the roads already built?

Mr. DAVENPORT. The provisions of the bill give the President absolute right and discretion to buy and construct, but just what the proposition is going to be is of unknown quantity to me at the present time.

Mr. O'HAIR. I thought perhaps the hearings might have thrown some light upon whether or not the Government might have to construct on to the seaboard or if there is any intention on the part of the people who own those railroads to unload them on the Government.

Mr. DAVENPORT. Was the gentleman in the Hall when I read the statement of Senator Nelson?

Mr. O'HAIR. I came in just as the gentleman was reading it.

Mr. DAVENPORT. Senator Nelson stated that Mr. Guggenheim said they would be perfectly willing, if they could get their money back, to let the Government have the road.

Mr. O'HAIR. Yes; I understand; but there are lots of people who have gone into deals like to that who would like to do the same thing. I wanted to know whether there was anything in the hearings that indicated whether the proposition would be to buy these roads or lease them?

Mr. DAVENPORT. That is left entirely to the discretion of the President.

Mr. BRUMBAUGH. Mr. Chairman, will the gentleman yield?

Mr. DAVENPORT. Yes. Mr. BRUMBAUGH. In In answer to the question propounded by the gentleman from Mississippi [Mr. Sisson], I desire to say that the opinion of the majority of the committee was that it would be proper and best for the Government to build but one road, from some seaport to the Tanana River, tributary to the Yukon, which would cost possibly \$20,000,000, and that would open possibly 7,000 miles to civilization throughout the valleys and Alaska and to the coal mines, and to stop with one railroad; after having opened the country to civilization by that one line. then permit private enterprise to tap that line by any system of leasing that the Government might desire. The Government can lease, sell, or operate the read, as may prove to be best.

Mr. SISSON. Will the gentleman yield?

Mr. DAVENPORT. Yes.

Mr. SISSON. We are taught in the Scriptures that if a man puts his hands to the plow, he ought not to turn back. When you put your hand to the plow in this case how and when will the Government turn back?

Mr. BRUMBAUGH. The report of the engineering commission some years ago recommended the building of two roads, but the bill reported to Congress by the Committee on Territories—the bill now before the House—very properly, I think, leaves the location of the road or roads, or whether it shall be one railroad or two railroads, to the judgment of the President.

We understand that is the mere beginning. What I am endeavoring to arrive at is what would be the final

Mr. BRUMBAUGH. Congress could say as to that. My own binion is that one road is sufficient. The building of one opinion is that one road is sufficient. railroad at a cost of about \$20,000,000 or two roads at not to exceed \$35,000,000 would be the final conclusion. One road is absolutely necessary.

Oh, well, we have been in Congress long Mr. SISSON. enough to know that when you once emback upon a proposition of any kind there is no end to it.

Mr. BRUMBAUGH. Not necessarily. We have often assisted in this way other sections of the United States and it did not prove to be an endless matter as the gentleman fears.

Mr. SISSON. I would like to have the gentleman show me one single instance where they have ever commenced a proposition of this kind where they have ever turned back until they have completed it. Absolutely every proposition that the Government has gone into seriously must go forward; it can not retreat; so I ask the gentleman to consider what would be the final outcome of opening this up.

Mr. BRUMBAUGH. The committee has thoroughly con-The great value of this development of Alaska to all the people of the United States demands this assistance and we owe it to Alaska as well.

Mr. SISSON. What does the gentleman believe would be

the final expenditure in that section?

Mr. BRUMBAUGH. If we complete one road, the expense will be about \$20,000,000. If we complete two roads, the expense will not exceed \$35,000,000; private enterprise can do the balance in the developing of Alaska and the Government will not need to do more. But whichever it does the Government will get its money back many times over.

The CHAIRMAN. Does the gentleman from Oklahoma fur-

Mr. DAVENPORT. I was just about to conclude. Mr. SISSON. The gentleman has unlimited time.

Mr. DAVENPORT. I wanted to say in reply to the suggestion made by the gentleman from Ohio [Mr. BRUMBAUGH] that I do not so understand the majority report, that it draws any distinction or makes any recommendation of the construction of a road or a part of a road up there. I understand the majority report takes the cork entirely under and recommends the construction of 733 miles, as indicated by the railway commission's report.

Mr. SISSON. I have not heard all of the discussion, but did the committee take into consideration the fact that out in the great Western States and in the Southern States there are vast stretches of country that badly need opening up by the

building of railroads?

Mr. BRUMBAUGH. The bill leaves the whole matter, very properly I think, to the discretion and judgment of the Presi-The President can locate the route and can authorize the building of one railroad or two railroads, as in his judgment seems to him best, right, or proper. The people will be willing to trust our great President to do the right thing on all these points

Mr. SISSON. Now, those people are directly in need of that, because that country is already settled up. Did they take into consideration that this Government, in all fairness, ought to embark in the development of our country at home, among our people, when we have so many people who need railroads at

Mr. DAVENPORT. I will say to the gentleman from Mississippi I did not attend all the hearings, but at those I did attend they did not. They considered only the question of Alaska, and the question of other portions of the United States was not considered, as far as I know, and have been able to find from the report.

Mr. SISSON. I wonder if an amendment will be in order upon the bill-

Mr. DAVENPORT. It will at the proper time, and it will

Mr. SISSON (continuing). For me to offer an amendment to build certain roads at the hands of the Government down in my State, where they are badly needed.

Mr. WINGO. I should like, if I have the attention of my

Mr. SISSON. If gentlemen talk about building roads in the State of Mississippi, the fact of the business is there was only one crime, and that was the granting of public lands to railroads. It seems to me that was one of the crimes of history, where the

Congress gave away thousands of acres of the public domain to the railroads

Mr. HUMPHREY of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HUMPHREY of Washington. I would like to know who has the floor.

Mr. SISSON. The gentleman down there has the floor

Mr. HUMPHREY of Washington. Then, why does the gentleman from Mississippi take the floor, if the gentleman down there has it, without getting recognition?

Mr. SISSON. I was recognized at the time the gentleman from Arkansas interrupted me, and the gentleman from Wash-

ington himself is out of order.

Mr. HUMPHREY of Washington. I am asking a parliamentary inquiry. I want to know how the gentleman got the

Mr. DAVENPORT. I yield to the gentleman from Arkansas [Mr. WINGO]

Mr. WINGO. Mr. Chairman, I was about to ask, when so facetiously interrupted by my friend from Mississippi, whether or not any estimate had been made in the committee of the cost of the Panama Canal equipment, the property that belongs to the Government that is now being used in the construction of the Panama Canal, which under this act is turned over for the construction of these railroads in Alaska? What is the value of that property, machinery, and so forth, that is now being used in Panama that is to be taken from Panama to be put in Alaska?

Mr. DAVENPORT. I could not answer the gentleman's ques-It was considered as to whether or not the machinery could be transferred and used up there in the construction of those roads, but the value of it I am not able to answer ac-

curately; but it goes into the several thousand dollars.

Mr. WINGO. But the bill authorizes the transfer of any

portion of the equipment up there. Mr. DAVENPORT. Yes, sir.

Mr. WINGO. Now, did anybody give an estimate of the value of that property

Mr. DAVENPORT. If so, I do not remember it.

Mr. MANN. If the gentleman will yield, the Panama Commission has just made a report to Congress on this subject, which was printed, I think, within a week. I am not sure about the amount, but my recollection is it was in the neighborhood of a million or two million dollars, including the railroad rails which might be used. The estimate is in detail and just published.

Mr. DAVENPORT. I understood the report was to be made, but I have never been able to see what the estimate would run

into.

Mr. WINGO. What estimate, if any, was made by the committee, or statement to the committee, of the number of acres of land that is susceptible of agricultural development that would be opened up by these proposed lines of railway?

Mr. DAVENPORT. I think there were some estimates, but

I do not remember them. I think Judge Houston gave that in

his remarks to-day.

Mr. BRUMBAUGH. If the gentleman will yield, I can answer that, because it is part of my address. It has been estimated by Government sources that in the Tanana Valley there will be about 9,000,000 acres; in entire Alaska, about 64,000,000 If the gentleman wants some comparisons, I will state that in Norway, Sweden, and Denmark, of a similar climate, with less acres than in the Tanana Valley alone, there resides a population of more than 11,000,000 people. The Tanana Valley alone could, therefore, equal this population. Besides, Norway, Sweden, and Denmark, with their 11,000,000 people, do not have the rich mineral resources Alaska has, while interior Alaska has a much better climate than Norway and Sweden have. The warm Japan Current does for interior Alaska what the Gulf Stream does for England, Scotland, and parts of Norway and

Mr. WINGO. On agriculture?

BRUMBAUGH. These nations do not have as good climatic conditions as Alaska has, and have none of the mineral resources that Alaska has.

Mr. HUMPHREY of Washington, Mr. Chairman

The CHAIRMAN. Does the gentleman from Oklahoma [Mr.

DAVENPORT] yield to the gentleman from Washington?

Mr. DAVENPORT. I do.

Mr. HUMPHREY of Washington. I was going to suggest to my friend from Mississippi [Mr. Sisson] whether the Government still owns that State, as they do Alaska, when he talks about building roads up there? I remind the gentleman of the fact that Stephen A. Douglas introduced a bill to construct a railroad through his State, and that Jefferson Davis voted for it.

Mr. SISSON. I am glad the gentleman has seen fit and proper at last to quote as good an authority as these two Democrats, Stephen A. Douglas and Jefferson Davis. But, nevertheless, I do not believe—and I want to repeat this and will not trespass on the gentleman's time any more—that the land grants of that day and time constitute, especially in the West, one of the crimes that has been committed against the people of the United States and against posterity.

Mr. DAVENPORT. Mr. Chairman, I want to say now in conclusion, that I am proud of the fact that we stopped several years ago making land grants to railroads, and as far as I am concerned, unless something comes up different than has come up, and more facts are submitted to me than have been submitted in any hearing on this proposition, I will endeavor to stop the Government building of railroads either in its Territories or in its States.

I thank you. [Applause.]

Mr. HOUSTON. Mr. Chairman, if no other gentleman wants to speak just now, I move that the committee do now rise.

The motion was agreed to; and the Speaker having resumed the chair, Mr. HARRISON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 1739, and had come to no resolution thereon.

ADJOURNMENT.

Mr. HOUSTON. Mr. Speaker, I move that the House do now

The motion was agreed to; accordingly (at 5 o'clock and 12 minutes p. m.) the House adjourned until Thursday, December 18, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Interior, submitting a report on land withdrawals from settlement, location, sale, or entry, under provisions of the act of Congress approved June 25, 1910 (36 Stats., 847) (H. Doc. No. 482); to the Committee on the Public Lands and ordered to be printed.

2. A letter from the Secretary of War, transmitting a copy, with accompanying inclosures, of the report of the board of officers that was appointed by this department to consider the matter referred to in the act approved March 3, 1913 (Public Law No. 412), to protect monuments on the battle field of Bull Run (H. Doc. No. 481); to the Committee on Military Affairs and ordered to be printed, with illustrations.

3. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of John Pitman v. the United States (H. Doc. No. 483); to the Committee on War Claims and ordered to be printed.

4. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of Charles S. Smith v. the United States (H. Doc. No. 484); to the Committee on War Claims and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 4938) providing for the issuance of patents to transferees of town lots purchased from the United States at public sale in certain cases, reported the same with amendment, accompanied by a report (No. 150), which said bill and report were referred to the House Calendar.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 10313) to amend an act entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes," approved March 4, 1913, reported the same with amendment, accompanied by a report (No. 151), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 9417) to amend the act of June 11, 1878, entitled

"An act providing a permanent form of government for the District of Columbia," by repealing so much of said act as authorizes one-half the expenses of the District of Columbia to be paid out of the Treasury of the United States, reported the same with amendment, accompanied by a report (No. 154), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CLARK of Florida, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 5487) to authorize an additional appropriation for the erection of the United States appraisers' stores building at Milwaukee, Wis., reported the same with amendment, accompanied by a report (No. 153), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BYRNES of South Carolina, from the Committee on War Claims, to which was referred the bill (H. R. 8811) to execute the findings of the Court of Claims in the case of Sara B. Hatch, widow of Davis W. Hatch, reported the same without amend-ment, accompanied by a report (No. 152), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 6015) for the relief of Juan Paiz, and the same was referred to the Committee on Military Affairs.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows: By Mr. BUCHANAN of Illinois: A bill (H. R. 10821) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict labor, or made in whole or in part from materials which have been made in whole or in part or in any manner manipulated by convict labor; to the

Committee on Labor.

By Mr. EDMONDS: A bill (H. R. 10822) appropriating \$15,000 for purchase of additional ground at Frankford Arse-

nal, Philadelphia, Pa.; to the Committee on Appropriations.

By Mr. ROBERTS of Massachusetts: A bill (H. R. 10823) authorizing the Secretary of the Navy to dispose of the naval hospital and magazine lands located in Chelsea, Mass.; to the Committee on Naval Affairs.

By Mr. GUERNSEY: A bill (H. R. 10824) authorizing the Secretary of War to deliver to Grand Army Post No. 51, of Sherman Mills, Me., two condemned cannon; to the Committee on Military Affairs.

By Mr. UNDERHILL: A bill (H. R. 10825) authorizing the Secretary of War to donate to Custer Post, No. 81, of the Grand Army of the Republic, and Major John Stocum Camp No. 181, Sons of Veterans, at Bath, in the State of New York, three bronze or brass fieldpieces or cannon, with their carriages and outfit

of cannon balls, etc.; to the Committee on Military Affairs. By Mr. EDWARDS: A bill (H. R. 10826) providing that the United States shall aid in the construction and maintenance of public roads; to the Committee on Roads.

By Mr. TAYLOR of New York: A bill (H. R. 10827) to regulate the payment of salaries of post-office clerks in first and second class post offices and letter carriers in the City Delivery Service; to the Committee on the Post Office and Post Roads.

By Mr. CARTER: A bill (H. R. 10828) to authorize the Secretary of the Treasury to employ consulting architects in connection with the work of the Supervising Architect's Office, and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. KENT: A bill (H. R. 10829) to authorize a survey of

Novato Creek, Cal.; to the Committee on Rivers and Harbors. By Mr. ANTHONY: A bill (H. R. 10830) providing for military highways between Forts Leavenworth and Riley, Kans., and between Fort McPherson and the Government rifle range near Waco, in the State of Georgia; to the Committee on Military Affairs.

By Mr. ADAMSON: A bill (H. R. 10831) providing for military highways between Fort McPherson and the Government rifle range near Waco, in the State of Georgia, and between Forts Leavenworth and Riley, in the State of Kansas; to the Committee on Military Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 10832) to amend section 2 of an act approved March 2, 1907, entitled "An act providing for the allotment and distribution of Indian tribal funds" (34 Stat. L., 1221, 1222); to the Committee on Indian Affairs.

SENATE.

THURSDAY, December 18, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. Mr. SMOOT. Mr. President, I suggest the absence of a quo-

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Brady Braddy Brandegee Bristow Bryan Burton Catron Chamberlain Clapp Clarke, Ark. Colt	Gronna Hollis Hughes Jackson James Johnson Jones Kern Lane Lea McCumber McLean	Overman Owen Page Perkins Poindexter Pomerene Ransdell Reed Robinson Shafroth Sheppard Sherman	Smith, S. C. Smoot Sterling Sutherland Swanson Thompson Townsend Vardaman Walsh Warren Weeks
Clarke, Ark.	McCumber	Sheppard	Warren
Fletcher Gallinger	Norris O'Gorman	Smith, Ariz. Smith, Ga.	

The senior Senator from Alabama [Mr. BANK-HEAD] is unavoidably detained from the Senate. This announcement may stand for the day.

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. Culberson] and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. nouncement may stand for the day.

Mr. WEEKS. I wish to announce that my colleague [Mr. Lodge] is absent on account of illness, and to have this state-

ment stand for the day.

Mr. REED. I announce the necessary absence of my colleague [Mr. Stone] on account of illness. I think, I know in fact, that he will not be able to attend the sessions of the Senate for a couple of days

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding session.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. WORKS. Mr. President, I have here two telegrams relating to the pending currency bill, one from Stoddard Jess, vice president of the First National Bank of Los Angeles, Cal., and the other from J. E. Fishburn, president of the National Bank of California, of the same city, and also president of the Los Angeles Clearing House Association.

One of the telegrams suggests what seems to be an important and necessary amendment to the bill. I recognize the fact that the final form and substance of the bill will be determined by the Democratic caucus. I am sorry that the Senator from Oklahoma [Mr. Owen] is not in his seat, as I should be glad to call his attention to the telegram. I hope other Senators on the other side of the Chamber will give it their attention.

Mr. CLAPP. Will the Senator pardon an interruption? Mr. WORKS. Certainly.

Mr. CLAPP. I suppose the telegram relates to the clearinghouse matter.

Mr. WORKS. It does. Mr. CLAPP. I was assured by the Senator from Oklahoma. when similar telegrams were presented to him, that they will give the matter consideration,

Mr. WORKS. I ask that the two telegrams be read.

There being no objection, the telegrams were read, as fol-

Los Angeles, Cal., December 17, 1913.

Hon. John D. Works.
Senate Chamber, Washington, D. C.:

Senate Chamber, Washington, D. C.:

Section 24 of the Owen bill contains the following: "No examiner, public or private, shall disclose the names of horrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained express permission, in writing, from the Comptroller of the Currency," etc. With such a provision in the currency bill the entire efficiency of the system of examinations by special examiners employed by clearing-house associations, and which have proven such a protection in handling local situations, will be destroyed. Please support and use your influence to secure an amendment inserting after the words "Comptroller of the Currency" the following: "or from the directors of such bank."

Stoddard Jess, Vice President.

Los Angeles, Cal., December 16, 1913.

Hon. John D. Works, Senate, Washington, D. C.:

By mutual agreement all banks in Los Angeles employ a clearing-house examiner, whose entire time is given to their auditing and examination of loans, collateral, etc. The system has been in operation for five years and is of immeasurable benefit to the banks, their stockholders, and depositors alike. We know of no possible injury or injustice under the system, and if section 23, lines 16 to 19, page 61, and section 24, lines 12 to 18, page 62, report of Senate committee, calendar 107, prohibits or curtails the rights of banks to these examinations and free exchange of credit information, it very materially lessens the efficiency of the currency bill. We earnestly request that the provision contained in above sections be eliminated from the bill.

J. E. Fishburn,

President Los Angeles Clearing House Association.

Mr. BURTON. Mr. President, I wish simply to state that I have received telegrams from the clearing-house associations of the cities of Cincinnati and Columbus on the same subject and containing the same contention.

Mr. SMITH of Georgia. I present a telegram from John K. Ottley, of Atlanta, Ga., which I ask to have read.

There being no objection, the telegram was read, as follows:

ATLANTA, GA., December 17, 1913.

ATLANTA, GA., December 17, 1913.

Hon. Hoke Smith, Washington, D. C.:

Section 24, Owen bill, contains: "No examiner, public or private, shall disclose the names of borrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained express permission in writing from the Comptroller of the Currency, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States or either House thereof or any committee thereof." It is suggested that the words "or from the directors of such bank" be inserted after "Comptroller of the Currency." Without this amendment system of clearing-house examinations, which is a power toward better banking, will receive a great backset. JNO. K. OTTLEY.

Mr. CLAPP. I desire to have printed in the RECORD a telegram, which I send to the desk, relative to the banking and currency question. It is from E. H. Bailey, president of the

St. Paul Clearing House Association.

There being no objection, the telegram was ordered to be printed in the Record, as follows:

ST. PAUL, MINN., December 17, 1913.

Hon. Moses E. Clapp.

St. Paul, Minn., December 17, 1913.

Hon. Moses E. Clapp.

United States Senate, Washington, D. C.:

At a meeting of the St. Paul Clearing House Association held to-day, at which all members of the association were represented, it was unanimously resolved that in the opinion of this association the system of clearing-house examination has been of inestimable value to the entire business interests of this section in enabling member banks to maintain a high standard of credit and banking methods among banks in the community, in preventing improper or undue borrowing from member banks, and keeping the association in closer touch with the members or banks clearing through the association. We respectfully protest against that part of Calendar No. 107, Senate section 23, page 61, of the report, lines 16 to 19, inclusive, and that part of section 24, page 62, of the report, lines 12 to 18, inclusive, as being prohibitive against the present system of clearing-house examinations, which have been proved of great advantage to business interests, and we believe that a clearing-house examiner will be in better position to give reliable information to the officers of regional reserve banks with respect to commercial paper offered for rediscount.

E. H. Baller,

President St. Paul Clearing House Association

President St. Paul Clearing House Association.

Mr. JONES. I present a telegram from W. D. Vincent, cashier of one of the banks in Spokane, Wash., relating to the clearing-house proposition, which is covered by other telegrams which have been presented. I shall not ask that the telegram be printed in the RECORD, because it is substantially the same as others which have been presented, but I ask that it may be referred to the Committee on Banking and Currency for the consideration of the committee and of the Democratic caucus.

The VICE PRESIDENT. The telegram will be referred to

the Committee on Banking and Currency.

Mr. KERN. I present a telegram, which I ask may be read. There being no objection, the telegram was read, as follows: SOUTH BEND, IND., December 17, 1913.

Hon. John W. Kern. Washington, D. C.:

If guaranty of deposits under section 7 of currency bill is approved, have it amended so that United States will act as trustee for depositors in falled member banks and trust companies, and not alone for national banks, as now provided.

AMERICAN TRUST CO. St. Joseph County Savings Bank. St. Joseph Loan & Trust Co.

Mr. JAMES. I present a telegram from bankers in Frankfort, Ky., which I desire to have read and incorporated in the RECORD

There being no objection, the telegram was read, as follows: FRANKFORT, KY., December 17, 1913.

Senator Ollie M. James,

Washington, D. C.:

We consider the guaranty of deposits in the currency bill as grossly unjust to the State banks unless they are allowed to take the benefit of the guaranty. We suggest either the elimination of the guaranty feature or that the guaranty extend to banks taking stock in the regional banks.

CAPITAL TRUST CO.,
By T. L. EDELIN, President.
FARMERS BANK OF FRANKFORT, KY.,
By JOHN C. NOEL, President.
DEPOSIT BANK OF FRANKFORT, KY.,
By DAVID NICOL, Cashier.
PEOPLE'S STATE BANK,
By O. H. SKILES, President.

Mr. PERKINS. I present a telegram from Stoddard Jess, vice president of the First National Bank of Los Angeles, Cal., relating to the pending currency bill. I will not ask that the telegram be read or printed in the Record, as a similar one has been presented by my colleague.

The VICE PRESIDENT. The telegram will lie on the table.

Mr. ASHURST. Mr. President, I have in the past two weeks received a great number of petitions, memorials, and telegrams relating to a certain subject. I have not seen fit to ask that any of them be incorporated in the RECORD, but I have this morning received two telegrams on the same subject which I ask may be read at the desk and incorporated in the RECORD.

There being no objection, the telegrams were read, as follows:

BISBEE, ARIZ., December 16, 1913.

HENRY F. ASHURST,
Senate, Washington, D. C.:

Understand that a resolution is pending calling for a congressional investigation of the deplorable conditions existing in the Michigan and Colorado strikes, and we, the members of the Bisbee Miners' Union, request that you use your utmost effort to secure its passage at an early date.

W. E. Holm, Secretary.

W. E. HOLM, Secretary.

GLOBE, ARIZ., December 17, 1918.

Hon. Henry F. Ashurst, United States Senate, Washington, D. C.:

As a congressional investigation of the copper miners in Michigan and the coal miners of Colorado strikes appears probable, the Globe Miners' Union desires to have you use your utmost favorable efforts to bring the same about.

E. C. BRIGHT, President. SIDNEY ODGERS, Secretary.

Mr. BURTON presented a memorial of the Polish-American Chamber of Commerce, of Cleveland, Ohio, remonstrating against the enactment of legislation providing for a literacy test for immigrants to this country, which was referred to the Committee on Immigration.

Mr. WEEKS presented petitions of the common council of Quincy, of the board of trade of Beverly, of the board of selectmen of Dedham, and of Local Union No. 16, International Union of Steam and Operating Engineers, of Boston, all in the State of Massachusetts, praying for the enactment of legislation authorizing the construction of the proposed supply ship for the Navy at the Boston Navy Yard, which were referred to the Committee on Naval Affairs.

He also presented a memorial of the Boston Retail Shoe Merchants' Association, of Massachusetts, remonstrating against the enactment of a so-called pure-shoe law, which was referred

to the Committee on Manufactures,

He also presented resolutions adopted by the Board of Trade of Somerville, Mass., favoring an appropriation for the construction of permanent homes for American representatives abroad, which were referred to the Committee on Foreign Relations

Mr. McLEAN presented resolutions adopted by the Business Men's Association of New London, Conn., favoring railroad ownership of vessels employed in the coastwise trade, which were referred to the Committee on Commerce.

COMMISSION OF FINE ARTS.

Mr. FLETCHER. The report of the Commission of Fine Arts, transmitted by the President of the United States to both Houses of Congress, was referred to the Committee on Printing December 10, 1913, for action. The House has ordered the report printed as House Document No. 461. I am directed by the Committee on Printing to report it back with a recommendation that it be referred to the Committee on the Library without printing. I ask unanimous consent for immediate action on the

The VICE PRESIDENT, Is there objection? The Chair hears none, and the report will be referred to the Committee on the Library without printing.

ADDRESSES BY JUDGE S. A. LINDSEY (S. DOC. NO. 334).

Mr. FLETCHER. Copies of addresses by Judge S. A. Lindsey, chairman of the Texas Farm Life Commission, on "Our rural life and farm problems," "The building of a State," and "The cooperative agricultural plan," submitted by the junior Senator from Texas [Mr. Sheppard], were referred to the Committee on Printing December 6, 1913. I am directed by the Committee on Printing to report them back with the recommendation that the three addresses be printed as one document. I ask unanimous consent for the present consideration of the report.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the addresses will be printed as a Senate docu-

ADDRESS BY W. D. BOYCE (S. DOC. NO. 333)

Mr. FLETCHER. Extracts from an address delivered by W. D. Boyce, of Chicago, at the Southern Commercial Congress meeting in Mobile, Ala., October 28 last, on "How to make the Panama Canal pay," were referred to the Committee on Printing on December 16, 1913. I am directed by the committee to report the matter back with the recommendation that it be printed as a Senate document.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

CHITINA MINING DISTRICT, ALASKA.

Mr. WALSH. I am directed by the Committee on Mines and Mining, to which was referred the bill (S. 3588) releasing the Dan Creek Gold & Copper Co. of assessment work on certain claims in the Territory of Alaska during the calendar year 1913, to report it back favorably with an amendment, and I submit a report (No. 142) thereon. I ask unanimous consent for the immediate consideration of the bill.

Mr. SMOOT. I ask the Senator from Montana if there is a report accompanying the recommendation of the committee?

Mr. WALSH. There is. Mr. SMOOT. Perhaps the Senator can state briefly what is

the bill and for what purpose it is designed.

Mr. WALSH. The bill proposes to release locators of mining claims within the basin of Dan Creek, in the Chitina mining district of Alaska, from the necessity of doing representation work for the current year.

Mr. SMOOT. For what reason? Mr. WALSH. The recommendation is founded upon a report, which is to the effect that they have had in that locality a most extraordinary cloudburst, which has practically wiped out the development work that had been placed within the basin of the creek for the purpose of carrying on operations.

Mr. SMOOT. I thought we passed a bill in the Senate a month or so ago relieving all of the mining locators in Alaska

from assessment work for this year.

Mr. WALSH. That was only in the Seward Peninsula.
Mr. SMOOT. And this is another district?
Mr. WALSH. This is in a widely remote district.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment of the Committee on Mines and Mining was

to strike out all after the enacting clause and to insert:

That on account of disaster and loss, destruction of improvements and other injury caused by floods in the region drained by Dan Creek, Alaska, the owners of all lode and placer mining claims within the basin of Dan Creek, in the Chitina mining district, in the Territory of Alaska, be, and they are hereby, released from all assessment work

upon the said claims for the year 1913, and the failure to perform such work upon the said claims during said year shall not affect the title to the same.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read

the third time, and passed.

The title was amended so as to read: "A bill releasing the owners of all lode and placer mining claims in the basin of Dan Creek, in the Chitina mining district, in the Territory of Alaska, for the year 1913."

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows

By Mr. JAMES: A bill (S. 3764) granting a pension to J. W. Compton (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 3765) providing for the erection of monuments along the international boundary line between the United States and Canada commemorating 100 years of peace between the United States and Great Britain; to the Committee on Foreign Relations.

By Mr. GOFF

A bill (S. 3766) for the relief of James A. Showen; to the Committee on Claims.

A bill (S. 3767) granting an increase of pension to Albert Scroggins, sr.; to the Committee on Pensions.

By Mr. DU PONT:

A bill (S. 3768) to restore Capt. Harold L. Jackson, retired, to the active list of the Army (with accompanying papers); to the Committee on Military Affairs.

By Mr. CATRON:

A bill (S. 3769) granting a pension to Washington R. Price; and

A bill (S. 3770) granting a pension to John Ritter; to the Committee on Pensions. By Mr. CRAWFORD:

A bill (S. 3771) granting a pension to Waddy Hoover (with accompanying papers); and

A bill (S. 3772) granting a pension to Corydon M. Turnbull (with accompanying paper); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3773) granting an increase of pension to Emerette C. Hillman (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 3774) for the relief of W. S. Hosack: to the Committee on Claims.

A bill (S. 3775) granting an increase of pension to Annie

Mellinger; to the Committee on Pensions.

By Mr. LEWIS:

A bill (S. 3776) granting franchise to the National Motor Transportation Co.; to the Committee on the District of Co-

By Mr. OVERMAN (for Mr. CHAMBERLAIN) :

A joint resolution (S. J. Res. 90) to continue in effect the provisions of the act of March 9, 1906 (34 Stat. L., 56); to the Committee on Military Affairs.

CENTRAL HIGH-SCHOOL BUILDING.

Mr. LANE. I introduce a bill, and ask to have it read.

The bill (S. 3763) to amend the act of March 4, 1913, entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes," was read the first time by its title.

Mr. LANE. I ask to have the bill read in full. It is not long.

The bill was read the second time at length, as follows:

The bill was read the second time at length, as follows:

Be it enacted, etc., That the appropriation of \$1.200,000 authorized by the act of March 4, 1913, entitled "An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914," etc., for the erection of a central high-school building in the city of Washington, D. C., be divided, \$750,000 thereof to be applied to the erection of a central high-school building on the site at the corner of Eleventh and Clifton Streets NW., heretofore acquired under authority of Congress, and that the remaining \$450,000, or so much thereof as may be necessary, be applied under direction of the Board of Commissioners of the District of Columbia to the purchase of a site, preparation of plans, and erection of a high-school building in the eastern section of Washington, in accordance with the general plan outlined in Senate Document 329, Sixty-third Congress, second session.

Mr. LANE. I wish to say in regard to this measure that the

1113

I am informed, did the Senate authorize it, nor did the House; but in conference the committee, for some reason or other, raised the estimate of the board of commissioners. I will read an extract from the report of the board of commissioners on this point :

The appropriation bill for the fiscal year 1913, as reported to the Senate by the Appropriations Committee and passed by the Senate, contained authorization for a new central high school to cost \$725,000, and made an appropriation of \$250,000 available for that purpose.

In conference the Senate amendment authorizing a new central high school to cost \$725,000, and making an appropriation of \$250,000 toward the building, was stricken out.

So that it seems that in conference the amount was raised to the sum of \$1,200,000. There is necessity and need, according to the report of the board of commissioners which was submitted to the Senate a few days ago in answer to a resolution which was presented by me some time ago, for two high schools in the city, and they state that the sum mentioned in the bill will provide all that is necessary for 1,200 pupils at the present site, which has already been selected, and the remainder of the sum might perhaps build another high school over in another portion of the District, where the children need the facilities of a high school. The board of commissioners further say:

Only one high school, the Eastern High School, is in the eastern or southwestern section of the city. A new high school in the eastern section of the city is needed. A new central high school is needed, but in the judgment of the commissioners a central high school to accommodate 2,500 pupils is not needed at present.

So that this bill meets the approbation of the Board of Commissioners of the District of Columbia, and follows right in the line of their recommendation, as I understand.

I will ask to what committee the Senator desires the bill referred?

The VICE PRESIDENT. To the Committee on the District

of Columbia.

Mr. SMOOT. Mr. President, this appropriation was recommended by the Appropriations Committee. The reasons for the change in plans were given to that committee. hearings upon this particular item. I ask the Senator, therefore, if it would not be proper to have this bill referred to the Appropriations Committee, which originally acted upon this matter?

Mr. LANE. It makes no difference to me as to where the bill is referred so long as it receives proper and expeditious consideration. There is need for a division of this fund, and, as I have said before, the bill is in harmony with the report and the request of the board of commissioners, as I understand.

Mr. SMOOT. I have read the report to which the Senator

has referred, but I-

Mr. SMITH of Georgia. Is it not a District matter, and ought not the bill, therefore, go to the Committee on the District of Columbia, rather than to the Committee on Appropriations?

Mr. SMOOT. The Senator from Georgia will remember that there was quite a discussion upon this matter after the conference report was made. The matter has been acted upon by the Appropriations Committee and incorporated in an appropriation bill, and I think, therefore, if we are going to change that appropriation, as the bill virtually seeks to do, that it ought to go to the Appropriations Committee, where hearings were held and the whole question considered at a previous ses-

Mr. SMITH of Georgia. My interest in it is simply that I agree very fully with the views of the Senator from Oregon [Mr. LANE] that this fund ought to be divided, and that it was a mistake to put so large a school in one place. The Senator from Utah [Mr. Smoot] will remember that I did could at the time to press that view upon the Senate, but the matter had gone so far that it was hardly possible to check it. I would be very much gratified to see both sections of the city supplied with high schools rather than to undertake to mass so many children at one place from so many different directions.

Mr. SMOOT. I will say to the Senator that I think the Appropriations Committee will take up the subject for consideration, and perhaps insert a provision in the regular District of Columbia appropriation bill. In this way, if it is to be passed at all, it will be passed at an earlier date than if the bill were referred to the Committee on the District of Columbia.

Mr. SMITH of Georgia. I wish to say that I have had no communication whatever on this subject from the District Commissioners. After I finished the fight on the floor, I dropped the matter, but the same line of thought seems to have broken out again, and taken hold of those who now have control of the

matter, and my own observation fully sustains that view.

Mr. LANE. Mr. President, I wish to say that this bill does

merely divides and properly apportions money which has already

been appropriated.

Mr. GALLINGER. Mr. President, that is true, but at the same time I think this is a matter that ought to be given very careful consideration. At the time this appropriation was made I chanced to be chairman of the Committee on the District of Columbia, and also chairman of the subcommittee of the Committee on Appropriations which considered this matter. It is barely possible that the Senate erred in the conclusion it reached, but it did not reach that conclusion in any haphazard way. We had very full hearings on the subject and gave it the most careful consideration.

It is the judgment of a great many people in this District, as well as elsewhere in this country, that we have passed the period in Washington of erecting small school buildings.

The truth is this District is gridironed with small school buildings, and that is one of the reasons why the cost of education in the District of Columbia is at so high a point that we are constantly criticized and comparisons made with other cities which are not to the credit of the District of Columbia. In that view it was thought well, inasmuch as we had purchased a very large tract of land in a most desirable part of the city, to erect a building not only for present needs, but looking to the future needs of the District.

Mr. President, that appealed to my judgment; and whilst a mistake may have been made, as I have suggested, and it may. be desirable to divide this appropriation and build one highschool building and purchase a site for another, yet it ought not to be done without the most mature consideration by some committee of the Senate. I agree with the Senator from Utah that as the Committee on Appropriations have handled the District of Columbia appropriation bill, that appropriation bill not having gone to the Committee on the District of Columbia, this matter ought to be referred to that committee for consideration, and doubtless a wise conclusion will be reached.

Mr. LANE. Mr. President, I would say just a word in reply to that. I had no choice. It did not seem to me to make a particle of difference where this bill went, so long as it went into the hands of an intelligent committee; and if the Appropriations Committee is the one which the Senator wishes it referred to, and that committee handled it before and made an appropriation of hundreds of thousands of dollars in excess of the estimates which were submitted to them, then I prefer to have it go into the hands of the other committee, the Committee on the District of Columbia, where the matter can be taken

up on its merits.

Mr. SMOOT. Mr. President, I do not think the Senator ought

to reflect upon a committee.

Mr. LANE. I am not; but inasmuch as the question has been raised and the reference was made, what objection can there be to having the bill referred to the Committee on the District of Columbia? Is there any idea that they will not treat the matter fairly and look into it intelligently?

Mr. GALLINGER. The present difficulty seems to be, Mr.

President, that certain Senators who have not served on either of these committees seem to have violently and suddenly come to the conclusion that the committees which have had jurisdic-

tion of all these matters have not acted wisely.

Mr. President, it is barely possible that had the Senator from Oregon been on those committees he would have reached wiser conclusions than the committees did, but it is a matter of doubt at best. I again submit that, as the Committee on Appropriations has handled this matter, it ought to go to that committee. I therefore move its reference to the Committee on Appropriations.

Mr. SMOOT. I wish to say to the Senator that he will get quicker action, if that is what he desires, by having this matter referred to the Appropriations Committee than he will by having it referred to the Committee on the District of Columbia. Not only that, but the bill involves an appropriation, indirectly if not directly.

The bill came from the Committee on Appropriations. It was considered there. Hearings were had there, and the whole question, even in the House, was considered by the Committee on Appropriations. Therefore it seems to me it ought to go In its regular order it ought to go there.

I think every bill should go to the appropriate committee, and certainly the appropriate committee to handle this bill is the

Committee on Appropriations.

Mr. SMITH of Georgia. Ought it not to be the work of the District Committee to determine the problems of policy of the schools for the District?

Mr. SMOOT. The Senator knows that every appropriation made here for any additional school, or any appropriation for not provide for the appropriation of one-quarter of a cent. It maintaining any school in the District, is always made by the Appropriations Committee, and every dollar that is appropriated for the maintenance of the District, as far as the Government is concerned, comes through the Appropriations Committee

Mr. SMITH of Georgia. But ought not the District Committee be the first to consider problems of policy for the District,

even if they do not make the appropriations?

Mr. SMOOT. They of course consider the laws that affect the District, but they never yet, in the history of the Senate, have had the appropriating of money in any way for the building of schoolhouses or the maintenance of any department of the District

Mr. SMITH of Georgia. I have no choice at all as to the committee to which the bill should go, except that it would seem that the District Committee ought to work out the problem of

school distribution in the District of Columbia.

Mr. GALLINGER. If the Senator from Utah will permit me, the Senator from Georgia is right on that point. All these matters are originally determined by the Committee on the District of Columbia. The recommendations are made and then the Committee on Appropriations makes the appropriation. The District bill is peculiar in the respect that while the appropriation bills a few years ago were divided among several committees at a time when the Appropriations Committee handled all these bills, the naval bill being sent to the Naval Affairs Committee, the military bill to the Committee on Military Affairs, and so on, those of us who were connected with the District of Columbia Committee did not care to take the bill, thinking it might be more properly handled by the Committee on Appropriations. The same was true in the House when the appropriation bills were divided. These matters are originally considered by the Committee on the District of Columbia, the appropriations being afterwards made by the Committee on Appropriations.

I am inclined to think the Senator from Georgia is right in his suggestion. Therefore I withdraw the motion I made to refer the bill to the Committee on Appropriations, and suggest that it go originally to the Committee on the District of Colum-Then their recommendation, of course, will be passed along

to the Committee on Appropriations.

I think the Senator from Georgia is right, and I hope that

reference will be made.

The VICE PRESIDENT. The bill will be referred to the Committee on the District of Columbia.

OMNIBUS CLAIMS BILL

Mr. WARREN submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

Mr. GOFF submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

PARITY OF EXCHANGE DETWEEN GOLD AND SILVER USING COUNTRIES.

Mr. THOMAS. Mr. President, in view of the unanimous-consent agreement which was adopted yesterday I wish to vacate the notice now on the calendar that I would speak on Senate joint resolution 89, and I desire to give notice that at a later date I shall address the Senate upon the subject.

IMPROVEMENT OF NAVIGABLE RIVERS.

Mr. BANKHEAD. Mr. President, I ask permission to have referred to the Committee on Printing a copy of an address by Rome G. Brown, delivered before the National Rivers and Harbors Congress a few days ago, with the view that if, in the judgment of the committee, it is deemed advisable to have it printed they will report favorably upon it.

The VICE PRESIDENT. The matter will be referred to the

Committee on Printing.

BANKING AND CURRENCY.

The VICE PRESIDENT. Morning business is closed. The Chair lays before the Senate House bill 7837.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and

The VICE PRESIDENT. The pending question is the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] to the amendment of the Senator from Oklahoma [Mr. Owen]

Before the discussion begins the Chair desires to make a ruling which, if not agreed to by the Senate, the Chair requests shall be settled now, so as to prevent confusion.

The Chair is going to rule that when a Senator rises on his feet he has 15 minutes in which to speak; and if he yields any minutes. The Chair will be unable to keep a record of the joint discussion.

Mr. SMOOT. Does the Chair say it will not be taken out of his time or that it will be?

The VICE PRESIDENT. It will not be taken out.

Mr. JAMES. Mr. President-

Mr. SMITH of Georgia. That is to say, he will have only 15 minutes, and he will lose the time consumed by the interrup-

The VICE PRESIDENT. He will hold the floor for 15 min-tes. If he permits himself to be interrupted, that is his fault, and not the fault of the Chair.

Mr. SMOOT. That is right.

Mr. JAMES. So it will be taken out of his time? Mr. SMOOT. It will be taken out of his time.

The VICE PRESIDENT. Yes.

Mr. JAMES. The Chair stated that it would not.

The VICE PRESIDENT. What the Chair meant was that with a running debate between Senators on these amendments there would be no way for the Chair to keep a record of the time.

Mr. GALLINGER, Absolutely.
The VICE PRESIDENT. We would have to get a time-

keeper if that were to be done.

Mr. BRISTOW. Referring to the ruling of the Chair, if a Senator should occupy, say, 10 minutes on an amendment and then yield the floor, and the position he had taken should be replied to or controverted by other Senators, he would then have 5 minutes left in which to answer them?

The VICE PRESIDENT. Undoubtedly. The ruling the Chair wanted to make was with reference to these running The ruling the debates, where there is a quarter of a minute occupied by each In such cases there is no way to keep the time.

Mr. BRISTOW. I think the Chair is right about that.

Mr. GALLINGER. It simply could not be done.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] to the amendment of the Senator from Oklahoma [Mr. Owen]

Mr. SHERMAN. Mr. President, I will take such part of the 15 minutes as I need. I hope not to use all of it. I will take what time I do take now, however. I do this in order to conclude the remarks I began last night.

My purpose was to show the distribution, under the pending Owen bill, of the capital and surplus and deposits over the cropproducing area. I submitted last night some figures for that I submit these figures particularly in view of the character of the Owen bill and the Hitchcock bill.

The Hitchcock bill provides that the regional banks shall be capitalized by the voluntary action of the subscribers. It offers to the general public subscription to the shares. This removes practically all of the compulsory features from the bill. If people voluntarily subscribe to and put their money in a regional bank, they thereby become subject to such regulations as the act itself imposes. It possesses none of the objectionable features that attend the Owen bill. After that, if any action of a compulsory character is taken by the reserve board which controls the investment of the capital and deposits, no complaint can be properly made.

Under the Cwen bill the reserve board has power to require the regional banks to rediscount the paper of any other regional bank in the United States. Because of this, the distribution of capital, surplus, and deposits in relation to the crop-production areas of the United States becomes material. Because of the compulsory character of the use of the capital and deposits under this power of the reserve board, the regional banks may be compelled to send their money to any part of the United States.

This furnishes to us the reason for subjecting to analysis the allotments of money made by the Secretary of the Treasury last fall for moving crops. I have collected the percentages in this way, so as to present them in the smallest possible compass.

The North-I do not mean by that any sectional geographical division, but the census division, taking the States I read into the RECORD last night—has 72.7 per cent of the total capital and surplus, which will be the basis of the regional-bank subscriptions. It has 75.2 per cent of the total of all the deposits in the national banks. The South has 18.2 per cent of the total capital and surplus. It has 14.7 per cent of the deposits.

Put in another form, the North has in its national banks more than four times the capital and surplus of the southern division. It has more than five times the deposits of the south ern division. The North has nearly 57 per cent of the total crop production of the United States. The South has 35 per This includes all the staple crops, everything that is cent. of the time for interrogatories it will not be taken out of the 15 | considered under the head of crops in the census report. Therefore, when we compare the crop production of the southern area with that of the northern area we find that the northern area has a crop production more than 60 per cent in excess of that of the southern area.

The figures of the crop-moving allotment, as given last night, show that 48.49 per cent of the total of \$46,500,000 was allotted to the South and West. To the North and East only 40.8 per cent was allotted. To the Pacific coast and Rocky Mountain country 10.64 per cent was allotted.

In other words, while the northern area produces from four to five times as much of the capital, surplus, and deposits of the banking resources of the country and 60 per cent more of the crop production, it gets 20 per cent less of the allotment of funds from the Secretary of the Treasury. This is the first practical application of the compulsory-rediscount power vested in the Federal reserve board.

One very marked advantage which the Hitchcock bill possesses over the Owen bill is that the compulsory rediscount feature is limited to times of emergency. An emergency is a time of financial crisis, a time when help is needed. The Owen bill makes no such restriction. It gives arbitrarily the compulsory rediscount power without any regard to the necessities arising from an emergency. This would give, applied in concrete form, vastly increased power to the great banking resources of the United States for distribution in a favored way to the area that has a minority of the crop production, and a decided minority of banking resources.

At present we have three central reserve cities in the United States—New York, Chicago, and St. Louis. I have compiled the figures with reference to each of these areas, showing what would happen in the event of the creation of regional banks.

Beginning with St. Louis, taking her banking facilities as they appear in the Comptroller of the Currency's report of November 20, 1913, if a regional bank were created in St. Louis it would draw in capital and surplus and deposits more than \$11,000,000 from the State of Missouri alone. If a regional bank were created in the city of Chicago it would withdraw or transfer from the places where the money now is, in the capital stock of the national banks of Illinois, more than \$7,000,000. It would withdraw from the places of deposit, reserves, and elsewhere, a total of more than \$23,000,000. It would require a transfer or shifting of funds in that State alone of more than \$30,000,000.

If a regional bank were created in the city of New York, it would require more than \$20.000,000 of capital and surplus to be subscribed from the State of New York alone.

It would take of the deposits from New York City and from the country banks and the reserve cities outside in the State of New York a total of more than \$64,000,000, making a total transfer in the State of New York alone of nearly \$85,000,000; and all this aggregation of banking resources, when collected in these regional banks, would be absolutely subject to the arbitrary power of the Federal reserve board, without a limitation as to a time of emergency. The time in which it could be exercised would be unlimited. It would run 12 months in the year and be subject to the same course of distribution shown in the \$46.500,000. Whether any favoritism be shown or not, the truth remains that in distribution it goes to the country and furnishes the banking resources to areas that produce a minimum of crops and money. This is the first net result of the "new freedom" in business.

I wish here, in conclusion, in the very few minutes I have to occupy, to read a quotation from an address of the Secretary of the Navy, made last night or yesterday. I quote from the Washington Post of December 18, 1913. The Secretary of the Navy said:

The latest exhibition of hysteria is the effort to prevent the passage of the currency bill. It is well known by everybody that this bill is certain to become a law substantially as now framed, and yet those who would destroy confidence in the American Government and its ability to control its finances dub as hysteria the effort to pass a long-needed currency reform, promised for years, but never until now answered.

The answer to that statement is that the House bill as it came over to the Senate has by those who are responsible for legislation by virtue of holding party power been vastly improved. It contains in its amended features what its own authors will admit is a very substantial improvement. There has been no effort here to delay the passage of the bill. There has been an effort to improve the quality of the bill. I believe the record here, not only that kept in this Chamber, but the record of the committee room, will show a very material improvement in the character of the legislation, whether it be the Owen bill or the Hitchcock bill. So our deliberations here have not been for the purpose of preventing currency legislation, but for the express purpose of improving currency legislation. If this be hysteria, then we can well stand more of such hysteria.

In conclusion, Mr. President, I wish to express my thanks for the courtesy and kindness shown me by the Senator from Nebraska [Mr. Hitchcook] last evening in yielding me time that he properly would have taken.

Mr. BURTON. Mr. President, I strongly favor the provision in the amendment offered by the Senator from Nebraska to increase the required reserve against circulating notes to 45 per cent. In framing a measure of this kind no one can tell with accuracy how large a reserve will be required, but every presumption favors one that is ample. The law should provide not merely for ordinary conditions, for periods of prosperity, but for those possibilities which confront any nation in its future development. We should provide for storms as well as for sunshine.

No tendency has been more marked in recent years than increase of metallic reserves against the circulating notes. On this subject I read briefly from page 293 of the work of Mr. Conant on the Principles of Banking:

The gold reserves of all the European banks of issue in 1877 were only \$575,000,000, and had risen in 1885 to only \$700,000,000, but the amount nearly doubled in the next dozen years, and now affords almost inexhaustible reservoirs of metallic money. Between December 31, 1883, and December 31, 1897, it is pointed out by Thery, the gold reserves of the European banks of issue increased by 5,189,700,000 francs (\$1,000,000,000) and reached 8,745,600,000 francs (\$1,740,000,000), while the circulation increased only 3,035,507,000 francs (\$60,000,000). After 1897 the production of gold was somewhat retarded by the troubles in the Transvaal, but the reserves of the European banks continued to increase until their ratio to outstanding notes became nearly 60 per cent.

The manner in which the proportion of gold to notes has thus increased within a period of less than a generation is shown in the following table.

Unfortunately this table does not bring the figures down to a later date than 1904. In 1883 the quantity of gold reserves was 3,555,900,000 francs; of silver reserves, 2,049,000,000 francs. In five years, or by 1888, the amount of gold reserves had increased to 4,376,100,000 francs, while of silver reserves it had increased to 2,517,000,000 francs. The percentage of gold to notes in 1883 was comparatively small, being only 29 per cent. In 1888 it had increased to 34 per cent.

Mr. President, I will not take the time to read the whole of this table, which gives the figures biennially from 1888 to 1904, but I ask consent to have it printed in the Record.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The table referred to follows.

Reserves of European banks of issue.

Year.	Gold reserve.	Silver reserve.	Circulation.	Per cent of gold to notes.
1883 1888 1890 1892 1894 1896 1898 1990 1900	Francs. 3, 555, 900, 000 4, 378, 100, 000 4, 592, 700, 000 6, 982, 000, 000 7, 859, 900, 000 8, 211, 000, 000 8, 752, 000, 000 9, 837, 000, 000	Francs. 2,049,900,000 2,517,000,000 2,339,200,000 2,405,100,000 2,603,700,000 2,512,700,000 2,636,000,000 2,637,000,000 2,821,000,000 2,821,000,000	Francs. 12, 246, 900, 000 12, 757, 800, 000 13, 205, 800, 000 14, 805, 500, 000 15, 539, 500, 000 14, 536, 600, 000 14, 975, 000, 000 15, 906, 000, 000 16, 215, 000, 000 16, 737, 000, 000	22 34 34 44 55 56 55 56

Mr. BURTON. I will, however, give the figures for 1904. At that time the gold reserve in banks of issue in Europe had increased to 9,837,000,000 francs; the silver reserves to 2,841,000,000 francs. The circulation had increased to 16,737,000,000 francs. Some rather striking features appear in this change, which has been prompted by the best experience of foreign countries in regard to metallic reserves. The silver reserves increased about 40 per cent in these 21 years. The gold reserve increased 180 per cent. That shows the tendency to rely upon gold. The circulation increased only about 35 per cent. The per cent of gold to notes in 1883 was, as I have already stated, only 29 per cent, but that proportion had mounted to 59 per cent in 1904, or more than double that of 1883.

It is true that this table does not mention the amount of Government and private deposits which are secured by these same reserves or measurably secured by them, but those deposits do not modify the general fact of the great increase in the metallic reserves against circulating notes.

record of the committee room, will show a very material improvement in the character of the legislation, whether it be the Owen bill or the Hitchcock bill. So our deliberations here have not been for the purpose of preventing currency legislation, but for the express purpose of improving currency legislation. If this be hysteria, then we can well stand more of such hysteria.

Nevertheless its deposits are not so large as those of some private banks. Its Government deposits in 1910 were \$25,000,000 and other deposits \$118,000,000, in all about \$143,000,000. This amount is surpassed by private banks in our own country. The deposits of the Reichsbank are somewhat larger, about \$51,000,000 of Government deposits and about \$91,000,000 of private deposits, the private deposits being smaller than the Bank of France, although the aggregate is greater.

Mr. President, this is the course which has been pursued in foreign countries, a practical doubling of the reserves against circulating notes in 21 years. We can not too often reiterate the fact that our own situation is unique and requires greater care than in these other countries, because we already have outstanding such an enormous amount of paper currency which, in whole or in part, depends upon the gold reserve. In other words, these foreign banks have reserves against only one form of currency, a currency issued by these great central banks. Under our system we will have not merely these Federal reserve notes but even now we have an enormous mass of paper currency, of silver currency, which is half flat money, and the national-bank notes; so that if any change is made, if we should adopt any distinctive policy compared with foreign private banks, our reserves should be larger.

Mr. NELSON. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. I am glad to yield to the Senator.

Mr. NELSON. I wish to call the Senator's attention to a fact in connection with the discussion that he is now carrying on. I.' you study this bill you will find that paragraph 6 of the power conferred on the Federal board and section 18 of the refunding provision contemplate the continuance of the circulation of our present bond-secured currency up to its full volume. If that be borne in mind, necessarily the effect of this bill, so far as a currency measure is concerned, is simply to provide for an emergency currency, something in addition to the national-bank note currency, and not to take the place of it.

Mr. BURTON. Mr. President, on that question I have decided views. We ought to withdraw that bank-note currency as soon as possible and substitute these Federal reserve notes for it or some other form of currency. But if the policy which the Senator from Minnesota outlines as the object of the bill is carried out there is unlimited opportunity to issue an additional amount. Whether that additional amount be small or large, the same principle applies as to the reserve against it.

Mr. President, I hope this amendment will prevail. Whether the rest of the provisions are to be commended or not there is enough in the 45 per cent proposition to command the support of the Senate. I understand the Democratic caucus yesterday agreed to raise the amount from 35 per cent to 40 per cent, but that is not sufficient. The report of the Monetary Commission suggested 50 per cent, insisting that was the smallest percentage which would be safe.

Mr. HITCHCOCK. Mr. President, I suggest the absence of

a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names.

names.
Gallinger
Goff
Gore
Gronna
Hitchcock
Hollis
Hughes
Jackson
James Nelson Norris O'Gorman Oliver Overman Owen Page Perkins Shively Simmons Smith, Ga. Smith, Md. Smith, Mich. Smith, S. C. Smoot Starling Ashurst Bacon Bradley Brady Brandegee Bristow Sterling Sutherland Swanson Thomas Pittman Poindexter Pomerene James Johnson Catron Chamberlain Chilton Clapp Clark, Wyo. Clarke, Ark. Kenvon Kern Kern La Follette Lane Ransdell Thompson Reed Robinson Root Saulsbury Vardaman Walsh Warren Lea F Lippitt McCumber McLean Martin, Va. Martine, N. J. Colt Crawford Weeks Williams Shafroth Sheppard Cummins Dillingham Sherman Shields

Mr. SMOOT. I desire to announce that the senior Senator from Washington [Mr. Jones] and the junior Senator from Michigan [Mr. Townsend] have been called from the Chamber on public business.

The VICE PRESIDENT. Seventy-eight Senators having answered to the roll call, there is a quorum present. The question is on the amendment proposed by the Senator from Nebraska [Mr. Hitchcock] to the amendment of the Senator from Oklahoma [Mr. Owen].

Mr. HITCHCOCK. Mr. President, in asking for a vote upon this amendment, I desire to make a brief statement to accompany it.

This amendment proposes to raise the gold reserve from 33½ per cent to 45 per cent. Supplementing what the Senator from Ohio has said, to the effect that in all European countries larger gold reserves are now being accumulated than ever before and in those countries larger gold reserves are now being held than are proposed to be established by this bill in this county, I want to say that the figures in 1908, four years later than those given by the Senator from Ohio, show that in the Bank of England the gold reserve against notes was over 66 per cent; in the Bank of France it was over 68 per cent; in the Reichsbank of Germany the reserve against notes was 57 per cent, while from the report of the Comptroller of the Currency of the United States for last year I take the following figures to show that in the leading countries of Europe at the present time the amount of uncovered paper currency is much smaller than the uncovered paper currency of the United States.

In England the uncovered paper currency was \$115,000,000; in France it was \$245,000,000; in Germany it was \$276,000,000; and in the United States already it is \$764,000,000. Can the United States, in view of this enormous excess of uncovered paper as compared with the countries of Europe, afford to enter into a new currency system with a gold reserve of less than 45

per cent?

I ask for a vote, Mr. President,

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska [Mr. Hitchcock] to the amendment of the Senator from Oklahoma [Mr. OWEN].

Mr. OWEN. I move to lay the amendment to the amendment on the table.

The VICE PRESIDENT. The question is on the motion of the Senator from Oklahoma to lay the amendment proposed by the Senator from Nebraska to the amendment of the Senator from Oklahoma on the table.

Mr. BURTON and Mr. SMOOT called for the yeas and nays. The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I will transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Maine [Mr. Johnson] and vote. I vote "yea."

Mr. STERLING (when his name was called). I again announce my pair with the senior Senator from Louisiana [Mr. Thornton]. If permitted to vote, I should vote "nay."

Mr. SWANSON (when his name was called). I am paired with the senior Senator from Washington [Mr. Jones] for today. I transfer that pair to the Senator from Illinois [Mr. Lewis] and vote. I vote "yea." I will let this announcement stand for the day.

The roll call was concluded.

Mr. BRYAN (after having voted in the affirmative). I have a pair with the junior Senator from Michigan [Mr. Townsend], which I will transfer to the junior Senator from South Carolina [Mr. Smith] and allow my vote to stand.

[Mr. SMITH] and allow my vote to stand.

Mr. SMITH of Arizona. I am paired with the Senator from New Mexico [Mr. FALL], and for that reason can not vote. If I were at liberty to vote, I should vote "yea." I make this announcement to stand for the day.

Mr. CLARK of Wyoming (after having voted in the negative). I have a general pair with the senior Senator from Missouri [Mr. Stone]. I voted, not noticing his absence. The Senator from Missouri is confined to his house by illness and unable to attend the sessions. Therefore I withdraw my vote. I ask that this announcement of the pair stand for the day.

Mr. SMOOT. I desire to again announce that the senior Senator from Washington [Mr. Jones] and the junior Senator from Michigan [Mr. Townsend] are absent from the Chamber on account of public business. They are both paired. I will allow this announcement to stand for the day.

The result was announced-yeas 42, nays 39, as follows:

YEAS-42.

Ashurst Bacon Kern Pomerene Bankhead Lane Ransdell Bryan Lea Reed Robinson Martin, Va. Charke, Ark. Myers Shafroth Fletcher Gore O'Gorman Hollis Overman Shively Hughes Owen Simmons

Burleigh Clark, Wyo. Culberson Fall Smith, Ariz. Smith, S. C. Johnson Thornton Townsend Jones Lewis Lodge Sterling

So Mr. HITCHCOCK's amendment to the amendment of Mr. Owen was laid on the table.

Mr. HITCHCOCK. Mr. President, I offer the amendment which I send to the desk to the amendment of the Senator from Oklahoma.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. In the print of the amendment of Mr. Owen, in section 2, page 7, line 20, it is proposed to strike out "\$3,000,000" and insert "\$5,000,000"; so that the amendment if amended will read:

No Federal reserve bank shall commence business with a subscribed capital less in amount than \$5,000,000.

Mr. HITCHCOCK. Mr. President, this amendment is designed to strengthen the bill. As provided in the original House bill, no reserve bank was permitted to commence business with less than a fully paid-up capital of \$5,000,000. The Senator from Oklahoma [Mr. Owen] has presented a bill providing that a reserve bank can commence business with a subscribed capital of \$3,000,000, only \$500,000 of which need be paid up. To my mind, this makes possible the establishment of the weakliest and sickliest pretenses of reserve banks. I therefore move that the amount be increased to \$5,000,000 as the very minimum with which any bank should be permitted to open its doors.

Mr. NEWLANDS. Mr. President, I am opposed to the amendment presented by the Senator from Nebraska. I do not believe that any capital should be required of these banks beyond the contribution of a portion of the capital of each member bank represented by its cash reserves. Having that view, I am therefore opposed to any increase of the capital required by this

bill.

I hope yet that all the capital requirements outside of the reserves themselves, which constitute capital, will be stricken from this bill. I regard them as encumbering the bill and as delaying its acceptance by the banks, National and State, which we hope will become member banks of this organization.

We all know that, taking all the banks of the country, both National and State, the total capital and surplus of these banks aggregate nearly \$4,000,000,000, an enormous sum, a sum larger in proportion to population and wealth than that utilized under any government, however powerful or wealthy, in the world. This sum constitutes, according to statistics, 40 per cent of the existing bank capital of the world, although our population stands at only 100.000,000 as against a total world population of about 1.500,000,000. Having, therefore, only one-fifteenth of the population of the world, we have nearly one-half of the banking capital of the world. There is, therefore, no need of

increasing our banking capital.

With what capital will these reserve banks go into operation? They will go into operation with that portion of the capital of the member banks which this bill provides for, known as bank reserves. As I have said, all the banks of the country, National and State, have \$4,000,000,000 of capital, one billion and a half of which is in cash in the banks; and under this system we compel the transfer of one-third of that cash, or \$500,000,000 of capital of the member banks, to the reserve So that the reserve banks, without any additional capital requirement, will have \$500,000,000 within their vaults taken from the capital of the member banks. What need is there of demanding more? Shall we add to a banking capital that is already top-heavy as compared with that of the rest of the world? These reserve banks will have in their vaults five hundred millions of the cash capital of the member banks, and that is enough with which to do business.

I hope yet the Democratic conference will amend this bill by doing away with all these extra banking capital requirements. In doing so they will remove one of the greatest obstructions that now exists to the immediate acceptance and operation of this bill

We all know that the banks, both National and State, are objecting to a demand upon them for capital beyond that propor- industry, in the crop-moving season, accommodations would be

tion of their cash capital which they are called upon to supply under this bill, and that an additional requirement will prevent many of the State banks, and possibly some of the national banks, from coming under the operation of this act.

So far as I am concerned, I believe we should make the operation of the act as easy as possible; that we should address ourselves to the question of putting into the hands of these re-serve banks such a proportion of the cash reserve capital of the member banks as will enable them to mobilize and present the reserves at the point of attack in vast volume, so as to overcome any temporary difficulty, either local, interstate, or national, and that we should address ourselves to that question without any further complications. If we can only mobilize these reserves—the cash capital of these reserve banks—in such a way as to make them effective at the point of danger, we shall accomplish all we need under this bill.

Mr. BURTON. Mr. President, I can not agree with my good friend the Senator from Nevada upon this proposition. Briefly stated, his argument is that it is safe for a bank or other institution to enter business providing it has plenty of debts; for what are deposits and these other obligations which the re-

gional banks will incur but debts?

Capital in sufficient volume to meet losses in case they occur is an essential requirement for confidence in a banking institu-One of the main objections to this whole system lies in dividing the country into different regions, 8 or 12 in number. The banks will thereby become so weak that they can neither command foreign exchanges nor regulate domestic transactions. This small capital affords one of the very strongest argumentsindeed, an unanswerable argument-for a central institution.

This bill provides that each regional bank must supply the demands for credit-the wants of an aggregation of States, 8, possibly 10-and yet a bank may begin business with

\$1,500,000 of paid-in capital.

Why, we already have private institutions much larger than that. In looking over the report of the Comptroller of the Currency for 1912 I notice that one bank in New York City alone has a capital of \$25,000,000 and a surplus of \$10,000,000; another a capital of \$25,000,000 and a surplus of \$25,000,000. One institution in Chicago has a capital of \$10,000,000 with a surplus of \$10,000,000; another in Chicago a capital of \$21,500,000 and a surplus of \$8,000,000.

It has been said that the central-bank idea ought not to be adopted because these institutions which have been so generally adopted abroad provide for the wants of only a small area, such as Belgium or Holland. As against the \$1.500,000 of capital proposed here, let us see what is the amount of

capital of some of those foreign institutions.

The little country of Switzerland has a bank which commenced business with a capital of \$4,825,000. The central bank of Belgium, a country about the size of the smaller of our States, has a capital of \$9,650,000 and a surplus of \$7,417,000. Look at South America. Take the Argentine Republic. The Bank of the Nation, as it is called, has a capital which, expressed in its equivalent in American money, amounts to \$49,905,000. Another bank, that of the Rio de la Plata, has a capital of \$44,000.000.

The little country of Paraguay, considered somewhat backward, has a bank, the Mercantile Bank of Paraguay, with a capital of \$8,800,000. The Bank of Venezuela has a capital of

\$5,280,000.

It is provided that these regional banks, however small they may be, may-I think the bill now says "shall"-establish agencies in foreign countries and buy bills of exchange, discount paper, and carry on banking transactions. Compared with these great institutions what kind of attention would be afforded a bank which sought to incur obligations and transact business in a foreign country and which its manager would be compelled to say had a capital of only \$1,500,000?

Again, they are authorized to issue circulating notes based upon bonds to an unlimited amount. It is conceivable, though of course not probable, that one of the regional banks with this small capital might under the provisions of the bill acquire \$50,000,000 of United States bonds—yes, \$100,000,000. could be issued against those bonds, and the obligation would be imposed on that institution to maintain a 5 per cent redemption fund against them, and to redeem the notes as they might be

Again, there is no check whatever on the quantity of Federal reserve notes that can be issued to one of the regional banks against commercial paper. There is no check whatever on the amount that may be loaned to one of them. Very likely in some sections of the country where agriculture is the predominant

required from one of these regional banks amounting to fifty times the capital that is required. A fractional loss would wipe out the whole capital, would exhaust the liability of the unpaid 50 per cent, and would also exhaust the secondary liability. However, after all, that is not the vital point about it. The real objection is that a plan for so small a capital is contrary to every sound rule of banking, and contrary to the requirement which should be observed, not merely in all business but especially and for peculiar reasons in the banking business, namely, that the capital shall be large enough to be commensurate with the probable transactions which the bank may be called on to perform.

I trust this amendment will be adopted.

The VICE PRESIDENT. The question is on the adoption of the amendment proposed by the Senator from Nebraska to the amendment of the Senator from Oklahoma.

I move to lay the amendment on the table.

Mr. BURTON. In this connection I rise to a parliamentary inquiry. A motion to lay upon the table was made when the last amendment was pending and no objection was interposed. The debate was completed. Under our unanimous-consent agreement, however, which allows any Senator to speak 15 minutes upon pending propositions, is it in order to move to lay an amendment or proposition on the table?

Mr. OWEN. Mr. President—

The VICE PRESIDENT. If the Chair is called upon to rule, the Chair will rule that if anybody wants to discuss the amendment it is not in order; but the Chair assumes that the Senator from Oklahoma understood debate was closed.

Mr. OWEN. I understood the debate was closed. The Senator from Ohio had taken his seat and no one rose, and I therefore made the motion. If anyone desires to discuss it, I do not

wish to make the motion.

Mr. BURTON. If it is conceded that the motion is not to be made until debate has been concluded, that is one way of disposing of the proposition; but I will ask the Senator from Oklahoma why not vote directly on the amendment?

Mr. OWEN. That is another proposition, Mr. BURTON. It seems to me this is a little bit incongruous. There is a provision that any Senator may speak 15 minutes, and the well-understood purpose of a motion to lay on the table is to conclude debate; that is, you have here a rule under which any Senator may speak; but the motion as made runs in an opposite direction from that agreement in that it contemplates the closing of debate.

Mr. BRISTOW. Mr. President, I have here an article which appears in the New York Sun of December 17, an extract from which I desire to read. While it does not relate directly to this

subject, it does indirectly.

It reads as follows: The Democratic and Republican leaders in the Senate are striving to finish the debate and take a final vote on the currency bill to-morrow night, or Thursday at the latest, so that the bill may go to the conference committee of the two Houses and be agreed on by Saturday

night.
The work of the conference is being simplified by Secretary McAdoo,
H. Parker Willis, and certain Democratic leaders, who are meeting
nightly in secret.

I desire especially to have the attention of Senators on the other side. I should like to have the Senator from Oklahoma remain in the Chamber, if he will, because I wish to ask him a question after I am through with the reading.

Meetings have been held in the Raleigh Hotel, at the Treasury Department, and other places, but always under circumstances of great

For several days mysterious hints have been thrown out from administration sources that Secretary McAdoo was relieving Congress of some of the more important details that Senators and Representatives had been expecting later on to commit to a conference committee. Hints have been thrown out of midnight conferences in the Treasury

Hints have been thrown out or midnight conferences in the Treasury Department.

It seems incredible to men in Congress who have been reading the New Freedom and reflecting on the wholesome advice given by the author of the little volume that there should be a third legislative body at work, not in the open light of day, as the President has advised, but under conditions of profound secrecy.

Now, we come to the important part of the article:

Now, we come to the important part of the article.

Of course, there is an additional ground for surprise in the fact that the Secretary of the Treasury with one of his newspaper advisers, who has enjoyed some distinction in the authorship of the Glass bill, should take over the work of legislating on the currency.

From time to time decisions reached in these secret conferences have been hinted at. It was learned to-day, for example, that the proposed guaranty of bank deposits in the administration bill has been eliminated by Secretary McAdoo and the members of his third house.

I do not know anything about the reliability of the information upon which this was based, but I heard a rumor last night that the Democratic caucus was going to drop out of the bill the provision relating to the insurance of bank deposits, and that if it was not dropped there it would be dropped in the conference between the two Houses. That rumor being affoat

in the Chamber and the cloakrooms yesterday, I was very much interested when I saw this article this morning.

I should like to ask the chairman of the committee if it is proposed or has been suggested by him or his advisers that that feature of the bill is to be eliminated in conference or by the Democratic caucus?

Mr. OWEN. I will respond with another question. I should like to know the author of the article the Senator read.

Mr. BRISTOW. It appeared in the New York Sun. Mr. OWEN. Who is the author? Mr. BRISTOW. It is not signed.

Mr. OWEN. Does the Senator expect to interrogate Senators

on this side upon anonymous articles?

Mr. BRISTOW. The article appears under a Washington date line, in the New York Sun of December 17, as a news article. News articles are not signed. Associated Press articles are not signed. It is not marked "Special." I suppose it is by the Sun's news service.

Mr. OWEN. In response to that article, first, I will say that I have attended no meetings in the Treasury, nor at the Raleigh Hotel, nor did I know that there were any in progress.

In response to the last question of the Senator as to this rumor, I should like to know who is the author of the rumor. From whom did the Senator hear that?

Mr. BRISTOW. I do not care anything about whether the rumor is reliable or unreliable. What I asked was whether it is proposed by the Democratic managers to drop this provision out of the bill, either in a Democratic caucus or in the conference between the Houses.

Mr. OWEN. Mr. President, I am concerned to know the authority upon which the Senator proceeds.

Mr. BRISTOW. I have stated it. I am simply calling the

chairman's attention to this proposition.

Mr. OWEN. The Senator from Kansas appears to be calling the attention of the chairman of the committee to a rumor which he has heard, and he does not seem to recall who gave him this startling information. I should like to know who this person is, in order that we may have the light of day upon these things which are so necessary to be known by the people.

Mr. BRISTOW. That is a very diplomatic way for the Sen-

ator from Oklahoma to refuse to answer the pointed question I

put to him.

Mr. OWEN. The Senator from Oklahoma has not concluded this matter.

Mr. BRISTOW. I will put it again. Does the Senator from Oklahoma and his colleagues and conferees intend or expect to eliminate this bank-insurance provision from the bill?

Mr. OWEN. The Senator from Kansas puts this inquiry upon a rumor given to him by some person unknown, and whose name he withholds. I insist upon knowing the person who circulates that rumor.

Mr. BRISTOW. I will change the attitude of my question, and put it upon my own authority. I ask the Senator, regardless of what I may have heard or from whom it may have come, whether or not he proposes or intends to permit this provision to be eliminated from the bill?

Mr. OWEN. As a preliminary to the answer of the Senator from Oklahoma the Senator from Oklahoma desires to know. who circulated this rumor. Does the Senator decline to give that information?

The question is ridiculous, and the Senator Mr. BRISTOW. knows it. It is a subterfuge to insist on an answer to the question and nothing else.

Mr. OWEN. The Senator then does decline to answer? The

Senator declines to give the name?

Mr. BRISTOW. The word "rumor" means generally circu-

lated about the Chamber, and so it was.

Mr. OWEN. The Senator from Oklahoma understands that the Senator says he has heard a rumor. He must have heard the rumor from some person. I desire to know who that person is who is circulating the rumor, and the Senator from Kansas declines to answer. I want to know the name of the man who circulated that rumor. The Senator from Kansas says that is a subterfuge. I will answer the question, but I ask the Senator to answer this question first: Who is the person who circulated the rumor?

Mr. BRISTOW. I decline to give the name of the Senator who told me what the Democratic caucus was going to do.

Mr. OWEN. Then, in reply, I say there is nothing in the

Mr. BRISTOW. I am glad to know the Senator from Oklahoma has thus publicly said that this provision will not be eliminated from the bill.

Mr. OWEN. The Senator from Oklahoma has said nothing of the kind.

Mr. BRISTOW. I am inclined to think that the rumor was

probably accurate.

Mr. OWEN. The Senator is not justified in that conclusion.

Mr. BRISTOW. The Senator from Kansas thinks he is.

Mr. WEEKS. Before the Senator from Oklahoma leaves the hall I want to call his attention to a general protest that has come from all sections of the country to that portion of section 19 which provides that no member bank shall extend, directly

or indirectly, benefits of that sort to a nonmember bank.

Mr. OWEN. I will say that I think that should be revised.

Mr. WEEKS. Here is evidence taken from yesterday's New York Financial News relating to action at this time being taken by the Corn Exchange Bank, of the city of New York, which has numerous branches, relating to that particular subject. I should like to have it read and refer it to the Senator from Oklahoma to be used in the conferences which I understand are now being held.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

ANTICIPATING THE CURRENCY ACT—SOLICITING RESERVE ACCOUNTS OF COUNTRY BANKS THAT MAY BE AFFECTED.

Corn Exchange Bank is sending a letter to a large number of country banks calling attention to two sections in the currency bill which discriminate against banks not members of the Federal reserve system and soliciting their accounts in event of such nonmember banks withdrawing their reserve relationship with those banks that join the system.

Section 13 in the Owen bill provides that "any Federal reserve bank may receive from any of its member banks and from the United States deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks and drafts upon solvent banks of the Federal reserve system." In section 19 of the same bill it is provided that "no member bank shall extend, directly or indirectly, the benefits of this system to a nonmember bank except upon written permission of the Federal reserve board, under penalty of suspension."

These provisions appear to be drawn up with view of coercing all banks to come into the new system, but it further imposes an obligation on those banks which join to discriminate against those which remain out. For instance, country banks not belonging to the Federal reserve system would be debarred from obtaining rediscounts or loans from their present correspondents if the latter become members of the system.

Under the circumstances, the Corn Exchange Bank assumes that there

their present correspondents it the latter become members of the system.

Under the circumstances, the Corn Exchange Bank assumes that there will be many interior banks that will have to sever relations with their present New York City correspondents if they become member banks. The Corn Exchange Bank is careful to point out that only in this event is it placing itself at service of the interior banks as a correspondent.

The letters which the Corn Exchange is sending out now are addressed only to the State banks. It is said that national banks of the country will be circularized later.

Mr. CLAPP. Mr. President, I should like to have the attention of the Senator from Oklahoma for a moment. This prohibition is probably as vital to our section of the country as any provision in the bill. Some of the friends of the so-called Owen bill claim that the prohibition does not go to rediscounting through various banks by the reserve banks.

Mr. OWEN. I have already stated that it is the intention to

redraft the provision.

Mr. CLAPP. But I want to call the Senator's attention particularly to one phase of what may be the redraft. It is claimed by those who are in favor of the bill as championed by the Senator that that provision only goes to the rediscounting by the member banks or the so-called reserve bank. If that is true, and it is proposed to modify the prohibition so as to simply apply to banks that can come in and relieve from the prohibition those banks that can not come in under existing laws, I want to call the attention of the Senator to the importance of also correcting that language.

Mr. OWEN. I agree with the Senator. Mr. President, we have proceeded outside of the regular order. I should like the

regular order to be observed.

Will the Senator from Oklahoma permit me to make a suggestion to him with regard to the redrafting which he has in mind? It is that taking together the clauses to which reference has been made regarding the conduct of business between member banks and nonmember banks the effect which I hope and do not doubt the redraft is intended to obviate amounts almost to a nonintercourse provision as between the banks forming a part of the new system and the State banks in

Mr. OWEN. Of course, there was no such intention as that.

I assume there was not, but I hope that will be Mr. ROOT. kept in mind in the redrafting. Taking it altogether it does amount in a considerable degree to a nonintercourse provision; that is, it does not promote that free business interchange between the national banks in the system and the State banks which are not in the system that has prevailed hitherto.

Mr. OWEN. It was not intended to interrupt that.

Mr. ROOT. It is important that that should be taken out of the bill.

Mr. BURTON. Now that we are on this provision-

Mr. OWEN. I do not understand that we are on this provision.

Mr. BURTON. There is another matter to which I should like to call the attention of the Senator from Oklahoma very

briefly in this connection.

Mr. WILLIAMS. Mr. President, if the Senator will excuse me, I rise to a point of order. We are operating under a unanimous-consent agreement, and that unanimous-consent agreement is that no Senator shall speak more than 15 minutes on the bill itself and not more than 15 minutes on any amendment thereto. In other words, Senators must confine themselves to the amendment under consideration or speak on the bill. We have had two speeches this morning that do not refer either to the pending amendment or to the bill. One of them referred to something which had been stated in some newspaper and another

referred to another amendment to be offered later on. If that is the sense in which the unanimous-consent agreement is to be construed, certainly we have not accelerated progress upon the bill by adopting it. Mr. BURTON. I recognize, if the point of order is raised,

amendment here; at least, I take it so. But there has been very considerable discussion in regard to the provision on page 67, and the attention of the Senator from Oklahoma was called to I thought it would promote steps leading to the final disposition of the bill to call attention briefly to another provision immediately preceding which should be considered at the same

that we can not discuss anything outside of or extraneous to the

Mr. WILLIAMS. But the Senator will not save time, because when we get to the amendment it will be discussed again. How is the Chair to keep account as to whether Senators have spoken upon that amendment or not if they are speaking on it now? I hope the point of order will be considered by the Chair and that we can have a ruling upon it, so as to confine ourselves to the unanimous-consent agreement in the spirit in which it was adopted.

Mr. BURTON. I shall not insist upon speaking upon it at this time, Mr. President, though I do think it would promote orderly progress after having considered at some length one provision to take up another, of only two or three lines, just preceding it, which is closely connected with it. I will, however, try to bring it up at some other time.

Mr. WILLIAMS. That is the proper course.

The VICE PRESIDENT. If there is no further discussion

on the amendment, the question is on the motion made by the Senator from Oklahoma [Mr. Owen] to lay the amendment to the amendment on the table.

Mr. HITCHCOCK and Mr. BURTON called for the yeas and

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SMITH of Arizona (when his name was called). again announce my pair with the Senator from New Mexico [Mr. Fall] and withhold my vote.

Mr. SMITH of Georgia (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr.

Lodge]. I therefore withhold my vote.

Mr. STERLING (when his name was called). I again announce my pair with the senior Senator from Louisiana [Mr. If at liberty to vote, I would vote "nay." THORNTON 1.

Mr. SWANSON (when his name was called). As previously stated, I am paired with the senior Senator from Washington [Mr. Jones]. Consequently I can not vote. If permitted to vote, I would vote "yea."

The roll call was concluded.

Mr. SWANSON. I transfer my pair with the senior Senator from Washington [Mr. Jones] to the junior Senator from South Carolina [Mr. SMITH] and vote. I vote "yea."

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. STERLING. I transfer my pair to the junior Senator from California [Mr. Works] and vote "nay."

The result was announced-yeas 43, nays, 40, as follows:

Smith, Ariz, Smith, Ga. Smith, S. C. Burleigh Clark, Wyo. Culberson Jones Lodge Thornton Works So Mr. Owen's motion to lay Mr. HITCHCOCK's amendment to the amendment on the table was agreed to.

Mr. HITCHCOCK. I offer an amendment to section 2.

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The SECRETARY. In section 2 of the amendment offered by the Senator from Oklahoma, page 2, line 15, strike out the word "eight" and insert the word "six," so that if amended it will

SEC. 2. As soon as practicable the Secretary of the Treasury and not less than two other members of the Federal reserve board hereinafter provided for, to be assigned by the President, acting as "the reserve bank organization committee," shall designate not less than 6 nor more than 12 cities to be known as Federal reserve cities.

Mr. HITCHCOCK. Mr. President, this is experimental legislation. No country has ever attempted to establish more than one reserve bank. The bill as reported by myself provided for the establishment of four. That number, however, presented as an amendment, has been defeated. I am now endeavoring in this amendment to make it possible for the reserve board, when it comes to divide up the country and establish these reserve banks, if in its judgment eight shall prove to be an excessive number, to establish six. If the bill as proposed by the Senator from Oklahoma is passed, the reserve board might feel that eight would be an excessive number, that with eight the system would be a failure, that several of the banks would prove inadequate, and yet its hands would be tied and it would not be able to establish a system with a lesser number of banks than eight.

My amendment, therefore, gives to the reserve board the power to establish so small a number as six. It does not compel the reserve board to establish six, but it makes it possible, if, in the opinion of the reserve board appointed by the President, six shall prove the more desirable number after hearings had and

evidence taken, to make that number.

I offer the amendment in the hope that it may receive some attention, although I concede that the hope is very feeble.

Mr. GRONNA. Mr. President, my attention was diverted for a moment, and I should like to have the amendment read before we vote upon it.

The VICE PRESIDENT. It will be again read.

The Secretary again read the amendment to the amendment. Mr. GRONNA. Mr. President, this would make a change only in the number of reserve banks. As I understand it, it would still leave the control in the hands of the bankers. For that reason I can not vote for the amendment proposed by the Senator from Nebraska.

I said on yesterday that it was possible for the bankers of eight reserve districts to combine and control the currency as it is possible for one central bank to control the volume of

money and currency.

If, on the other hand, the power were placed in the hands of a Government board, I should be in favor not of reducing the number of banks; but leaving it to the individual bankers, to the men who own and control and are conducting these institutions for the purpose of making profit, is a dangerous provision. I can not vote for the amendment proposed by the Senator from Nebraska.

Mr. OWEN. I move to lay the amendment on the table. Mr. HITCHCOCK. I ask for the yeas and nays, Mr. President.

The VICE PRESIDENT. The Senator from Oklahoma moves to lay the amendment to the amendment on the table. Is the request for the yeas and nays seconded?

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson].

I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. JACKSON (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. Chilton], who has been called from the Senate. I withhold my vote. Mr. SMITH of Georgia (when his name was called). I will !

simply announce my pair with the senior Senator from Massa-

chusetts [Mr. Lodge] and withhold my vote.

Mr. STERLING (when his name was called). I again announce my pair with the Senator from Louisiana [Mr. Thorn-

TON] and withhold my vote.

Mr. REED (when Mr. STONE's name was called). I again announce the absence of my colleague [Mr. STONE], on account of illness, and the fact that he is paired with the Senator from Wyoming [Mr. Clark]. If my colleague were present, he would vote "yea.

Mr. RANSDELL (when Mr. THORNTON's name was called). I wish to announce the unavoidable absence of my colleague [Mr. THORNTON]. He is paired with the Senator from South Dakota [Mr. Sterling]. If my colleague were present, he would vote "yea."

Mr. SMITH of Arizona (when his name was called). I again announce my pair with the Senator from New Mexico [Mr.

FALL], and withhold my vote. The roll call was concluded.

Mr. OLIVER (after having voted in the negative). Has the senior Senator from Oregon [Mr. CHAMBERLAIN] voted?
The VICE PRESIDENT. He has not.

Mr. OLIVER. I withdraw my vote.

Mr. SUTHERLAND. I inquire whether the Senator from Arkansas [Mr. Clarke] has voted?

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with that Senator, and therefore withhold my vote.

Mr. JONES. I desire to ask if the junior Senator from Virginia [Mr. Swanson] has voted?

The VICE PRESIDENT. He has not.

Mr. JONES. I have a pair for the morning with that Senator, and I shall withhold my vote. If I were at liberty to vote,

I would vote "nay."

Mr. SMITH of Georgia. I desire to transfer my pair with the senior Senator from Massachusetts [Mr. Longe] to the junior Senator from South Carolina [Mr. SMITH], and to vote. I vote "yea.'

The result was announced-yeas 43, nays 30, as follows:

So Mr. Owen's motion to lay Mr. HITCHCOCK's amendment

to the amendment on the table was agreed to.

Mr. HITCHCOCK. Mr. President, I am drawing to the end of my portfolio of amendments, and I would like to say, if there are any other Senators who have amendments to offer, that I have but three more to offer. I offer the amendment which I send to the desk to section 4.

The VICE PRESIDENT. The amendment proposed by the Senator from Nebraska to the amendment of the Senator from

Oklahoma will be stated.

The Secretary. In section 4, of the amendment of Mr. Owen, on page 12, beginning in line 16, it is proposed to strike out all upon the page and the first six lines of page 13, and in lieu thereof to insert:

Every Federal reserve bank shall be conducted, managed, and controlled by a board of nine directors, five of whom shall be appointed by the Federal reserve board, and shall be known as directors "A," and four of whom shall be known as directors "B," and who shall be selected and appointed by the member banks as follows:

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska to the amendment of

the Senator from Oklahoma.

Mr. HITCHCOCK. I should like to have the yeas and nays on the amendment to the amendment.

Mr. BRISTOW. Mr. President, before the vote is taken on this amendment I wish to say that while we voted on section 2 as a whole, which involved the number of regional banks and the method of appointing their directors, the Senator from Nebraska is now offering amendments to specific parts of section 2 of the bill reported by the Senator from Oklahoma. will now be a direct vote as to whether the regional banks shall be controlled by officers of the Government or by directors selected by the banks themselves. It is a question as to whether these banking monopolies, which we are creating under the proposed law shall be controlled by their posed law, shall be controlled by their own boards of officers selected by themselves or whether they shall be controlled by officers of the Government. This matter has been discussed at length, and I am glad the Senator from Nebraska has offered this direct amendment involving this one question.

We have heard a great deal of complaint about the monopolization of the credit of the country by Wall Street, and those who have complained the loudest, as I have taken occasion to say before, have now framed a measure which legalizes the very things which they have denounced most violently, and creates a new law by which these private interests can obtain a much more effective control of the credit of the country than they can under the present law.

So important do I regard this provision in the bill that, if I indorsed the majority of its other features, I would not vote for it because it contains this provision, for I never intend to cast my vote for a measure which legalizes a monopoly and legalizes the control of that monopoly by private interests. It seems an amazing proposition to me in this day and age of enlightened public opinion and universal information that an organization or an administration would undertake to denounce trusts and at the same time create them by law and turn them over to private interests to be controlled and operated at their will. That is exactly what this bill proposes to do. I repeat I am glad that the Senator from Nebraska has offered the amendment just as it is, so that we shall vote on the naked question as to whether we favor the control of the credit of the country by a banker's monopoly organized under the law or favor the control of a regional bank organized for the purposes of discount by

officers of the Federal Government.

Mr. OWEN. Mr. President, I move to lay the amendment to the amendment on the table,

Mr. GRONNA. Mr. President, I merely wish to say a word. Mr. OWEN. I withhold my motion, Mr. President.

Mr. GRONNA. Mr. President, I have said repeatedly that I believed it was possible for the reserve banks, whether there were 8 or 12, to concentrate the money and to monopolize business just as well as it is possible for one bank to do so. again emphasize that I believe that to be the fact. I did not vote for the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] to reduce the number from eight to six. could not consistently do so. I can not see where it would be of any benefit to have six rather than eight regional banks, if we are going to have those banks controlled by the Money Trust.

I have always been opposed to a single central bank, if it was to be controlled by the bankers. I have never objected to a central bank, providing the Government of the United States had full control over it. I can see no good reason why a banker should have authority to say whether the volume of currency should be increased or decreased, any more than that a mer-chant or a farmer or a planter should have that power. I see no good reason why it should be left to a few men to regulate the increase or the decrease of the volume of the currency.

My friends on the other side, those of you who are voting to place this absolute power in the hands of the bankers, will, I believe, regret it. It is the function of government and not of individuals to regulate the volume of the currency.

Mr. SHAFROTH. Mr. President, I wish simply to say, in reply to the Senator from North Dakota [Mr. Gronna], that we think this bill is safeguarded by the absolute control of the Federal reserve board; it is safeguarded by the appointment by the Federal reserve board of three of the directors of this bank and the right to remove six of the directors in the event that any abuse occurs. Mr. President, I move to lay on the table the amendment to the amendment offered by the Senator from Nebraska.

The PRESIDING OFFICER (Mr. Walsh in the chair). The question is on the motion of the Senator from Colorado [Mr. SHAFROTH] to lay upon the table the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK] to the amendment

of the Senator from Oklahoma [Mr. OWEN].
Mr. HITCHCOCK. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Bur-Leigh] and vote. I vote "nay."

Mr. SMITH of Arizona (when his name was called). I am

paired, as I have frequently announced to-day, with the Senator from New Mexico [Mr. Fall]. On this vote I transfer that pair to the Senator from South Carolina [Mr. SMITH] and vote

yea."
Mr. STERLING (when his name was called). As already stated, I am paired with the senior Senator from Louisiana [Mr. THORNTON]. If at liberty to vote, I should vote "nay. The roll call was concluded.

Mr. SMITH of South Carolina (after having voted in the affirmative). Inadvertently I voted when I was paired. I withdraw my vote.

Mr. REED. I again announce the necessary absence of my colleague [Mr. Stone] on account of illness, and the fact that he is paired with the Senator from Wyoming [Mr. Clark]. If my colleague were present he would vote "yea."

The result was announced-yeas 44, nays 36, as follows: YEAS-44.

		The state of the s

So. Mr. HITCHCOCK's amendment to the amendment of Mr. Owen was laid on the table.

Mr. HITCHCOCK. I offer an amendment to section 2, the purport of which is to provide that the stock of the reserve banks shall be underwritten by the banks and offered to the

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. In section 2, on page 3, of Mr. Owen's amendment, beginning with the word "When," in line 23, it is proposed to strike out down to and including line 10, page 4, and insert:

There shall be allotted to every national bank within a Federal reserve district, of the capital stock of the Federal reserve bank of such district, a sum equal to 6 per cent of the fully paid-up capital stock and surplus of such national bank, which stock so allotted shall be underwritten by said bank and for a period of 60 days after allotment be offered for subscription at par to the public at large, but no more than 100 shares shall be allowed to be subscribed for, owned, or held by any person, firm, or corporation and all of the allotted stock not subscribed for and taken by the public shall immediately be subscribed for and taken by the national bank to which the same was in the first instance allotted. The preparation, allotment, subscription to, and sale of stock shall be under the control of the board, which in case of oversubscription shall give preference to the smaller subscriptions. The national banks shall in the first instance act as agents of the Federal reserve board to take subscriptions from the general public and receive payment therefor which shall be held subject to the order of the board. That said stock subscription shall be paid for in gold coin or gold certificates as follows: One-third at the time of subscription, one-third within 30 days, and one-third within 60 days thereafter.

Mr. HITCHCOCK. Mr. President, it has been stated here

Mr. HITCHCOCK. Mr. President, it has been stated here repeatedly, and with force, that to compel the national banks of the country to take this stock is practically to make it certain that many banks will not join the system. This amendment would remove that difficulty and tend to bring into the system more banks than would otherwise enter it. This amendment will also prevent the creation of a bankers' trust; it will tend to bring into the banking world \$106,000,000 of fresh capital. It avoids the objection inherent in the other plan of taking fifty or a hundred million dollars away from the active banking capital of the country.

I shall not further discuss the amendment, because I have

heretofore discussed it at length, but I should like a yea-andnay vote upon it.

Mr. OWEN. Mr. President, this matter has been already discussed at great length, and I will only make a single observation in regard to it. If the stock were offered to the public, of course it would be taken by the public because it is a good stock. The value, however, of the stock is due to the funds belonging to the banks of the country; it is due to the putting of their reserves into the system, and the earnings from their reserves ought to go to the banks or to the Government which gives the franchise and which puts its own funds in large volume into this bankers' bank-because it is merely a bankers' bank. It is intended to stabilize the banking business in the United States and to enable bankers to have their individual liberty, which heretofore they have not had, as at any time they might have been put under the shadow of a stringency or even of a panic. The banks of the country which have complained that they ought not to come in, evidently have not considered what the earning power of this stock will be. Six per cent nontaxable amounts to an earning approximately of seven and a fraction per cent. The earning power of the deposits in the banks of the country only approximates a little over 2 per cent-about two and a quarter per cent-so that when they transfer a part of their deposits which they now have as reserves at 2 per cent into this 6 per cent nontaxable stock they will have a distinct advantage in that transfer. We have provided for lower reserves, so that they may make that transfer without any tax at all, and with the positive pecuniary advantage of earning 6 per cent without taxation, instead of 2 per cent with taxation. I move to lay the amendment to the amendment on the table.

Mr. NEWLANDS. Mr. President—
Mr. OWEN. I withhold the motion.
Mr. NEWLANDS. I wish to state that, with reference to this amendment, I shall sustain the committee, although I hope that at a conference of the majority party to-day some modification of this paragraph will be reached. I think it is modification of this paragraph will be reached. I think it is of the highest importance that all of the banks, both national and State, should come into this union or federation that is intended to facilitate exchange and to prevent temporary obstructions in the movement of money caused by panics or stringencies that are either local or nation-wide.

I deem it of the highest importance that all the banks, both National and State, shall come into this federation. I shall regard it as an element of weakness if any of them remain out. I believe that in union there will be strength; and in this chain of banks, some 25,000 in number, it is essential that the weaker banks shall be strengthened by cooperation with the stronger banks. The strength of the chain will be the strength of the weakest link.

I think it would be a great misfortune in our financial system, which is now divided between National banks and State banks, if the State banks should remain outside of this federation, for I believe the weakness of a portion of our financial system will detract from the strength of the stronger portion. I wish to see our entire financial system of exchange strengthened by a federation which will take in every banking corpora-tion in the country, whether National or State.

I believe that many banks in the country, both National and State, object to turning over any portion of their capital to another bank or furnishing additional capital. So far as the national banks are concerned, if this bill passes, the provision will be compulsory, and they will be compelled to go in or to abandon their national organization. Therefore, most of them will probably come in, though we hear threats that some of them will assume the State-bank form of organization. That is said to be true of one great bank in Chicago, the largest commercial bank in the country, with more correspondent banks than any other. So far as the State commercial banks are concerned, far outnumbering the national banks, the process of this bill is simply persuasive and not compulsory.

I should deem it a misfortune if they should remain out, or

any considerable portion of them should remain out. I should regard it as a misfortune if any considerable number of them should delay coming in. It seems to me it is of the highest importance to the existing industrial and financial condition of the country that this federation or union of banks should be quickly accomplished, and we should leave out of this bill any obstructions that will prevent an immediate and prompt acquiescence in its provisions, provided those obstructions are not essential to the basic principle of the bill.

We know that the national banks have objected to the compulsory process, and that many of the State banks have insisted that they will not yield to the persuasive process; they will remain outside of this organization. I regard that as an element of weakness in the situation.

So far as I am individually concerned, so important do I feel it to be that the State banks should organize and form a part of this federation and should turn over to these reserve associations a part of their reserve funds as a precautionary measure of safety, that I would exercise the coercive power of the National Government derived from the provision of the Constitu-tion which gives the National Government the regulation of interstate and foreign commerce to compel even the State banks to comply with the provisions of this bill; but that is not the mind of Congress. It purposes simply to persuade. If persuasion is to be the rule, I would make that persuasion effective by not inserting in this bill a provision which I regard as unnecessary and to which they seriously object.

How does this strengthen the bill, as to whether the capital is furnished by the public or the banks? The real capital of the reserve banks is, of course, furnished through the provisions of this bill compelling one-third of the reserves of the member banks to be turned over to the reserve banks and for concerted action. We take from the banks in that way, if we succeed in making the system effective with reference to all the banks, both National and State, one-third of the cash reserves which they now have on hand. We take that sum of \$500,000,000 out of their possession and put it in these reserve banks, and thus practically put that enormous sum as a safety device in the hands of the Federal Government, acting through the reserve

board, which will control the reserve banks.

Is not \$500,000,000 of capital enough to require from the member banks? If they object to furnishing this additional capital, which it is estimated will amount to \$53,000,000, and may amount, if the final call is made, to \$106,000,000, why should we insist that they furnish that additional capital when the public itself will furnish it? How does it weaken the system at all?

The Senator from Oklahoma says these banks are banks of banks. Does it make them any less banks of banks because the reserve banks in the aggregate, if all the banks come into the system, will have \$500,000,000 of the capital of the member banks constituting a portion of their cash reserves and only \$53,000,000 of the people's money subscribed as stock? The major interest, therefore, in the resources of these reserve banks, the utilizable funds, is in the member banks. That interest is not at all affected by taking in the public as stockholders without the power to vote.

It seems to me the attention of the Democratic conference ought to be called to this provision, and some modification ought to be made. If the modification I have insisted upon is not made, namely, that this subscription of \$53,000,000 of capital stock is unnecessary and should be dispensed with, it seems to me we should, at all events, free the banks from the obligation to furnish that \$53,000,000 and permit the public, if they wish, to acquire the ownership of it. That ownership will not be at all embarrassing to the management or to the administration of the reserve banks, for their control and administration is left just where the bill puts it, and is not weakened at all.

So, Mr. President, while I shall vote to sustain the bill that has been presented by the majority conference in all its integrity, for the reason that if individual members should tear away a portion here or there by uniting with the opposition its symmetry would be destroyed, I do insist that this presents a matter of grave consideration to the Democratic conference itself. I hope it will be considered; and I hope either that no capital requirement shall be made beyond the reserve contribution of the reserve banks or, if it is to be made, that the public shall share in it.

Mr. BORAH. Before the Senator takes his seat, did I understand the Senator from Nevada to say that he hoped the conference would take this matter under consideration?

Mr. NEWLANDS. Yes.

Mr. BORAH. I do not understand that this will be a subject for the conference at all if this body adopts the same proposition the House did. I refer to the bank ownership of the stock. It would not be open to change in the conference.

Mr. NEWLANDS. When I spoke of the conference, I did not speak of the conference between the Senate and the House. I spoke of the Democratic conference, which I believe will be held to-day.

Mr. BORAH. Would the Senator from Nevada be willing to make a motion to refer this matter to the conference?

Mr. NEWLANDS. No; I will not. That party conference is going on as a part of party administration, with a view to making the party will effective, and with a view to making the Democratic Party an efficient instrumentality in government. I see no way of escaping such conferences, and I think it is the only logical way in which the Democratic Party can exercise its will and express its will and make that party efficient in gov-

Mr. BORAH. Mr. Preside Mr. ROOT. Mr. President Mr. President-

The PRESIDING OFFICER. Does the Senator from Nevada further yield to the Senator from Idaho?

Mr. NEWLANDS. Certainly.
Mr. BORAH. I yield to the Senator from New York.

Mr. ROOT. I merely wish to ask the Senator from Nevada whether he has been trying to escape from it?

Trying to escape from what? Mr. NEWLANDS.

The Senator says there is no way of escaping from the conference. I ask him whether he is trying to escape from the conference?

Does the Senator mean from the confer-Mr. NEWLANDS.

ence of the Democratic Party?

Mr. ROOT. Yes.
Mr. NEWLANDS. I am not trying to escape from it. On the contrary, I am cooperating with it in every way. When I do escape from it, I certainly will not go into the opposition party. [Laughter.]

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Idaho?

Mr. NEWLANDS. Certainly.

Mr. BORAH. I should be glad to see the Senator from Nevada organize a party of his own.

Mr. NEWLANDS. I am hardly prepared to do that, because I believe in the value of cooperation.

The PRESIDING OFFICER. The time of the Senator from

Nevada has expired.

Mr. SMITH of Michigan. Mr. President, I desire to ask the Senator from Nevada a question.

Mr. SMOOT. I suggest that the Senator do it in his own time.

Mr. NEWLANDS. If the Senator will do it in his own time,

I will answer him gladly.

Mr. SMITH of Michigan. The Senator from Nevada has shown so much solicitude for the great number of State banks which will be found outside of this plan that I am prompted to ask him if he thinks the Democratic caucus upon his suggestion could change the laws in almost every State of the Union in order that State banks may get into this new system?

Such solicitude comes very late. Senators on that side of the Chamber have voted down every proposition which tended to make it easy for these very representative State institutions to come into this bankers' union. In the first place, the laws of most of the States provide that the reserves of State banks shall be kept in certain places; and until the laws of those States are changed, it is an absolute impossibility to transfer the reserves of State banks into this national bankers' union.

Perhaps the Senator from Nevada has not thought of the supervision that the States exercise over State banking institutions. The fact that the Senator has supported the committee with so much zeal and enthusiasm, quite contrary to some of the teachings he has heretofore espoused in this body, and in another body not remote, prompts me to ask whether the legislatures that do not meet for four years are to pass retroactive laws in order to get their State banks into this benevolent system?

For instance-

If a State bank or trust company is required by the law of its State-

I am now reading from the Owen bill-

to keep its reserves either in its own vaults or with another State bank or trust company, such reserve deposits so kept in such State bank or trust company shall be construed, within the meaning of this section, as if they were reserve deposits in a national bank in a reserve or central reserve city for a period of three years, etc.

If they do not change the law until after three years, then If the State legislatures in various States do not see fit to change their law with reference to these reserves how can a State bank qualify for membership in this proposed Democratic bankers' union?

Mr. NEWLANDS. Mr. President, if the Senator puts that as a question to me I will simply state that this organization is

a union of Democracy; it is a union of the banks. Mr. SMITH of Michigan. Early in the discussion it was not,

but it has taken on that partisan aspect in the last few days. Mr. NEWLANDS. The union which you are attempting to accomplish is a union of the banks, both National and Statethe national banks organized under the national sovereignty and the State banks organized under the State sovereignty. Of course, it is obvious that you can not in this persuasive process compel the banks to violate the State laws. That would Mr. SMITH of Michigan. You suggested it, if I understood

you correctly

Mr. NEWLANDS. We hope that later on, through the spirit of comity which I am glad to see is prevailing so extensively between the National sovereignty and the State sovereignties, the State sovereignties will so modify their legislation as to allow their States to become the beneficiaries of this movement for a union that will be of such great advantage to all of them. Of course, if it does not, it is the sacred right of sovereignty to deny its creatures that right, and no one can object. The bank can not object. We can not object. The national sovereignty can not object.

I believe that if we are to deal in persuasion with reference to the State banks, that persuasion should be made effective, and that we should clear out of this bill all objections that do not constitute essential portions of the bill which prevent the State banks from coming in speedily. I admit, of course, that if there is a State law on the statute books that absolutely prevents their complying with this act, this act must be inoperative with reference to them.

Mr. SMITH of Michigan. Certainly.

I think it will be a mis-Mr. NEWLANDS. That may be. fortune to them, and I think it will be so obvious that the public opinion of these States will in the end force a modification of the laws so as to permit the State banks to come into the union of banks. Certainly, however, there is nothing in this bill that applies at all the coercive power of the Nation to the States.

Mr. SMITH of Michigan. The Senator expressed so much solicitude this morning about the matter that I thought he wanted it done right away. He said he was in hopes that the conferees might take up this matter and promptly amalgamate these institutions, making it easy for State banks to promptly join in this new movement. The laws of the several States are as favorable to State banks as the laws of the Nation have been favorable to national banks. There is no temptation for a State bank to get into this system, which will be dominated by national bankers. If the laws of the States should be so changed that they might enter this system, who is to guarantee the permanence of the new system so hastily and inappropriately devised?

I think Senators upon that side of the Chamber have gone altogether too fast in their frantic efforts to relieve the country of an acute situation which they have brought about, against the protest of this side of the Chamber. The whole bill is an expedient from the first line to the last, an attempt to bridge over an industrial chasm which you yourselves have made. That is the truth about it. You have aroused and alarmed the country over her industrial and commercial safety, and you offer this new folly as a panacea. That is the truth about it. The Democratic platform upon which you went to the country last year contained no reference to this sweeping plan. It is an afterthought, pure and simple. You have diagnosed wrongly the trouble with your patient, and you are going to keep right on prescribing dum dum pills and painful nostrums for ills with which the body politic is not afflicted.

We have just as much money in this country to-day as we had when we were treated to this dose of new freedom and you put your new propaganda forth, but we have not as much public confidence in the stability of our institutions. Hundreds of thousands of men are out of employment-according to press reports, 30,000 in the city of Milwaukee, and I venture the assertion that there are 50,000 out of employment in the largest city in my own State. They have not been driven out of employment because there was no money, for exactly the same volume of money is in the country to-day that was here a year ago, when we were having such unrivaled prosperity.

Mr. MARTINE of New Jersey. Mr. President—

Mr. SMITH of Michigan. I can not yield to the Senator. He can speak in his own time. I would be willing to yield, but my time is practically exhausted.

The PRESIDING OFFICER. The Senator declines to yield.

The Senator from Michigan will proceed.

Mr. SMITH of Michigan. The Senator from Nevada [Mr. NEWLANDS] took half of my time, and I can not get it back, and he has taken away half of my prosperity by his unwise laws,

and I can not get that back. [Laughter.]

I have heard Senators on that side of the Chamber prescribe nostrums before, and they did not work and will not work now. There is scarcely a Senator on that side of the Chamber who has taken an active part in the formation of this bill who was not a free silverite in 1896 and thought free silver was necessary to process compel the banks to violate the State laws. That would be an unfortunate situation, of course, which we can not meet. friend the Senator from Colorado [Mr. Shafrorh], for whom I have such high admiration, sitting just a few feet from me in the House of Representatives, rise to his feet and proclaim that the only possible thing that could save the country from disaster in the panic of 1893 was the free and unlimited coinage of sliver at the ratio of 16 to 1. When some one asked him why the ratio should be 16 to 1, he replied, "Because it is thought that there is about 16 times as much sliver in the ground as there is gold." [Laughter.] Yet we are asked to accept the wisdom and experience of Senators upon that side of the Chamber when they have never prescribed a remedy that would touch the disease.

I have been led into this debate this morning rather against my will, and because of the solicitude of my friend from Nevada over the possibility that we might not be able to get State banks into this union, which caused him to utter such a wail of lamentation, that I just thought I would remind him that while the States of the Union have laws which fix the conduct of their banking institutions the Federal Government is powerless to force even this gilded panacea down their throats.

I do not think State banks will care to enter into this arrangement at all. They deal in mortgages and a vastly different form of credit from the form of credit contemplated by this bill. In fact, I think many national banks will enter the other field. If they do, and the number of banks that go into this regional reserve system is cut down very materially, it will not be a difficult thing for them to have a definite understanding with one another, which will make the so-called money trust, against which you inveigh, look like a rope of sand, for while they "hold the bag" the people of the United States, through the Federal Treasury, will fill it for their favorites without charge.

No! I am very suspicious of your remedy—very suspicious of it. If I had not heard you advocate so often political principles that have turned out to be utterly fallacious, I might have more faith in it. I read in every one of your faces chagrin and mortification over some of the nonsensical things you have championed in the past; and you will fly from this banking remedy to some other less effective cure-all just as soon as you discover your mistake.

The PRESIDING OFFICER. The time of the Senator from

Michigan has expired.

Mr. MARTINE of New Jersey. Mr. President, I am prompted by the reference which the genial Senator from Michigan made to the nonemployed to say a word most regretfully on my part, but candor and honesty compel me to bear testimony to the fact that there are many men unemployed. I clipped from a prominent Republican paper of the city of Cincinnati a most sad picture of many men out of employment. The article is headed:

Sixty thousand men out of employment in Cincinnati.

By what was it caused, Mr. President? Was it from the enactment of a tariff law that tended to lighten the burdens of humanity? Oh, no; it was from a condition infinitely worse than that. Was it from the anticipation of the passage of a currency bill, which the Senator says was an afterthought and not anticipated, notwithstanding the fact that the Democratic platform declared for a change in our banking system? Oh, no; it was even worse than that.

Mr. President, the very great Jehovah seemed to have conspired with the Republican Party to put working people out of employment and hence starve for bread. What brought about this horrifying calamity, when, according to the Cincinnati Enquirer, 60,000 men in Cincinnati, Ohio, are out of employment? It was neither of the things I have mentioned, but 60,000 men to-day are out of employment there because of the bursting of a water main. Doubtless the distinguished Senator from Michigan included those 60,000 in the 80,000 men to-day out of employment

I read to-day in one of the prominent New York papers of the convening of the Republican national committee yesterday or the day before in the city of Washington, and it was stated they were a party without a quarrel, and they had to stir up something, and they rolled as a sweet morsel under their tongues their hope of a hard winter and soup houses and the bread lines. I have seen soup houses and bread lines in the great city of New York for 20 years under the administration of the Republican Party. Your iniquity in legislation had gone on so far and heaped so hard and fast the burden on struggling humanity that they cried out to God and high heaven for relief, and the good people of this country came to their relief. Naturally in the change of a system from your iniquity to our method of legislation it will require a little while for it to become operative.

But that it will be able to give the relief none can question, and that our banking bill is indorsed by the strongest financial paper of the great city of New York is a fact. The Senator

may think that he can lay hopes of anticipation of sadness on our part. He says there is chagrin in the face of the Democratic majority. I will say to the Senator that there is no chagrin, there is no anticipation of sadness, but we do know that when our bill shall be put in force there will be a day of brighter dawn and there will be infinite happiness for all classes and conditions of our country.

Mr. PENROSE. Mr. President, I shall detain the Senate but a few moments. One of the chief reasons why this bill is intensely unpopular in Pennsylvania, and particularly in the city of Philadelphia, is the apprehension that Philadelphia will not be considered as a center for the establishment of a regional bank. The city of Philadelphia is an old and patriotic municipality, and the possibility of such an omission occurring is deeply felt by the bankers and the citizens of Philadelphia and the people of Pennsylvania. There is a long and patriotic history connected with the banking institutions of Philadelphia which makes this possibility felt more keenly by the people of that city than perhaps would prevail in a newer community or possibly in any other section of the United States.

The first bank in the United States was chartered by the Continental Congress in 1781 and was located in Philadelphia,

and it is still doing business there.

When the United States Bank was chartered it was located in Philadelphia; so was the second United States Bank.

The first institution to transact the functions of a trust company was the Pennsylvania Co. for Insurance on Lives and Securing and Granting Annuities, which was chartered in 1812. The first savings bank in the United States was the Philadel-

phia Savings Fund, chartered in 1816.

The First National Bank of Philadelphia was the first bank chartered under the national-bank act, receiving charter No. 1.

The first United States mint, the first post office, the first stock exchange, the first building association, and the American Bankers' Association were all first organized in Philadelphia. To-day Pennsylvania has more members in the American Bankers' Association than any other State in this country, eliminating New York City private banks.

Philadelphia is the second city in the amount of capital, surplus, and undivided profits. It is the third city in the amount of deposits and the second city in the volume of its out-of-town

clearings.

The district covered by the minimum rate for parcel post of which Philadelphia is a part has a larger population than any other district in the country.

Our people recall with patriotic pride the illustrious men in the banking business who have come to the rescue of the coun-

try in the crises of war.

Robert Morris, Jay Cooke, and others might be mentioned who have reflected a luster on the banking people of that great city, and I think it can be understood how keenly the mere possibility of this passing by of Philadelphia is felt by the people of that city.

Philadelphia's financial standing in the world is shown by the following figures: National banks, October 21, 1913, \$436,038,998; trust companies, savings banks, and State banks, \$629,601,092; building and loan associations, \$170,000,000; total, \$1,172,640,090.

The aggregate resources of the banks of the United States, according to the last report of the Government, reached \$25,000,000,000, of which Pennsylvania held more than \$2,538,000,000, while Philadelphia alone stands for more than \$1,000,000,000.

More than one-tenth of all the assets in the United States are in Pennsylvania, I have here some figures showing the financial conditions in certain sections of the country that I will ask to have inserted as part of this statement.

The PRESIDING OFFICER (Mr. Walsh in the chair). If there be no objection, it will be so ordered. The Chair hears

Mr. PENROSE. I have been in receipt of thousands of letters from all over the State of Pennsylvania protesting against the possibility of Philadelphia being ignored in this connection. Many trade bodies have met and passed resolutions. I have here the resolutions adopted by the merchants and manufacturers of Philadelphia, which is a fair sample of many others. It

MERCHANTS & MANUFACTURERS ASSOCIATION, Philadelphia, December 2, 1913.

The following resolution was adopted by the board of directors of the Merchants & Manufacturers Association, of Philadelphia:

"Whereas Federal regional reserve banks are contemplated by officials of the United States Government; and "Whereas the distribution of these regional banks apparently omits Philadelphia as a reserve city; and

"Whereas the importance of Philadelphia as a manufacturing and industrial center, as well as its geographical location and large banking deposits, would point to this city as a logical place for a regional bank: Therefore be it "Resolved, That the Merchants & Manufacturers Association is unalterably opposed to having this city disregarded in this respect, and that we call upon the President, Senators, Representatives, and officials of the Government, as well as business men generally, to lend aid and influence foward having Philadelphia recognized as a regional reserve city and to prevent the elimination of Philadelphia in this regard."

On behalf of the board of directors.

[SEAL.]

D. T. FLEISHER, President.

Attest :

C. W. SUMMERFIELD, Secretary.

I want to quote from a statement issued by the First National Bank of Birmingham, Ala., in a review of the situation for December, as follows:

Recent developments indicate the possibility of the banking and currency bill becoming a law before the close of the year. * * * * We would like to see more consideration of the question of four regional banks. It seems that the New England States, New York, Pennsylvania, Maryland. West Virginia, Virginia, North Carolina, South Carolina would make an ideal district, and that a regional bank located at Philadelphia, a central point, would serve it better than two or more banks in the same territory, even though one were located in New York.

I have here the resolutions of the Commercial Exchange of Philadelphia, as follows:

Philadelphia, as follows:

The Commercial Exchange of Philadelphia, December 1, 1913.

"Resolved, That the Commercial Exchange of Philadelphia would respectfully urge upon the legislative chambers of the National Government that by reason of its financial strength as the third largest city in the United States in the volume of its bank deposits and with practically \$1,000,000,000 of banking resources at command, as the reliance of populous and important smaller communities for both banking facilities and monetary guidance, the hub of an extensive and prosperous agricultural area, the center of a great manufacturing and commercial district, historically identified with great banking operations and conspicuous for ability to handle them and for having conducted vast enterprises to successful conclusions, and for other reasons which need not be enumerated in this resolution, but which are readily demonstrated, the claim of Philadelphia is paramount to that of the majority of American cities, and it is most earnestly hoped that whether the reserve centers be named in the legislation or are to be chosen by the board to be created, neither one nor the other method shall prevent Philadelphia from being selected as one of the regional reserve centers under the new Federal law."

Respectfully,

Antonio Sans, President.

I also read a letter from the Philadelphia Produce Exchange;

I also read a letter from the Philadelphia Produce Exchange:

Philadelphia Produce Exchange, Philadelphia, December 5, 1913.

Hon. Boies Penrose,

United States Senate, Washington, D. C.

Dear Sir: At a meeting of the board of trustees of this exchange, held on the 3d instant, the following resolution was unanimously adopted:

Whereas Philadelphia is the third largest city in the United States and is the center of a great manufacturing and business district; and Whereas in the volume of its bank deposits and the magnitude of its banking resources it is one of the most important cities of the country; and

try; and
Whereas in the proposed legislation by Congress to establish regional reserve centers Philadelphia is apparently omitted: Be it

Resolved, That the Philadelphia Produce Exchange earnestly urges upon Congress the claims of Philadelphia in this respect and that this city shall be one of the places in which a regional reserve bank shall be established; and be it further

Resolved, That copies of this resolution be sent to Members of Congress from this State and city, to Pennsylvania Senators, and to the Banking and Currency Committees of the Senate and House of Representatives.

sentativ

Respectfully, yours, SAML. S. DANIELS, Secretary.

Mr. President, I am aware of the fact that the selection of these cities is to be left, under the pending legislation, to a Federal board, which is expected to be nonpartisan, and that the number will be at least 8 and not more than 12. I only desire to take this opportunity to record what, in my opinion, is a unique situation in the banking world on account of the ancient and extraordinary history of the city of Philadelphia in connection with the Government and with finances. At the proper time the matter will, of course, be taken up with the Federal board and the claims of Philadelphia properly presented.

The PRESIDING OFFICER. The Chair understands that the Senator from Oklahoma [Mr. Owen] only temporarily withdrew his motion to lay on the table the amendment of the Senator from Nebraska to the amendment. The question now recurs on the motion of the Senator from Oklahoma to lay the amendment to the amendment on the table.

Mr. SHAFROTH. Mr. President, I have only a word to say in answer to the statement made by the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Colorado is

addressing himself now to the amendment offered by the Senator

Mr. SHAFROTH. I am simply about to make some observations in answer to the Senator from Michigan.

The PRESIDING OFFICER. Then the Chair will regard the motion of the Senator from Oklahoma as being still withheld.

Mr. SHAFROTH. Mr. President, I have only a word to say in answer to the statement made by the Senator from Michigan,

I have no apologies whatever to make for having in 1896 advocated a monetary system which had been in existence for more than 2,000 years. Our reasoning then was logical and it has

been verified by events subsequent to that time.

There is no question but that the production of gold was so small that it would not supply the demands of commerce. We were advocating more basic money. It was immaterial whether it was white money or whether it was yellow money; we felt that there was an insufficient supply of money in the world. Experience has demonstrated that that logic was absolutely true. If the gold mines had not yielded more of that money we would have had the conditions that existed in 1895, 1896, and 1897 upon us to-day, with probably increased conditions of distress and sorrow. So I have no apologies whatever to

I believed at that time that this Government was great enough and strong enough to establish bimetallism, and I based my belief upon the ground that we occupied a pivotal position among the nations of the world. At that time three-fourths of the nations were upon the gold standard and one-fourth upon the silver standard, with the United States occupying the pivotal position of one-fourth in importance in commerce, in manufacturing, and in all the other things that go to make a great nation, and by reason of that great power and that great strength it could have established the parity of the metals at that time. Since that time, of course, more nations have gone to the gold standard, and the result is that it becomes impossible now for one nation to do that. But at that time the situation was such, the exchanges of the country were such, that it seemed to me it was in the interest of humanity and justice, as the gold product was small, that we should advocate bimetallism. Our principles were exactly the same then as now, and our position was then taken by reason of the fact that we believed there was not sufficient basic money.

Mr. THOMAS and Mr. SMITH of Michigan addressed the

Chair.

The PRESIDING OFFICER. Does the Senator from Colo-

rado yield to his colleague?

Mr. SHAFROTH. I will yield in just a moment. By reason of the gold production since that time having largely increased, it has removed the strain to a large extent. I yield to my

Mr. THOMAS. I simply want to make the suggestion that my colleague might go one step further and say that if that great issue of bimetallism had been decided as it ought to have been decided the financial ills from which this country has suffered since then, and the question that is now before the Senate, would have been obviated.

Mr. SMITH of Michigan and Mr. REED addressed the Chair. The PRESIDING OFFICER. The junior Senator from Colo-

rado has the floor. Does he yield it, and to whom?

Mr. SHAFROTH. I was through. I merely wanted to make

that one observation.

Mr. SMITH of Michigan. I just wanted to say to the Senator in his time that I hope he did not construe anything I said as a reflection upon either his courage, his honesty, or his ability, because no man in this Chamber has a higher regard for the Senator from Colorado than myself.

Mr. SHAFROTH. Thank you.

The PRESIDING OFFICER. The Chair must remind the Senator from Michigan that his time has expired and, proceeding under the unanimous-consent agreement, he is entitled to speak but once.

Mr. SMITH of Michigan. I was interrupting the Senator from Colorado, and in his time; I may interrupt him under the

rule with his consent.

The PRESIDING OFFICER. The Chair inquired of the Senator from Colorado, and he informed the Chair that he had

Mr. SMITH of Michigan. I simply wanted the Senator from Colorado to understand that there is no personal reflection intended in what I said.

Mr. SHAFROTH. Certainly; I did not take it as personal. Mr. SMITH of Michigan. The Senator made very great sacri-

fices for the views he entertained. The Chair recognizes the Sen-

The PRESIDING OFFICER. ator from Missouri [Mr. Reed].

Mr. REED. Mr. President, the occasion of my inquiry has

passed. I was about to ask who started this filibuster.

The PRESIDING OFFICER. Then the question is upon the motion of the Senator from Oklahoma to lay upon the table the amendment offered by the Senator from Nebraska to the

Mr. HITCHCOCK and Mr. KERN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Goff	Myers	Smith, Ariz,
Bankhead	Gore	Nelson	Smith, Md.
Borah	Gronna	Norris	Smith, Mich.
Brady	Hitchcock	O'Gorman	Smith, Mich.
Brandegee		Oliman	Smith, S. C.
	Hughes	Oliver	Smoot -
Bristow	Jackson	Overman	Stephenson
Bryan	James	Owen	Sterling
Burton	Johnson	Page	Sutherland
Catron	Jones	Perkins	Thomas
Chamberlain	Kenyon	Ransdell	Thompson
Chilton	Kern	Reed	Townsend
Clark, Wyo.	La Follette	Robinson	Walsh
Colt	Lane	Saulsbury	Warren
Crawford	Lea	Shafroth	Weeks
Cummins	Lewis	Sheppard	Williams
Dillingham	Lippitt	Sherman	Works
Fletcher	McCumber		WOLKS
Gallinger		Shively	
Gainnger	Martine, N. J.	Simmons	

The PRESIDING OFFICER. Seventy Senators have answered to their names, and a quorum is present. The Secretary will now call the roll on the motion of the Senator from Oklahoma to lay the amendment of the Senator from Nebraska to the amendment on the table.

The Secretary proceeded to call the roll. Mr. NELSON (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. BACON]. I believe he is not present, and I withhold my vote on that account. If I were at liberty to vote, I would vote "nay."

Mr. SMITH of Arizona (when his name was called). I again announce my pair with the Senator from New Mexico [Mr. FALL] and withhold my vote. If I were at liberty to vote, I would vote "yea."

Mr. STERLING (when his name was called). I again announce my pair with the senior Senator from Louisiana [Mr. THORNTON]. If at liberty to vote, I should vote "nay."
Mr. REED (when Mr. Stone's name was called).

the announcement with reference to my colleague, the Senator from Missouri [Mr. Stone], which I made on the last vote.

Mr. SUTHERLAND (when his name was called). whether the Senator from Arkansas [Mr. CLARKE] has voted? The PRESIDING OFFICER. He has not voted.

Mr. SUTHERLAND. I have a pair with that Senator, and therefore withhold my vote.

The roll call was concluded.

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. WILLIAMS (after having voted in the affirmative). wish to inquire if the senior Senator from Pennsylvania [Mr. Penrose] has voted?

The PRESIDING OFFICER. He has not.
Mr. WILLIAMS. The Senator from Pennsylvania was in the Chamber a moment ago, and I was under the impression that he had voted. I have a pair with him, and therefore I withdraw my vote.

Mr. KERN. I desire to announce that the senior Senator from Georgia [Mr. BACON] has been called away from the Chamber on important public business. If he were here, he would vote "yea." He is paired with the Senator from Minnesota [Mr. Nelson].

The result was announced—yeas 41, navs 37, as follows:

STATE OF THE STATE	YE	AS-41.

So Mr. HITCHCOCK's amendment to Mr. Owen's amendment was laid on the table.

city banks.

Mr. HITCHCOCK. Mr. President, I now offer an amendment to section 19 of the amendment of the Senator from Oklahoma [Mr. Owen], designed to change some of the reserve requirements of the Owen bill.

The PRESIDING OFFICER. The amendment to the amendment proposed by the Senator from Nebraska will be stated.

The Secretary. In section 19 of Mr. Owen's amendment, on page 47, it is proposed to strike out the last three lines on the page, all of page 48, and on page 49 down to and including line 17, and to insert:

17, and to insert:

(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its net deposits, as follows:

In its vaults, four-twelfths thereof.

In the Federal reserve bank of its district, for a period of six months after said date, one-twelfth, and for each succeeding six months an additional one-twelfth, until four-twelfths have been so deposited, which shall be the amount permanently required.

After said period said reserves, other than those hereinbefore required to be held in the reserve bank, may be held in the vaults of the member bank or in the Federal reserve bank, or in both, at the option of the member bank.

(b) A bank in a reserve or a central reserve city, as now or hereafter defined, shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its net deposits, as follows:

In its vaults, five-fifteenths thereof.

In the Federal reserve bank of its district for a period of six months after the date aforesaid at least one-fifteenth, and for each succeeding six months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

Mr HITCHCOCK Mr President as this bill came from the

Mr. HITCHCOCK. Mr. President, as this bill came from the other House it provided for the sudden transfer of reserves into the reserve banks. That would probably have produced such a shock upon the country and upon the banking interests as to have resulted in an enormous contraction of bank credits and possibly in a panic. The section of the committee to which I belong realized that to set this enormous machinery in motion suddenly would be a great mistake. We therefore reported in favor of transferring one-twelfth of the reserves each 6 months until, in the course of 30 months, the whole transfer should have been made. It is the difference between the setting of a piece of machinery gradually in motion and setting it violently and suddenly in motion. To some extent the section of the committee headed by the Senator from Oklahoma has adopted our plan, but the Owen bill still provides that immediately, or within 60 days, three-twelfths in the case of the country banks and three-fifteenths in the case of the city banks shall be transferred to the reserve banks. It is for the purpose of correcting this sudden transfer and making the beginning gradual that the amendment to the amendment has been offered.

Mr. BURTON. Mr. President, it seems to me one of the defects of this bill is its disregard of the vital changes in our whole banking system which will ensue from the adoption of this measure. The banking business in the United States is an evolution. In earlier years the banks were chartered by States, save in the case of the two United States Banks, and the greatest diversity of regulation prevailed concerning capital, reserves, and note issues. That caused confusion, and losses were very frequent. Bank franchises were granted as a mark Failures were very numerous. Probably, of political favor. without any exception, our banking system was the worst in the world. Among the worst features were confusion regarding note issues and also the lack of sufficient security to protect them

While the primary object of the national banking system was to sustain the Federal Government during the Civil War by providing a market for bonds, another argument was urged, that the system would substitute order and uniformity for confusion. After the adoption of the national banking system under the act of 1863 and its amendments in 1864 a general preference prevailed for the national banks. That continued for many years, but the last two decades have witnessed a great growth of trust companies and an increase in the number of State banks. Whatever may have been the evolution, the result is that we now have a banking system with well-established relations. bank in a smaller city in a season which is slack in that neighborhood deposits its surplus with a bank in a larger city, and in a season where large demands are made upon the smaller bank it relies upon the larger banks. The relations between them are very close. The attitude of the larger institutions may almost be called paternal. These ties between the different institutions have grown up under father, son, and even grandson in the related institutions. Our banking is fixed; accommodations are obtained at certain places and in a certain way; and reserves are located with particular banks. This whole system can not be revolutionized in a year, nor even in two or three years.

One of the greatest dangers from this measure is the transition from our present methods. I think the question of its ultimate success will depend very largely on the management of the Federal reserve board, but I do not feel that sufficient thought has been given to the difficulties which will attend a change from the established methods and relations which now prevail in the banking business to those which must exist when this plan is adopted. The Senate should welcome any proposition likely to make the wrench less violent in the change from the present relations concerning reserves and the varied relations of banking to the conditions which will be created by this bill. So I hope that the Senate will adopt the amendment offered by the Senator from Nebraska.

Mr. BRISTOW. Mr. President, Senators on the other side who have any interest in this legislation, if there are any, should examine the provisions of this paragraph with some care. The Senator from Ohio [Mr. BURTON] has well said that the reserves of the country are now scattered in something over 350 banks located in 50 cities. Under the bill these reserves will be transferred from these 350 banks located in 50 cities to 8 or 12 banks located in 8 or 12 cities. Take the cities of Kansas City, St. Joseph, Omaha, and Wichita, which are all reserve cities. They all have in their vaults the reserves of country banks. These reserves will have to be transferred from these banks, possibly to St. Louis, which will probably be the location of the reserve bank in that region. When that money is transferred from these reserve cities, of course the banks will have to collect it, because it is now being loaned; it is now serving its purpose in those communities. The collecting of the money for transfer and its idleness during this transition period inevitably will contract the credit of that portion of the country that depends upon these reserve cities and the reserve-

With a view of making that contraction as small as possible, the branch of the committee which reported the bill known as the Hitchcock bill provides in the amendment the Senator from Nebraska has offered that it should be done 1 per cent for each six months until the 4 per cent of the reserves of the country banks are transferred, and also the 6 per cent of the reserves of the reserve city banks and the central reserve city banks. We believe that with 1 per cent each six months being transferred, the transition will be so moderate that it will not cause any material contraction of loans, and will not cause any great disturbance.

The section of the committee which framed the bill as reported by the chairman [Mr. Owen] have improved their original bill very much by adopting some of the provisions which were incorporated in the Hitchcock bill, but still they propose to collect 2 per cent immediately instead of 1 per cent, and that additional 1 per cent will aggregate many millions of dollars the country over. It seems to me that there is no argument in favor of their proposition as against the one which we

It is a very interesting situation. If the committee had not separated, if the chairman and his associates had not withdrawn and refused longer to cooperate with the other six members of the committee, I have not the slightest doubt that this provision of the Hitchcock bill would have been adopted by the full committee, because they are manifestly better: nobody can deny that; but not having been approved of by the Democratic caucus, it makes no difference how meritorious they are or how strongly they might appeal to the judgment of Senators on the other side of the Chamber, they would not vote for them.

It is apparently useless to stand here and present an argument in favor of a proposition under such circumstances. our only duty was to appeal to Senators on the other side who are not free to recognize individual judgment, who can not vote their convictions because they have agreed not to do so unless the majority of the caucus approve those convictions, it would be really useless, so far as they are concerned, to present any arguments. I suppose that apparent situation is what led the Senator from Indiana [Mr. Kern] yesterday to suggest that this was an idle and useless debate. There are some of us, however, who believe that there is sufficient intelligence and a sufficient sense of discrimination on the part of the American public to warrant us in presenting such amendments as these and in briefly submitting our views in the hope and belief that in the end they will meet the favorable consideration of that intelligent public. Believing that, I feel we have a duty which we owe to the country to expose the legislative situation in which we find ourselves

I have great respect individually for many of the Senators on the Democratic side; I have cooperated with them in the last four years a great deal; I have been somewhat criticized

for doing so by my Republican friends and praised very much by my Democratic friends for my independence in voting as I thought I ought to vote and in favor of things which I believed were right, and it has been a grave disappointment to me to find that when the political evolution takes place and there is a change in the majority of this Chamber from this side to that those who praised me most and commended my independence in the most earnest and enthusiastic manner now utterly fail to exercise any independence themselves and bow with absolute subserviency to the caucus yoke. As the Senator from Minnesota [Mr. CLAPP] said the other day, if I had been told a year ago that Senators on the other side would have voted for the things for which they have voted during the last 10 days and against the things which they have voted against, I would not have believed it. Nothing could have made me believe that such a thing could occur except the actual visible evidence of it having occurred.

I trust before this debate closes-which will not be very long now, for we will be able to wind up the consideration of this bill some time to-morrow—that there may be some visible demonstration on the part of the Democratic membership that will show an independence of thought and of action, and that this slavish subservience to caucus rule, which is a remnant of political barbarism, may be broken.

I think this amendment ought to be adopted.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK] to the amendment of the Senator from Oklahoma [Mr. Owen].

Mr. HITCHCOCK. I call for the yeas and nays.

Mr. OWEN. I move to lay the amendment to the amendment on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Oklahoma to lay on the table the amendment of the Senator from Nebraska to the amendment of the Senator from Oklahoma.

Mr. HITCHCOCK. On that motion I call for the yeas and

nays.

The yeas and nays were ordered, and the Secretary proceeded

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burteigh] and vote "nay."

Mr. NELSON (when his name was called). I have a gen-

eral pair with the senior Senator from Georgia [Mr. BACON]. and on that account I withhold my vote. If at liberty to vote,

should vote "nay."

Mr. SMITH of Arizona (when his name was called). announce my pair with the Senator from New Mexico [Mr. Fall]. I find, however, that I can transfer that pair to the Senator from New Hampshire [Mr. Hollis] and vote. I vote "yea."

Mr. STERLING (when his name was called). I again announce my pair with the senior Senator from Louisiana [Mr. THORNTON]. If at liberty to vote, I should vote "nay."

Mr. REED (when Mr. STONE's name was called). I renew the announcement I made this morning regarding the absence and pair of my colleague [Mr. STONE]. If he were present, he would vote "yea."

The roll call was concluded.

Mr. SUTHERLAND. I am informed that the Senator from Arkansas [Mr. Clarke] has not voted. Is that correct?

The PRESIDING OFFICER. The Chair is informed that that is correct.

Mr. SUTHERLAND. I have a pair with that Senator and

therefore withhold my vote,
Mr. WILLIAMS (after having voted in the affirmative). Understanding that the senior Senator from Pennsylvania [Mr. PENROSE] has not voted upon the roll call, I wish to withdraw

my vote, as I have a pair with him.

Mr. BURTON. I should like to inquire if the senior Senator

from Kentucky [Mr. BradLey] has voted? Mr. KERN. Mr. President—

The PRESIDING OFFICER. The Chair is informed that the Senator from Kentucky has not voted.

The Senator from Kentucky has not voted. Mr. BURTON. I understand that he is unavoidably detained

from the Chamber, and that he is paired with the senior Senator from Indiana [Mr. Kern].

Mr. KERN (after having voted in the affirmative). at this moment trying to get the floor to withdraw my vote on account of being paired with the Senator from Kentucky [Mr.

Bradley]. I ask that my vote be withdrawn.

I now desire to inquire if the senior Senator from Nevada {Mr. NEWLANDS] has voted?

The PRESIDING OFFICER. The Chair is informed that

Mr. KERN. Then I transfer my pair with the senior Senator from Kentucky [Mr. Bradley] to the Senator from Nevada [Mr. Newlands] and will allow my vote to stand.

The result was announced-yeas 40, nays 35, as follows:

YEAS-40

So Mr. HITCHCOCK's amendment to the amendment of Mr. Owen was laid on the table.

Mr. OWEN. Mr. President, I move, on page 3, lines 19

Mr. BURTON. May I ask which print this is? Mr. OWEN. This is the print of December 1, 1913, of the amendment intended to be proposed by Mr. Owen in the nature of a substitute

Mr. BURTON. That is the one containing the substitute reported by the Senator and not the original Glass bill?

Mr. OWEN. The substitute that I am proposing to perfect.

BURTON. The one marked "Print of December 1, 1913 "?

Mr. OWEN. Yes; at the top of the page it is marked "Print

of December 1, 1913."

On page 3, in lines 19 and 20, I move to strike out "engaged in commercial banking" and insert, after the word "Columbia," in line 20, the words "incorporated under an act of Congress approved October 1, 1890." It is intended to take care of the trust companies of the District of Columbia.

Mr. BURTON. What is the object of that amendment?
Mr. OWEN. The object of it is to describe more aptly the trust companies in the District of Columbia, some of which are not engaged in commercial banking. I therefore move to strike out the words "engaged in commercial banking" and insert the descriptive words "incorporated under an act of Congress approved October 1, 1890."

Mr. BURTON. Would the amendment increase the number of eligible banks, or those required to come in, or would it diminish the number?

Mr. OWEN. It would result in increasing the number. Mr. BURTON. If they are not engaged in commercial banking, why should they be required to come in under this system? Is it not the general purpose of the bill to include banks, National and State, engaged in commercial operations, discounting short-time paper, rather than those performing a trust business or making long-time loans and investments?

Mr. OWEN. The purpose is to require institutions which are holding charters from the United States to take part in this system. They do really engage in a banking business, but the term "engaged in commercial banking" was thought to be somewhat uncertain in its description. It was upon the suggestion of the American Security & Trust Co. that this language was proposed to be changed so as to include all trust companies incorporated under an act of Congress approved October 1, 1890.

Mr. BURTON. I was a member of the District Committee at the time the act of 1890 was passed. Its main object was to establish in the District trust companies at that time-a new form of banking business. It was debated at some length. My only question here—I have no special knowledge about it—is whether the words "engaged in commercial banking" ought not to be retained, because that is the class of institutions which I understand the bill intends to include.

However, I do not have sufficient information about the matter to speak positively. The Senator from Oklahoma is more ac-

curately informed about it than I am.

Mr. OWEN. I understand there is no doubt that they are really engaged in the banking business, but they do not call themselves commercial banks; and they objected to this descriptive term, thinking it might be held as not accurately de-

Mr. BURTON. Certainly in their original organization they

were more nearly trust companies.

Mr. OWEN. Yes; but in point of fact they do really engage in banking, but they take securities in the form of stocks or bonds as security for their paper instead of making straight

discounts without such classes of securities.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma to the amendment here-

tofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 4, in line 24, I move to strike out the words "engaged in commercial banking," and in line 25 to insert "incorporated under an act of Congress approved October 1,

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The SECRETARY. In the same amendment, on page 4, lines 24 and 25, it is proposed to strike out the words "engaged in commercial banking," and, after the words "District of Columbia," in line 25, to insert "incorporated under an act of Congress approved October 1, 1890."

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma to the amendment here-

tofore offered by him.

The amendment to the amendment was agreed to.
Mr. OWEN. On page 11, after line 21, I move to insert, after
the word "privilege," the words "except that the issue of such notes shall not be limited to the amount of capital stock of such Federal reserve banks.'

These words eliminate what might possibly have been regarded as ambiguous under the language of the eighth para-

graph of that section,

Mr. BURTON. Mr. President, I do not expect to oppose that amendment, or, at any rate, to ask for the yeas and nays on it; but it seems to me the whole paragraph is dangerous. It departs from the present law and the method which has been in vogue for 50 years, under which the total currency that any national banking institution can issue is limited to the amount As has been stated here several times, a bank of its capital. that had a paid-in capital of only a million and a half dollars could conceivably issue \$100,000,000 of notes. It would be under the obligation of retaining the 5 per cent reserve against those hundred millions. It altogether destroys the proportion which has existed since the passage of the national banking act in 1863. Again, it tends to continue indefinitely the circulation known as the national banking currency, based upon Government bonds.

I do not believe our monetary system will ever be perfect until that class of circulation, so rigid and called by some a sodden mass, is abolished and something else substituted for it.

Of course, that can not be done immediately; but it seems to me in all our monetary legislation we should aim to withdraw the whole amount of that bond-secured circulation as soon as we can without derangement. It is not a natural method of furnishing the basis for circulating notes. It has not been retained to any considerable extent in other countries where it For example, in Japan it was tried and then abandoned. It is subject to a number of serious objections.

First of all, there is its rigidity, its inability to respond to the changing demands of trade. It requires the maintenance of bonds as an investment whether the agency which issues circulation desires those bonds or not, and moreover it carries along our national debt on a very artificial basis. very naturally been gratified by the fact that for a number of years the United States has carried the larger share of its indebtedness at 2 per cent, but that is due to this artificial arrangement. I am not sure but that fact has at some times been an incentive to extravagance in our expenditures, because it could be said, "We are borrowing money so cheaply; we are paying only 2 per cent for it.'

Mr. NELSON. Mr. President, I should like to have the

amendment stated again. I do not understand it.

Mr. OWEN. I just wish to state briefly that the amount of 2 per cent bonds of 1930 was \$646,000,000, of which \$616,000,000 has been already absorbed to secure circulation and to secure deposits of public moneys in the banks, leaving only \$30,000,000 of the Panama twos of 1930 available. Of the Panama twos of 1936 there were \$54,000,000 issued, and \$54,000,000 having been used for circulation and to secure public deposits. Of the remaining twos of the \$30,000,000 issued for 1938, \$29,000,000 of the Panama twos of 1930 available.

have been absorbed. The possibility in this case for the entire reserve banking system would be only about \$40,000,000, including the twos which are now used as a reserve against the public deposits; so there is no possibility of abuse in this matter. It is safeguarded by the management of the reserve bank and also by the supervision of the reserve board.

It is not believed there is any danger whatever of any harm coming from this. It is merely a permission. It is not a requirement. These banks have also the double liability, amounting altogether to about \$212,000,000, while the bonds available could reach only \$40,000,000.

Mr. BURTON. Mr. President, will the Senator from Okla-

homa yield to me for a question?

Mr. OWEN. Certainly. Mr. BURTON. What is the relation of paragraph 8, on

page 11, to section 18?

Mr. OWEN. Paragraph 8 is permissive. Section 18 is compulsory. It permits the Federal reserve board to require the banks to take certain of these bonds and issue notes against them.

Mr. BURTON. Suppose the Federal reserve bank takes over bonds under the provisions of section 18. What is to prevent that bank from using them to an almost unlimited amount

under paragraph 8.

Mr. OWEN. I have just stated how they could not be used in an unlimited amount, because there are only \$40,000,000 of them altogether, and the double liability and stock of these banks make a gross amount of \$212,000,000, while the banks are also safeguarded by the supervision of the reserve board as well as the directors of the Federal reserve bank.

Mr. BURTON. I recognize all that, Mr. President; but under the provisions of section 18 the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase bonds for the withdrawal of which an application has been made by any member bank. Now, suppose the Federal reserve bank purchases them; why can it not utilize them under para-

graph 8?

Mr. OWEN. It could do so under either. The one permits the Federal reserve board to require, and the other is purely

permissive on the part of the Federal reserve bank.

Mr. BURTON. Then there is nothing to prevent the acquisition of bonds under section 18 and enlarging the class of circulating notes authorized by paragraph 8 to an amount far beyond \$40,000,000, is there? That is, the Federal reserve board could direct the Federal reserve bank to take these bonds, and when the Federal reserve bank had acquired them it could issue circulation under this paragraph, could it not?

Mr. OWEN. Yes; that is true. It is also true, however, that the national-bank system has been gradually expanding, and there is a call for these bonds by the new banks coming into the system which are absorbing them quite rapidly. It is not believed that many of the national banks will leave the system, but if they do, and want to sell these 2 per cent bonds, we would like to give them a market that will take care of the 2 per cent bonds, and not contract our national-bank currency. That is the object of it.

Mr. BURTON. Right in that connection, is it anticipated that under this bill the present amount of national-bank-note currency of \$730,000,000 or thereabouts will continue outstanding, either under this paragraph or under section 18?

Mr. OWEN. It will continue outstanding.

Mr. BURTON. Permanently?

Mr. OWEN. So far as this bill is concerned as amended in the Senate. The House bill has a provision requiring the compulsory retirement of those bonds in 20 years. We thought that matter should be discussed in an independent bill, so that we could consider the question of retiring the national-bank currency and the unification of our currency and putting the whole currency system in a better and more intelligent form as a separate measure

Mr. BURTON. Does not the Senator from Oklahoma believe it would be better if that class of circulation should be gradually withdrawn, at least as rapidly as was provided by the

House bill?

Mr. OWEN. I do; yes. Mr. BURTON. As I understand it, the Senate provision varies from the House provision because it was considered best to take up that subject in a separate measure?

Mr. OWEN. That was the motive that moved the members of the committee who agreed with the chairman in this draft.

Mr. BURTON. Is not that, after all, an essential part of the plan that you are seeking to adopt? Is it not necessary to know what will become of those national-bank notes?

Mr. OWEN. As far as this measure provides, it permits the

Federal reserve banks to absorb so much of these bonds as the

national banks may relinquish and to issue against such bonds notes of like quantity, in that way avoiding the contraction which would occur if the national banks were to throw their bonds on the market and sell them and retire their circulation.

Mr. BURTON. What would be the status of a national bank which had a large circulation but which did not come into this system? It would have to pay off its notes, I suppose. What

would be the status of those bonds?

Mr. OWEN. It would be the owner of the bonds, and when it went out of the system it would no longer have the right to keep the national-bank notes in circulation, but would have to put lawful money in the United States Treasury against those national-bank notes. Consequently the circulation would be contracted to that extent, because these national-bank notes would be retired and canceled or destroyed, and the destruction of that amount of our national currency would constrict the currency of the country. It would do more than that, however. It would constrict ten times as much credits, because about \$10 of credit is based upon \$1 of these notes.

Mr. BURTON. Under this plan, if all or most of the notes based on Government bonds are to continue in circulation, is there any probable necessity in the future for issuing any very

large amount of these Federal reserve notes?

Mr. OWEN. The purpose is to replace any national-bank notes that might be retired and canceled and destroyed, and therefore withdrawn from circulation, by a like amount of these Federal reserve bank notes-not Federal reserve notes, but Federal reserve bank notes. It would be, however, merely a temporary expedient. As I explained to the Senator, it is believed that we should have a bill dealing expressly with the unification of our national currency, and in that contingency I should be in accord with the Senator in the retirement of this kind of bank notes secured by bonds.

Mr. BURTON. I trust something may be done in that di-I really think it is the most urgent need in the

reformation of our currency.

Mr. NEWLANDS. Mr. President— The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Nevada?

Mr. OWEN. I yield to the Senator.

Mr. NEWLANDS. Did I rightly understand the Senator to say, as to the retirement of these national-bank notes, that it would mean not only a contraction to that extent but the contraction of credits issued upon them to the extent of \$10 to \$1?

Mr. OWEN. To the extent that they are used as reserves by banks. There are about \$60,000,000 of these notes used as reserves by the State banks, and sometimes the amount goes up as high as \$100,000,000.

Mr. NEWLANDS. They are not, however, under the existing system allowed to be a part of the reserves of the national

Mr. OWEN. Not a part of the reserves of the national banks; but they serve the function of reserves for the State banks, which carry a still higher volume of credits upon the money

in their vaults, as the Senator well understands.

Mr. NEWLANDS. I wish to inquire whether, under this bill, the national-bank notes would constitute a part of the reserves

of member banks coming into this system?

Mr. OWEN. It is provided in the bill that the Federal reserve board may allow that to be done to the extent they find necessary.

Mr. NEWLANDS. I regard that as quite a dangerous power. Mr. OWEN. I have most abundantly explained the matter heretofore. I will call the attention of the Senator again at this time to the tables on page 18 of the report of the chairman of the committee, showing that if the national banks avail themselves of one-half of the resources of the Federal reserve bank by borrowing its resources to that extent there will be a surplus of \$114,000,000 of cash, but that if the State banks come in and avail themselves likewise of the right to borrow one-half of their contributions to the Federal reserve bank it would make a deficit of \$239,000,000, leaving a total deficit of \$100,000,000. makes necessary the use of a part of the national-bank notes or a part of the Federal-reserve notes as reserves, in order to prevent a contraction of credit to meet that requirement of the

Mr. NEWLANDS. So far as I am individually concerned, I should much prefer to give the banks a longer time in which to come up to the requirements of this act rather than to authorize them to put in their reserves mere promissory notes for money in the shape of bank notes, either national-bank notes or reserve notes. I hope that matter will receive the attention of the committee. I realize, of course, that if all the State banks should come into this system it would mean that the reserves of those

banks must be increased from the present average of 8 per cent up to about 14 per cent.

There will be 12 per cent and 15 per cent for reserves and 18 per cent for the central reserve cities. I imagine that the aver-

age would be about 13 or 14 per cent.

I can realize, of course, that if State banks were suddenly called upon to increase their reserves they might find it very difficult to do it except by reducing their loans, which, in turn, would reduce their deposits and thus bring their reserves within proper proportions. We do not want to force these State banks coming into this organization to reduce either their loans or their deposits, for that would mean a system of contraction which would be injurious to the country. Hence, I would much more readily provide that the State banks whose reserves are now not equal to the requirements of this act should have four or five years, or even longer, under the direction of the reserve board, to bring up their reserves to the percentage required by this act, rather than permit them to put in their reserves national-bank notes-mere promises to pay money which under a good banking system I understand has always been condemned.

The VICE PRESIDENT. The time of the Senator from Okla-

homa has expired.

Mr. NEWLANDS. I hope the committee will further consider it.

Mr. NELSON. I would like to have the amendment read.

The VICE PRESIDENT. The amendment to the amendment shall be read.

The Secretary. In section 4, amendment to paragraph 8, page 11, line 21, after the word "privilege," insert a comma and the following words:

Except that the issue of such notes shall not be limited to the amount of the capital stock of such Federal reserve bank.

Mr. NELSON. Mr. President, in the remarks which I have heretofore made on this bill I explained and called attention to the fact that the bill really perpetuates the existing bond-secured currency exactly in the form that it is to-day, and perpetuates it as long as the life of the bonds.

Paragraph 8, relating to the powers of Federal reserve banks,

is as follows:

Eighth. Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law which relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege.

So these reserve banks may take out on bonds exactly the same kind of national-bank notes that we have now. the existing law a national bank can not take out notes beyond the amount of its capital. The amendment which is offered removes that limitation so that the regional banks can take out all the circulation they want. It is only a question as to how

many bonds they can get hold of.

Section 18 must be considered in connection with that provision. That allows member banks that desire to retire the circulation of the national-bank notes to apply to the reserve board, and if the reserve board grants the permission, the regional banks are required to take up those bonds and retire that circulation; but instead of using the bonds as an investment or for any other purpose, they are absolutely required to take out new circulation of the same kind. I will read the provision:

The Federal reserve banks purchasing-

Remember that they are required to purchase those bonds-

The Federal reserve banks purchasing such bonds shall be required to take out an amount of circulating notes equal to the amount of national-bank notes outstanding against such bonds.

Upon the deposit with the Treasurer of the United States bonds so purchased, or any bonds with the circulating privilege acquired under section 4 of this act, any Federal reserve bank making such deposit in the manner provided by existing law shall be entitled to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited. Such notes shall be the obligations of the Federal reserve bank procuring same, and shall be in form prescribed by the Secretary of the Treasury, and to the same tenor and effect as national bank notes now provided by law.

They shall be issued under the same terms and conditions as national-bank notes.

Now, the only provisions of the bill that relate to the refunding of bonds are for bonds that have no circulation on them.

United States bonds bought by the Federal reserve bank, against which there are no outstanding national-bank notes, may be exchanged at the Treasury for one-year gold notes—

We have \$743,438,000 of bonds outstanding on which there is national-bank circulation. The provisions of the bill that I have referred to practically keep that circulation in existence as a bond-secured currency, exactly identical with what we have.

The bill contemplates that that currency is to remain in circulation indefinitely, just as we have had it. So it brings it to this: That the bill, with all its machinery, as now amended, simply provides for an emergency currency beyond and as an addition and supplement to the national-bank notes. The Glass bill was entirely different. That provided for the gradual retirement of these national-bank notes and the substitution of new notes at the rate of 5 per cent a year, taking 20 years to accomplish the task. That is eliminated from this bill. The only bonds that can be renewed or refunded, as it were, are \$223,-852,240. Our total amount of bonded indebtedness is \$966,823,-490, and out of those bonds \$743,000,000 are outstanding and secured for circulation.

Mr. BURTON. What was the total amount out of which the \$743,000,000 was taken?

Mr. NELSON. The total amount was \$966,823,490 of bonds outstanding, on which there is a circulation of \$743,438,000, leaving simply a residue of \$223,852,000 of bonds that can be refunded under this bill into 3 per cent per year gold notes.

That is the extent of the refunding provision in this bill.

So, to summarize the effect of the power conferred by para-

graph 8, relating to the powers of the regional banks, and the requirement of section 18 that I have quoted, it simply means the continuance and perpetuation of the entire volume of our bond-secured currency in its present form without any limitation, leaving only a little over \$223,000,000 of our outstanding bonds to be refunded.

The VICE PRESIDENT. The question is on the amendmentproposed by the Senator from Oklahoma to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 12, line 24, I move to strike out the word "respectively" and the word "and," inserting after the word "agriculture" the word "or" and after the word "other" inserting the word "industrial," so that line 24 will read:

In commerce, in agriculture, or in some other industrial pursuit.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma to the amendment.

Mr. BURTON. The object of that is to allow the selection of three in commercial or three in agricultural or three in industrial pursuits?

Mr. OWEN. Yes; without the strict limitation of the text.
Mr. BURTON. Not one of each?
Mr. OWEN. To leave the matter open, so as to avoid the complication which the Senator from Ohio pointed out the other

The amendment to the amendment was agreed to.

Mr. OWEN. On page 13, line 2, after the words "reserve board," I move to insert:

When the necessary subscriptions to the capital stock have been obtained for the organization of any Federal reserve bank, the Federal reserve board shall appoint the class C directors herein provided for and shall designate one of such directors as chairman of the board to be selected. Pending designation of such chairman, the organization committee shall, as provided in this section, exercise the powers and duties appertaining to the office of chairman in the organization of such Federal reserve bank.

The amendment is self-explanatory. I think it needs no

further explanation.

Mr. BURTON. If the Senator from Oklahoma will yield, is it not provided here that in case there is a public subscription of stock—that is, stock subscribed for by private individuals or by the Government-the directors of class C shall vote upon it? How could there be any organization? As I understand it, this does not contemplate that they should be chosen until the organization occurs.

Mr. OWEN. It is made the duty of the chairman of the proposed board belonging to class C to receive the list of the electors and to furnish them with forms, and so forth. I call

for the question, Mr. President.

The amendment to the amendment was agreed to.
Mr. OWEN. On page 13, line 8, after the word "situated,"
I move to insert the words "or pending the appointment of such chairman, the organization committee," so that the language will

The chairman of the board of directors of the Federal reserve bank of the district in which the bank is situated, or pending the appointment of such chairman, the organization committee shall classify the member banks of the district into three general groups or divisions.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 13, line 8, after the word "situated," Insert "or pending the appointment of such chairman, the organ-ization committee."

The amendment to the amendment was agreed to.
Mr. OWEN. On page 13, in lines 16 and 17, I move to strike out the words "one of its own members as."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 13, lines 16 and 17, strike out the words "one of its own members as," so as to read:

At a regularly called meeting of the board of directors of each member bank in the district it shall elect by ballot a district reserve—

And so forth.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 14, line 1, I move to strike out the words "upon the list" and insert the words "of a director of class A and class B, respectively." That relieves an obscurity which the Senator from Ohio [Mr. Burton] discussed several

days ago.

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. On page 14, line 1, after the word "choices," strike out the words "upon the list" and insert the words "of a director of class A and class B, respectively."

The amendment to the amendment was agreed to.

Mr. OWEN. On page 19, line 24, after the word "bank," I move to insert "and failed member trust companies in the District of Columbia."

Mr. CLARKE of Arkansas. Mr. President, in connection with that amendment I wish to make an inquiry. Will the adoption of the amendment leave the general proposition in such a condition that the conferees on the part of the two Houses may consider the proposition to include State member banks?
Mr. OWEN. It does.

Mr. CLARKE of Arkansas. It leaves that question within

reach of the conferees.

Mr. BURTON. Mr. President, we can not in this part of the Chamber hear the discussion.

Mr. CLARKE of Arkansas. I asked the Senator from Okla-homa if the adoption of the pending amendment would leave the general proposition of guaranteeing deposits in such a condition that the conferees on the part of the two Houses might consider the proposition of including qualified State banks that had become members of the association, and the Senator from Oklahoma answered that it did. That is all I care to say about it.

The VICE PRESIDENT. The Secretary will state the

amendment to the amendment.

The Secretary. On page 19, line 24, after the word "bank," insert "and failed member trust companies in the District of Columbia."

Mr. OWEN. They would not have been included under the term "national banks," and there was a desire to include them

in this provision.

Mr. WEEKS. Mr. President—

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Massachusetts?

Mr. OWEN. I yield.

Mr. WEEKS. There is an amendment which I wish to offer at this point, but if the Senator from Oklahoma would like to finish his amendments, I will withhold it.

Mr. OWEN. I would be glad to finish the amendments I have

Mr. BRISTOW. I desire to say, if the Senator will yield, that I have two amendments to offer to section 7, when he gets

Mr. OWEN. Very well.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Oklahoma to his amendment.

Mr. HITCHCOCK. I should like to have the amendment to the amendment stated.

The VICE PRESIDENT. It will be read.

The SECRETARY. After the words "failed national banks," in lines 23 and 24, page 19, insert the words "and failed member trust companies in the District of Columbia."

Mr. HITCHCOCK. That still leaves out the State banks,

then?

It does,

Mr. HITCHCOCK. Is it not the purpose of the Senator from Oklahoma to include State banks?

Mr. OWEN. Not at this time.
Mr. HITCHCOCK. Is it expected to do it at some subse-

Mr. OWEN. I thought possibly that might be done by the Democratic conference when they had an opportunity to pass n it. They have not had any opportunity to pass on it yet.

Mr. HITCHCOCK. Would it not be wise to leave the whole

thing to the Democratic caucus?

Mr. OWEN. This will not preclude the suggestion of the Senator.

Mr. HITCHCOCK. It shall have to be rewritten then. Mr. OWEN. It need not, because the word "member" can be inserted before "national banks."

Mr. HITCHCOCK. I call the attention of the Senator to the fact that as it is drawn now it provides for the payment of money into the Treasury of the United States. I think it is very doubtful whether the Treasury of the United States can hold trust funds for State banks.

Mr. OWEN. It can under an instruction of Congress.

Mr. HITCHCOCK. I doubt that very much.

Mr. OWEN. They do that for private individuals.
Mr. HITCHCOCK. They can hold the trust funds for the reserve banks of which the State banks are members, but when you involve the Treasury of the United States, I doubt if you can go any further than the national banks.

Mr. CLARKE of Arkansas. Mr. President, the suggestion made by the Senator from Oklahoma [Mr. Owen] makes it necessary for me to submit an additional observation. When I spoke of a conference, I had reference to the usual conference committee appointed by the respective Houses to adjust differences between the two Houses, and not to the Democratic conference

Mr. OWEN. I understood that.

The VICE PRESIDENT. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 20, line 4, after the word "shall," I move to insert the words "in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall." I send the amendment to the

The VICE PRESIDENT. The amendment proposed by the Senator from Oklahoma to the amendment will be stated.

The Secretary. On page 20, line 4, of the amendment of Mr. Owen, after the word "shall," it is proposed to insert the words "in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall," so that if amended it will read:

All net earnings derived by the United States from Federal reserve banks shall, in the discretion of the Secretary, be used to supplement the gold reserve held against outstanding United States notes, or shall be applied to the reduction of the outstanding bonded indebtedness of the United States, etc.

The VICE PRESIDENT. The question is on the amendment

to the amendment,
Mr. THOMAS. I should like to inquire of the Senator from Oklahoma whether that is offered by the desire of the Secretary

of the Treasury?

Mr. OWEN. It was offered by the direction of the Democratic conference held last evening, upon the suggestion of the Secretary of the Treasury, and upon a discussion of the matter in which it was thought that it was justified to use this if it might possibly be found necessary. There were some differences of opinion about it, but it was adopted, and so I have offered it.

Mr. THOMAS. It seems to me that the best use that could be made of a surplus, if we have any, would be to reduce the

outstanding interest-bearing debt.

Mr. OWEN. It is provided both in this section and

Mr. THOMAS. It gives discretion to the Secretary to do one or the other. I should like to see it mandatory, to be used for the purpose of reducing the debt.

The VICE PRESIDENT. The question is on the amendment

to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. Mr. President, in lieu of section 8 of the amend-

ment I send to the desk a proposed substitute.

The VICE PRESIDENT. The amendment proposed by the Senator from Oklahoma to the amendment will be stated.

The Secretary. On pages 20 and 21 it is proposed to strike

out section 8 as printed in the proposed amendment of Mr. Owen and in lieu thereof to insert:

Owen and in lieu thereof to insert:

Sec. 8. That section 5154, United States Revised Statutes, be amended to read as follows:

"Any bank incorporated by special law of any State or of the United States or organized under the general laws of any State or of the United States and having an unimpaired capital sufficient to entitle it to become a national banking association under the provisions of the existing laws may, by the vote of the shareholders owning not less than 51 per cent of the capital stock of such bank or banking association, with the approval of the Comptroller of the Currency, be converted into a national banking association with any name approved by the Comptroller of the Currency: Provided, however, That said conversion shall not be in contravention of the State law. In such case the articles of association and organization certificate may be executed by a majority of the directors of the bank or banking institution, and the certificate shall declare that the owners of 51 per cent of the capital stock have authorized the directors to make such certificate and to change or convert the bank or banking institution into a national association. A majority of the directors, after executing the articles of association and the organization certificate, shall have power to execute all other papers

and to do whatever may be required to make its organization perfect and complete as a national association. The shares of any such bank may continue to be for the same amount each as they were before the conversion, and the directors may continue to be directors of the association until others are elected or appointed in accordance with the provisions of the statutes of the United States. When the comptroller has given to such bank or banking association a certificate that the provisions of this act have been complied with, such bank or banking association, and all its stockholders, officers, and employees, shall have the same powers and privileges and shall be subject to the same duties, liabilities, and regulations in all respects as shall have been prescribed by the Federal reserve act and by the national banking act for associations originally organized as national banking associations."

Mr. GALLINGER. Mr. President, I presume that the amendments which are now being submitted by the Senator from Oklahoma [Mr. Owen] are wise amendments and that they will greatly improve this bill. Assuming that to be the fact leads me to make the suggestion that when Senators were chided for delaying this bill by discussion they were doing a very wise work, because if this bill had been passed one week ago or three days ago, the Democratic conference or caucus held last evening could not have made these wise changes in the bill. I think that the strictures which have been made against this side of the Chamber, and perhaps to some extent against Senators on the other side, that we are debating the bill at too great length, ought to be withdrawn; that we ought to be congratulated and ought to congratulate ourselves upon the fact that a good-natured discussion, extending over 10 or 11 days, has been beneficial to the country, inasmuch as it has enabled our Democratic friends in conference to produce the amendments which are now being submitted by the chairman of the Committee on Banking and

Mr. BACON. Mr. President, I think I might properly suggest to the Senators on the other side that there is another charge which was made which might well be withdrawn, which was that the Democratic caucus had determined upon the form of this bill and would not permit any change.

Mr. GALLINGER. The Democratic caucus of last evening has simply added to the action that was taken in a previous Democratic caucus. It is only a second edition of caucus action;

that is all.

Mr. BACON. Mr. President, in the suggestion made by the Senator from New Hampshire that there should be a withdrawal of the suggestions which have been made on this side of the Chamber, the Senator from New Hampshire necessarily negatives the propriety of the suggestions which have been made on the other side, that we would not permit any changes to be made in the bill.

Mr. LEWIS. Mr. President, I would not deprive the very able Senator from New Hampshire of such unction as he might flatteringly lay to his soul as to the effect of the discussion upon the Democratic side produced through his colleagues. It is only fair, however, that his present illusion be dissipated to the extent of stating that the amendments being tendered by the able chairman of the Committee on Banking and Currency were inspired from other sources than those on the other side of the Chamber. Thus it is that such confidence is placed in them as to be tendered with our sanction.

Mr. SMITH of Michigan. Mr. President, I should like to ask the Senator from Oklahoma if this is not a rather radical innovation upon the principle laid down by the Comptroller of the Currency against the too liberal establishment of national banks in communities? I have known of a number of instances where the Comptroller of the Currency has seen fit to limit the establishment of national banks, because there was already a sufficient number established to serve the community; and yet here is a proposition to take them in by wholesale. A community of 10,000 people with two national banks and four State banks is to be given the privilege of having six national banks—something which has always been frowned upon by the Comptroller of the Currency as unwise. It seems to me that it is rather a radical innovation which the Senator from Oklahoma now advocates.

Further, the assets of the State banks are not at all the character of assets required of national banks; and yet you propose to admit them upon the mere whim of a majority of the board of directors and 51 per cent of the stock. I can not

believe that you regard this as practicable.

Mr. O'GORMAN. Mr. President—
The PRESIDING OFFICER (Mr. SMITH of Georgia in the chair). Does the Senator from Michigan yield to the Senator from New York?

Mr. SMITH of Michigan. Certainly.
Mr. O'GORMAN. Is the Senator from Michigan not aware that under the provisions of this bill the State banks coming in under the circumstances referred to must at once comply with the various requirements of the act and observe every rule and regulation established by the reserve board?

Mr. SMITH of Michigan. Yes, Mr. President, but that is a very difficult thing to do.

Mr. O'GORMAN. Then they will not come in.

Mr. SMITH of Michigan. Then why put the provision in the bill?

Mr. O'GORMAN. They will have the opportunity to come in. Mr. SMITH of Michigan. If it is a mere advertisement of your good will toward the State banks, all right; let it pass; but if it is put in the bill with the sincere desire to add to the number of national banks throughout the country in a wholesale way. I think that the objections to it are very serious.

Mr. O'GORMAN. Does not the Senator recognize the fact that if the number of national banks be increased in consequence of this provision, there will be a corresponding decrease

in the number of State institutions?

Mr. SMITH of Michigan. No, Mr. President; I hardly think

that would be the case.

Mr. O'GORMAN. Surely if the State bank carries itself into the national system it would cease to be a State bank.

Mr. SMITH of Michigan. Yes; but I am inclined to the belief that when the bill that is now before the Senate shall have ripened into law and the banks of the country and the stockholders thereof understand the serious situation into which they have been precipitated the changes will be from National to State charters rather than from State to National.

Mr. O'GORMAN. That is not the judgment of the bankers, many of whom appeared before the Senate Banking and Currency Committee. It is not the position taken by the leading

bankers of America to-day, who are ready to come into the system as soon as this law is enacted.

Mr. SMITH of Michigan. If they are so anxious, Mr. President, I ask the Senator from New York why make it obligatory for them to come in under the penalty of a revocation of their

Mr. O'GORMAN. Because the best banking thought of the country advised the committee to make it compulsory.

Mr. SMITH of Michigan. It must have been because of the

fear that they would not join voluntarily.

Mr. President, I do not expect to see the national banks enter this system en masse. I do expect to see a great many of them take out State charters. The State laws nowadays afford very ample scope for safe banking; their supervision is as searching as that of the national banks and their scope larger. I fully expect to see some of the national banks go under the State laws; and I candidly believe, if you did not impose a penalty and threaten to revoke their charters, that your new system would fall to the ground for want of cooperation.

If any large proportion of the national banks do change their charters and go under the State laws, the relations of those that remain will be so close to one another that the idea of the country ridding itself of a banking monopoly will be more remote than it is to-day. I do not exactly fancy putting into this bill at the behest of a party caucus a provision which is directly contrary to the settled and accepted rule of the Treas-

nry Department for many years.

I know of a town of 10,000 people, with two national banks, where an application was made for a national-bank charter. It was refused, because it was said they had banking facilities enough, and yet in that identical town-and I am speaking of a town in the State represented by my friend from California [Mr. Works]—the four State banks in that town may overnight be incorporated into the national system.

I can not understand the reasoning that would justify such a reckless departure from a rule that has hitherto been regarded

as necessary and conservative by Treasury officials.

Then, again, you are taking them in, Mr. President, in exactly the same way as the national banks were taken into the State system under the laws of Oklahoma, about which much complaint was made because of a failure to properly safeguard the personnel and the character of those institutions. Yet you are going to take them all in, 17,000 of them, if they want to come in the national-bank system, immediately after the passage of this bill. I do not believe that that is a sincere attempt to strengthen the banking credit in the country and I am opposed

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma to the amendment

heretofore submitted by him.

Mr. BURTON. I should like to understand a little more fully the necessity for this change. The amendment was read at the desk. It does not modify the substance of this section, does it?

Mr. OWEN. It makes the method a little clearer than it was in the previous language. It does not change the substance of it. It merely facilitates the transfer of a bank that is a State bank and wants to come into the system and makes it a little

bit more easily accomplished. That is all there is in the section.

Mr. BURTON. I notice that until reaching the top of page 21, line 2, the proposed amendment concurs with the bill in its present form. Then the words "and acting through a compresent form. Then the words "and acting through a com-mittee" are omitted. Several Senators near me say they would like to hear the amendment read again. May I ask that that be

The VICE PRESIDENT. The Secretary will again state the amendment.

The Secretary again stated the amendment to the amendment. The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Oklahoma to the amendment heretofore proposed by him.

The amendment to the amendment was agreed to.

Mr. OWEN obtained the floor.

Mr. SHERMAN. Mr. President-

Mr. OWEN. I yield to the Senator from Illinois. Mr. SHERMAN. Will the Senator from Oklahoma yield a moment to permit me to offer an amendment?

Mr. OWEN. I yield to the Senator. Mr. SHERMAN. It is on page 54 of the printed bill, line 18, in regard to the divulging of examinations by bank examiners. I should like to offer an amendment so that the information gained by the bank examiner may be, by consent of the board of directors of the bank concerned, given to others. I have the amendment written out, on page 54.

Mr. OWEN. I will say to the Senator that at the instance of his colleague [Mr. Læwis] I have already had that amendment submitted and prepared, and had intended to introduce it; but I have no objection to the Senator introducing it if he

prefers.

Mr. SHERMAN. No; in that event I will not urge it at this time. It will be considered at some appropriate time?

Mr. OWEN. It will; yes. Mr. SHERMAN. It has been urged on me very strongly by the committee of the Chicago clearing house.

The committee understand the matter quite Mr. OWEN. thoroughly and had already prepared for it in the way the Senator doubtless desires. Mr. SHERMAN. Very well; then I will not urge the amend-

ment.

Mr. OWEN. On page 25, in line 12, I move to strike out "\$10,000" and insert "\$12,000," relating to the salaries of the members of the Federal reserve board.

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. On page 25, line 12, it is proposed to strike out "\$10,000" and in lieu thereof to insert "\$12,000."

The amendment to the amendment was agreed to.
Mr. OWEN. On page 25, line 13, after the word "expenses," move to insert the following words:

The members of said board, the Secretary of the Treasury, the Assistant Secretaries of the Treasury, and the Comptroller of the Currency shall be ineligible during the time they are in office, and for two years thereafter, to hold any position or employment by any member bank.

Mr. O'GORMAN. Mr. President, I suggest to the Senator from Oklahoma the propriety of inserting the word "office," so that it will read "position, office, or employment." That would cover the case of an officer as distinguished from an employee.

Mr. OWEN. I accept the suggestion, and move to insert the words so as to read:

Shall be ineligible during the time they are in office, and for two years thereafter, to hold any office, position, or employment conferred by any member bank.

The VICE PRESIDENT. Has the Senator from Oklahoma the amendment written out? It is difficult for the Secretary to catch the language. The Chair will state that the bill has been already modified at this point on December 3.

Mr. OWEN. Then I move to strike out the amendment which has been heretofore inserted in the bill and insert the matter

I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 25, line 13, after the word "expenses," it is proposed to strike out the comma and the words and they shall be ineligible during the time they are in office and for two years thereafter to hold any appointive office or employment under the United States or in the District of Columbia or any Territory of the United States or of any member bank of a reserve bank," and in lieu of those words to insert:

Mr. THOMAS. I would suggest striking out the word "member," so as to make them ineligible to any employment or to hold office in any bank.

Mr. CRAWFORD. How would you enforce that?

Mr. THOMAS. The reason why I make the suggestion is because it is very evident that there may be banks outside of the member banks quite as important and quite as influential as those within the member banks; and if the purpose is to exempt these men from any influence whatever, the exemption should be made general.

Mr. BURTON. Mr. President, will the Senator from Colo-

rado yield to me?

Mr. THOMAS. Certainly.

Mr. BURTON. Suppose a man has been engaged as one of these members or as Assistant Secretary of the Treasury or as Secretary of the Treasury. What right have we to say to him that within two years after he leaves that office he shall not be employed by any bank that is outside of the system? What right have we to impose a condition on a man as to private positions after he leaves office?

Mr. THOMAS. The same right we have to limit it to member banks. If we have the right to do one, we have the right to do the other, and make it a qualification for the office.

Mr. BURTON. It is a very different proposition.
Mr. CRAWFORD. Mr. President—
The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. THOMAS. Certainly.

Mr. CRAWFORD. I wish to call the attention of the Senator from Colorado to another fact. That is that the Federal reserve board may control the action of the member banks in employing people, and it may say to them, "You shall not employ a man who has been in one of these positions within the past two years," but the Federal reserve board can not say that to a State bank.

Mr. THOMAS. There may be State banks which are not member banks that are quite as important and influential as other banks; and if the members of the Federal reserve board are eligible to positions in those banks, then the purpose sought

to be subserved by this amendment will fail.

Mr. CRAWFORD. I am discussing the question of power. The Federal reserve board can not say to a State bank out in Lawrence, Kans.: "You shall not employ an ex-Secretary of the Treasury in the capacity of president or cashier or in any other capacity." It can not say to the ex-Secretary of the Treasury: "You shall not engage in any such service for a

Mr. THOMAS. But it can make it a condition of holding the office of Secretary that the man filling it must subject himself to certain disqualifications.

Mr. CRAWFORD. What are you going to do with him after he has served his term in office? Shall the disqualification follow him until he is ready to be laid away in the grave?

Mr. THOMAS. What are you going to do with him if he takes a position with a member bank?

Mr. CRAWFORD. You have the power here to remove him if he is an officer of a member bank.

Mr. THOMAS. You have the same power— Mr. O'GORMAN. Mr. President—

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from New York?

Mr. THOMAS. I yield the floor. Mr. O'GORMAN. Mr. President, I take it there can not be much dispute respecting the proposition that under the Constitution there is no power conferred upon the Federal Government to place a restriction upon a citizen of the United States with respect to his private occupation after he ceases his Federal employment.

This proposed statute does not operate upon the individual. It operates upon the banks that are within the jurisdiction of

In effect this provision is that no national bank shall, within a prescribed period, employ a former member of the reserve board or certain other men who may have held Federal posi-The penalty for violation would not be visited upon the individual, but upon the national bank. Because of such a violation a national bank would incur the risk of forfeiture of its charter. So the rule that would be applicable with respect to the national banks could have no application whatever with respect to the State banks or other non-Federal institutions, public or private.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 30, after line 23, I move to insert an additional paragraph, to be designated "(m)," which I send to the desk and ask to have read.

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. On page 30, after line 23, it is proposed to insert the following paragraph:

(m) To employ such attorneys, experts, assistants, clerks, or other employees as may be deemed necessary to properly conduct the business of such board and to accomplish the purposes of this act. All salaries, allowances, and expenses of those employed to be fixed in advance by said board and to be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees to be appointed without regard to the provisions of the act of January 6, 1883 (22 Rev. Stat., 403), and amendments thereto or any rule or regulation made in pursuance thereof.

Mr. BURTON. Mr. President, this amendment presents a

very important proposition.

It has been repeatedly denied here and elsewhere that this measure would be used in any way for political purposes. It has been repeatedly said by the friends and proponents of this bill that the men who would be appointed to this Federal board would be of the same high standing and command the same confidence as the members of the Supreme Court. Its success depends upon the confidence of the people, and it depends upon the degree in which the members will be able to ignore political considerations and recognize their unprecedented responsibility. Here, however, we have offered a provision to exclude their subordinates from the protection afforded by the civil-service law.

A very vigorous protest was raised here when legislation to this same effect was adopted in regard to deputy marshals and deputy internal-revenue collectors; but, to use the vernacular, I think this is the limit. This means that you are going to bring this entire system into politics instead of keeping it out. It means that these officials are invited to violate the letter

and the spirit of the civil-service law.

In the first place, they are given an authority very seldom vested in any executive officers of the Government, namely, the power to select what subordinates they please and to fix their salaries. They determine what the positions shall pay without supervision by Congress and without legislative action.

Why, Mr. President, every time that has been attempted by any commission under this Government it has awakened opposi-

tion and has come near to creating a scandal.

What reason is there for the very existence of the legislative branch of the Government unless it be to determine what offices may exist and to define their powers? What has caused the growth of liberty in England and the great progressive nations of this age? That the legislative department has controlled the power of taxation, the disbursements from the public purse, has been able to prevent the creation of unnecessary offices, and thwart oppression or partiality by those at the head of the Government.

Mr. President, I enter my most emphatic protest against any further infraction of the civil-service law in this bill, which of all bills should invite the support of the whole country without regard to party affiliations and which should be kept entirely

free from the mud and mire of politics.

Mr. O'GORMAN. Mr. President, I simply want to call the attention of the Senator to the provision of the bill requiring the reserve board to make annual report to the other branch of Congress setting forth in detail all the officers created by the board, the duties of the several positions, and the salaries and the compensations fixed. It would seem not to require much argument that in the creation of a system of this character the reserve board, charged with its great responsibilities, should be permitted to use its best judgment and care in selecting from time to time the various persons whose services may be needed to perfect the system or the detailed work of the plan. If, after the first report is made, from the information then presented to Congress, there is need for legislation or for the application of the civil-service system to this particular banking plan, Congress, will have apple appropriately a constant. gress will have ample opportunity at that time to correct any mistake that may be made.

Mr. ROOT. Mr. President, I think that Congress has never created a subordinate agency under a higher responsibility to protect the agent from political influences than rests upon Congress at this time. Of course, the argument against the application of this system of selection through civil-service examination always has been that the officer charged with responsibility would feel the necessity of making his administration of the office a success and would endeavor to select suitable and efficient assistants. That argument is theoretically sound. It would be practically sound if humanity were perfect. But we all know how the business is conducted in practice.

There is no public officer connected with the Government of the United States in Washington who has the power to appoint subordinates, free from the limitations of the civil-service system, who is not besieged by applications and forced by Senators and Representatives in Congress and by political leaders from the different States urging appointments upon him. The original impulse given to civil-service-reform system by President Grant grew out of his experience of the necessity that the appointing power should have some protection against assaults of that description.

Sir, we certainly ought to protect this board. We all agree that the board ought to be kept out of politics. We all agree that the board and its surroundings ought to be as free from political influence as possible. We all agree that that wide and important opportunity for suggestion, for direction, for giving form to the opinions and the actions of superiors resting in the practical assistance in office, ought to be in this case free from politics. But no law, no human power can prevent Senators and Representatives in Congress and the political leaders in the States from pressing upon the reserve board the appointment of particular persons as being the best persons for these subordinate places. Experts, attorneys, counsel, assistants will have vast influence in various phases of the complicated and difficult subject of finance. They will have vast influence upon the deliberations and the action of the board, and if Senators and Representatives are to urge their appointees, their favorites, the persons whom they wish to take care of, upon the board, we can not prevent the board from being surrounded by influences which are political in their

If there ever was a case in which the protection of the civilservice system ought to be thrown around public officers, this board furnishes the case.

Mr. LEWIS. Mr. President, no one who has heard the observations of both the able Senators, the one from Ohio [Mr. Burron] and the other from New York [Mr. Root], but who coincides with the logic of the argument and the philosophy of the observations. If these positions were of ordinary occupation, applicable generally to mere general clerical service, I am sure every Senator would be glad to accept the suggestions of the learned Senators, because it would relieve us of what we may frankly speak of as persecution in the attempts of many persons to have themselves lodged in positions without regard to their merits or their fitness, for it does seem that in politics a man has no possible appreciation of his own fitness

or his unfitness for the particular thing which he will seek.

But, Mr. President, there are in this measure these exceptions that I am sure the learned Senators have not reflected upon. This system is a scientific one. It can only be carried out by the aid of a form of scientific knowledge. The aids should have some knowledge of banking; they should not be ignorant of finances; they should have some information touching bookkeeping; they should have formed some previous relation to the ordinary commercial business associations. If they should be taken from a general list, where the examinations which qualified them largely consisted of questions concerning what were the capitals of the countries of Europe, and what were the relative proportions of acetylene gas compared to the present oxides, or something no more appropriate, I am very sure, as we so frequently observe from such examinations that both the able Senators and all Senators will see that very little assistance could be had as a result of such.

As the junior Senator from New York [Mr. O'GORMAN] aptly said, this board will be held responsible, and any errors on the part of the employee from either want of knowledge or want of experience will be charged to the board.

I invite both the learned Senators to the precedents upon which this action we advanced can be justified. When the Board of General Appraisers was created, having for its object the passing upon what tariffs should apply to certain merchandise and to heed the protests of shippers, that board was not hampered by the civil-service regulations, as the able senior tor from New York will recall, but the law recognizing that it would be necessary that these aids should know something about the tariff, or at least merchandise and the application of tariff rates, the Board of General Appraisers sitting in New York had the right to name these aids without recurrence to the civilservice list, because a form of scientific knowledge was essential in order that the appointee should properly discharge the duty necessary.

So I recur to a late act, which both the able Senator from Ohio and the distinguished gentleman from New York will recall. When the late President of the United States, President Taft—only late as having lately retired from his high office, and I am delighted to add that he still exists with us as a dis-

tinguished citizen-created and sent to the Senate a body called the Industrial Commission, created for the purpose of making certain investigations concerning the general industrial relations of this country between employer and employee, factories, skilled labor, and otherwise.

There was again that excellent sense shown in exempting that body from being compelled to take its aids from the civil-service list, and since the present Senate confirmed the appoint-ment, which by some accident or condition had gone over in the previous administration, and that body is now assembled have in Washburton drawing its resistants from the search have here in Washington, drawing its assistants from those who by their skill and ability disclose their fitness, but unhampered, following the wisdom of the Republican President of the United States and those who were his able advisers, by the civil-service regulations, which too often put upon officials men utterly unfit and wholly incompetent for the particular tasks assigned

I appeal to the Senator from New York for his personal experiences of Federal judges who are particularly exempt, as he will recall, and who can name the referee in bankruptcy, the clerk of the court, or the commissioners free from the civil service, upon the very theory urged by the junior Senator from New York, that fitness and qualifications in the form of scientific knowledge of the law and its difficulties were essential.

Now, by virtue of these precedents I most respectfully insist

that this committee, following it, is amply justified by the reason, by logic, and by the previous political history.

Mr. O'GORMAN. Mr. President, I desire to add one other instance to those named by the Senator from Illinois which would seem to justify his view of the question involved. If I am not mistaken, when the Tariff Board was created by the last Republican administration there was a specific provision that in the appointment of clerks and assistants the provisions

of the civil-service law would not apply.

Mr. BRISTOW. Mr. President, I do not care what precedents there are for this action, it seems to me that now we have a manifestation of the reasons for the unusual and extraordinary haste in getting this bill through. It probably is not only to relieve the financial disturbance that is imminent as a result of the unrest that has been created by this administration and the legislation that has been passed and proposed to be passed but also to satisfy the horde of hungry office seekers that have been besieging the Capital for the last 10 months. It is now proposed to unload some of them upon this great banking establishment that is to be created.

There could not be anything more inconsistent than the argument that it is necessary to exempt these officers and employees from the civil-service law in order that competent persons might be secured. If the Federal board that is created desires some one to be appointed who can not be secured through the civil-service method, the President has the power to exempt that place from the operations of the civil-service law. This board can not be hampered by the law, because exemptions are within the power of the Executive himself. To say that to get competent officers it is necessary to throw this wide open to political appointments is utterly without reason.

There is no occasion to exempt a single one of these officers from the civil-service statute. There is ample provision now for exemptions, if the interest of the service requires it, and the President exercises that power frequently. Every President has done it in the past. It has been exercised too much. It has been exercised not in the interest of the service, but in the interest of some political influences that sought to place men in office for political purposes. It seems to me that of all the indefensible propositions that are incorporated into this bill this is the worst.

Andrew Jackson destroyed the second United States Bank because it was in politics. Here are Senators who claim that in-dependent and courageous President as one of their patron saints; yet they propose to create a United States bank and put it in politics

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from New Hampshire?

Mr. BRISTOW. I yield. Mr. GALLINGER. The Senator from Kansas might well make the suggestion that the Civil Service Commission are every day examining men for scientific positions. If the office of Supervising Architect of the Treasury should become vacant to-day, the Civil Service Commission would have a competitive examination for that place; and I apprehend that commission have all the required facilities for examining the men it is pro-

posed to put in these responsible positions.

Mr. BRISTOW. Mr. President, there is no doubt about that.

The Civil Service Commission will obtain a great deal more effi-

cient employees for this banking system than Democratic Representatives and Senators will select, because they are more competent to do it. The Democratic or Republican Senators and Representatives, so far as that goes, when it comes to recommending such appointees, will recommend the men who are useful to them in their political campaigns. They recommend them nine times out of ten because they are useful or they expect to make them useful politically.

This amendment is proposed here for the purpose of aiding Representatives and Senators in their next campaign by taking care of ambitious politicians from the wards and townships and the counties who will control or attempt to control primaries and conventions, to receive as a political reward some appointment in the United States banking system. This is a beautiful and delightful exhibition that we are now observing here in this enlightened age of civil government! Are we going back into the old spoils system, worse than it was in the days of Jackson? Then it was the higher officers that were in politics; now it is proposed not only that the higher officers shall be political appointments, but all of the subordinates as well.

I suppose it will go through; of course the Democratic caucus has decreed that it shall, and that ends it. It goes through; but this arrogance of power that defies reason will in time bring down upon its head the condemnation of the patriotic, intelligent American people; they will not stand for it; and experience will demonstrate that no administration, I care not with what prestige and power it may come into office, can abuse that prestige and power, as it is proposed to do in the enactment of this

measure, with impunity.

Mr. TOWNSEND. Unfortunately, Mr. President, I was not in the Chamber when this amendment was presented, nor did I hear the arguments of the distinguished Senators from New York and Ohio regarding it; but, as I understand, it is proposed to relieve from the civil-service regulations the appointments of such men as will be required by this bill. One of the things that most men who have listened to the arguments up to date and who have read the bill have had to fear has been that politics would control the administration of this proposed law. Most serious and, it seems to me, pertinent arguments have been presented against the lodgment of so much discretion in the hands of the reserve board, and the answer has always been that it is most unthinkable that these men will be other than of the highest character. I think I am saying what nearly every Senator will corroborate when I state that many Democratic Senators have already complained in private conversation that they have been pressed with applications for appointments before this proposed law has been enacted. Already candidates even for places on the reserve board are being urged through political One prominent example has been called to my attention, and the Senator besieged felt that the candidate was most unfit and yet realized that influence was great, and I inferred that there was danger that great political pressure might bring It was stated by a Senator in the course of this discussion that the Oklahoma bank guaranty law had been a failure for the first two or three years and before it was amended because it was in politics; that politicians had been so much interested in the execution of the law that it had proven a failure.

Mr. President, I think it is a serious mistake for us to take any steps backward in the operation of the civil-service law. I know of nothing that has improved so greatly under the operation of the merit-system law as has the public service of

the United States.

I know that politicians, Republicans and Democrats alike, who feel that they can reward some faithful supporter, are willing at times to ride over the civil-service law, but it is a Every one of you understands that it is a mistake. It is our business here to legislate for the best interests of the Government; and, politics aside, there is no man, in my judgment, who can stand up and consistently claim that it would not be a mistake to make it even possible for gentlemen, in whatever position of power they may be, to make appointments for political purposes only. There can be no other object in this amendment than to reward political supporters by appointments in connection with this new law.

It is idle to say that you can not get good men for these places under the civil service. The great interstate-commerce law, embracing all the technical, complicated questions of railroad valuation and railroad operation, is administered through experts appointed under the civil service; the selection of men for that work is being made without difficulty, because you can obtain men, the best men, in that way; and do Senators insist that under this administration the civil-service board, which has been reorganized, as I fear, for political purposes, can not provide proper questions to be propounded to ap-

plicants, that all of the whimsical and unimportant ones shall be omitted and only those which test the qualification of the applicant shall be asked in its examinations? I am sorry that we should not only change radically the currency and banking laws of the country, but that we should put its administration into the hands of spoilsmen. Could anything be more destructive of public confidence?

It is difficult to believe that some Senators on the other side, who I know have secretly rebelled against the pressure of the caucus, can be compelled at this time to stifle their consciences and surrender their convictions and join with their colleagues in this attack upon one of the most wholesome and progressive

laws of modern times, namely, the civil-service law.

Before I take my seat I desire to refer to a proposition to which I called attention in reference to the Oklahoma law. is short, but is an example directly in point of the possible evils under this amendment. I read from the third annual report of the bank commissioner of the State of Oklahoma. He

The only near fatal mistake made in our guaranty law was that after its passage, the immediate taking in under the guaranty system of all banks without first the most careful and rigid examination of banks, men, and methods. They should have been tried out under the most thorough test, and the incompetent and dishouest should have been eliminated from our financial institutions, and none but the strongest and best men permitted to engage in banking. The department of banking should be elevated to the highest standard and placed upon the most permanent and solid basis possible, as nearly every individual in Oklahoma is effected more or less by the condition of her financial institutions. With this end in view, the commissioner is of the opinion that all employees of the banking department should be appointed under the civil service rules, with only one object in mind, that of rendering the very best service at all times. In making the appointments therefor I have not in a single instance raked as to the politics of any applicant, but have only sought to select high-class men, considering efficiency and ability only.

This report was made after that law had been tried by experience; it was made after it was determined that the law was practically a failure. The commissioner states that after that experience it would be well for the operation of that law if appointments of men to administer it could be made under the civil service. In another place the bank commissioner says:

The reasons of the heavy losses, as they have been narrated in the foregoing discussion, may be here summarily restated: (1) The banking department was for a long time in politics. (2) Unsound banks were admitted and guaranteed at the outset. (3) The record of bankers has not been properly traced. (4) There has been procrastination in closing insolvent banks and timidity in the face of losses. (5) Economic conditions have been somewhat adverse. (6) The guaranty of deposits has relieved depositors of all necessity for care in selecting banks.

Please notice that the very first reason given for failure is "politics." And yet with this experience of Oklahoma in the operation of the banking law in that State it is now proposed by the advocates of this bill to write into a law for the Nation the inexcusable mistake of political control. It can result in no good. It may, it probably will, result in disaster.

Mr. NORRIS. Mr. President. I speak as a friend of this legis-

lation. There is no man in this Chamber who more earnestly desires that we should have proper legislation on the banking and currency question than I do. I have given to it all the careful study of which I have been capable. I attended the meetings and the hearings of the Banking and Currency Committee almost as punctually, I think, as any member of that committee. I had intended to address the Senate at some length, but because I was auxious that this legislation should be enacted into law at as early a date as possible, I have desisted.

I expect to vote for this measure. I would not vote for the bill as it passed the House; but I would vote for either bill brought in by the different branches of the Banking and Currency Committee of this body. I did believe, and do believe, that the banking and currency system and the banks organized under the system ought to be under Government control, I favored the ownership of the stock by the people. I was opposed to 12 regional banks as against 4. However, I would rather have 12 regional banks than not to have the law passed at all. I have voted for ownership of the stock by the people and for Government control of the banks.

I am not going to discuss those provisions; I am not going into a detailed discussion of any of the provisions, except to say that as between the provisions incorporated in what is known as the Owen bill and most of the amendments which have been offered to it, I have favored the amendments. I favored the amendment designed to extend the time of the notes eligible to the rediscount privilege to 6 months rather than 90 days; I favored several other amendments of less importance; but through it all I was earnest and anxious that we should get out of this bill the best possible law, and although these amendments have been defeated, I am still in favor of the bill and am as anxious as any man here to prevent emasculation of the measure by unworthy action.

I believe those amendments would have been adopted by almost a unanimous vote in this Chamber if we could have eliminated the silent but the potent influence of the secret caucus.

I was principally opposed to the House bill because it pro vided for a board of control that, in my honest judgment, would have become in a few years the football of politics, and would have meant the building up of the greatest political machine that this country or this world has ever seen; that it would have placed the banking and currency business of our country in politics, and just as surely as that is done you will not only ruin the banking and currency system but you will ruin the country as well.

I prepared an article which has been published in reference to the House bill bearing on that particular point, and I should like to have it incorporated in the RECORD as a part of my remarks without reading.

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

The article referred to is as follows:

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

The article referred to is as follows:

I am asked to state what, in my judgment, is the most objectionable feature of the currency bill as it passed the House of Representatives. Let me preface what I shall say by the statement that I am in favor of thanacial legislation. The country ought to have an elastic currency, and I am in favor of Government control as distinguished from bank control, but I am more opposed to partisan control than I am to any other kind.

The bill as it passed the House was a purely partisan measure, and we would naturally expect it to have defects that usually follow any measure on any subject that is the outgrowth of partisan manipulation and secret-caucus control.

It was first considered in secret by the Democratic members of the House Banking and Currency Committee. After they had finished they went through the formality of inviting in the entire committee while they officially reported the bill to the House. It was then considered in a secret Democratic caucus, wherein it was made possible to pass the bill through the House without any amendment, regardless of the merit that the amendment might have or how it might appeal to the individual Members.

The country could not expect good legislation from such a procedure. The entire system of banking and currency as provided in the bill sunder the control of what is called the "Federal reserve banks. Each one of these Federal reserve banks will control directly the banking of one-twelfth of the country. The capital stock of each of these banks is made up by subscription of stock taken by the various banks in each of the respective districts.

The bill provides that any bank can go to the Federal reserve banks. Each one of these Federal reserve banks of its district, and by depositing notes and bills of exchange and guaranteeing their payment, can get in return Federal reserve banks in each of the respective districts.

The bill provides that any

serve agent, who is practically made the go-between the Federal reserve bank and the Government. Then the Federal reserve board has the power to remove any or all of the board of directors included in class B.

The Federal reserve board not only names the Federal reserve agent, who is really the controlling power of every Federal reserve bank, but they fix his salary. They have the power also, to remove any of the officials of every Federal reserve bank. They can likewise suspend the operation of any Federal reserve bank and appoint a receiver therefor. They fix the rate of interest. They can compel one Federal reserve bank to rediscount the paper of another Federal reserve bank. They can suspend for a period of 30 days, and renew such suspension for another 15 days, the reserve requirements. They supervise and regulate the issuance and retirement of the Federal reserve notes. They can examine the accounts, books, and affairs of each Federal reserve bank. They can levy an assessment upon the Federal reserve banks for money to pay their expenses. They can rendjust the districts and create new ones. They can provide by regulation for the establishment of branch Federal reserve banks within each district. They can remove the chairman of any Federal reserve bank without notice. They can require the writing off of doubtful or worthless assets upon the books of any Federal reserve bank. They can determine and define the character of paper which the local bank will be allowed to discount at the Federal reserve bank. They can determine and define the character of paper which the local bank will be allowed to discount at the Federal reserve bank. It most most most the sound to be charged by Federal reserve banks.

I am not making particular complaint against the granting of these powers to this board, because I presume these powers, under the system at least provided for in the bill, must be lodged somewhere, but it will not require a moment's consideration for any man to determine that any board having all these powers

will thus be seen that any President will be able to name a majority of the board. The Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency will hold their positions at the President's will, and it would be a very easy matter for any administration to completely change the complexion of the entire board, and thereby absolutely control at will the entire financial system of the

the President's will, and it would be a very easy matter for any administration to completely change the complexion of the entire board, and thereby absolutely control at will the entire financial system of the country.

The board is made at once a football of partisan politics. I am not charging that any President would deliberately try to upset the banking and financial system of the country. I am not even intimating that any President would take any step with corrupt motives, but within the recollection of all grown men it is known that financial systems and combinations have often had the sympathy of Presidents. The men who control these combinations would be able to furnish the sinews of war in presidential campaigns, and it is fair to assume that flavy would be rewarded in the future as they have been in the past. Our banking and financial system would be on edge at every presidential campaign. It ought to be stable and absolutely unaffected by the success or the defeat of any political party or political organization. Neither do I believe that the political power of this system would develop at once. It might be quite a number of years before the control of this board would gradually drift into politics. Such has been the history of every political machine that has existed in the past.

Every political machine has always been to a great extent a matter of growth, and those who control such machines are continually reaching out for additional power and additional influence, which procedure goes on, often for many years, before the people really are awake to the great danger that such power gives.

If this provision of the bill is not changed, I believe this Federal reserve board would, in the course of years, grow into the most powerful political machine the world has ever seen. Its influence would percolate down through the Federal reserve bank, through the local bank, and finally to every borrower in the land. This would not necessarily come about with the assistance of the reserve or the local banks, b

security is not satisfactory when, as a matter of fact, the real reason is something entirely different. There is no appeal from their decision. They can supply bank "A" on one side of the street with unlimited funds and refuse all assistance to bank "B," on the opposite side of the street.

It will not be necessary for this machine, to have its influence effective, to make any threat, demand, or even express a wish. Every banker in the country will know what brand of finance or politics is desired by the Federal reserve board. They will know which political official running for office is friendly and which is unfriendly. Realizing that this machine may either make or destroy them, the bank will always try to do the things which pleases those in control.

The local banker in turn will use his influence with the borrower at his bank, He knows that he will be expected to make good in his community. This will be an incentive to him to control the man who has to use his bank in his business operations. He can easily make the borrower understand that he can not be accommodated at his bank unless favored candidates are supported and favored policies advocated. It will be an easy matter to explain to him that such a course is necessary in order to enable the bank to get funds with which to supply the man who borrows the money.

The power of such a machine carried to its ultimate finality is so great that even the imagination must recoil in horror at the wonderfully far-reaching effects that will come about through its power.

The bill has other serious objections, and it has likewise many things in its favor. The objection which I have pointed out is one that can be remedied by amendment; but, in my judgment, it is the greatest defect in the bill. It has so far attracted but little attention, because men who are discussing the measure, either in criticism or in praise, have been attracted by other features that more directly apply to the various lines of business and trade in which those who are participating in the d

Mr. NORRIS. The amendment now before the Senate, it seems to me, goes toward the proposition that I was seeking in that article to avoid-placing this board, which has the control over all the banks, in politics. No argument has been offered, and none can be presented, in favor of taking these appointees out from under the civil service that will not apply to every appointment that has ever been made in the history of the civil-service system.

Mr. President, if we injure this legislation now by making it partisan, by making it possible for official political influence to become instrumental in placing favorites in office under this law, we will, in my judgment, eliminate the good that would otherwise come from it. I can not understand, I can not appreciate, how any man, realizing the importance of the measure that we are now to place upon the statute books-and it will probably remain upon the statute books longer than any of us will live-I can not see how anyone can for a single moment concede the proposition that the appointees of this board should be politicians, rather than be appointed on account of their fit-

ness for the places they are to occupy.

Mr. President, this is only a stepping-stone. It may be said that the men who make the appointments will not be politicians, but by this act we are going to make them politicians, whether they will or no. If we are going to subject them to all of the influences that come from every State and from every city in this Nation to get favorites on account of their political belief appointed to positions under this board, we will necessarily and inevitably drag this board into politics, and when we do that, we have taken our banking and currency system into politics.

I do not believe any man wants to do that. I can not believe that those who favor this proposition really understand how far-reaching this amendment will be, and how in the end it will bring the Federal reserve banks into disrepute, just as the other national bank which was destroyed by Andrew Jackson was brought into disrepute-killed because it got into poli-

tics.

When the system provided for in this measure gets into politics we will have a political machine that will reach into every village where a bank is located. Its influence will extend to and be felt by every man who has to patronize a bank, either to borrow money or to deposit money. It will be almost limitless. It may be several years before its power will be fully gained; that is true of every political machine; but you will be sowing the seed, if you pass this amendment, that will eventually disgrace and bring into disrepute the very system that

we are trying to adopt.

It has been well said several times here that this is the most important measure which has been before Congress since the Civil War. I am inclined to believe that that is true. There is not a citizen, high or low, rich or poor, who is not anxious that the law which we place on the statute books shall be workable, shall be a good law; there is not a citizen, unless you eliminate those who are trying to get office, who does not desire that the system that we shall adopt shall be beyond the control of politicians, political bosses, and political machines. It seems to me that if we would give this candid, sober consideration not a Member of this body would think for a moment of taking the first step to make out of this system-which, if it is to succeed, must be nonpartisan—a partisan machine.

Mr. President, in all the history of the United States there has never yet been a law passed to take any bureau or official or any position out of politics where the service of the Government has not been improved thereby. It is the history of the civil service. It does not mean perfection. I am not contending for that. God knows enough mistakes will creep in; enough employees will get in perhaps who will be unworthy; but this opens the door and says to every applicant, "You must be a partisan or you can not enter here."

We are not legislating for a party. The offices that will be brought into existence by this law are insignificant when we compare them with all the people of the country who are demanding a nonpartisan banking and currency system. Yet if we commence now, at the very threshold, to say that the appointees of this system shall be appointed on account of polities we shall be appointed on account of politics. tics, we shall have opened a door that you never can close and never will close, and it will be sowing the seeds that will eventually destroy the very system we are trying to build up.

I have heard it rumored that a great many men in this body

were in favor of getting as large a number of regional banks as possible in order that certain localities might have regional banks and get buildings on that account. I never believed it. I could not conceive how any Member of the Senate should permit his vote to be in the remotest degree influenced by such a consideration. Yet here we are presented face to face with something that gives color even to that-that now, when we are about to inaugurate a new system of finance and of banking, we are making a sort of logrolling, pork-barrel, public-building proposition of it in order that we may have this patronage distributed as far as possible.

It seems to me that a second thought on the part of those who are deeply interested, as I believe we all are, in getting the best possible law and the best possible system must lead us all to the conclusion that under no circumstances, nowhere in this great system, must there be any place for partisan control. It means injury and ruin to thousands of people, not only now but in the years that are to come. There will be no stopping place until the entire system is honeycombed with politicians

and with politics, and our banks will all be in politics, not because they want to be, but because on account of the system in which they are they will be compelled to get into politics. We can not afford to jeopardize the success of this system and trade it for a few political jobs. To satisfy a few politicians in their desire to get office we can not afford to turn our banking and currency system into a partisan political machine.

Mr. OWEN. Mr. President, I must confess that I have been

amazed at the severe criticism of this provision. The Federal reserve board, consisting, as it will, of six of the most distinguished men who can be found in the United States, is by this provision given the power to select the experts and assistants it may require for organizing this work. The number of such employees will be very small. Of necessity the number will be

I believe in the civil service. I desire to see it maintained and to see it practiced in letter and in spirit. Even the civil service, however, places in the hands of some competent authorities the choice of our Federal servants, of our officers; and had just as lief trust the Federal reserve board to perform this function as I had the civil-service board. The assumption coolly made, and somewhat vociferously proclaimed to the country, that the Federal reserve board is going to use these offices in the organization of the greatest banking system in the world as a means of rewarding petty politicians from one end of the country to another, at the solicitation, perhaps, of Senators or perhaps of Members of Congress, when perhaps a dozen employees will be all that will be involved in the matter is, I think,

very unfair and very unjust.

There is another very important consideration, and that is one of urgency. The country desires to have this system put into effect. The Federal reserve board itself must take some time for its organization. It will take some time before the President can make a wise and proper selection of these six men, I take it. After they are appointed and after they determine what kind of employees will be necessary, then it would be necessary under the civil-service act, for them to certify over to the Civil Service Board what kind of employees they wanted; and then, under the rules of that board, it would be necessary to await the slow processes by which advertised examinations could be held, and all that sort of thing. All of this would delay the country, at great cost, for the poor purpose of enabling one set of men to choose the employees which another set of men can choose just as wisely, and even more wisely; because the Federal reserve board, in selecting a small number of employees for this purpose, employees who are to render service in so important an undertaking, can be relied upon to exercise the greatest caution in making the selections.

I do not feel disposed to depart from the general principle of the civil service, because I really favor it; but in this case do not think the harsh criticism upon this plan is justified. confess it has been a matter of great surprise to me, because I really did not think it would lead to any discussion at all.

Mr. GALLINGER. Mr. President, addressing myself to the Senator from Oklahoma, I wish to call his attention to a matter with which he is fully familiar. It is that the House bill, which provided for four members of this board, also provided that the transfer of the same political. that not more than two of them should be of the same political

In making that provision, I presume, it was the view of the House that, as far as possible, the board should be nonpartisan. The Senate committee has increased the number to six and has stricken out the limitation as to the number of members of one

political party.

Is the Senator from Oklahoma fully persuaded that it is more desirable to have the provision in the form in which it is now before the Senate rather than in the form in which it passed

the House, in that respect?

Mr. OWEN. Absolutely so; because if you put in a provision that not more than two shall be partisan, it means that two shall be partisan and four shall be partisan—all shall be partisan. It then becomes a bipartisan board, whereas it ought to be a nonpartisan board. I should be much disappointed if in the selection of these men it were not in truth and sober good faith a nonpartisan board.

Mr. GALLINGER. I did not ask the question for the purpose of entering into a controversy with the Senator on that point. I have no such desire. I do not think it follows, however, that if we should say that not more than three should be of the same political party the President would necessarily appoint partisan Democrats or partisan Republicans. me that he would very likely appoint men who had broad views, and, while they belonged to a certain political party, yet they would not carry their political convictions into matters relating

to banking.

I have no disposition to undertake to get the bill changed in that respect. I could not if I tried. I simply wanted the Senator's judgment, or his opinion, as to the wisdom of the change the Senate committee has made in that regard. It is not an unusual thing in legislation, both State and National, to have precisely that kind of a provision in a statute. It is a very common thing to limit the appointing power in the number he shall take from any one political party.

Mr. OWEN. I did not mean to suggest that there was any controversy between the Senator and myself. I was expressing my sincere conviction, because I feel a great anxiety that this board shall be of the very highest possible character. Where you make a provision that not more than two shall be members of a given party, I think it carries with it an implication that they shall be distinguished for party services. That implication would seem to be contained in the law itself, and therefore I think it has a tendency, as far as it has any effect one way or the other, to suggest that it should be a bipartisan board. should hope, no matter what the language, that the President would rise above the question of partisanship and make this board what it ought to be-a nonpartisan board of the very highest possible character.

Mr. CUMMINS. Mr. President, the introduction of this amendment may arouse regret, but it certainly can not excite He must be a dull observer of events who has not seen, during this administration, a persistent, successful attack upon the merit system of appointing civil-service employees. This effort has already invaded the Post Office Department. It has already made great inroads upon the Treasury Department. Now, it is proposed to abandon this new department of the Government entirely to the old method of appointing Gov-

ernment employees.

Mr. President-Mr. REED.

Mr. CUMMINS. I do not yield, Mr. President. I have but a few minutes and I can not yield, save for a question.

Mr. REED. That is all I intended to ask.

Mr. CUMMINS. Very well.

Mr. REED. I intended to ask the Senator to specify how the civil service has been set aside in the Post Office Department and in the Treasury Department, and to give us the number of

cases, instead of dealing in generalities.

Mr. CUMMINS. I should be very glad indeed to give to the Senate at this time such little information as I have—and I have been somewhat careful in gathering it—with regard to the instances I have in mind respecting the Post Office Department and the policy I have suggested in the Treasury Department. I shall do that at some future time, upon some future occasion, because I intend to make some observations upon the present state of the civil service in Washington and throughout the country. I mention these things now only for the purpose of indicating that there is a determined endeavor to strike down the merit system-that is, the merit system involving competitive examinations.

I am not suggesting that the system that is intended to be substituted for it is to be designedly prostituted by political influences. I am simply saying that the majority in this administration seems determined to return to the old plan of appointing employees; to return to individual selection determined by individual considerations, subject to whatever influences sur-

rounded that system.

We passed not very long ago a bill which required the Interstate Commerce Commission to enter upon the valuation of the railway properties of the United States. A more important measure never passed Congress. The Interstate Commerce Commission entered upon that work, and it is now selecting the men who are to do the work through examinations conducted by the Civil Service Commission. It is idle to say that the competitive examinations conducted by the Civil Service Commission do not fairly develop competency. It is idle to say that these examina-tions are not made pertinent and relevant to the particular place to which the employee is to be appointed. They are examining civil engineers, mechanical engineers, electrical engineers, scientific men of all kinds, and out of the great number which appear before the Civil Service Commission the most competent, the most worthy, are selected, and they receive the appointment of the Interstate Commerce Commission.

I do not say that there are not certain places connected with the department about to be created, the Federal reserve board. that ought not to be filled through individual selection. There may be, but to take the whole body of the employees of that board and allow them to be selected through the influences which have been so graphically described here is to deny the whole spirit of the merit system. It is to return to the old spoils system. That system has a great many advocates throughout this country; I do not disguise that from myself,

but I find that the great preponderance of the civilized judgment of mankind, not only in the United States but in every other country in the world, has been rendered for the merit system as distinguished from the individual system.

The Senator from Oklahoma said that the Federal reserve board will be made up of men of high character, exalted motives, with an eye single to the public good. I have no reason to doubt that it will be so composed; but it does not propose to conduct a competitive examination. He said that that board could select the employees as efficiently and as wisely as the Civil Service Commission. So it could if it would adopt and apply the rules of the Civil Service Commission, namely, to determine merit through a competitive examination.

JAMES. Mr. President, will the Senator from Iowa yield for a question?

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Kentucky?

Mr. CUMMINS. Certainly. Mr. JAMES. When the Vreeland-Aldrich bill was passed, creating the Monetary Commission, commonly called the Aldrich Monetary Commission, there was a provision in that law for the appointment of secretaries, experts, stenographers, messengers, and other assistants, to the number necessary for the purpose of gathering that information. No provision was incorporated in that law requiring that those officials should be taken from the civil service.

Mr. CUMMINS. I can not be called into a defense of what was done at that time. I do not pretend but that the party to which I belong has now and then been an offender against the civil-service spirit and requirements. But the Senator from Kentucky must of course remember that the Monetary Commission was a temporary board. It was not intended to continue over a great period of time. But we are here establishing a board which, if it be found to perform a wise function in our Government, will endure to the end of time, and there can be no reason given for the exemption of its employees from the merit or competitive system that will not apply with equal force to the employees of every department of the Government.

It seems to me that if this amendment be adopted it must be

accepted by the country as a final declaration of hostility to the merit system by the legislative administration through

which we are now passing.

Mr. JAMES. My purpose in calling that to the attention of the Senator from Iowa was merely to show that when the Republican Party undertook to gather this information, so valuable to the country, by a commission to go throughout the world and collate information, so that we might know what ought to be done here upon the question of finance and banking and currency, they recognized that they could get better service by leaving to the commission the selection of these employees rather than to go to the civil-service list or to the merit system that the Senator speaks of. Not only did it give to the commission the right to employ experts, stenographers, and messengers in an unlimited number, but it placed no curb whatever upon the amount of money that might be expended for these purposes.

Mr. CUMMINS. Mr. President, the commission, in my opinion, expended entirely too much money, and continued probably longer than it should, although it performed a very valuable service. The Senator from Kentucky may remember that it was upon my resolution that its labors came to an end and its expenses ceased. But there is a very great difference between a legislative committee-and it was no more-and a permanent department of the Government, a department that is to be administrative, that is to be executive, and not merely an investigating committee intended to develop information and to ac-

quire the learning upon the particular subject.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Massachusetts?

Mr. CUMMINS. I yield the floor. Mr. WEEKS. I wish to call the attention of the Senator from Kentucky to the fact that the number of permanent employees of the Monetary Commission did not at any time exceed a half a dozen, and very frequently not more than two or three, and that the men to whom the Senator from Kentucky refers were experts, one selected usually in each country as the bestknown expert in his country to write of the banking system of

Mr. WILLIAMS. Mr. President—
Mr. JAMES. Mr. President, that does not answer the question at all. Our friends upon the other side have attacked this bill, because they said—

The VICE PRESIDENT. The Chair must know who has the floor in order to keep the time.

Mr. JAMES. I will take the floor.

The VICE PRESIDENT. The Senator from Kentucky will

Mr. JAMES. I take the floor just for the purpose of making one observation. An attack has been made upon this bill because it provides that these experts might be selected by the Federal reserve board, who will be appointed by the President, and we are told they ought to have men who have passed the civil-service examination for the purpose of entering into the Government service, men who perhaps know utterly nothing about banking and who are experts upon finance in no respect. I was pointing out that when the Republican Party, a once historic party in this Government, had control of this Chamber here, and when they were legislating upon finance and not criticizing and faultfinding, they provided in the Aldrich-Vreeland

That it shall be the duty of this commission to inquire into and report to Congress, at the earliest date practicable, what changes are necessary or desirable in the monetary system of the United States or in the laws relating to banking and currency, and for this purpose they are authorized to sit during the sessions or recess of Congress, at such times and places as they may deem desirable, to send for persons and papers, to administer oaths, to summons and compel the attendance of witnesses, and to employ a disbursing officer and such secretaries, experts, stenographers, messengers, and other assistants as shall be necessary to carry out the purposes for which said commission was created. The commission shall have the power, through subcommittee or otherwise, to examine witnesses and to make such investigations and examinations, in this or other countries, of the subjects committed to their charge as they shall deem necessary.

Sec. 19. That a sum sufficient to carry out the purposes of sections 17 and 18 of this act, and to pay the necessary expenses of the commission and its members, is hereby appropriated, out of any money in the Treasury not otherwise appropriated.

The point I make is that the Republican Party itself upon the monetary question set aside the civil service and gave unlimited power to one man to appoint as many employees as he saw fit, giving him the unlimited right to draw upon the Public Treasury, nothing stopping him but the bottom of it, and that man was Senator Nelson W. Aldrich.

I say it comes with poor grace, if nothing more, from our friends to charge that we ourselves are destroying the civil service because we are seeking to get experts appointed by these men, who I do not suppose any Senator upon the other side will say will not be men of the highest character and the greatest ability and of the highest patriotism, to administer this law.

Mr. WEEKS. Mr. President, if the Senator from Kentucky will hold the floor for a moment until I can make a suggestion, I want to call attention once more to the fact that there were not at any one time in the employment of the Monetary Commission half a dozen men who would come within the class provided for in this amendment. My recollection is that every one of those men was in the Government service in some form and connected with the Senate service. For instance, the man who had charge of the finances was an employee of the Senate, and it is my recollection that every one of those men was employed in some capacity in the Government service.

Mr. JAMES. Does the Senator mean to urge that because the authority given was not abused it is an answer to the ques-

tion that the authority was given?

Mr. WEEKS. No; but, Mr. President, even if that authority was not justified it is a very poor argument to make that because somebody else has done something it is justifiable for me to do something.

Mr. JAMES. Yes; and it is likewise a very poor argument to make that because other people have the right to appoint them

and your side does not it ought not to be done.

Mr. WILLIAMS. Mr. President, it would be worse than an ordinary crime; it would be a sacrilege if politics were permitted to sully the organization or the maintenance or the operation of this great banking scheme. The country will not accept this action, if adopted, as a war upon the merit system, as the Senator from Iowa predicts, for the very simplest reason in the world, and that is that the country has ordinary common sense.

Senators speak about this matter as if it were a "revolution,' a "flood" of spoilsmen coming into the service of the Government of the United States. There will probably be six or eight clerks and three or four messengers at the reserve board's head-The messengers might very well be left under the civil service, and probably will be drawn from the eligible list. The other employees must be in the very highest degree banking experts and of approved experience as banking accountants. You can not draw banking experts from the ordinary civil-service eligible list. The Senator from Iowa [Mr. Cummins] and the Senator from Kansas [Mr. Bristow] and the Senator from New York [Mr. Root] ought to know that.

This board is first to organize, and then it is to manage this great scheme. I repeat, they must have skilled banking accountants. They will have to search the entire United States over to get the 6, or 8, or 10, or at the utmost 12 men of that sort |

that they must have in their employ. They not only must have men of that sort, but those men must be men of the most trustworthy character, because their relations to the board are in the highest degree confidential. It would be madness to go to the eligible list of this country in order to get men who are to act as experts for these great merchants, these great manufacturers, these great representatives of all the industrial conditions of this country who are to compose this reserve board. There is no "revolution" about it. There is no "flood" in it. It is simply a tempest in a teapot.

Gentlemen on the Republican side of this Chamber must be awfully anxious to seek partisan advantage when they undertake to take advantage of this clause in order to try to alarm the country about the safety and perpetuity of the merit system of the United States. What will this reserve board have to do? It is not a bank itself, but it has to have about it men who know banking from the ground up, who are banking accountants, banking experts, and it will get them, if it has good sense, from men who have had years of experience.

In my opinion the Senator or Representative who would be willing to lower himself to the level of going to this board in order to get them to reward some party service to himself by putting one of his partisans, simply because of party or personal political service, in that board's chamber as an employee, as a banking expert and skilled accountant, ought to be kicked out of this House or out of the other one.

Moreover, I have not the slightest idea that that board, composed as it will be, will listen to any purely political argument about one of its appointees. The board itself ought to be neither partisan nor bipartisan. Politics ought not to enter into the consideration of its selection at all. The President ought to be free to find the best men he can find in the United States, and if they shall happen every one of them to be Republicans, or every one of them to be Progressives, or every one of them to be Democrats it would make no difference. They have no political duties. They ought not to be bipartisan.

The Senator from Oklahoma [Mr. Owen] is right. When-

ever you put in a statute a bipartisan provision you secure, you necessitate the consideration of political questions in the appointment. In such an instance the President proceeds to select these men. He is confined to one party for three; he is confined to the other party for three. Merit and fitness must cease to be considered when he reaches the limit of either three.

Gentlemen need not frighten themselves about this, nor need they attempt to make the American people think that a molehill is a mountain or that a harmless mouse is a roaring lion. I can not imagine that this board could have over a dozen employees of this character. It must have, I suppose, a messenger boy or so besides. If I were a member of that board—of course a man of my lack of the required experience could not be and ought not to be; it would require a man of immense and intimate knowledge of business affairs in this country-but if I were a man of that sort and were a member of that board, I would hate-if the Senator from Iowa were one, if the Senator from Kansas were one, each of them would hate-to have to rely upon the ordinary men drawn from the eligible list of the civil service to inaugurate and perpetuate this new, novel, scientific, complicated work. It involves the possession of an intellect at once acute and comprehensive and the same time the experience of an approved expert upon the particular subject matter.

Mr. SUTHERLAND. Mr. President, the arguments made upon the other side of this Chamber with reference to the amendment, while apparently confined to the amendment itself, are really an attack upon the whole civil-service system.

The Senator from Mississippi [Mr. Williams] has just said, and other Senators have said, that only a comparatively small number of employees are to be affected by this amendment. Mr. President, that would be true with reference to any one bureau of the Government. We might do away with the civilservice rules with reference to any one particular bureau or any particular department of the Government without affecting

a comparatively large number of employees.

So it is said that these gentlemen who are to be appointed upon this board are men of high character and that they can be trusted to select the best possible employees for the service

which they are to render.

Mr. President, that also can be said of every department of Are not the Secretary of War, the Secretary the Government. of the Treasury, the Secretary of the Interior, the Postmaster General, and these other department heads men of high character, men of great responsibility?

The argument has been made here that we can do away safely with the civil-service rules because this board is composed of men of high character. Precisely the same argument could be made with reference to doing away with the civil-service rules altogether, because in this Government of ours, with rare exceptions, the men who are at the head of these great departments are men of high character.

But it is the system, the old spoils system, because it bore down men in spite of their own better desires, that we undertook to get rid of. This is a step in the direction of restoring the old, abominable spoils system, and for that reason I am

opposed to it.

The Senator from Kentucky [Mr. James] called attention to the provision of the law with reference to the Monetary Commission. Mr. President, the Monetary Commission amounted to nothing more than an extension of the committees of this body and of the body at the other end of the Capitol. The Monetary Commission was charged with duties which might well have been conferred upon the Finance Committee of the Senate, or which might have been conferred upon a joint committee composed of members of the Finance Committee of the Senate and the corresponding committee of the House, the Committee on Banking and Currency. It was a special commission, that was to be in existence for only a short time and charged with the single duty of making an investigation and ascertaining factsdischarging no governmental functions whatever. There was no more reason why the civil service should have been extended to a commission of that kind, charged with that temporary and single duty, than there would be in extending it to the Judiciary Committee of this body or to the Finance Committee or to any other committee of the Senate. This, however, is a governmental body, charged with great responsibility, perhaps for all time; as much of a governmental body charged with as responsible duties as is the Department of War or the Department of the Interior or any one of the great departments of this Government. If we can afford to do away with the civil-service rules with reference to this board, there is no reason why we can not do away with them with reference to every department of the Government.

Mr. President, the amendment we are considering simply provides that the board shall have authority to select such attorneys, experts, assistants, clerks, and other employees as it may see fit or find necessary without getting them through the civil-service board. It has been said here several times, and not challenged, that there probably will not be more than a dozen of them; and because of this provision we have all this controversy. Mr. President, it looks to me a little bit more like playing politics than anything else. We have heard the expression that in the Post Office Department the civil service has been striken down and that in some other departments the civil service has been stricken down. That statement has been made broadly and sent out to the country, I suppose, in order that there may be a little suspicion created in the minds of the people that we are building a political machine instead of trying to build a wall to strengthen our financial system. It is proposed to discredit it a little in the minds of the people; to send it out crippled, if possible.

Mr. President, I challenge the statement that the Democratic administration has stricken down the civil service in the Post Office Department. I assert that the civil service in the Post Office Department was murdered every day in the year by the past Republican administration. I have it upon reliable information that in whole divisions of the department it has been found upon examination that 92 and 93 and 94 per cent of the employees of those divisions were Republicans. In view of that result, every sane man knows that the civil service was reduced to a farce, and to nothing else. The figures can be brought to substantiate the statement. This went on without a single voice of protest being raised on the other side of the Chamber, not even by the Senator from Kansas [Mr. Bristow], whose long experience in the Post Office Department qualified him to have an intimate knowledge of the subject.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Kansas?

Mr. REED. Yes; I yield for a question. Mr. BRISTOW. I want to state that I think the Senator's information is wholly erroneous, because no such condition, nor anything approaching it, existed in the Post Office Department. Mr. REED. Well, the Senator may have that opinion, but I have it on information that I regard as absolutely reliable.

Mr. President, the Senator from Utah [Mr. SUTHERLAND] said that in undertaking to draw a line of demarcation or distinction between the action of Congress in empowering the Monetary Commission to select its own employees and this measure, that the Monetary Commission was, after all, only an arm of the Government and was something similar to a committee of this body. If these gentlemen love civil service so much, I

wonder why they do not extend it to the employees of the committees of Congress, why they do not extend it to their own secretaries and their own clerks? The answer is that we want service here.

It was said by the Senator from Iowa [Mr. Cummins] that the Interstate Commerce Commission had had no difficulty in employing experts, and getting them through the civil service, in order to make the physical valuation of the railroads. I want to say to the Senator from Iowa that my information is that the only kind of examination which was conducted, or which they could conduct for the engineers whom they selected, was to send out blanks upon which the applicant was required to certify where he graduated, how long he had practiced his profession, the extent of his experience, and to add some recommendations as to moral character and fitness

You talk about the civil service board conducting an examination that will tell whether a man is competent to help lay out a great banking system! I undertake to say that there is not a man upon the civil service board who knows enough to pass an examination of that kind, who has any such qualifications himself, or who knows anything about the matter.

I do not intend to detain the Senate, but I should like to ask the Senator from Massachusetts [Mr. Weeks] how he would like to open up a great bank and be obliged to draw his cashier, his paying teller, and his other confidential men from a civil-

service list?

This board has a great task before it. It requires special talent to enable it to put this system into effect, and it would be as ridiculous to tie its hands and compel it to take incompetent people who have passed some kind of an examination prescribed by a civil-service board, who know nothing about banking, as it would be to compel the Supreme Court of the United States to select its clerk from a list of clerks that might have been furnished to it by a civil-service board.

It seems to me that the Senator from Massachusetts, who has all along taken a very high plane upon this banking question, ought to want to see two things: First, a board of the highest character selected-and I know he does want that-a board skilled in matters of finance and acquainted with the conditions of the country-I know he wants that-and, having created such a board, it seems to me he ought to allow that board a free hand in selecting the men it must trust, in selecting the arms through which it is to put this great system into force and effect.

Mr. BURTON. Mr. President, how much more time have I? have spoken once.

The VICE PRESIDENT. Twelve minutes.

Mr. BURTON. Mr. President, this proposition comes as a thunderclap out of a clear sky, and I believe it will cause surprise, if not amazement, throughout the entire country. If ever there was a board appointed or a system organized in which partisanship should be entirely eliminated, it is the board which this bill proposes to create. The capital of the country does not belong to the Republicans, or to the Democrats, or to the Progressives; it belongs to that great mass of our people who are engaged in agriculture, in industry, and in commerce, including as well the great magnate and the occupant of the humble home who has a few dollars. A part belongs to the ten million and ten thousand of men, women, and children who have four and a half billion dollars in the savings banks.

There has been much complaint of the provisions in this bill. It has been said that coercion lurked in its paragraphs; it has been said that discrimination would be exercised, that one lecality would be preferred over another; but the greatest fear of all has been that politics, with its polluting touch, would in-

fluence this great system.

Mr. President, we have been told that politics will be eschewed; that the President, in his great responsibility—and I trust him as much as Democrats do-would choose the best of men; and, notwithstanding some shifting of the centers of finance and of business, the country at large would be benefited, rates of interest would be lower, and every class in every State would be benefited.

It has been said that by this measure the scepter of finance and banking would be transferred to the New World. Once it dwelt at Venice, where, "laughing at the storm," stout argosies, laden with priceless cargoes, turned their prows from the sea into the canals of the city and glided along under the shadow of turret and spire near that magnificent tower of St. Marks. Then it was transferred to Amsterdam. The sturdy inhabitants of the Netherlands, who with their navy bearing the broom at the masthead, sailed up the Thames. Then it was trans-ferred to London, the great metropolis of the world. But "westward the star of empire takes its way," and it has been promised us that the center of financial operations would be transferred from the banks of the Thames to the banks of the Hudson, where great business structures rise toward the sky, towering higher than the Pyramids, or perhaps to the banks of the Delaware or the Potomac or the mighty Mississippi, because the New World, in its buoyancy and its enterprise, had reached a position in which it deserves this distinction and all the power and glory which it carries.

How are these mighty promises fallen! You are descending from the mountain peak into the miasma of the swamp; you are falling from the castle's top into the muck; you are proposing to establish a great system of finance, but not one that is fair to the whole country, not one that gives to the young man who has graduated from the grammar school or from some other educational institution an equal opportunity with the favorite of the members of this board, for you say, "Throw aside the civil-service law; ignore its provisions."

Oh, but we have heard here so many times that it is futile to examine people in chemistry or conic sections in order to ascertain their ability to perform certain classes of work; we have been told that an examination does not determine the

capability of a man for any task.

Why, Mr. President, examinations in historical erudition are not necessary parts of a civil-service selection. Appointments are made according to experience. Much as I would trust the members of the Federal reserve board as men, I would not trust them as members of that body, with their environment and with the influences which will surround them. As was said at one time in this very Chamber in a discussion on political corruption, the angels fell from heaven with less temptation than that to which men are subjected who have this power of appointment.

As to the Monetary Commission, that was but a temporary organization. The Senator from New York says that the Federal reserve board must make a report every year. How futile that is. Is not that an illustration of the old adage of locking the door after the horse is stolen? After they have disregarded the civil service, after they have made their appointments, after they have introduced politics into the sacred temple of finance and into the management of the savings of the people, then they will write out a statement and submit it to Congress, to be put on the desk of the Presiding Officer, who will say, "Received and ordered to be printed." Oh, what an amount of solace there would be in that after the public service had been looted!

Mr. President, I can not listen with patience to such arguments. From the very first day I entered Congress I have advocated the extension of the civil service. I have sometimes stood against currents of popular opinion in my own State and community, because I thought that it was right to remove the public service of the country from the spoils system, to pro-claim to the young men and young women, to those of all parties, "You shall be appointed to public positions, with the distinction which belongs to employment by the Government, according to your ability and standing under a competitive examination." If ever there was a place where it was needed it is here in this measure which we are now considering

I want to say to my friends on the other side that the people are watching your actions on this measure. They are watching every section and every line of this bill. There never was a They are watching time when the people desired so much to rely on your patriotism as in framing this law. They may alternately entertain distrust and hope, but they desire that hope may prevail. I trust this system will succeed, but in order that it may succeed, we must have a good bill and we must not allow the withering touch of the spoils system to corrupt it. We must not set up any standard except that of the welfare of the whole country, the devotion of our best efforts to establishing a financial system which shall enlarge our wealth and our resources, which shall be fair to every one, which shall treat alike Republican, Democrat, and Progressive, and which especially shall be, like Cæsar's wife, above suspicion, above the imputation that it marks a return to the old spoils system, with all its iniquities.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Colorado?

Mr. BURTON. I do.

Mr. THOMAS. I am considerably impressed by this debate on both sides of this Chamber. Before the Senator takes his seat I should like to call his attention to one feature of this amendment. It provides for the selection of attorneys, experts, assistants, employees, etc. Does not the Senator think there is, or should be, a distinction in the method and source of selecting attorneys and experts, as contrasted with attendants,

Mr. BURTON. If I were at the head of a Government bureau and desired the services of an attorney or an expert, I should

hesitate to depend upon my own judgment. I should rather have an eligible list to choose from, that I might bring them in before me and see them. But does not the Senator from Colorado recognize that the President, who is of your party, has the absolute right to suspend any provision of the civil-service law?
Mr. THOMAS. Oh, yes; I understand that.

Mr. BURTON. Why make an exception here when you have that authority?

Mr. THOMAS. I do not understand that there is such a thing as an eligible list of attorneys and financial experts. However, if I am wrong the Senator will please correct me.

Mr. BURTON. There may not be an eligible list, but here you are seeking to organize a body that will enjoy a certain distinction beyond any organization or bureau of the Government. It will be the very blue ribbon of the Government service. Are we to say at the very outset right here in this bill, "We will shut out every young man who desires to come into that organiza-tion and who is willing to make it his life work," merely in order that somebody may exercise favoritism in making the selections for appointments?

The PRESIDING OFFICER (Mr. Walsh in the chair). The

time of the Senator from Ohio has expired.

Mr. WEEKS. Mr. President, as the action of the Monetary Commission has been used as a precedent for the proposed action on this amendment, I wish to call to the attention of the Senate specifically what was done by that commission.

The financial clerk of the commission was the financial clerk of the Senate. He received no salary, but after the commission had terminated its services he was voted \$1,200 for his entire work connected with the Monetary Commission.

The secretary of the commission was the secretary of the Committee on Finance. He was voted by Congress \$2,200 for his work in connection with the commission. He received no salary.

The clerk of the commission received \$2,000 during the life of the commission, which was four or five years.

A messenger was employed at \$60 a month, who served when

the commission was actually in session. Those were the only employees of the Monetary Commission

with the exception of Dr. Andrew, who was the financial expert

during the services of the commission.

Mr. BRISTOW. Mr. President, it has been stated here time and time again that there would not be more than a dozen of these employees. Of course no Senator knows how many employees there may be, nor how large a bureau or establishment this Federal reserve board may ultimately grow into; but here it is proposed to incorporate into the law a provision that the employees of this great governmental agency shall not be selected through the civil service.

Mr. SMOOT. Mr. President, will the Senator yield to me?
Mr. BRISTOW. I have only a minute's time. I wish the
Senator would take the floor after I am through. This is my second speech, and I have not much time left.

Reference was made to what would be my personal action in the event that I were in charge of a bureau or a department of the Government. I want to say that my experience has been that you will get better employees through the civil service than you will get upon political recommendation. I think that is the experience of nearly every executive officer. But the astounding thing is that we are urged here to make it impossible for the President to have these appointments made through the civil service by forbidding it in the law.

As has been said, the President has the authority to exempt every employee from the civil-service law if he thinks the interests of the banking department require it. The Democratic caucus is not willing to trust the President of the United States with that authority, but seeks by this amendment to take from him any authority, so far as concerns the exercise of the civilservice law, in making these appointments. It is wholly and solely for the purpose of making them political appointments, of throwing this open to the depredations of political spoilsmen; and all of the declarations that have been made that this organization was not to be in politics are contradicted by the adoption of this amendment here this afternoon.

Mr. SMOOT. Mr. President, I should have said nothing on this question at this time if it had not been for the reference made by Senators to the number of employees affected by the

pending amendment.

It is perfectly ridiculous for a Senator to get up on this floor and state there will not be more than a dozen employees involved. I predict that the board will not be organized one year until there will be a hundred or more employees and we will be asked to provide by appropriation for their salaries. I want the Senators on the other side to remember that I now state, and with all the confidence in the world, that it will not be one year until there will be a hundred or more employees. If this is not the case, the work of the board will amount to nothing.

There are six members to be appointed. If the board's labors amount to anything by way of imparting information or obtaining information for proper and intelligent action on their part, each member will have to have at least two stenographers. Who is going to keep in order all of the information the board will be compelled to receive and distribute? Each member of the board can not do this necessary work, nor will we expect him to

I want to say now, as other Senators have already said, that there has been and is a determined effort on the part of the Democratic majority to abolish the merit system. Of course, the Senator from Oklahoma under present conditions would as soon trust the Federal board to select these employees as the Civil Service Commission. Under this administration he might have said the same of every bureau in this Government, and with just as much justification. If we are going to maintain the civil-service system and have appointments made under that system for all the bureaus of this Government, this amendment should be defeated.

I wonder why this amendment was not incorporated in the bill when first reported to the Senate. I believe I know why. If it had been, there would have been protests against it from one end of this country to the other, and we would have had time to discuss it and the country would have been informed of the intent of it; but it is not offered until a unanimous-consent agreement is reached preventing any Senator from speaking longer than 15 minutes upon any one amendment.

I believe the offering of this amendment is a mistake. not improve the bill, but it is an attack upon the civil service. The mere fact that the Democratic Party wants these positions for political purposes will not be a sufficient justification in the minds of the people of this country for setting aside a most splendid merit system of securing employees for the different departments and bureaus of our Government.

Mr. GALLINGER. Mr. President, I have not taken much time in this debate, and I do not propose to do so. I will simply ask to have read the Democratic platform of 1908 and the

Democratic platform of 1912 relating to the civil-service law.

The PRESIDING OFFICER. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

CIVIL SERVICE.

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be standard of appointment and promotion, rather than services rendered to a political party.

Mr. GALLINGER. That is the plank of the Democratic national platform of 1908.

Now I ask that the plank of the Democratic national platform of 1912 be read.

The Secretary read as follows:

CIVIL-SERVICE LAW.

CIVIL-SERVICE LAW.

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party; and we favor a reorganization of the civil service, with adequate compensation commensurate with the class of work performed, for all officers and employees; we also recommend the extension to all classes of civil-service employees of the benefits of the provisions of the employers' liability law; we also recognize the right of direct petition to Congress by employees for the redress of grievance.

RECESS.

Mr. CUMMINS. Mr. President, I think we ought not to vote upon this amendment before the recess. I know a great many Senators have already gone from the Chamber, believing the debate would consume the time until 6 o'clock. If our friends upon the other side would like to take a recess now, I think it would be entirely proper to do so. I do not move a recess, but if it is not desired, I shall have to suggest the absence of a quorum. The Senators who have left have done so in the belief that there would be no vote on this amendment until the evening session.

Mr. OWEN. I think the suggestion is a good one; and I therefore move that the Senate take a recess until 8 o'clock.

The motion was agreed to; and (at 5 o'clock and 55 minutes p. m.) the Senate took a recess until 8 o'clock p. m.

EVENING SESSION.

The Senate reassembled at 8 o'clock p. m.

Mr. SMOOT. Mr. President, I do not believe we ought to start business without a quorum to-night. I see about five Senators in the Chamber. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WALSH in the chair).

The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gronna Hollis Hughes James Johnson Jones Kern Lane Lea	Overman	Smith, Md.
Borah		Owen	Smith, S. C.
Brady		Page	Smoot
Brandegee		Pittman	Sterling
Bristow		Pomerene	Sutherland
Rryan		Rausdell	Thomas
Burton		Reed	Thompson
Catron		Robinson	Tillman
Chilton		Root	Townsend
Chilton Clarke, Ark. Colt Cummins du Pont Fletcher Goff	Lewis McCumber Martin, Va. Martine, N. J. Myers Newlands Norris	Saulsbury Shafroth Sheppard Sherman Shively Simmons Smith, Ariz.	Vardaman Walsh Warren Williams

The PRESIDING OFFICER. Sixty-one Senators have answered to their names. There is a quorum present. The Senate resumes the consideration of House bill 7837.

BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States,

and for other purposes.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma [Mr. Owen] to the amendment proposed by him in the nature of a substitute.

Mr. BRANDEGEE. I ask for the yeas and nays on the amendment to the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson]. In his absence I withhold my vote, unless it is necesto make a quorum.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson].

I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. SMITH of Maryland (when his name was called). I have a pair with the senior Senator from Vermont [Mr. Dilayer and the senior Senator from Vermont [Mr. Dilayer and the senior Senator from Vermont [Mr. Dilayer and the senior Senator from Oblehoma LINGHAM]. I transfer that pair to the Senator from Oklahoma [Mr. Gore] and vote "yea."

Mr. STERLING (when his name was called). I transfer my pair with the senior Senator from Louisiana [Mr. Thornton] to the junior Senator from California [Mr. Works] and vote 'nav.'

Mr. REED (when Mr. Stone's name was called.) I renew the statement heretofore made in reference to the illness of my colleague [Mr. Stone]. He is paired with the Senator from Wyoming [Mr. Clark]. If my colleague were present, he would vote "yea.

The PRESIDING OFFICER (when Mr. Walsh's name was called). The present occupant of the chair is paired with the Senator from Rhode Island [Mr. LIPPITT], and will therefore refrain from voting.

The roll call was concluded.

Mr. OVERMAN. I have a general pair with the senior Senator from California [Mr. Perkins]. I will transfer that pair to the senior Senator from Arizona [Mr. Ashurst] and vote. I vote "yea."

Mr. WILLIAMS (after having voted in the affirmative). Since I have voted I have learned that the Senator from Pennsylvania [Mr. Penrose] is not in the Chamber at this moment and has not voted. I therefore withdraw my vote, being paired with that Senator.

Mr. MYERS. I inquire if the Senator from Connecticut [Mr. McLean] has voted?

The PRESIDING OFFICER. He has not.

Mr. MYERS. I have a pair with that Senator and in his absence I withhold my vote. If I were at liberty to vote, I would vote "yea."

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I

Mr. SMITH of Arizona. I announce my pair with the Senator from New Mexico [Mr. Fall]. If I were at liberty to vote, I would vote "yea."

Mr. WARREN. My colleague [Mr. Clark of Wyoming] is detained from the Chamber. He is paired with the Senator from Missouri [Mr. Stone]. If my colleague were present and permitted to vote, he would vote "nay."

Mr. KERN. I desire to announce the unavoidable absence of the senior Senator from Georgia [Mr. Bacon], and to state that he is paired with the senior Senator from Minnesota [Mr. NELSON 1.

The result was announced-yeas 34, nays 29, as follows:

YEAS-34.

Bankhead Bryan Clarke, Ark. Fletcher Hollis Hughes James Johnson Kern	Lea Lewis Martin, Va. Martine, N. J. Newlands O'Gorman Overman Owen Pittman	Pomerene Ransdell Reed Robinson Saulsbury Shafroth Sheppard Shields Shively	Simmons Smith, Md. Smith, S. C. Swanson Thompson Tillman Vardaman

So Mr. Owen's amendment to the amendment was agreed to.

Mr. OWEN. Mr. President— Mr. JONES. Will the Senator from Oklahoma yield? I wish Mr. JONES. to offer an amendment following the amendment just adopted.

Mr. OWEN. I will yield to the Senator.
Mr. JONES. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. It will be read.

The Secretary. It is proposed to add at the end of the amendment just agreed to the following proviso:

Provided, That nothing herein shall prevent the President from placing any or all the foregoing officers and employees in the classified service.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Washington [Mr. Jones] to the amendment of the Senator from Oklahoma [Mr. OWEN].

Mr. GALLINGER. I ask the Senator from Washington if the consequence of that amendment is that they may be appointed outside of civil service, and then the President is authorized by the amendment to put them in the civil service?

Mr. JONES. That would be the effect of it.

Mr. GALLINGER. Well, Mr. President— Mr. JONES. As I understand, under the amendment which has just been offered, the President could not at any time put these places under the civil service. If that is not the effect of the amendment proposed by the Senator from Oklahoma, then, of course, I should not care to offer my amendment. I have understood from the argument and from the reading of the amendment of the Senator from Oklahoma that if the amendment were adopted, it would absolutely prohibit the President from putting these positions at any time under civil service.

Mr. DU PONT. I ask that the amendment may be read.

Mr. JAMES. As I understand the Senator from Washington, he is trying to make it possible for President Wilson to do what Republican Presidents have heretofore done under like circumstances

Mr. JONES. I am trying to make it so that if the President deems it wise to put these places under the civil-service regulations he can do so, because that is where they ought to be. Even though President Wilson may appoint them in the first instance outside the civil-service law, they ought to be put under the civil service hereafter.

Mr. SMOOT. Under the present law—
The PRESIDING OFFICER. The Senator from New Hamp-

shire [Mr. GALLINGER] has the floor.

Mr. GALLINGER. I will simply make this observation: I do not see why the President could not exercise that discretion, so far as these officials are concerned, as well as in reference to other officials. That is one, as I think, of the evils of the civil-service law. In fact, the civil-service law is not responsible for it, but it has been done under another statute. I think it is an evil that the President is given authority at all to extend the civil-service regulations by Executive proclamation; but that has been done in thousands of cases, and I can not quite understand why he would not have authority to do it in this

case. Perhaps the Senator from Oklahoma can explain the operation of it.

Mr. OWEN. I think the President would have authority under the general law, but I have no objection to the amendment of the Senator.

Mr. GALLINGER. I think, Mr. President, we ought to object to it.

Mr. JONES. Mr. President, will the Senator from New

Hampshire yield to me?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Washington?

Mr. GALLINGER. I do.

Mr. JONES. If the statement of the Senator from Oklahoma is correct that under the amendment offered by him, if it is adopted, the President would still have authority to place these officials under the civil service, I withdraw my amendment.

Mr. OWEN. I think he undoubtedly has that authority: Mr. JONES. On that statement I withdraw the amendment.

The PRESIDING OFFICER. The amendment to the amendment is withdrawn.

Mr. OWEN. On page 30, line 20, after the word "State," I move to insert the words "or local," so as to read:

(1) To grant by special permit to national banks applying therefor, when not in contravention of State or local law—

And so forth.

Mr. WEEKS. I should like to ask the Senator from Oklahoma what is meant by "local law"?

Mr. OWEN. That refers to the laws of the District of

Mr. OWEN. Columbia.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 31, line 10, after the word "council," I move to insert the words:

May, in addition to the meetings above provided for, hold such other meetings in Washington, D. C., or elsewhere, as it may deem necessary—

Referring to the Federal council.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Oklahoma to the amendment.

Mr. GALLINGER. Let the amendment be stated.

Mr. BURTON. After the word "select," how would the whole line read as proposed to be amended?

Mr. OWEN. It would read:

The council may, in addition to the meetings above provided for, hold such other meetings in Washington, D. C., or elsewhere, as it may deem necessary, may select its own officers and adopt its own methods of procedure, and a majority of its members shall constitute a quorum for the transaction of business.

The PRESIDING OFFICER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 33, line 7, I move as an amendment to the amendment—and I call the attention of the Senator from South Carolina, the Senator from Texas, and the Senator from Montana, who have been especially interested in this matter, to this amendment-the following:

Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months may be discounted in an amount to be limited to a percentage of the capital of the Federal reserve bank, to be ascertained and fixed by the Federal reserve board.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 38, line 4, after the word "receivable," I move to insert the words "by all national and member banks and Federal reserve banks, and," so as to read:

The said notes

Referring to the Federal reserve notesshall be obligations of the United States and shall be receivable by all national and member banks and Federal reserve banks, and for all taxes, customs, and other public dues.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 40, line 5, referring to the redemption of Federal reserve notes presented for redemption at the Treasury of the United States, after the word "issued," I move to

And thereupon such Federal reserve bank shall, upon demand of the Secretary of the Treasury, reimburse such redemption fund in lawful money, or if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates, and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasury in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer.

Mr. BURTON. Why is the matter of judgment of the amount.

Mr. BURTON. Why is the matter of judgment of the amount left to the Secretary of the Treasury rather than to the Federal reserve board? It seems to me the power to determine these questions should be left in principal degree to the Federal reserve board. The redemption is to be at the Treasury.

Mr. OWEN. Mr. President, the reason for that was that the Secretary of the Treasury, having charge of the administrative end of the redemption of these notes, through the Treasurer of the United States, it was thought better that he should determine the question of the amount of gold that might be required for this purpose, because he would be in immediate communication with the Treasurer of the United States, who is acting in the Treasury Department, and it was not thought necessary to require the Federal reserve board to pass upon a mere administative matter of this character. We have found, with regard to the national-bank notes, that while a 5 per cent redemption fund was provided by the statutes, in reality it has since transpired that a larger amount than 5 per cent was necessary because of the continual supply of these notes flowing through the Treasury for redemption.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Oklahoma to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. Mr. President, on page 41, line 6, after the word "delivery," I move to insert the words "together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds," so that the language shall read:

And the amount of such Federal reserve notes so issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore submitted by him.

The amendment to the amendment was agreed to.
Mr. OWEN. On page 47, line 4, after the word "issued," I
move to insert the words "and redeemed," so that the language as to these notes shall read:

They shall be issued and redeemed under the same terms and conditions as national-bank notes.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Oklahoma to the amendment heretofore submitted by him.

The amendment to the amendment was agreed to.
Mr. OWEN. On page 47, line 15, after the word "maturing,"
I move to insert the words "or payable," so as to read:

Maturing or payable within 30 days.

Mr. BRANDEGEE. Mr. President, I wish to ask the Senator, Would that include a liability which matured 30 days after date? It reads "maturing or payable within 30 days."

Mr. OWEN. It would be something less than 30 days Mr. BRANDEGEE. I assume that the ordinary note would be payable 30 days after date. Now, such a note as that would not be a demand liability, within the definition of this bill, would it?

Mr. OWEN. I think it would not.
The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore submitted by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 47, line 17, in the provision giving the definition of "time deposits," I move to insert, after the words "30 days," the words "and all savings accounts and certificates of deposit which are subject to not less than 30 days' notice

before payment."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to his amendment. Mr. GALLINGER. Let the amendment to the amendment be stated at the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 47, line 17, after the words "30 days," it is proposed to insert a comma and the following words: "and all savings accounts and certificates of deposit which are subject to not less than 30 days' notice before payment.

Mr. BRISTOW. Mr. President, is it not true that a great many banking establishments receive deposits which are subject to 30 days' notice, but, as a matter of fact, they never exercise the right of demanding notice and they are treated as merely checking accounts? The amendment proposed would require all such accounts to be considered as time deposits. Take almost

any trust company in town here—
Mr. OWEN. The terms "which are subject to not less than 30 days' notice" relate to all savings accounts and certificates They do not relate to the ordinary checking of deposit. account, which is not a savings account, and which is not a certificate of deposit.

Mr. JONES. Mr. President, does not the Senator think that the words "on or" should be inserted just before the word "payable," so as to read "on or after 30 days"? It seems to

me that you have no provision here covering a 30-day obligation. The first clause relates to those maturing within 30 days and the second to those maturing after 30 days.

Mr. OWEN. Those words "subject to not less than 30 days' notice" are included with time deposits. Those within 30 days are less than 30 days; the others are those not less than 30 days, which includes both, and does not leave even a day uncovered.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Oklahoma to the amendment

The amendment to the amendment was agreed to.

Mr. OWEN. On page 48, line 22, I move to strike out the word "eighteenths" and to insert the word "fifteenths," so as to read:

In its vaults six-fifteenths thereof.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oklahoma to the

The amendment to the amendment was agreed to.

Mr. OWEN. On page 49, line 15, I move to strike out the words "For a period of 24 months after said date" and begin a new sentence, so as to read:

The balance of said reserves shall be held in its own vaults or in the Federal reserve bank, at its option.

The PRESIDING OFFICER. The question is on agreeing to to the amendment of the Senator from Oklahoma to the amendment.

Mr. BURTON. One minute, Mr. President. I do not quite understand what that means,

Mr. OWEN. It refers to the reserves of banks in central reserve cities. It authorizes such a bank to keep the balance of its reserves not required to be placed in the Federal reserve bank either in its own vaults or in the Federal reserve bank, at its option

Mr. BURTON. Why is not the language now in the bill nec-

essary-" for a period of 24 months after said date'

Mr. OWEN. There is no reason for postponing the period, since the bank has the cash in its own vaults; and if it chooses to transfer it to the Federal reserve bank for its convenience, there is no reason why it should not do so.

Mr. BURTON. That is, if the bank holds a certain amount of reserve, there is the option retained to itself to turn it over? Mr. OWEN. That is correct. That is correct.

Mr. BURTON. So there is no reason for placing any limit upon it'

Mr. OWEN. That is right.
The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 49 I move to strike out lines 18, 19, 20, and 21,

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 49, beginning on line 18, it is proposed to strike out the following paragraph:

After said 24 months' period all of said reserves, except those herein permanently required to be held in the Federal reserve bank, shall be held in its own vaults or in the Federal reserve bank, or both, at its

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 50, line 14, I move to strike out the words following the word "shall," down to the end of the sentence, and to insert the following words: "Act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act," so as to read:

No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 50, beginning on line 14, after the word "shall," it is proposed to strike out the remainder of the paragraph and insert:

Act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act.

Mr. GRONNA. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I do.

Mr. GRONNA. Does that mean that a member bank may extend credit to or discount the notes of a nonmember bank, but it can not act as its agent in getting a loan from the reserve association?

Mr. OWEN. It means they are at liberty to have any transactions whatever with the nonmember banks, but that they must not act as a medium for nonmember banks to get

loans out of Federal reserve banks.

Mr. GRONNA. I think that would be much better. I called attention to this provision on yesterday. In my State we have about 600 State banks. They are all small banks, and I do not think they will all come into this association and become parts of this system. They have correspondents in the larger cities. It seems to me it would work a hardship on the member banks in the large cities to prohibit them from doing business with these small banks. That is why I called attention to

it on yesterday, before we took a recess.

Mr. BURTON. Are the words "except upon written permission of the Federal reserve board" stricken out, or do they re-

main in, under the proposed amendment?

Mr. OWEN. They are stricken out, The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore proposed by him.

The amendment to the amendment was agreed to.
Mr. OWEN. On page 54, line 18, after the words "Comptroller of the Currency," I move to insert the words "or from the board of directors of such bank," so as to read:

No examiner, public or private, shall disclose the names of borrowers or the collateral for loans of a member bank to other than the proper officers of such bank without first having obtained the express permission, in writing, from the Comptroller of the Currency or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction.

The PRESIDING OFFICER. The amendment to the amendment will be stated

The Secretary. On page 54, line 18, after the words "Comptroller of the Currency," it is proposed to insert:

or from the board of directors of such bank.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 58, I move to insert, after line 21, as a new section, the provision I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 58, after line 21, it is proposed to insert a new section to be known as section 28, and to read as follows:

SEC. 28. Any association formed under this title may, by the vote of shareholders owning two-thirds of its capital stock, reduce its capital to any sum not below the amount required by this title to authorize the formation of associations; but no such reduction shall be allowable which will reduce the capital of the association below the amount required for its outstanding circulation, nor shall any reduction be made until the amount of the proposed reduction has been reported to the Comptroller of the Currency and such reduction has been approved by the said Comptroller of the Currency and by the Federal reserve board, or by the organization committee pending the organization of the Federal reserve board.

Mr. BRANDEGEE. Will the Senator allow me to ask a question there? I notice the language is, "Any association formed under this title."

Mr. OWEN. It refers to the national-bank act. Mr. BRANDEGEE. Does this bill purport to be an amendment of the national-bank act?

Mr. OWEN. No; this section of the bill purports to be an

Mr. OWEN. No; this section of the bill purports to be an amendment of that particular section of the national-bank act.
Mr. BRANDEGEE. Very well.
Mr. WEEKS. I should like to ask the Senator from Oklahoma to explain the necessity for this provision, and what is

intended to be accomplished by it.

The PRESIDING OFFICER. Before that is done, the Chair desires to state that the Secretary informs the Chair he did not

read all of the amendment, and he will read it again.

Mr. BURTON. In order that we may clearly understand it, I ask that it be read again in its entirety.

The Secretary. It is proposed to add a new section to the bill, to be known as section 28, and to read as follows:

bill, to be known as section 28, and to read as follows:

Sec. 28. Section 5143 of the Revised Statutes is hereby amended and reenacted to read as follows: "Any association formed under this title may, by the vote of shareholders owning two-thirds of its capital stock, reduce its capital to any sum not below the amount required by this title to authorize the formation of associations; but no such reduction shall be allowable which will reduce the capital of the association below the amount required for its outstanding circulation, nor shall any reduction be made until the amount of the proposed reduction has been reported to the Comptroller of the Currency and such reduction has been approved by the said Comptroller of the Currency

and by the Federal reserve board, or by the organization committee pending the organization of the Federal reserve board.

Mr. WEEKS. I ask, for information, what is the purpose of this amendment?

Mr. OWEN. The purpose is, as the amendment states, not to permit a bank to lower its capital stock without providing for its circulation in the first place, nor to do it without the consent of the Federal reserve board as well as the Comptroller of the Currency. Under this new system it was thought proper to give this right of supervision to the Federal reserve board. which exercises a general supervision over the system.

Mr. BURTON. The only difference between this and the

present law is that the consent of the Federal reserve board, or of the organization committee before the Federal reserve board is established, is added to the present law; otherwise it is the

same as the present law, is it not?

Mr. OWEN. It is practically the same; yes, The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. I move, on page 58, line 22, to strike out "28" and insert "29," so as to read "Section 29" instead of "Section 28."

The PRESIDING OFFICER. The Chair is advised that the Secretary makes such corrections without the necessity of formally adopting an amendment of that character.

Mr. OWEN. I now move the reconsideration of the amendment made to-day, on page 3, in lines 19 and 20, in which there were stricken out the words "engaged in commercial banking," and there were inserted in line 20, after the word "Columbia." the words "incorporated under an act of Congress approved October 1, 1890."

I should like to explain that matter. The amendment adopted to-day compels the trust companies of the District of Columbia to enter the system. They are not really engaged in commercial banking under the terms of their charters under the act of October 1, 1890. The way the language was first written it related to trust companies engaged in commercial banking. Having ascertained that they did not engage in commercial banking in the ordinary acceptation of the term, it is desired to make it permissive as to them, and these words are proposed to be changed so as to leave it permissive and not compulsory.

Mr. BURTON. Just what is stricken out there? As the bill read before the amendment of to-day the trust companies engaged in commercial banking within the District of Columbia were placed on the same footing as national banking associa-They were required, within 60 days after the passage of the act, to accept it or forfeit their charters.

Mr. OWEN. I was asking to have this amendment reconsidered, so as then to insert words, after "eligible bank," in line 21, which would make it permissive, but I have first to ask the

reconsideration of the form adopted this afternoon.

The PRESIDING OFFICER. The question is on the motion made by the Senator from Oklahoma to reconsider the vote by which the amendment was adopted on page 3, lines 19 and 20, of the amendment heretofore offered by the Senator from Okla-

The motion to reconsider was agreed to.

Mr. OWEN. I now move, in line 21, page 3, after the word "bank," to insert the words "including the trust companies within the District of Columbia incorporated under an act of Congress approved October 1, 1890," so as to read:

And every eligible bank, including the trust companies within the District of Columbia incorporated under an act of Congress approved October 1, 1890, is hereby authorized to signify.

Mr. ROOT. What becomes of lines 19 and 20?
Mr. OWEN. I intend to strike them out as a part of this motion. I move also to strike out the words "including the trust companies engaged in commercial banking within the District of Columbia," in lines 19 and 20, which leaves the language then to read:

Under regulations to be prescribed by the organization committee, every national banking association in the United States is hereby required and every eligible bank and trust company within the District of Columbia incorporated under an act of Congress approved October 1, 1890, is hereby authorized to signify in writing—

Mr. BURTON. On that reading, would not that confine the eligible banks to those incorporated within the District of Columbia under the act of October 1, 1890? As I understand this, "every eligible bank" is a very general expression.

Mr. OWEN. I think the suggestion of the Senator is sound. I will change that to read "every eligible bank in the United States and every trust company within the District of Columbia incorporated under an act of Congress approved October 1, 1890, is hereby authorized.'

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 3, lines 19 and 20, it is proposed to strike out the words "including the trust companies engaged in commercial banking within the District of Columbia," and on line 21, after the word "bank," to insert the words "in the United States and every trust company within the District of Columbia incorporated under an act of Congress approved October 1, 1890."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 4 the same subject matter was treated this afternoon, in which an amendment was passed striking out the words "engaged in commercial banking," in lines 24 and 25, and inserting after the words "District of Columbia" the words "incorporated under an act of Congress approved October 1, 1890." It refers to the same subject matter, and I move a reconsideration of that amendment.

The motion to reconsider was agreed to.

Mr. OWEN. I now move to strike out, in line 24, on page 4, the words "or trust company engaged in commercial banking in the District of Columbia."

The amendment to the amendment was agreed to.

Mr. OWEN. On page 5, lines 6 and 7, I move to strike out the words "within the discretion of the Federal reserve board," so as to read:

All of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall be thereby forfeited.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 29, line 9, I move to strike out the words "such tax to be uniform in its application to all Federal reserve banks and to member banks required to keep the same reserves," and to insert the words:

And provided further, That when the gold reserve held against Federal reserve notes falls below 40 per cent, the Federal reserve board shall establish a graduated tax of not more than 1 per cent upon such deficiency until the reserves fall to 32½ per cent, and when said reserve falls below 32½ per cent, and when said reserve falls below 32½ per cent or fraction thereof that such reserve falls below 32½ per cent. The tax shall be paid by the reserve bank, but the reserve bank shall add an amount equal to said tax to the rates of interest and discount fixed by the Federal reserve board.

Mr. BRISTOW. Let me inquire if that tax is to be distributed to all banks that have obtained rediscounts during the year. Suppose a number of banks obtained rediscounts before the gold reserve falls below 40 per cent, and then a bank, after it falls below 40 per cent, should obtain a discount. Is the penalty added to that bank or is the burden distributed upon all the banks which have received discounts during the year?

Mr. OWEN. It would be added to the interest rate. would become a part of the earnings of the bank itself in that contingency, and would be distributed as a part of the net

earnings

Mr. BRISTOW. It would be an expense that followed the

member bank that got the discount?

It would go to the credit of the United States. Mr. BRISTOW. But the point is this: Suppose a bank has not had any rediscounts during the year. Other banks have had them, and because of the rediscounts that other banks have secured the gold reserve is reduced, so that if the bank coming in late, that had none at all, gets any rediscount it must pay the additional tax caused by the accommodations which had been extended previously to other banks. The provision we have in our State is similar, except that we have a provision requiring that the tax shall be distributed upon all the banks in proportion to the rediscounts that they have obtained.

Mr. WEEKS. During the year. Mr. BRISTOW. During the year.

Mr. OWEN. That was not considered in framing this amendment.

Mr. BRISTOW. The Senator can see that it would be manifestly unfair if in November or some other period in the year a bank that had no discount at all was taxed because it needed the money then, when other banks that had discounts, for which the additional tax was charged, had reduced the gold reserve

Mr. OWEN. I take no special issue with that suggestion, but it is ignored in this amendment.

Mr. BRISTOW. I call the Senator's attention to it so that he may consider it.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Oklahoma,

Mr. HITCHCOCK. I should like to have the amendment

The PRESIDING OFFICER. It will be read.

The Secretary. On page 29, line 9, after the word "specified," strike out the remainder of the paragraph and insert a colon and the following additional proviso:

And provided further, That when the gold reserve held against Federal reserve notes falls below 40 per cent the Federal reserve board shall establish a graduated tax of not more than 1 per cent upon such deficiency until the reserves fall to 32½ per cent, and when said reserve falls below 32½ per cent a tax at the rate, increasingly, of not less than 1½ per cent upon each 2½ per cent or fraction thereof that such reserve falls below 32½ per cent. The tax shall be paid by the reserve bank, but the reserve bank shall add an amount equal to said tax to the rates of interest and discount fixed by the Federal reserve board.

Mr. HITCHCOCK. Mr. President, in the place of the first proviso I offer the following amendment:

Provided, That the amount of such tax paid by the bank during a fiscal year shall be charged to the member banks in its district in proportion to their average discounts during that year.

That makes the tax fall pro rata upon all the borrowing banks and is an equitable arrangement. It simplifies it by having it done in a lump sum at the end of the year.

Mr. OWEN. I think it would require quite complicated bookkeeping to adjust matters on that line, where a bank has two or three thousand correspondents, and I do not feel that I can accept the proposed amendment.

Mr. HITCHCOCK. I think if the Senator from Oklahoma will consider it a moment he will realize that this is the simplest plan. It does not require during the year the adjustment of any interest rate, as the amendment which the Senator proposes does. The bank goes on and does its business, discounting the paper of member banks, and when its reserve falls below the amount stipulated in the Senator's amendment then the reserve bank will be required to pay a certain lump sum of money to the Government of the United States. That sum of money it will then assess against its member banks in proportion to the discounts they received during the year. The Senator's provision is exactly the same, as far as the tax is concerned which the reserve bank pays to the Treasury, but when at the end of the year the reserve bank has ascertained the amount which it has paid to the Treasury of the United States my amendment distributes that among the banks which have borrowed during the year in proportion to their borrowing.

There is no possible way in which it can distribute it during the year. At one time the reserves in the reserve bank may be down 11 per cent and at another time they may be down 2 per cent. They will be down different amounts at different times during the year, and there is no possibility of distributing that tax for the deficiency upon the banks unless you do it in a lump

sum at the end of the year.

Mr. WILLIAMS. If the Senator will pardon me, it is automatically distributed by adding the tax to the discount rate. It automatically distributes the tax to the borrower, who comes in at the time when the reserve has fallen below the required amount.

There is nothing in what the Senator from Kansas said about the misfortune of somebody who had not borrowed early enough. If I am running a bank and find my reserves depleted, I immediately raise my rate so as to bring my reserves back to their proper state by checking up discounting and lending. simply the misfortune of the bank that comes at the wrong time to borrow money, and it is a misfortune that prevails in the entire banking business.

Mr. HITCHCOCK. If the Senator will permit me, as I can not yield for a long interruption in the short time I have to speak, I will say that he is mistaken, because the rate of discount which is charged by the reserve bank is under the regulation and control of the Federal board. Under the general terms of the act the rate can be raised at any time without regard to this penalty.

Mr. WILLIAMS. That has nothing to do with this question, if the Senator will pardon me.

Mr. HITCHCOCK. I say that is an entirely different proposition.

Mr. WILLIAMS. It is an entirely different proposition.
Mr. HITCHCOCK. When a bank comes to the reserve bank
to secure a discount it is charged the rate of discount which prevails at that time, which is dependent upon the scarcity of

money.

Mr. WILLIAMS. I understand that.

Mr. HITCHCOCK. As a matter of fact, these borrowing banks are the owners of the reserve bank, and they will be required to pay this tax not in proportion to their holdings of stock in the reserve bank, but in proportion to the amount of accommodation which they receive from the reserve bank.

Mr. WILLIAMS. The stockholders ought to stand loans in proportion to the stock, not in proportion to their borrowing or their dealing

Mr. HITCHCOCK. That is not the amendment of the Senator from Oklahoma. He is attempting to distribute it in proportion to the loans, but it can not be distributed in proportion to the loans by attempting to do it piecemeal. It has to be done pro rata at the end of the year.

Mr. WILLIAMS. As every bank, it distributes in proportion to the loans to-day by simply raising the rate of interest whenever its reserve goes below what it thinks is safe.

Mr. HITCHCOCK. It is not a question of raising the rate of interest. That the bank can do regardless of this provision. This is a question of paying a tax to the Government of the United States upon a sliding scale applied at different times during the year and in different amounts at different times.

Mr. REED. Mr. President, the plan of distributing these burdens which is submitted by the Senator from Nebraska is inequitable and impractical, in my judgment. It proposes, in addition to the interest rate which a man contracts to pay, to add an arbitrary sum which is occasioned not by the money market when he borrows nor by the contract which he makes but by the independent action of other men, which takes place subsequent to the time he makes his bargain. A bank under these circumstances desiring accommodation and finding the interest rate low and a good reason for borrowing money, because it is a good investment, and having borrowed that money because it is a good investment, and discharged its loan, could be mulcted by an interest rate or a tax rate fixed six months thereafter, by reason of the improvident conduct of people thereafter or by reason of a change in the money market, which, if it had taken place before the bank borrowed, would have led them never to make the investment.

The plan suggested in the Owen amendment is absolutely the practical and proper thing. It proceeds upon this basis: If a bank when the market is easy and the rate is low borrows money, it pays its debts on that basis; but if a bank comes to borrow money when the reserve is low, when there is a great amount of money out, when it is engaged in increasing a burden that is already so high that it has become a danger to the system, it knows that it must pay a tax or penalty for having further invaded the system. It is in the shape really of an increased interest, fixed at that time and in that district, and based upon the invasion of the gold reserve which has taken The man, therefore, who comes at that time to get an accommodation, who comes at the time of danger and demands help, pays for the accommodation just the price that he ought to pay for coming at that time, and the transaction is closed.

We are putting the member banks on the same basis that any

man is on who comes to a bank to borrow money. A man who comes to a bank to borrow money and finds money easy gets it at a low rate of interest; but if he comes to a bank to borrow money when the rate is high, when money is scarce, he pays for his money, because it is worth more to him and it is a greater hardship for the bank to loan it.

It seems to me the amendment of the Senator from Oklahoma is correct.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Nebraska to the amendment offered by the Senator from Oklahoma.

I make the point of order that it is an amend-Mr. OWEN.

ment in the third degree. The PRESIDING OFFICER. The Chair is advised that the amendment is one in the second degree only and falls within

the provision of Rule XVIII. The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question now recurs on the amendment offered by the Senator from Oklahoma to his amendment, in the nature of a substitute.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 39— Mr. BRANDEGEE. Will the Senator permit a question about an amendment that he has just had adopted before he passes

Mr. OWEN. Certainly.

Mr. BRANDEGEE. On page 5 the Senator had his bill amended by striking out in line 6 the words "within the discretion of the Federal reserve board.'

As it now stands, if any member bank fails to comply with any provision of this act, thereby its franchises become forfeited. Under the section of the national-bank act which treats with the same subject, section 5239, the provision is that "if the directors of any national-banking association shall knowingly violate, or knowingly permit any of the officers," and so forth, to violate any of the provisions, their franchises shall be forfeited.

By striking out that the franchises shall be forfeited within the discretion of the Federal reserve board, it seems to me that it absolutely forfeits the national bank's franchise if unwittingly it should fail to comply with the slightest provision of this act. wondered whether the Senator had intended to bring about that situation.

Mr. OWEN. It was believed that, if this language was followed and any noncompliance with or violation of the act should be determined and adjudged by a court of competent jurisdiction in a suit brought for that purpose under the direction of the Federal reserve board by the Comptroller of the

Currency, it would cover that contingency.

Mr. BRANDEGEE. Let me direct the Senator's attention to this view of it: I agree that before the corporation could be dissolved under the language of the bill the court would have to find that there had been a noncompliance, but inasmuch as the act provides that any noncompliance, whether wittingly unwittingly, would be a noncompliance that would forfeit thereby, it is not within the jurisdiction of the court to say that it ought not to be forfeited because the noncompliance was an innocent one. It seems to me very hard and fast and utterly mandatory. An innocent omission of one of the details contained in this bill thereby forfeits the franchise. All the court can determine is whether there was such a noncompliance; the court can not say that the franchise ought not to be forfeited because it was an innocent and immaterial noncompliance, for it was thereby forfeited.

Mr. OWEN. Mr. President, I venture to suggest to the Senator from Connecticut that no authoritative assertion of noncompliance can be made except through the process provided

by the statute itself.

Mr. BRANDEGEE. I agree to that. I think, however, I failed to make myself understood by the Senator. It is not for the court to say that the noncompliance ought not to forfeit the franchise because it is an innocent one or an immaterial one. Under the language of the proposed act, as it now stands as amended, without the word "knowingly," which is contained in the national-bank act, and with the discretion given the Federal reserve board stricken out, it leaves it so that no matter if it is the most innocent violation or noncompliance in the world, the franchises are thereby forfeited. All the court can find afterwards is whether there had been such a non-compliance. If the court finds that the noncompliance was perfectly innocent-

Mr. OWEN. I remind the Senator that the court can not make any declaration on the subject one way or the other until the Federal reserve board sees fit to direct a suit, and they would not, within the exercises of a wise discretion, authorize

or direct a suit for an innocent noncompliance. Mr. BRANDEGEE. All the court can do under this act is,

after the comptroller has brought the suit-Mr. OWEN. The comptroller will not bring a suit on the assumption of the Senator.

Mr. BRANDEGEE. The proposed act provides:

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which such bank is located, under direction of the Federal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved.

Mr. OWEN. The Senator from Connecticut is assuming that the Federal reserve board would direct a suit to be brought by the Comptroller of the Currency upon circumstances which

would not justify a suit.

Mr. BRANDEGEE. But the discretion of the Federal reserve board to decide whether a franchise is forfeited or not has been taken away, and if the Federal reserve board obeys the language of the act they will direct a suit to be brought. Then, the court says the act was a violation or a noncompliance, although it was an innocent one, it has to dissolve the association, because, under the terms of the act, its franchise has been forfeited.

I have no special interest in the matter whatever, but I do not see why the present provision of the national banking act that the noncompliance must have been knowingly made should be stricken out as it is stricken out in this bill.

Mr. OWEN. Mr. President, on page 39, line 6, I move to strike out the words "thirty-three and one-third" and insert "forty," so as to read:

shall be at least equal to 40 per cent of the Federal reserve notes issued to said bank—

And so forth. Mr. BURTON. I move to amend the amendment by striking out the word "forty" and inserting "forty-five."

The PRESIDING OFFICER. The Chair regards the amend-

substitute. The question is on the amendment to the amendment proposed by the Senator from Ohio. [Putting the question.] The "noes" have it, and the substitute is rejected. The question recurs on the amendment to the amendment offered by the Senator from Oklahoma.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 39, line 9, I move to strike out the clause beginning with the words "The Federal" down to the end of the sentence in line 16, that being in conflict with the provisions otherwise made in the amendment which has been adopted.

The PRESIDING OFFICER. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 39, line 9, after the word "agent," it is proposed to strike out down to and including the word suspension," in line 16.

The amendment to the amendment was agreed to.

Mr. OWEN. Mr. President, that completes the amendments

to the amendment which I desired to offer.

Mr. ROOT. Mr. President, the amendment of the reserve provisions which has been adopted is, I think, a very great improvement of the bill, and it is very gratifying that it should be made. I do not think, however, that it is adequate, and, without detaining the Senate at all by any remarks, I will ask for a vote on the amendment which I presented the other day.

The PRESIDING OFFICER. The amendment to the amendment proposed by the Senator from New York will be stated.

The Secretary. In section 16 of the amendment of Mr. Owen it is proposed to strike out lines 24 and 25 on page 37, and lines 1 to 9, inclusive, on page 38, and insert in lieu thereof the following:

and lines 1 to 9, inclusive, on page 38, and insert in lieu thereof the following:

The Federal reserve banks may, from time to time, with the consent and approval of the Federal reserve board, issue notes to meet business requirements.

The said notes shall be obligations of the Federal reserve bank issuing the same and shall be receivable for all taxes, customs, and other public dues.

They shall be redeemable in gold on demand at the Treasury Department of the United States in the city of Washington, D. C., or in gold or lawful money at the bank of issue.

All note issues of the Federal reserve banks shall at all times be covered by legal reserves to the extent required by this section and by notes or bills of exchange arising out of commercial transactions or obligations of the United States.

All demand llabilities including deposits and note issues of the Federal reserve banks shall be covered to the extent of 50 per cent by a reserve of gold or other money of the United States which the national banks are now authorized to hold as a part of their legal reserve: Provided, That whenever and so long as such reserve shall fall and remain below 50 per cent the Federal reserve bank shall pay a special tax upon the deficiency of reserve at a rate increasing in proportion to such deficiency, as follows: For each 2½ per cent or fraction thereof that the reserve falls below 50 per cent a tax shall be levied of 1½ per cent: Provided further, That no additional circulating notes shall be issued whenever and so long as the amount of reserve held by any Federal reserve bank falls below 33½ per cent of its outstanding notes.

Any notes of the Federal reserve banks in circulation at any time in excess of an aggregate of \$00,00,000 for all of said banks, which are not covered by an equal amount of lawful money, gold bullion, or foreign gold coin, held by said banks shall pay a special tax at the rate of 5 per cent per annum: Provided, That in computing said amounts of \$000,000,000 and of \$1,200,000,000 for all said banks

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New York to the amendment of the Senator from Oklahoma.

Mr. ROOT. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BRISTOW. Mr. President, I desire to say that I am very much in favor of the provision relating to the gold reserve, and I think 50 per cent is not too high. I believe that the gold reserve should be the barometer to regulate the amount of this paper currency. The objection I have to the amendment is the arbitrary limitation, beyond which it can not go without a supplemental tax. I think the tax ought to be imposed on the deficiency in the gold reserve; I believe that is the way it should be regulated; and my objection to the amendment is to that part of it on page 3 which fixes an arbitrary tax. I regret, because of that limitation, that I can not vote for the amendment, as I am very much in favor of its other provisions.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New York [Mr. Root] to the

amendment of the Senator from Oklahoma [Mr. Owen]. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. KERN (when his name was called). I am paired with

the senior Senator from Kentucky [Mr. Bradley] and there-

fore withhold my vote.

Mr. MYERS (when his name was called). In the absence of my pair, the Senator from Connecticut [Mr. McLean], I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. STERLING (when his name was called). I again announce my pair with the senior Senator from Louisiana [Mr.

THORNTON] and withhold my vote.

Mr. REED (when Mr. STONE's name was called). I desire to renew the announcement I have heretofore made of the necessary absence of my colleague [Mr. Stone] and the fact that he is paired with the Senator from Wyoming [Mr. CLARK]. If my colleague were present, he would vote "nay."

The roll call was concluded.

Mr. CHIL/TON. I inquire if the junior Senator from Maryland [Mr. Jackson] has voted?

The PRESIDING OFFICER. The Chair is informed that he

Mr. CHILTON. I have a pair with that Senator. In his absence I can not vote. If permitted to vote, I should vote

Mr. OVERMAN. I have a general pair with the senior Senator from California [Mr. Perkins]. I transfer that pair to the senior Senator from South Carolina [Mr. TILLMAN] and vote. vote "nay." Mr. GOFF.

Mr. GOFF. I wish to announce that I am paired with the Senator from Alabama [Mr. BANKHEAD] and therefore with-

hold my vote.

Mr. JAMES. My colleague [Mr. Bradley] is unavoidably detained from the Senate. He has a general pair with the Senator from Indiana [Mr. KERN]. I will ask that this announcement stand for the day.

Mr. SMITH of Georgia (after having voted in the negative). I desire to withdraw my vote, as I have a pair with the senior Senator from Massachusetts [Mr. Lodge].

The result was announced-yeas 22, nays 49, as follows:

YEAS-22. Brandegee Burton Catron Gallinger Hitchcock Lippitt McCumber Penrose Root Townsend Warren Weeks Works Sherman Smith, Mich. Smoot Sutherland Colt Dillingham du Pont Page NAYS-49. Ashurst Brady Bristow O'Gorman Hughes Simmons Smith, Ariz Smith, Md. Smith, S. C. James Johnson Overman Bryan Chamberlain Clapp Clarke, Ark. Stephenson Sterling Stone Thornton Tillman Bradley Burleigh Perkins Poindexter Jackson Chilton Kern

So the amendment of Mr. Root to the amendment of Mr. OWEN was rejected.

Mr. McCUMBER. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 41, line 4, after the words "Federal reserve board," it is proposed to insert:

which rate shall not be less than 5 per cent per annum on the average of such notes received by such bank and put into circulation, and afterwards an additional rate of 1 per cent per annum for each month such notes are in circulation, until a rate of 10 per cent per annum has been reached.

Mr. McCUMBER. Mr. President, the purpose of the bill and the purpose of the amendment are identical. Both are to meet a condition; and the question whether or not the amendment better subserves the condition may need some explanation.

The President of the United States signalized the entry of his administration into the political life of the country by a concise declaration of his democratic purposes. On the 8th day of April last, in his first message delivered in person to the two Houses of Congress in joint session, he said:

Houses of Congress in joint session, he said:

We must abolish everything that bears even the semblance of privilege or of any kind of artificial advantage and put our business men and producers under the stimulation of a constant necessity to be efficient, economical, and enterprising masters of competitive supremacy, better workers and merchants than any in the world. Aside from the duties laid upon articles which we do not and probably can not produce, therefore,

* * the object of the tariff duties henceforth laid must be effective competition, the whetting of American wits by contest with the wits of the rest of the world.

* * To some not accustomed to the excitements and responsibilities of greater freedom, our methods may in some respects and at some points seem heroic, but remedies may be heroic and yet be remedies.

Mr. President the anticipation and the hone of the President

Mr. President, the anticipation and the hope of the President of the United States have been realized. Our business men and producers have been put under the necessity for efficient economy. They have been put in competition with the business men of the world, and laboring under the much heavier cost of production, they are slowly, doggedly, but surely retreating. They are slowly but surely restricting their output and discharging their employees. We have whetted the wits of the charging their employees. American producers, and in the face of a vast reduction in orders for their products they have been compelled to direct those whetted wits, not toward aggressive competition, but in defensive reductions in expenses. We have whetted not only the wits of the foreign producer, but also his cupidity, and the two conjoined are being exercised for a grand conquest of the American market.

Mildly putting it, the methods adopted by the Democratic majority have in general been more than heroic. Measured by the effect upon the section of the country which I represent, the word "diabolic" would better express their efforts.

Closely associated with the President's idea of a heroic

tariff operation is his idea of an opiate to make the patient, the American people, forget for a while the mutilation made by the tariff knife.

The President follows this declaration which I have quoted immediately with another so closely that the two become merged in a sort of combined idea. He says, in the same paragraph of his message:

At a later time I may take the liberty of calling your attention to reforms which should press close upon the heels of the tariff changes, if not accompany them, of which the chief is the reform in our banking and currency laws.

Why did the President feel that the amendment to our banking and currency laws should press close upon the heels of the tariff changes, if not actually to accompany them? Why this close association between tariff reform and emergency currency? What but the anticipated emergency?

Let us be fair and honest with the President, with the country, and with ourselves. Notwithstanding the declaration of the Democratic majority that the business interests of the country would not suffer by the proposed tariff change, the President did not think so. He did not believe that the tariff remedies which he would apply would not seriously disturb industrial conditions. The President did anticipate injury, at least temporary injury, to the country, and hence his keen desire and his timely declarations that the anæsthetic should be ready for immediate use.

I have no complaint to urge against what I consider the commendable precaution of the President. I complain only of the particular remedy he prescribes, and which is being compounded by the Democratic doctors in Congress—the remedy of currency inflation. Intoxication may make a man forget his ailments or his poverty; it never cures them. Inflating our currency will not create prosperity. All it can do is temporarily to excite the belief that as long as we can borrow, as long as we are creating debts, we are prosperous. The hair-pulling day is sure to arrive in either instance; and the longer and greater

the currency debauch the greater the final suffering.

In simple, plain English the purpose of this bill has been, and the operation of this law will be, an inflation of our currence of this law will be a minimum of our currence. rency as a tonic to revive us temporarily from the assured depression following our recent tariff legislation.

Mr. President, that is not the proper remedy. The proper remedy is to remove the cause of the depression, and the recuperative quality of the American people will take care of the disease.

I have therefore, Mr. President, prepared an amendment to this bill which will make it what it ought to be. The country has been demanding an elastic currency bill as distinguished from a bill for currency inflation. The country has never asked for inflation. Wherever it has had an opportunity it has voiced a strong sentiment against it. It has called for an elastic currency. You are responding to that call by giving it a debased currency. currency.

This amendment fixes a tax on the issue which will allow the paper currency provided in the bill—the Federal reserve notes to issue only when there is a real emergency or demand for it, and which will compel it to retire from circulation the moment it has fulfilled its purpose.

I shall not even delay the Senate by a roll call. The majority of the Senate in caucus have determined the form of this bill, and this amendment would naturally follow the fate of all other offered amendments. I simply want the amendment to indicate my own view of what would be a proper currency for this

I ask for a vote on the amendment.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from North Dakota to the amendment of the Senator from Oklahoma.

Th amendment to the amendment was rejected.

Mr. OWEN. On page 19, in line 23, after the word "in," I move to insert the word "all"; and after the word "failed," to strike out the word "national" and insert in lieu thereof "member"; and after the word "banks," in line 24, to insert "in the United States," so as to make the clause read:

As a trustee for the benefit of depositors in all failed member banks in the United States.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 19, in line 23, before the word "failed," near the end of the line, it is proposed to insert the word "all"; after the word "failed," to strike out the word "national" and insert "member"; and after the word "banks," in line 24, to insert the words "in the United States," so that if amended it will read:

Paid to the United States as a trustee for the benefit of depositors in all falled member banks in the United States and failed member trust companies in the District of Columbia—

And so forth.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. OWEN. At the end of section 27 I move to add the following words:

lowing words:

Provided, however, That section 9 of said act is hereby amended so as to change so much of the tax rates fixed in said section by making the portion applicable thereto read as follows:

National banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first three months a tax at the rate of 3 per cent per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax rate of one-half of 1 per cent per annum for each month until a tax of 6 per cent per annum upon the average amount of such notes.

The effect of that is, I will say to lower the tay on the notes.

The effect of that is, I will say, to lower the tax on the notes issued under the so-called Vreeland-Aldrich Act from 5 per cent to 3 per cent, gradually increasing it to 6 per cent, according to the period of time.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma to the amendment

heretofore offered by him.

The amendment to the amendment was agreed to.

Mr. WEEKS. Mr. President, my colleague has been unavoidably absent during this debate on account of illness. He has a general pair with the junior Senator from Georgia [Mr. SMITH] and wishes to be recorded, when the vote is taken on the bill, in the negative. Having, however, given the matter more or less consideration he has expressed his views briefly in a letter which I received to-day and which I wish, in his behalf, to insert in the RECORD. I should like to have it read.

The PRESIDING OFFICER. The Secretary will read the letter of the senior Senator from Massachusetts.

The Secretary read as follows:

"NEW YORK, December 17, 1913.

"MY DEAR SENATOR WEEKS: I am, as you know, unable to be in Washington before the holidays. I can not, therefore, be present and give my vote in person upon the final passage of the currency bill. This I greatly regret; so much, indeed, that I am unwilling to have the bill acted upon in the Senate without making public record of the reasons which would govern my

vote, were I able to give it, upon the passage of the bill.

"The many details of this most important law I have had no opportunity to master as they should be mastered by anyone who presumes to discuss them. Fortunately for me, however, there is no one who has a more thorough knowledge, not only of come for the following hill but also of the for words. of every feature of this particular bill but also of the far-reaching and difficult questions which must be involved in any bill of this character, than you. This mastery of the subject you have demonstrated in debate, and therefore with the most absolute confidence I authorized you to pair me upon all amendments as you yourself voted, without any statement or explanation on my part.

"When, however, the Senate comes to a final vote upon the bill as a whole, there are certain general principles involved upon which I have very strong convictions. By these convictions my vote, could I be present and give it in person, would be decided.

"I quite agree that there are provisions covering the details of the system proposed which would effect marked improvements in the system, or lack of system, of our banking laws as they now exist. This could hardly be otherwise, as many of these details are taken from the report of the Monetary Commission. But these improvements, which are not only most desirable, but which are very necessary, are not sufficient, in my opinion, to command my vote for the bill if they are linked with general principles which are both perilous and unsound.

Let me briefly state the objections which seem to me so grave as to make the adoption of the beneficial provisions of the bill impossible without a sacrifice of the fundamental principles upon which, as I believe, all sound and enduring banking laws

must rest.

"Throughout my public life I have supported all measures designed to take the Government out of the banking business. voted for the withdrawal of the Treasury notes and hoped that I should live to see the legal tenders also withdrawn—the Government confined to coining gold, silver, and copper, and wholly free from responsibility for note issues. I believe very strongly that banking should be done and bank notes issued by banks rigidly supervised by the Government, but that the Government itself should have no part in either function. This bill puts the Government into the banking business as never before in our history, and makes, as I understand it, all notes Government notes when they should be bank notes.

"The bill as it stands seems to me to open the way to a vast inflation of the currency. There is no necessity of dwelling upon this point after the remarkable and most powerful argument of the senior Senator from New York. I can be content here to follow the example of the English candidate for Parliament who thought it enough 'to say ditto to Mr. Burke.' I will merely add that I do not like to think that any law can be passed which will make it possible to submerge the gold stand-

ard in a flood of irredeemable paper currency.
"The guaranty of bank deposits seems to me a direct encouragement to bad and reckless banking. I can not but think that it may have results like those which followed Jackson's deposit of the surplus in the State banks.

The powers vested in the Federal board seem to me highly dangerous, especially where there is political control of the board. I should be sorry to hold stock in a bank subject to

such domination.

"I will not attempt to enumerate any other objections. Still less shall I undertake to argue upon those which I have men-

tioned, for that would be impossible in a letter.

"I merely desire, as I have already said, to make public record of the reasons which lead me to ask you to pair me against the passage of this bill. I had hoped to support this bill, but I could not vote for it as it stands, because it seems to me to contain features and to rest upon principles in the highest degree menacing to our prosperity, to stability in business, and to the general welfare of the people of the United States.

"I am, as always,

"Very sincerely, yours, H. C. LODGE"

Mr. BRISTOW. I desire to offer an amendment to sec-

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. On page 19, line 15, strike out "six" and insert "five."

On page 19, line 16, after the period insert:

On page 19, line 16, after the period insert:

After the aforesaid dividend claims have been fully met, an amount equal to 1 per cent of the subscribed capital stock of each regional bank shall be set aside annually in a trust fund, to be known as the depositors of insarance fund, and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made by the board. When, in the judgment of the board, there has been accumulated in such depositors insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks the board shall have power to suspend the setting aside of the said 1 per cent, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replenished by again setting aside such 1 per cent or so much thereof as, in the judgment of the board, may be necessary.

On page 19 line 18 after the word "claims" insert "and

On page 19, line 18, after the word "claims," insert "and trust funds."

On page 19, line 22, after the word "tax," strike out the remainder of the line and all of lines 23, 24, and 25 on page attended with the uncertainty in the smaller regional districts

25, and on page 20 strike out lines 1 and 2, and in line 3 the word "Treasury."

Mr. BRISTOW. Mr. President, the purpose of this amendment I will explain, and I hope that the chairman of the com-

mittee will see fit to accept it.

It reduces the rate of interest which is paid on the capital stock from 6 to 5 per cent per annum. The capital stock in the system as the Senate has created it up to this time is owned by the member bank, and there is a 6 per cent cumulative dividend. I would reduce that from 6 to 5 and then use that 1 per cent to create this guaranty or insurance fund for depositors. The amendment provides that the 1 per cent then shall be set aside as an insurance fund for the depositors in the member bank. It takes 1 per cent of the profits that would come from the dividends, and since the subscribed capital will be approximately \$100,000,000, it means that there would be \$1,000,000 a year accumulated for the purpose of insuring the depositors in all the member banks. This fund would out of the pockets of those who subscribed for the stock. This fund would come

offer this amendment because, with 8 or 12 banks created, I think there will be some banks that will not have any net profits after the dividends have been paid and the other expenses which are provided for. I would make this an assessment, a claim, before any of the profits go to the Government, because I think the depositors in the member banks should be

first considered.

Mr. NORRIS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Nebraska?

Mr. BRISTOW. I do.
Mr. NORRIS. There is already provision in the bill for the insurance of depositors?
Mr. BRISTOW. Yes.
Mr. NORRIS. Would this 1 per cent be in addition to that?
Mr. BRISTOW. No; I have cut that out.

Mr. NORRIS. If this is adopted, the Senator would strike that out?

Mr. BRISTOW. Yes; the amendment proposes to strike out that provision.

Mr. NORRIS. I could not tell from the reading at the desk. I will ask the Senator if he can give any information as to whether the amendment he has offered would raise a larger

sum than that already provided in the bill?

Mr. BRISTOW. Yes; this makes a fund; there is no doubt about it. First, there was a dividend of 6 per cent provided, and then 50 per cent of the net profits was set aside to accumulate a surplus equal to 40 per cent of the capital. Then half of the additional net profits were set aside as an insurance fund. I would make the insurance fund come in ahead of any of the net profits and really take 1 per cent of the dividends of the banks upon their stock and make an insurance fund of that, so that in these small banks there will be an opportunity to create a fund about which there will be no uncertainty.

I think under the provisions in the bill there will be some regions that will have an insurance fund and others will not, while if this amendment should be adopted they would all have

an insurance fund.

Mr. SMOOT. Mr. President-The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Utah?

Mr. BRISTOW. I do. Mr. SMOOT. I did not quite catch the full meaning of the Senator's amendment, and therefore I will ask him a question. Suppose the profit of the regional bank was only 5 per cent, under the Senator's amendment there would be no provision for a fund for bank depositors?

Mr. BRISTOW. No; that is true. If the bank is unable to pay dividends, this fund would not accumulate.
Mr. SMOOT. In other words, there would be no accumulation of the fund until after the bank had made 5 per cent profit for the stockholders?

Mr. BRISTOW. That is right. After that there would be this accumulation of 1 per cent.

The advantage of this amendment is that it brings in 1 per cent before the surplus is created. Instead of giving the bank 6 per cent, it gives it 5 per cent and takes 1 per cent of the dividend that is provided in the bill and puts it into an insurance

I do not think that the chairman has been giving very serious attention to what I have been saying. I should like the attention of the chairman. I do not know whether he has heard any part of my conversation here, but I should like to know if he can not accept this amendment, so that we shall have a genuine insurance fund and will know what it will be. It will not be that there is under the provision as it is in the bill as it is I am afraid that the chairman did not hear my reframed.

Mr. OWEN. I do not understand that the Senator expected a reply from the chairman. I thought it was rather oratory than a direct question. In reply to the Senator I will state that the Senate has already disposed of the matter by adopting a provision which is superior to the proposal of the Senator from Kansas.

Mr. BRISTOW. I do not understand that the provision had been yet adopted. There are still some amendments offered to section 7, and the section has not been adopted.

Mr. OWEN. It has been so far amended by the Senate as to make it very certain that such a provision would be adopted when the Senate came to pass upon the matter in its entirety, because it has been amended so as to make certain its meaning.

Mr. BRISTOW. I realize that the Senator has offered an amendment which enables all member banks to participate in this fund if there is any fund. My amendment seeks to insure a fund, to get a fund, to have a fund even in the smaller bank I understand the Senator is not much interested in that. He thinks that the fund he has provided for is enough Or does he really think that possibly this is for this purpose. consuming valuable time for nothing-that in the end we will not have any insurance guaranty fund anyway?

Mr. OWEN. I will say to the Senator from Kansas that it is very difficult on this side to hear what the Senator says because of the buzz of conversation throughout the Chamber. So in reality the chairman has not heard all that the Senator has said, although he is disposed to hear, and ordinarily has no difficulty in hearing the Senator from Kansas.

Mr. BRISTOW. I am very sorry I have not time to go over it again, but I should like very much to do it. I suppose I should not have proceeded while there was so much confusion on the other side of the Chamber. I want to take 1 per cent of the 6 per cent that is provided for dividends of these banks and have a dividend of 5 per cent, with the other 1 per cent creating an insurance fund for the depositors in the member Does not the Senator think that would be a good thing

Mr. OWEN. I believe that an insurance fund of a sufficient volume is an advisable thing to have, provided you have a system of examination that precludes the abuse of such a fund by banks that are conducted in a slipshod, careless way. There in some States of the Union no law at all with regard to bank inspection, and in some of the advanced States it is only recently, indeed, that there has been any proper method of examining banks. So in adopting a system of this kind, which relates to banks under such a variety of laws as we have, I think there ought to be considerable caution observed. I think that the present provision in the bill is hardly more than an acknowledgment of a principle of government which, in time, would be developed; but I do not think it is worth while in this bill to attempt to develop a complete system.

I believe we have gone about as far as we can conveniently or safely go to provide a fund of the kind which has been suggested, but I do not think in a bill of this kind we could perfect a measure of legislation that would be sufficiently well contrived to meet the exigencies that would arise under the various State laws and the defective system of examination which prevails with regard to so many banks that would be member banks.

Mr. BRISTOW. I think the Federal board has ample power to provide for such examinations. I am just as anxious that examinations should be very critical and exact as anyone could be. I know that the examinations should be thorough.

I realize the futility of undertaking to get this amendment adopted unless the chairman of the committee will accept it. I will not consume the time of the Senate by asking for a roll call, because I could not secure any Democratic votes unless the caucus had passed upon it. Since the caucus has not passed upon this amendment and the chairman, I suppose, would have no authority to accept anything that the caucus had not authorized him to accept, and since a number of my associates on this side are very much opposed to such beneficial legislation as this, I know it could not pass. So I will not ask for a roll call, but I do ask for a vote.

Mr. OWEN. In view of the lack of sympathetic consideration by the Senator's colleagues and his frequent suggestions as to the Democratic caucus, I might suggest that he attend the next Democratic caucus that is held and submit his proposition.

Mr. WEEKS. Mr. President, as the Senate knows, I have no sympathy whatever with any proposition to guarantee bank banking; that it offers a premium to unprincipled adventurers

deposits by the National Government. All such propositions are bad. There may, perhaps, be a modifying of the degree of un-wisdom injected into some such particular scheme, but I want to call the attention of the chairman of the committee to this one proposition: In his bill it is proposed to pay the holders of this stock 6 per cent. The Senator from Kansas wishes to take 1 per cent of that and constitute a fund to guarantee deposits. I would not do that with the 1 per cent. I wish to say to the Senator from Oklahoma that, in my judgment, he is wasting a million dollars a year of dividends on this stock. I think that he will find, as soon as this system is established, that the stock, which is now being sold on a 6 per cent basis with cumulative dividends and no taxes, will be selling on a 5 per cent basis, and the Government will lose the difference; in other words, the stock will be selling at about \$120 a share. I would be willing to stake what little business reputation I have that every dollar of that stock could be sold on a 5 per cent basis and save a million dollars a year.

Mr. THOMAS. Mr. President, up to this time I have taken no part whatever in the discussion of the pending bill, and perhaps the Senate would feel more grateful to me if I should continue that policy; but in view of what the chairman of the committee has stated concerning the section of the bill relating to an insurance fund, and inasmuch as I want to see that principle ingrafted upon this measure as an actual working reality, I feel impelled to say something in behalf of the provision which will be adopted by the Senate, and also to express the opinion that the proposition of the Senator from Kansas would be more acceptable, and I think more beneficial to the bill, but, as stated by him, it is quite evident that on both sides of the Chamber there is a very considerable opposition of a fundamental character to the principle which is involved in what is generally known as the guaranty of bank deposits, which this is not. I wish it were. As I understand this matter, it is intended to take a portion of the earnings which are realized from the operation of these Federal reserve banks and devote them to the payment of depositors of failed banks under the system. That is not a guaranty and falls short of an insurance, because if the fund provided for is not sufficient for the purpose, there is no payment, or at least but a partial payment.

It is not a guaranty, because the fund does not come from the banks, but from the profits which are made in this system after dividends are paid and after a surplus fund has been created.

Mr. President, to my mind, this is one of the most beneficent

features of the measure. Perhaps I may be partial to it because I have advocated the principle for a good many years. It gives some measure of security to depositors, the individuals whose money, after all, is the real thing behind the new system, as it has been behind the old system, and which new system places a first lien practically upon all that they have as security for the notes that are to be issued under the operation of the system itself. That being the case, the depositors in the member banks being the fundamental basis of the entire system and upon their deposits in the last analysis there rests the first lien, why should they not have some protection in this general scheme of banking, especially when it can be easily given to them by devoting a part of the profits to that purpose, just as well as not? I have heard much discussion here about the protection which holders of reserve notes need, but too little in behalf of the man whose little store lies at the foundation of the whole system.

There are some great banks in the United States-very great banks-but the Government of the United States will not trust one of them with a dollar of its money unless some guaranty or indemnity or security is given, nor will the States of the Union nor the cities nor any of the municipal subdivisions. It is a principle running through all deposits of public money without reference to the solvency or security of the depositee that security must be given for them. When a failure comes, if come it does, it is not the public depositor, Mr. President, but it is the private individual who has the last lien and the last chance to get his money out of the bank. This is wrong, and it is in his behalf that I invoke the consideration of the Senate.

Mr. WEEKS. Mr. President-The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. THOMAS. I will yield, if it is not taken out of my time. The PRESIDING OFFICER. The Chair will be obliged to rule that it will be taken out of the time of the Senator from Colorado.

Mr. THOMAS. If that is the case, I can not yield.

Mr. President, the chief objection that is urged against this system is, and always has been, that it encourages fraudulent

to go into the banking business. The senior Senator from New York [Mr. Root] the other day complained that—

it gives the credit of the United States to every speculator, every promoter, every blackguard, who is able to scrape together \$25,000 and take out a national-bank charter.

Depositors may intrust their money to the speculator with the same confidence with which they intrust their money to the sound and conservative banker.

It is a fact, Mr. President, that unprincipled men go into all lines of business in this world, and I know of no system of legislation that will prevent it. If we could keep scoundrels and adventurers out of the banking business, the system would be absolutely perfect, and we would not be obliged to waste the time which this Senate has wasted upon the consideration of a banking and currency measure. It is against that class of individuals, Mr. President, that all schemes of protective legislation are necessarily directed. Our common experience is that they are in the banking business, and they have been ever since there was such a business. And they will be until human nature undergoes radical transformation. Says the Senator from New York:

It is a premium on speculation.

It is an invitation to every adventurer in the world to come into the national-bank system and get the indorsement of the United States upon all the moneys he comes to owe for his schemes.

Then the Senator from New York calls attention to this as an illustration, I presume, of his general statement:

In the panic of 1907 there was a chain of banks in the city of New York—a chain, five of them linked together—that had been promoting enterprises out of which the managers of the banks looked for great profit. If they had kept on, they would have become millionaires. There were ice companies, steamship companies, and all sorts of speculative enterprises. If they succeeded, the managers of the banks would have made enormous fortunes. They failed. The men who had trusted them suffered the natural consequences which in this world follow folly and a failure to regard the laws of probity and good sense.

There is an instance of bad banking given by the Senator under the present system which is devoid of any guaranty feature whatsoever; in other words, the condition of which the Senator complains now exists. It does not need to be promoted or stimulated by any bank guaranty system. It is here, and the Senator can not draw his illustrations from what is bred from the law which he commends in order to punctuate an evil which he prophesies. And, Mr. President, in addition to this chain of banks which failed there were and are other chains of banks which did not fail; and failure, or the want of it, seems to be the measure of determining its legitimacy. Contempora-neously with the Heinze chain was a chain which the firm of Morgan forged and controlled, consisting of the First National Bank, the Guaranty Trust Co., the Bankers' Trust Co., the First Securities Co., the Equitable Life Assurance Society, and the New York Life Insurance Co., and doubtless many others. They also financed ice companies and railroad companies and steamship companies, and a great many other companies. They succeeded. Their success has been tremendous; it has been phenomenal. The Morse system of banks failed and Morse went to the penitentiary. The Morgan system of banks succeeded and Morgan went to heaven. [Laughter.]

There is no great difference in principle, Mr. President, between that chain of banks which the Senator from New York used as an illustration and those chains of banks which exist everywhere, the principal difference being that some represent enormous and stupendous capitalization bound and linked together in millions, while the others, weak imitators, are generally made unsuccessful because of the opposition of their gigantic competitors, which regard them as nuisances. greater power which dictates and dominates the liquid money and finances of the country therefore determines their fate and then holds them up as horrible examples of what may occur under a guaranty system. So that, so far as these conditions exist, they are here, and they will continue so long as banking continues, whether we have a guaranty system or not.

Mr. President, some years ago what was known as the Walsh Bank, in the city of Chicago, failed. It was a tremendous failure; it was one which threatened for a time the financial situation in that great city. The banks comprising the clearing house, to protect themselves, had to get behind the failed bank and practically guarantee all its deposits. If there had been a system coupled, as the Senator from Oklahoma suggests, with a good method of examination, which they have now, as has been suggested, and which they have put into operation because of this bitter experience, they never would have been obliged to become guarantors after the fact, at a loss to themselves, as they should have been guarantors before the fact, with resulting immunity.

I might mention a number of instances in which the principle of bank guaranty has been vindicated by experience, and I might mention the fact, because I believe it to be true, that, in the instance which the Senator from New York used as his illustration, ultimately the depositors got their money.

Mr. President, the time is coming, in my judgment, when in every State in this Union there will be a system of bank guaranty, because the people see the force of it; the depositors demand it, and the demand will be so potent as to overcome the opposition of the banking interests of this country.

In this connection it might, perhaps, not be amiss to call attention to the fact that the same opposition was made to our postal savings-bank system that is made to the bank guaranty system. It was something unheard of, something entirely out of the ordinary, something which in banking eyes menaced the welfare and the interests of the country. I call attention to an article which appeared in the Chicago Banker of date February 5, 1910, which, I am told, is a most reputable publication, and which graphically outlines the opposition which the American Bankers' Association made at that time to the postal savings bill. As it is not very long, I will read it into the RECORD:

New York, January 31-

It must be January 31, 1910-

The American Bankers' Association to-day told why it is willing to spend a vast sum of money (\$1,000,000 if necessary) to educate the people against the postal savings bank. The association regards the postal savings as a menace to the American people.

The association probably is the most important and financially powerful organization of capitalists in the world. It consists of the officials of every National, State, and savings bank in the United States. The capital controlled runs into billions of dollars.

The organization is prepared to go "the limit" to defeat the proposed postal savings bank bill now before Congress, and it declares, without equivocation, that this opposition is absolutely unselfish and without prejudice. The American Bankers' Association has expended between \$20,000 and \$25,000 in postage stamps alone in circulation throughout the country of literature bearing on the subject and petitions in blank addressed to Members of Congress, which read:

"Believing that the postal savings bank system would prove detrimental to the best business interests of this community and of the country at large, the undersigned respectfully urge that you oppose any legislation for the establishment of postal savings banks."

Half a million copies of this petition have been sent out by the association to every chamber of commerce, to every board of trade, to every commercial body, life insurance company, and provident loan society, and also to every bullding and loan association in the United States.

In order that the people may understand the motives actuating the American Bankers' Association.

States.

In order that the people may understand the motives actuating the American Bankers' Association, William Hanhart, secretary of group 2 of the American Bankers' Association, which includes the savings-bank section, said:

"The idea of postal savings banks originated with Postmaster General Meyer, and my statistics show that Mr. Meyer's proposition was based on utterly erroneous figures furnished year after year by the Comptroller of the Currency. In the belief that this postal savings-bank legislation is not for the best interests of the American people we are engaged in a campaign to educate the people on this topic, and, while the expense is heavy, we reckon not the cost."

This statement from the Chicago Banker well illustrates the position of the American Bankers' Association to great and needed changes in banking operations. This organization, composed of gentlemen of the highest character and doubtless anxious to serve what they believe to be the public welfare, unfortunately stands too close to the practical details of banking to catch the larger vision which a broader perspective would afford; and so, when the postal savings-bank measure was before the country, although the public sentiment of the Nation was behind it, understood it thoroughly, were familiar with its benefits in European countries and anxious to see it crystallized as soon as possible into a law, this great association, with its head in the sund, used all of its power and all of its influence in a useless and ridiculous effort to defeat it.

Whatever its motive may have been-and that I do not question-the subsequent events which began with the enactment of that bill into law have demonstrated that instead of "educating the people" the association should have educated itself as to the wants and needs of the people, because, generally speaking, the mass of the people are more nearly right in their eco-nomic ideas and desires than any specific interest has ever proved to be.

I make the prediction that if this measure is incorporated into the pending bill, as I think it will be, the time is not far distant when the opposition to it which is now so manifest will not only disappear, but will be accepted as an essential to a safe system of banking. It is a system of legislation which is designed to protect the poor man, the depositor of limited means, the man with a small but precious hoard, who can least afford to lose his money, and who is therefore more directly interested than anyone else in a safe and sound system of banking and currency.

Mr. President, the purpose of this bill is to enable the banks of the country to obtain money when needed, in order that the business of the country may not suffer from panics and from disaster through temporary monetary stringency. In other words, the credit of the United States is given to the banking interests of the country, to the end that they may serve the people. To put it more concisely, the credit of the people is given to the people's creditors, although for a beneficent purpose. Surely those who deposit their money in the banks, those who lie at and whose collective savings form the basis of the entire system, without whose deposits the system itself could not be maintained and might not be necessary, and who have suffered most in times past from the failure of banks in which they had confidence, should be themselves made to feel, through the operation of this bill and the provisions it contains, that their interests have been cared for, or at least have not been wholly overlooked.

The risk to the fund is comparatively small. I have here a postal card which I received from Chicago the other day. I have not had time to verify the figures, but I think they are very nearly right. The communication is directed to this particular portion of the bill.

My correspondent says:

The Government has received in the past 50 years from national banks in the shape of taxes on circulation \$120,000,000. Expenses of administration of that department have not exceeded \$30,000,000. Hence the net profit to the Government is \$50,000,000, or firee times the amount of losses to depositors during same period.

I may say that in round numbers the loss to depositors during that period was \$37,000,000, which is somewhere near onefortieth of 1 per cent of the total deposits of the country.

How easy and without added expense to the banks it would have been to have insured national-bank deposits all these years out of the profit from this tax and to have used it for the relief of this small percentage of losers. And why could not one or two millions out of this \$90,000,000 of profit have been devoted to a deposit-guaranty fund? And why does not this slender percentage of loss justify the establishment of the policy now, when the surplus of the regional banks will soon be sufficient for the purpose, and thus provide for making it effective at once, and not at some future or indefinite time, as contemplated by the Senate amendment?

That, Mr. President, suggests in concrete form what I think the amendment to the bill is designed to accomplish-to take a part of that which comes from the general business of banking, which taxes no one, and devote it to the security of the depositor. You want to make this new law popular. That is right. And let me tell you that it will be popular when the depositor knows that the Government keeps watch and guard over his savings as well as the millions of industry and commerce. While it is true that the total amount of losses to depositors in national banks up to 1912 aggregated but \$37,000,000, it does not represent the actual loss to the depositors themselves.

To illustrate what I mean, the other day there was a run on one of the banks in the city of Washington during which men were going up and down the lines of depositors who were waiting for an opportunity to get their money working upon their needs and fears and offering to discount their deposits for 5 per cent. In many instances this offer was eagerly accepted, notwithstanding the bank was sound. I know, and I suppose it is the experience of a great many other Senators, that when a bank fails the depositors are frequently obliged by their necessities to sell their accounts to speculators, at speculators' prices, the latter making a great profit upon them. That is neither more nor less than legalized robbery.

A proper system of bank guaranty or bank insurance would do away with this additional spoliation of the poor depositor, who because of his necessities is subject to loss by the failure of the bank, on the one hand, and to be stripped of his small possessions and small opportunity to obtain some part of it by speculators, on the other.

It seems to me this is one of the most beneficent features of this measure, and I am glad it is to be inserted in the bill. I wish it were more specific and more definite, as it must become if the great mass of depositors throughout this country have their interests and welfare conserved as they should be by a great scheme of banking and currency. The postal savings bank is a success. Who to-day would dare to suggest its abolition? The guaranty of deposits under a system of frequent and exhaustive examinations will prove a greater one. Hasten the

day when it shall become a law.

Mr. OWEN. Mr. President, I submit and ask to have printed in the Record a memorandum bearing upon the question of the

guaranty of bank deposits.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the request is granted.

The matter referred to is as follows:

[Memorandum by George H. Shibley, publicist.]

HISTORY OF GUARANTY OF BANK DEPOSITS IN THE UNITED STATES, 1907-1913.

HISTORY OF GUARANTY OF BANK DEPOSITS IN THE UNITED STATES, 1907-1913.

On December 17, 1907, the State of Oklahoma, noted for its progressiveness, enacted a law providing for the establishment of a fund for the guaranty of the safety of deposits in the State banks. This system is compulsory.

Fifteen months later a somewhat similar system was established in Nebraska (Mar. 25, 1909).

Three weeks earlier, in Kansas, a voluntary system for the incorporated banks of the State was enacted (Mar. 6, 1909).

Three days after the Kansas voluntary system was installed a similar plan was established in South Dakota.

On August 9, 1909, the Texas Legislature established a law providing that all incorporated State banks must secure depositors either by the guaranty fund or by furnishing a guaranty bond.

Nearly six years have passed since the first State entered upon this procedure for the protection of the people of their several jurisdictions and what is the net result?

In each of the States the people, through their Representatives in the Government, have continued the system, amending it in such points as experience has shown should be improved.

That is conclusive proof that the main principle is indorsed by the people in the States where it has been tried.

In line with the favorable action by the people of these five progressive States are the following statements by bank commissioners.

In the last published report of the bank commissioner of Oklahoma, Hon. J. D. Lankford, he says:

"With reference to the bank guaranty feature of our law, will say that it is not growing in favor with the bankers, but is becoming more popular each day with the people." (Report of Dec. 15, 1912, p. vii.)

The last published report of the Kansas bank commissioner, Hon. J. N. Dolley, says:

"The guaranty law in Kansas has done more to put the proper amount of confidence in the State banks than any other one thing since its enactment. It also has done much toward assisting us to regulate and supervise the banks in the manner that they

THE PROPOSALS IN THE OWEN AND THE HITCHCOCK BILLS.

These official statements are in line with the people's action in retaining the laws.

THE PROPOSALS IN THE OWEN AND THE HITCHCOCK BILLS.

The proposals in the Owen and the Hitchcock bills are improvements over the State laws for the guaranty of the safety of bank deposits in that the fund for the payment of losses is to come from part of the profits to the Government from the Federal reserve banks, so that the banks in the system will not be taxed to supply the fund to pay the losses. That is a vital difference.

Another great difference between these two bills and the State systems is that the proposed Federal system is to be in connection with an elastic volume of money, so that whenever a bank shall be liquidated the payment of depositors in cash will no longer cause any stringency in the money marker; and then as rapidly as normal conditions are marked to the payment of depositors in cash will no longer cause any stringency in the money marker; and then as rapidly as normal conditions are marked to the payment of depositors in cash will no longer cause any stringency in the money marker; and then as rapidly as normal conditions are marked to the payment of depositors are sure as rapidly as normal conditions are marked to the constant of the money depositors are sure to get the Secretary of the Treasury the issuance of the necessary regulations, as experience demonstrates, is that inasmuch as depositors are sure to get their money back from each bank that is in the system, and therefore the thing which decides them to patronize a bank does not include a consideration of the sound sense with which the competing banks are managed, it becomes necessary to prescribe regulations limiting the amount of interest that shall be paid.

With this safeguard for all concerned, company which the described to rely for safety, except, as they secure special security or security for wildcat "banking."

Unfair competition will not be permitted. Therefore the system will be a benefit of the Nation. All concerned will be benef

existing national banks will find it to their advantage to remain as national banks, and a considerable proportion of the State banks will doubtless come in in the near future, and eventually all of them. In Oklahoma, Kansas, Nebraska, Texas, and South Dakota the State banks are being obliged to pay the insurance fund, whereas under the Federal reserve system the Government is to contribute it. In the States where as yet there is no State provision for insurance of the safety of deposits the people's self-interest will cause them to gradually transfer their funds to safe banks. Furthermore, the additional advantages in the Federal reserve system of the cheap method for transferring funds throughout the Nation by means of the Federal clearing house will cause the Federal reserve system to become the prevailing one throughout the Nation. The two advantages just described and the fact that the tendency to a unification of the banking system is bound to continue will make it inevitable that the State systems of banking will eventually lead to their complete termination through transfers to the national system, with its great natural and man-made advantages.

The immediate questions of just how great will be the payment of dividends to the member banks for their funds that are to be placed in the forthcoming system, and how great shall be the percentage of deposits of the member banks that must be placed with the reserve bank of each district, are merely temporary matters, for as soon as a couple years of experience shall have been had there then will be provided whatever changes are needed.

The present aim is to be sure and amply safeguard the public interests, so that it well may be that experience will demonstrate that the member banks will be able to secure reductions in percentages and increases in rates for the money on deposit with the Federal reserve banks that will materially aid. Certain it is that Congress will supply to the business world in this country the most effective system that it will be possibl

GUARANTY OF BANK DEPOSITS.

REBUTTAL

Guaranty of Bank Deposits.

REBUTAL

Because the Democratic majority in the Senate have seen fit to provide in their bill for a depositors' insurance fund, to be built up from funds due to the United States Government, the senior Senator from New York has seen fit to declare against the plan, using strong words in denunciation, and closing with the words:

"We (the people of this Nation) are turning our faces away from the fundamental principle upon which we have come to our high estate. We are turning them weakly toward practices which history shows have invariably led to decadence, to degradation, and the downfall of nations."

It is thus that the ones who have served with the powerful few when they were the rulers in this Nation talk. They would that the people would leave themselves unprotected in their relations with the bankers, while the Government and the rich few take special security from the banks that they deposit with. But the philliptics of these statesmen will not deter the party organization that represents the new order of things in this country.

Each point that the reactionists make against the providing of a depositors' insurance fund is either a fallacy or there are advantages which more than offset it.

For example, the New York Senator said:

"The serious side of it is that this is giving the credit of the United States to every speculator, every promoter, every plackguard, who is able to scrape together \$25,000 and take out a national-bank charter."

The Senator failed to state that the United States is also to examine the banks and constantly supervise them; also, that bank examinations and supervision ought to be so thorough that the certificate of the supervising power will be the thing upon which the depositors and of the executive officer. Always there are some bankers who are inclined to take undue risks, and the examinations and supervision should be adjusted to that class so that under no circumstance shall the depositors so their money. The depositors are compelled by the circum

(The following extract from the argument in favor of a limited insurance on noninterest-bearing deposits by ROBERT L. OWEN, United States Scnator, on February 25, 1908, on S. 3023:)

THE GUARANTY OF DEPOSITS.

The substitute provides that noninterest-bearing deposits in national banks shall be guaranteed out of the tax paid by the national banks on their present circulation and by the proposed tax on emergency circulation.

As I have heretofore pointed out, the tax on the annual circulation is over three millions per annum, and the average loss to depositors of national banks during the last nine years is \$85,000 per annum.

There would be no need for so large a guaranty fund except for its moral effect. There is no harm in making it so abundant that confidence in the fund should be assured. There might be harm if the fund were not large enough to thoroughly establish public confidence.

As I have already pointed out, the fear of the depositor is the real cause of hoarding money on a large scale by the people. If you remove the cause for this hoarding, there will be no panic capable of seriously harming our national commerce.

When the depositor is absolutely assured in the security of his deposit, regardless of the solvency of the bank, he has no reason whatever to withdraw his funds, and he has no reason to hoard it.

There is a class of persons who do not keep any bank account, because of their distrust. One of the strongest benefits arising from the guaranty of deposits would be to bring out the currency hoarded by this class of people, who at present do not keep any bank account. The insurance plan would bring into activity a considerable volume of money which is now hidden.

But the value of the insurance plan is not the protection of the depositor; it is the protection of the public; it is the protection of our commerce; it is the protection of the public; it is the protection which is specially to be desired. The depositor is perfectly safe now, but nevertheless when he takes fright and withdraws currency for hoarding and produces a panic he is very dangerous to our commerce, and it is this danger which should be absted.

I have received a vast number of letters from bankers with regard to the insurance of deposits. The great majority of these letters strongly favor the guaranty plan and give abundant reason therefor. I submit a sample of these letters (Appendix "E"), but I have also received various letters from bankers opposing the idea of the guaranty of deposits.

received various letters from pankers opposing the face of the guarant, of deposits.

I have carefully read the letters which oppose this proposition and have scrutinized every objection made.

The first objection is that it will promote reckless banking, which will encourage unscrupulous bankers to offer high interest for deposits, with a view to embezzling the funds of the depositors; that this would be at the expense of the honest bankers of the country. The answer to

First. That interest-bearing deposits are not insured and, therefore, the entire objection fails because the supposititious embezzler has no inducement to offer for deposits, and, moreover, the honest banker pays nothing more under the plan proposed than he does now. It costs him

nothing.

Second. In the second place, the embezzlement of funds is made sufficiently unattractive by the criminal code to prevent the predicted embezzlement.

Third. In the third place, the safeguards of national banks are otherwise abundant to prevent embezzlement, and with 6,600 of such banks in the United States the losses for the last nine years have been a negligible quantity. The persons who invest their money in a national bank are subject to a double liability, so that the stockholders of a national bank of the smallest kind put up \$25,000 and are liable to a like amount under the law before any harm can come to the depositor. This equals a \$50,000 bond to secure fidelity.

No bank can start with any prospect of success that has not a board of local directors favorably known to the community, who comprise a further safeguard.

There is no force whatever in this objection.

Another objection which is offered is that it puts a conservative banker on a par with a reckless banker, who will offer special privileges in exchange for deposits.

The answer to this is: He is not allowed to insure an interest-bearing account; the depositor is protected by double liability of the bank's stockholders, and that the depositors are perfectly safe now, as a matter of fact, and there would be no more force in the objection under the new condition of insurance than there is under the present condition of no insurance.

But everybody familiar with the banking business knows that the pri-

of fact, and there would be no more force in the objection under the new condition of insurance than there is under the present condition of no insurance.

But everybody familiar with the banking business knows that the primary condition of a deposit is the belief of the depositor that the bank is safe. The real factors which control the deposit are the personal friendship of the depositor for the bank, for some of its officers or directors or stockholders; the fact that it is convenient to his business; the fact that he has a right to expect the reasonable business accommodations to which he is entitled. These are the motives which control deposits. The question of the security of the deposit does not control it except in a negative way. A man would not deposit where he had doubt; and if a bank were in the hands of a reckless, extravagant man, the common people can be relied on to find that out, and no such man can attract deposits against a man more honorable and more worthy of trust.

Another objection which is made is that it will do great harm to the State banks, because the State banks will not have a like insurance.

The answer to this is that the national banks for the last nine years have lost their depositors relatively only about \$1 where the State banks have lost their depositors \$23. The average loss of the State banks have been about \$85,000 per year for the last nine years.

Notwithstanding this greater safety of the national banks, the State banks have twice as much in deposits. This further discredits the theory of the objection.

It is not true, therefore, that the greater security of the national bank depositor would break up the State banks. I think it is true that where a small State bank in a town has a small national bank as its rival, under the guaranty plan, it would weaken to some extent the State bank depositor of the State bank, especially in time of panie, if there should ever be a panie under this improved system and in the event that the State banks and no friend of the State bank

It should always be kept in mind that it is not the welfare of the bank, nor the welfare of the depositor which is the main object to be attained, but it is the prevention of panic, the protection of our commerce, the stability of business conditions, and the maintenance in active operation of the productive energies of the Nation, which is the question of vital importance.

Mr. OWEN. I ask, out of order, to submit a motion that 5,000 copies of the banking and currency bill, H. R. 7837, showing the Senate amendments, be printed for the use of the Senate document room.

Mr. BRISTOW. Mr. President, I should like the amendment which I have offered first to be disposed of.

Mr. OWEN. I beg the Senator's pardon. I overlooked the

fact that his amendment was pending.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Kansas [Mr. Bristow] to the amendment of the Senator from Oklahoma [Mr. OWEN].

The amendment to the amendment was rejected.

Mr. OWEN. Out of order, I ask that the following order be made by the Senate.

The PRESIDING OFFICER. The Senator from Oklahoma submits an order, which will be read.

The Secretary read as follows:

Ordered, That 5,000 additional copies of the banking bill, H. R. 7837, be printed for the use of the Senate document room.

Mr. SMOOT. Do I understand that that includes all the amendments that have been offered up to the present time?

Mr. OWEN. No; it is intended to let the printers prepare for the bill in the form in which it passes the Senate. In that way they will be able to get it out promptly. There will be quite a demand for this bill as it shall be finally amended and passed by the Senate.

Mr. GALLINGER. The bill will not be printed until its con-

sideration is completed?

Mr. OWEN. Oh, no. Mr. SMOOT. Then it is proposed that the 5,000 additional copies of the bill shall not be printed until the bill is com-

Mr. OWEN. When the bill is completed; that is what it means. I will modify the order to make it clear.

The order as modified was considered by unanimous consent and agreed to, as follows:

Ordered, That 5,000 additional copies of the banking bill, H. R. 7837, when finally passed by the Senate, be printed, showing the Senate amendment, for the use of the Senate document room.

Mr. OWEN. I ask for the adoption of the following order

(S. Doc. No. 335):

(8. Doc. No. 559):

Ordered, That there be printed as a Senate document, in document type and in three parallel columns, a comparative print of the banking and currency bill, H. R. 7837, "An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective superivision of banking in the United States, and for other purposes," showing the bill as passed by the House, the bill as passed by the Senate, and the bill as agreed to in conference, and that 5,000 additional copies be printed for the use of the Senate document room.

Mr. SMOOT. I should like to ask the Senator what he means "the bill as agreed to in conference"?

Mr. OWEN. It is simply saving time; that is all. It is in order to save the time that would elapse if this order were de-

layed until after the conference had been held.

Mr. GALLINGER. If the Senator will permit me, I will venture to ask the Senator from Oklahoma if he thinks the general public will be interested in any phase of the bill except the bill as it shall be completed and approved by the President?

Mr. OWEN. I thought the Senate would be very much interested in making the comparison and would like to have these parallel columns so that they could see what the conferees

were doing with the bill.

Mr. GALLINGER. It occurs to me that all that will interest the public, and it seems to me all that ought to interest the Senate, is the bill as it finally becomes a law. We have had these other bills printed over and over again.

Mr. OWEN. I would remind the Senator that there are 25,000 banks, and they are quite interested in the bill and the various steps in it. They write asking for information about it, and it is very difficult to answer them unless we have it in some such form.

Mr. GALLINGER. I want to give them all possible information, but it seems to me the House bill and the bill as amended

by the Senate would be, in a sense, ancient history.

Mr. OWEN. It was believed that the Senate itself want to have this print for the purpose of comparison. It was believed that the Senate itself would demand from the banks of the country for information about the bill and the changes made is the basis of the request.

Mr. GALLINGER. I shall not object to the request, and yet it does seem to me that it is simply piling up the expense of printing without any result. That is the way it strikes me.

Mr. SMOOT. Let me suggest to the Senator that he increase the number of copies to be printed of the bill as it passes the Senate, when the bill becomes completed, because there will be a great demand for those documents.

Mr. GALLINGER. The Senator means as it is approved?

Mr. SMOOT. As it is approved. Mr. OWEN. There will be a very great demand for the bill itself after it becomes a law. For the bill just as it passes the Senate I do not think there will be a larger demand than 5,000 conies

Mr. SMOOT. I meant, of course, after the bill became a law. Mr. OWEN. Oh, after it becomes a law there will be a large

demand for it.

Mr. SMOOT But I wish to call the Senator's attention to the fact that Document No. 264 shows what the House bill contains, the Owen amendment as reported to the Senate, and the Hitchcock amendment. It does seem to me that is all the comparison the Senate needs, and especially all the comparison the banks need. If they have this comparison and then have a copy of the bill as it becomes a law, they will have almost the complete history of the bill from the beginning.

Mr. OWEN. I will remind the Senator that it will not take very much time to change this pamphlet and make it comply with what has been actually done. The changes are not very numerous, although they are sufficiently numerous to make it very confusing if one were to rely upon that particular print.

Mr. SMOOT. If the Senator really thinks it is necessary, I shall not object; but I really do think it is a waste of money.

Mr. OWEN. It will require a very small amount of money.

The PRESIDING OFFICER. The question is on agreeing to the order offered by the Senator from Oklahoma.

The order was agreed to.

Mr. NORRIS. In connection with section 7, I have an amendment that I should like to have read at the desk. I should like to have the attention of the Senator from Oklahoma while the Secretary is reading the amendment.

The Secretary. On page 20, line 3, after the word "Treas-

ury," it is proposed to insert:

Whenever the Secretary of the Treasury, out of said fund, shall pay any amounts due to depositors of failed member banks, the Secretary of the Treasury shall be subrogated to all the rights of said depositors, and in the settlement of the affairs of any such bank all dividends that would have been due to such depositors shall be paid to the Secretary of the Treasury, and the same shall be by him paid into and become a part of said depositors' insurance fund.

Mr. OWEN. The reason that was not put in was because it was believed those rights would be subrogated; but I have no objection to the amendment.

Mr. NORRIS. I presume with that statement, then, there will

be no opposition to the amendment. I do not care to take up the time of the Senate in debating it. I am ready to vote.

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from Nebraska to the amendment of the Senator from Oklahoma.

The amendment to the amendment was agreed to.

Mr. OWEN. I ask that there shall be a reprint of the bill for the use of the Senate in the morning.

Mr. GALLINGER. A reprint with the amendments as agreed to?

Mr. OWEN. With the amendments as agreed to.

The PRESIDING OFFICER. In the absence of objection, it will be so ordered.

Mr. BURTON. I should like to ask if it is expected that that print will be ready here to-morrow morning by 10 o'clock? Can anyone tell about that?

Mr. OWEN. Yes; to-morrow morning. Mr. CRAWFORD. I desire to offer an amendment and have it read, so that it may be printed in the RECORD, and I shall call it up in the morning when we resume the consideration of the I offer it as a substitute for section 24.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The Secretary. In lieu of section 24 as printed in the amendment, it is proposed to insert:

All national banks not located in central reserve cities may make loans secured by improved, occupied, and unencumbered farm land situated within the Federal reserve district where the loaning bank is located to the extent of one-half of its value; but no such loan shall be made for a longer period than five years, nor shall the aggregate of such loans by any bank exceed one-third of its time deposits.

Mr. NEWLANDS. I wish to offer, for the consideration of the committee, the following amendment:

On page 2, lines 15 and 16, strike out the words "nor more than 12," leaving the clause to stand:

Shall designate not less than eight cities, to be known as Federal reserve cities.

And on page 29, at the end of line 2, add the words:

And to require from the Federal reserve banks such proportion of the reserves deposited by member banks with the Federal reserve banks, not exceeding one-fourth, as they may require for the purpose of advancing to any Federal reserve bank in order to rediscount the dis-counted paper of member banks.

The PRESIDING OFFICER. The hour of 11 o'clock having arrived, the Senate stands adjourned until 10 o'clock to-morrow

morning.

The Senate thereupon (at 11 o'clock p. m.) adjourned until to-morrow, Friday, December 19, 1913, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, December 18, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Almighty Father, from whom cometh every blessing, "As the rain cometh down, and the snow, from heaven, and returneth not thither but watereth the earth and maketh it bring forth and bud, that it may give seed to the sower and bread to the eater," so may Thy spirit permeate our souls that it may temper our minds, mellow our hearts, and fit us for the new duties of the new day; that we may use the gifts Thou hast bestowed upon us as children of the living God, and quit ourselves like men, to the glory and honor of Thy holy name. In the name of the Master. Amen.

The Journal of the proceedings of yesterday was read and

approved.

LEAVE OF ABSENCE.

The SPEAKER laid before the House the following personal request:

House of Representatives, Washington, D. C., December 17, 1913.

To the honorable the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEAR SIR: I desire to request that I be granted leave of absence for four days on account of important business.
Yours, respectfully,

George E. Gorman.

The SPEAKER. Is there objection to the request? There was no objection.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the

H. J. Res. 165. Joint resolution for recognition of the services of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mr. Katherine Davis Gaillard.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL. Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the

United States, for his approval, the following bill:

H. R. 10081. An act to make the tenure of the office of the major general commandant of the Marine Corps for a term of

four years.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia appropriation bill (H. R. 10523); and, pending that motion, Mr. Speaker, I would like to inquire of the gentleman from Minnesota [Mr. Davis], on the other side, as to whether we can now reach an agreement as to the closing of general debate.

Mr. DAVIS. I do not know whether we can or not. I know the gentleman from Wyoming [Mr. Mondell] wants 30 minutes, and the gentleman from Illinois [Mr. Mann] wants some time; I can not really tell how much. I want about 20 or 25 minutes The gentleman from Illinois says he wants an hour.

Mr. PAGE of North Carolina. Oh, I do not think the gentleman from Illinois wants an hour at this stage of the proceedings. He is not going to discuss this bill, I imagine.

Mr. MANN. No doubt I would if I had the chance. Mr. DAVIS. And the gentleman from Tennessee [Mr. AUSTIN] wants 15 minutes.

Mr. PAGE of North Carolina. Why, Mr. Speaker, that would prolong this debate to a time beyond what it seems to me there is any necessity for. The debate has already run for one full

Mr. DAVIS. I am willing to agree that we take two hours on this side. Will the gentleman from North Carolina be satis-

field with that?

Mr. PAGE of North Carolina. How is that?

Mr. DAVIS. Two hours on this side.
Mr. PAGE of North Carolina. One hour on each side.

Mr. DAVIS. No; two hours on this side.

Mr. PAGE of North Carolina. That will take practically the whole legislative day. I want to yield to the sentiment of the House, but I do not feel inclined, being in charge of this bill, to agree to spend another legislative day in general debate. would agree very readily to an hour on a side.

Mr. MANN. If the gentleman from North Carolina will per-

mit, it is early in the session now, and usually it has been customary to give a reasonable opportunity for general debate at this time in the session. If it were late in the session, it would be different, but there has been no protracted general debate on

Mr. PAGE of North Carolina. No; but I think the gentleman realizes that there are some 12 other appropriation bills that will come into the House, and their consideration will give ample opportunity for the unlimited debate of-

Mr. MANN. I do not realize that, because if you are not to have a reasonable debate on this bill at this time in the session, I do not see how anyone can anticipate that there would be reasonable debate on any other appropriation bill. Late in the session there is reason for cutting off debate.

Mr. PAGE of North Carolina. Mr. Speaker, will the gentleman from Minnesota [Mr. Davis] agree to close general debate within three hours, the time to be equally divided between him-

self and myself?

Mr. DAVIS. I will agree to that.

Mr. MANN. It may cut me off, but in consideration of the anxiety of the gentleman from North Carolina to prevent my making some statements on the floor at this time which I appreciate that side of the House does not want me to make, I

Mr. PAGE of North Carolina. It is not so much the statement that the gentleman would make as it is the time that he will take to make it that makes the impression on this side.

Mr. MANN. I think it is the statements that will be made that the gentleman worries about.

Mr. PAGE of North Carolina. We on this side of the House will take care of any statements that may be made.

Mr. MANN. To try and prevent their being made.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that general debate close within three hours, the time to be controlled one-half by myself and one-half by the gentleman from Minnesota.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that general debate be limited to three hours, if Members want to use that much time, one half to be controlled by himself and the other half by the gentleman from Minnesota. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The gentleman from North Carolina moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HULL in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District of Columbia appro-

Mr. PAGE of North Carolina. Mr. Chairman, I will ask the gentleman from Minnesota to use some of his time. I will say to the gentleman that there will only be two speeches made on this side of the House.

Mr. DAVIS. Mr. Chairman, I yield 30 minutes to the gentle-

man from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, at the outset of my remarks I desire to testify to the thorough, efficient, and painstaking investigation and consideration which the subcommittee of the Committee on Appropriations, headed by the gentleman from North Carolina [Mr. Page], gave to the estimates of the District government in connection with the preparation of the District appropriation bill. I am sure that every member of the sub-committee, as well as all the members of the full committee which reported the measure, approached, carried on, and concluded their labors with a sincere desire to ascertain the needs of the District and to reasonably provide for every department of the District government. From the necessarily hurried examination which, as a member of the committee and not of the subcommittee, I have been able to give to the bill, I am of the opinion that the details of the items have been carefully and fairly adjusted. It is also possible that no administrative

department of the city government will be seriously handicapped in carrying on its labors and meeting its responsibilities with at least a moderate degree of success and satisfaction by reason of the rigid economies which have been practiced in the preparation of this bill.

As a member of the committee desirous of cooperating in a friendly and harmonious way with my colleagues, I wish I could say more with regard to the merits of the measure, but from my viewpoint of the needs of the District I can not truthfully do so. I do desire, however, to emphasize my opinion that the faults of omission, which so seriously mar the virtues of the bill, are not due to any unfriendly attitude toward the District on the part of the Committee on Appropriations. They are largely due to a belief on the part of the majority that in the face of uncertain and dwindling revenues it becomes necessary to use the pruning knife wherever any excuse, valid or otherwise, is found for so doing. It is true that under a fair application of the half-and-half principle, reductions in the District appropriation bill do not afford the saving to the Treasury that reductions in other appropriation bills do. Should the departure from that principle contemplated by this measure become effective, however, for every dollar less than twice the revenues of the District this bill carries, a like sum will be transferred from the District revenues to the Treasury of the United States. It is thus very clear that in the face of a probable deficit in national income the majority has a real and substantial incentive to keep this, the first of the appropriation bills, as low as possible.

tion bills, as low as possible.

It has been and will be urged in defense of the measure that it appropriates approximately \$84,000 more than the bill for the current year. Assuming that there was an actual increase of \$84,000 in the sums provided for running the District departments, which is not the case, as I will show later, it is very doubtful if such an increase would meet the legitimate and necessary requirements of a rapidly growing and expanding city such as Washington is, not to mention those expenditures in the nature of investments, such as schoolhouses, hospitals, markets, playgrounds, and parks, which become increasingly important every year. It is an exceedingly narrow and, in my mind, untenable view that the growing Capital of a growing Nation should be compelled to mark time and forego indefinitely any enlargement and extension of its public service or of the facilities for the education, care, and comfort of its people.

facilities for the education, care, and comfort of its people. The fact is, however, that this bill does not increase by \$84,000, or by any other sum, the amounts available for the administration of the city government. On the contrary, the amount so available is less than in the current law, and it comes about in this wise: Owing largely to the necessity of making a larger appropriation than last year for the construction of a new Central High School, the appropriation for school buildings and grounds is increased \$156,000 above the current appropriation. Deducting the \$84,000 of total increase from this sum we find that the actual sum available for all purposes of administration and improvement, other than this new building, is \$72,000 less than the current law provides.

I said a moment ago that I was of the opinion that it is possible that no administrative department of the city government would be seriously handicapped in carrying on its labors and meeting its responsibilities with at least a moderate degree of success and satisfaction by reason of the rigid economies of this bill. I fear I must somewhat qualify even that moderate statement, for I am not entirely satisfied that three important departments of the city government will not be badly handicapped or at least embarrassed in meeting the reasonable demands and requirements of the people of the District. I have in mind the public schools, the public library, and the public utilities commission.

Outside of the increases for buildings and longevity pay to teachers, the increase for schools is approximately \$20,000, a very slight increase indeed compared with the growth of the city and the total increase of about \$800,000 asked and urged by the commissioners.

In the matter of the public library the commissioners asked an increase of about \$27,000, and about \$7,000 was granted, though Commissioner Newman, who is thoroughly conversant with needs of the District in this regard, earnestly urged the allowance of the larger sum.

With a view of performing the duties imposed by the public utilities act, and in carrying out a mandatory provision of that act, the commissioners ask for the sum of \$110,000 to defray the expenses of a valuation of the property of every public utility in the District. No portion of this was granted, though the commissioners earnestly urged the appropriation in order that the commission might perform a duty imposed upon them by the law of last year, and called attention to the fact that it was

impossible for them to properly and intelligently perform their duties in determining what service and facilities might properly be required and what charges allowed without the valuation which the law commands and good administration requires. Have we so soon forgotten the circumstances under which this commission was created and the hopes we entertained of its efficiency in the service of the people of the District that we refuse the sums which the law contemplated and the commission insists is necessary to enable it to properly perform its duties?

Turning now from questions of administration to those which relate to providing additional means and facilities for the safety, care, comfort, and convenience of the public we are at once confronted with the remarkable fact that not a single one of a considerable number of projects of this character, recommended by the commissioners, finds a place in this bill. I have grouped these items under two heads: First, the items which appear to me to be of first and primary importance; second, items possibly of less immediate necessity, but nevertheless important, and some of which should have been provided for at this time:

Items of first importance not provided for.

FISH WHARF AND MARKET.	
Buildings \$125,000 Wharves, reconstruction of 50,000	
	\$175,000
MUNICIPAL MARKET.	
Preparation of plans	5, 000
BATHING BEACHES.	
New beach at Tidal Basin. Potomac Park \$66,000 New beach on Anacostia River 21, 369	
Physical valuation public utilities	87, 369
PUBLIC-CONVENIENCE STATIONS.	
Fifteenth and H Streets NE\$11, 000 Wisconsin Avenue and M Street\$20, 000	
Municipal bossital	31,000
Municipal hospital Municipal lodging house	50, 000 50, 000
Total	The Art Staveley
Important items not provided for.	020,000
Viaduct, Benning Road	\$110,000
Municipal warehouse	86, 500
Municipal warehouse Lump purchase, municipal supplies	100, 000
Resurfacing approaches to bridges	30,000
Paving P Street between Twenty-eighth Street and Wisconsin Avenue	
Paving Seventh Street NW	18, 000 30, 000
New Park. Patterson tract	375 000
Hospital for inebriates	75, 000
Total	824, 500

I regret that the time at my disposal is not sufficient to enable me to refer to these items in detail. As to the first of them, the fish wharf and market, no argument is necessary to convince anyone at all familiar with the situation and conditions of the urgency for and importance of its improvement. As was well said during the hearings, it would be difficult to exaggerate the wholly unsatisfactory conditions which now exist. The city has a splendid property which could be made of great use and value not only to the people of the District but to the fishermen and farmers of Maryland and Virginia. The present wharf facilities are entirely inadequate, and the buildings are a disgrace to the community. Enlarged and permanent wharves and good buildings at this point would facilitate and cheapen the unloading and distribution of fish and produce. It is a work which ought to be immediately undertaken in the interest of the health and the pocketbooks of the people of the District. There was some difference of opinion as to whether facilities should be provided for retail trade at this point. That is altogether a minor question, and ought not delay the undertaking of this needed improvement. Not only is it entirely omitted from the bill, but no provision is made for further plans; and an item for plans for a municipal market is also omitted.

One of the things that Washington needs badly is additional bathing beaches. One was estimated for at the tidal basin in Potomac Park, one on the Anacostia River. There was such an urgent demand for these additional facilities that it did not seem possible that the committee could ignore them. The advocates of economy found, however, an unexpected ally in an overzealous advocate of bathing pools in the interior of the city in connection with the playgrounds. This misguided gentleman discovered and brought forward a physician with a microscope and an imagination so powerful as to enable him to discover bugs and "varmints" in the tidal waters of the Potomac which, he gravely insisted, threatened the health of the youth of the community if allowed to bathe in it. Aghast at these startling revelations of lurking dangers in good Potomac water, the committee shrank from the responsibility of authorizing the pro-

posed bathing beaches. At the same time the committee seems to have overlooked the filtered-water swimming pools that these professional investigators hoped would take the place of the shore beaches. Never was an overzealous butter-in more serviceable in the interest of false economy than in this case.

I have not the time to even refer to the other items which I have scheduled, asked for by the commissioners and denied by the committee. That they are not all of immediate and pressing importance is undoubtedly true. That some of them are of such immediate importance as to warrant provision being made for them there can be no question, and this is particularly true of the public-comfort stations which the commissioners asked for.

The present Secretary of Commerce is much quoted as an authority on a variety of subjects. I believe it was he who suggested and urged a municipal warehouse and lump-sum purchase of supplies in one of those numerous reports, so fashionable of late, reflecting on the management of the District government. His recommendations do not seem to have found favor in the eyes of the majority of the committee.

THE HALF-AND-HALF PRINCIPLE

Much of the trimming and many of the omissions of the bill can be accounted for by section 8, which appears on page 84 of the bill, and which is as follows:

SEC. 8. That to the extent the revenues of the District of Columbia for the fiscal year 1915 shall exceed the proportionate part of the appropriations made in this or any other act and chargeable against said revenues, the same shall be covered into the Treasury of the United States to the credit of "miscellaneous receipts."

This provision strikes at the vitals of the plan under which the District has been operating for many years. I have neither the time nor the inclination to discuss the wisdom or propriety of the arrangement under which the Federal Treasury is pledged to pay one-half of the expenditures of the District, but this is not the time, this bill is not the place, to attempt to change that plan. That fiscal plan is one of the features of an arrangement under which the General Government has taken over and administers the affairs of the District. The arrangement in its general features has been considered wise and advantageous to the Nation, and if the time has come to modify it the modification should come after full consideration of all features of that relationship between the District and the General Government, of which the half-and-half plan is but one of the factors.

PUBLIC PLAYGROUNDS.

As an illuminating illustration of the unfair and illogical character of section 8, to which I have referred, let me call attention to the facts with regard to playgrounds: Playgrounds are supported entirely from District revenues. It seems we are so little interested in giving the children of this community an opportunity for fresh air and exercise that we have declined to carry out our part of the pact so far as playgrounds are con-This year the commissioners asked for an increase in the appropriation for playgrounds amounting to nearly \$70,000, most of which was to be used for the purchase of a tract in the northwest now used for playgrounds by the sufferance of the owner. As the District must make payment out of its own revenues, there would seem to be no excuse for denying them the opportunity of securing this property before it further enhances in value; but, although under section 8 nearly a million and a half dollars of the District revenues would be confiscated by the National Government, the committee declines to allow the commissioners to rescue a portion of these funds belonging to the people of the District for the purpose of pur-chasing a needed playground for their children.

The gentleman from Iowa [Mr. Prouty] during the debate on Tuesday said it was "no secret that the people of this town look with suspicion and disrespect on Congress." I hope that is not true. If it is, may not Congress be at least partly to blame? Suspicion and disrespect seldom exist without some slight foundation. What has been the attitude of the House as voiced on the floor of late toward the District. I am certain that there is much work of a constructive character in legislation for the District that needs to be done. Have we performed our duty in this regard? I think not. I can not recall any discussion, much less the enactment, of any useful constructive legislation for the District in many months. On the contrary, there has been a perfect flood of criticism and faultfinding of the District and its people, and a number of proposals of legislation ob-noxious to them and of doubtful justice and wisdom have been pressed with heat and haste.

District baiting has become a popular pastime in certain quarters, and under these circumstances it is perhaps not to be wondered at if the people of the District are suspicious and critical of Congress.

Whatever Congress may conclude to do in the future, our duty in the present is to deal fairly and considerately with these people from whom we have taken the franchise and whose city council we have constituted ourselves. It may be that some different plan may be devised better adapted to present on future conditions, but it is neither fair nor logical for Congress to overturn, in whole or in part, one feature of the arrangement under which the District is governed and administered without consideration of the situation as a whole.

One thing is certain; I do not anticipate that the constituents of any of us will receive more at the hands of the Federal Government because the District may receive less. It is not particularly logical, in my opinion, to argue against the present arrangement under which the Government is pledged to pay half of the expenses of the District on the theory that the sums thus expended would, if divided up on the basis of population, amount to certain sums for each State or locality of the Union. On that theory I should be entirely justified in voting against river and harbor appropriations, even in voting against the Panama Canal expenditure, neither of which can be of direct benefit to my constituents, because the sums thus expended, if divided up among the States, would give each a certain sum. The question is: Is the plain a fair one; is the expenditure proper; are we bound to abide by the arrangement as made until changed as a whole? As to the last question, there can be but one answer.

It is natural that the people of the District should desire such appropriations as will maintain a creditable government here and provide satisfactory facilities here. As citizens of the Nation, of which this is the Capitol, we should all be of the same mind. With a view of restoring amicable relations between the District and Congress, if such have been in anywise disturbed, I desire to express the hope that those charged with legislation for the District will in the future give at least as much time and attention to the work of constructive and helpful legislation as is given to the resurrection of ancient and doubtful claims, to faultfinding and criticism of the District, its officers

claims, to faulting and criticism of the District, its officers and its people, and to plans for the confiscation of their revenues. [Applause.]

Mr. DAVIS. Mr. Chairman, I now yield 15 minutes to the gentleman from Tennessee [Mr. Austin].

Mr. AUSTIN. Mr. Chairman, I wish to call the attention of the House to the consideration of this bill and other appropriation bills that will follow, and the following provision of the Democratic platform adopted at Baltimore last year:

Republican extravagance:
We denounce the profligate waste of money wrung from the people by oppressive taxation through a lavish appropriation of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toll. We demand a return to that simplicity of economy which befits a Democratic Government, to a reduction in the number of useless offices, the salaries of which drain the substance of the people.

The Committee on Appropriations has published the estimates submitted to that committee by the Democratic national administration elected upon the Baltimore platform. The estimates called for by the Democratic heads of the executive departments aggregate \$1,108,681,777.02. That is an increase over the estimates submitted to the last session of the Sixty-second Congress by a Republican administration of \$3,474,813.80. These estimates show an increase over the appropriations of the present fiscal year, appropriations enacted by a Republican Senate and a Republican national administration, of \$38,466,498.15.

The last Democratic House of the Sixty-second Congress, third session, agreed to appropriations amounting to \$1,150,-206,963.14, the largest appropriation ever carried through any Congress within the recollection of man. The District of Columbia appropriation bill that we are now considering shows an increase over existing law and an increase over the appropriations of the last Republican Congress. A Democratic Secretary of Agriculture stated to the Committee on Appropriations that he desires \$774,102 more for the administration of his department under Democratic administration than the Republican Secretary of Agriculture certified he needed to administer the same department.

The Secretary of War has asked for \$9,550,127.52 more than his Republican predecessor requested from the last Congres

The Secretary of State, who has been credited with having something to do with writing the Democratic platform on the waste and extravagance of the Republican Party that I have just read, has asked for \$481,650 more than his Republican predecessor called upon Congress for.

The District of Columbia Commissioners, appointed by the President elected upon this pledge of economy, have asked for \$1,617,316.89 more than the three District Commissioners appointed by President Taft asked for.

Mr. LOBECK. Will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. LOBECK. The gentleman from Wyoming [Mr. MONDELL] stated a few moments ago that the requests by the District Commissioners were absolutely correct. How does the gentleman

reconcile that with his statement?

Mr. AUSTIN. I will speak of that later. This administration has asked for \$2,114,565.49 more to be expended upon fortifications that the last Republican Secretary of War requested. In this plank of the platform just read is a denunciation of my party for the creation of useless offices, and yet this estimate made up by the Democratic members of the Cabinet has requested, in the way of increase in the legislative, executive, and judicial appropriation bill which carries the salaries of Government officials, an increase of \$3,069,754.20.

And the Postmaster General, who has served upon the Committee on Appropriations in this House, has asked for \$25,161,609

more than his Republican predecessor.

In other words, these members of the Cabinet whom I have mentioned have asked us for \$42,769,125.15 more than the corresponding Republican Cabinet officers asked to administer their respective departments. I am not complaining of this. The Government business is growing and expanding. But I do com-plain of this unjust criticism made of the Republican Party in the Democratic platform, and I am saying that in the action of the agents of the Democratic administration you are not carrying out in good faith that pledge made in the Baltimore platform in the interest of retrenchment and economy.

Every department of the Government is growing and properly

extending its work. I vote for these appropriations because I believe the money is needed, and that the American people never complain of their representatives if the money is needed and is

honestly expended.

What are we going to do under this appropriation bill? We are going to prevent the Capital City from going forward with the development of its plans and purposes as enunciated by the three District Commissioners appointed by President Wilson.

We are told in the public press that a conference was held of the Speaker and other Members of the House looking to economy and a reduction of expenses and the cutting down of estimates submitted here by the executive departments for the expansion and development of the people's business all over the Union. Why, gentlemen, you are setting a bad example for the entire country in this plan of yours. If you let it go out to the American people that you are going to enter upon a scheme not to do anything, a scheme to reduce and retrench and lop off and discharge Government employees, every thoughtful citizen in the Republic who is engaged in business and in the employment of labor will stop and hesitate, and he will naturally follow the example of Congress. If in the judgment of Congress no public improvements should go forward, then the cautious, prudent business man will take heed; and instead of making this country prosperous and enabling your party to make the condition of the workingman better than it was under the Republican administration, you will produce the very opposite

These amounts are asked for, and I take it that the able men who compose the Cabinet of President Wilson are sincere, honest, patriotic, and have the welfare of all the people at heart in submitting these estimates, and I believe they submitted them in good faith.

Mr. ADAIR. Will the gentleman yield there?
Mr. AUSTIN. Yes.
Mr. ADAIR. Is it the gentleman's notion that the proper way to make the people throughout the country prosperous is to tax

them heavily to carry on improvements here in Washington?

Mr. AUSTIN. You are not going to tax them heavily. You have reduced tariff taxation, and what is the result? Has it resulted in the construction of a single additional manufacturing plant, or an enlargement? Has it added one single pay envelope to a workman in a State or city in the Union? On the contrary, has not that mistaken policy of yours resulted in hardship and the stopping of the construction of new plants or the extension of existing plants? Did not the Democratic leader in the Senate state in a public debate yesterday that there are thousands of workingmen out of employment in Indiana? And has not one of the Representatives from the Pacific coast, Mr. HUMPHREY of Washington, stated here in the debate on the floor of this House, without any contradiction, that your legislation has resulted in turning into idleness 15,000 workingmen in his State in the lumber and shingle industry alone?

Mr. ADAIR. Will the gentleman yield? Mr. AUSTIN. In a moment. Let me get through with this thought. Has not the Chicago Tribune published in the last House my irritation at the treatment which the majority party

24 hours the statement that more than 100,000 men, who were busy and employed before you passed your tariff bill, are wandering aimlessly around in that city without employment? And it is a serious proposition that confronts your Democratic mayor of Chicago how to house and feed them. What else?

Mr. ADAIR. Now will the gentleman yield?
Mr. AUSTIN. Not yet. Here is an extract from the Washington Herald of this morning:

MILWAUKEE, December 17.

A report to the citizens committee says there are 30,000 unemployed in the city, and that of this number nearly 6,000 are on the border line of starvation and need immediate assistance. The condition is steadily growing worse, and the prospect for the winter is bad.

Only a few days ago the New York Sun published a telegram from Connecticut, I believe from the town of Stamford, stating that 10,000 mechanics were idle there. Yet you are encouraging this condition in cutting down and paring down the appropriations of this National Government. And I warn you, not in the interest of any political party, but I warn you in the interest of the prosperity and happiness of all the American people-Mr. ADAIR. Now will the gentleman yield? Mr. AUSTIN. Yes.

Mr. ADAIR. Does the gentleman believe that by taxing the unemployed he speaks of in the great cities of the country, to carry on improvements in the city of Washington, it will open up the mills he talks about being closed throughout the country?

Mr. AUSTIN. The gentleman knows well enough that the army of unemployed just starting out now are not heavy tax-But what will you do for the District of Columbia?

The building operations in this town alone show a falling off of 30 per cent. But you are going to saddle upon the people here an additional burden in the way of taxation. You are going to attempt to force the people of this city to do what our predecessors for 40 years said Congress should do. You are going to add to their burdens of taxation. This is a great city. It belongs to all the people, and it is unfair and unjust, after pursuing this just policy, which is fair and equitable to the Government, to change or alter it.

The CHAIRMAN. The time of the gentleman from Tennessee

has expired.

Mr. AUSTIN. Mr. Chairman, I will ask the gentleman from Minnesota to let me have a little more time.

Mr. DAVIS. Mr. Chairman, I will yield three more minutes

to the gentleman.

Mr. AUSTIN. Mr. Chairman, what you are going to do is unjust to this magnificent city, a city which is the envy of the world and the admiration of all of our people, and it is not right to enter upon a policy here that will set it back a half century in its development, progress, and beautification. My constituents do not complain at any vote I cast to continue this policy. No man's constituents will complain. They admire and they

have a pride in this great and beautiful city.

Mr. Chairman, let me say this in conclusion: You began in this House with an investigation of the Steel Corporation. Then you started in on the so-called Money Trust and then the Sugar Trust. You followed that with your tariff bill, which means, according to the statements of the committee, the sale in this country of millions of dollars of foreign-made goods. Not satisfied with passing a tariff bill against the interests of thousands of our manufacturers, and countless thousands of deserving toilers, you brought in a currency bill striking at the security and soundness of the banking system of the country, the stockholders, the men and women and children, who have their savings invested in these institutions, and now the President is busy on additional legislation against the railroads and corporation interests. Where are you going to stop? Are you surprised that capital is timid; that manufacturers are halting; that bankers are cautious; that business men are alarmed? You have given every reason and argument why they should be demoralized. Stop it; stop it in the interests of all the people; forget your partisan and unpatriotic promises written in the Democratic platform at Baltimore, which proclaimed a fight against everything, every man, and every corporation that was developing the country and giving employment to our people and furnishing prosperity from ocean to ocean. [Applause on the Republican side.]

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. HINEBAUGH].

Mr. HINEBAUGH. Mr. Chairman, I shall probably not consume the entire five minutes which has been allotted to me by the chairman of the subcommittee of which I have the honor to be a member. I think it my duty, notwithstanding the fact that I have expressed on other occasions on the floor of this in this House has given the party which I have the honor to represent in the matter of the distribution of time. Nevertheless, in spite of the objection I have to that treatment, I must say that on this subcommittee I find myself very largely in accord with the action taken by the majority party, and that, with the possible exception of three items out of the entire mass of items considered in the District bill, I find it my duty to vote with the majority members of the committee in their program of economy. And I can not refrain from noting the fact that one of our Republican brethren complains this morning because the committee cut down the estimates submitted by the various department heads, while another Republican brother complains because the department heads submitted estimates which were larger than those submitted under the last Republican administration. I submit that under these conditions it would be very difficult for any committee to please everybody. believe that the chairman of this subcommittee has acted intelligently. I believe that this subcommittee, through its chairman, has taken the utmost pains and the utmost care to examine into the various items of the estimates submitted, and that where a cut has been made it was done after careful

In the one item of streets alone I desire to call the attention of the House to the fact that this subcommittee took the pains to visit personally every street proposed to be improved, and that no action was taken with reference to the estimates made until each member of the committee had an opportunity to satisfy himself as to whether or not the particular improve-

ment ought to be allowed.

The three items in this bill upon which I find myself unable entirely to agree with the majority members of the committee are the items for public schools, public library, and the juve-nile court. I had hoped that on the item of public schools, where some \$800,000 was asked more than was in the estimates of the last fiscal year, the committee would see its way clear to allow more than \$20,000 additional. I also thought from the hearings on the public library that that institution, because of the great good it does in the community, ought to be allowed a little more money; but I was especially, and I may say personally, interested in the estimate submitted by the juvenile court of the District of Columbia, possibly due to the fact that I have had a number of years of personal experience in that work.

It is true the majority members of the District Committee did increase the allowance of the juvenile court, and that increased allowance will increase the efficiency of the court; but the hearings demonstrated the fact that they handle some 540 children on probation annually and never have less than 480 children to care for. The testimony showed that they had but three proba-Anyone who is at all familiar with the character of the work done by the probation officers and the juvenile court system in this country will readily understand it is absolutely impossible for three or even four probation officers to properly care for 480 children. The records of cities of the size of Washington will show that the probation efficer ought not to have under his immediate charge more than 50 children, and in the city of Washington they have something like 150.

The CHAIRMAN. The time of the gentleman has expired. Mr. PAGE of North Carolina. Will the gentleman from Minnesota [Mr. Davis] now consume some of his time?

Mr. DAVIS. Mr. Chairman, how much time have I re-

The CHAIRMAN. The gentleman has 51 minutes remaining. Mr. DAVIS. Would the Chairman notify me after I have spoken for 20 minutes?

The CHAIRMAN. The gentleman from Minnesota is recog-

nized for 20 minutes.

Mr. DAVIS. Mr. Chairmen and gentlemen of the committee, I was in hopes that the chairman of the subcommittee [Mr. Page of North Carolina] would have explained this bill before I had anything to say concerning it. I believe that he is thoroughly familiar with every detail and perhaps more so than any individual Member. This subcommittee, in my judgment, spent more time and made a more thorough examination of all the departments of the government of the District of Columbia than has ever been done heretofore. We not only spent nearly three weeks listening to witnesses produced before us, but in most instances they were witnesses of our own choosing. In addition to that, as my colleague has just said, we visited all proposed street improvements, and, with very few exceptions, I am

ment. It is perhaps a just and fair criticism to say that while the present appropriation bill carries a larger amount for the management of the governmental affairs of the District than any previous bill, yet I believe that as to new projects and advancement along new lines, many of which are needed within the city, this bill perhaps carries less. Now, as to that. proper, is it right, is it just that a city of this size should, as it were, remain almost stationary as regards new improvements? As I said, that is the question that the Members of the House will have to decide. There were, as has been read here in your hearing, many new projects, some of which I agree should be given and others I thought could justly wait until some future time, but a large majority of the committee decided that nothing whatever in the form of new improvements or new plans should be taken up at this time, and that

is the rock upon which some of us split.

I for one thought that there should be some improvements down at the wharves and that the condition there warranted it. The estimates requested a large appropriation for a new fish market, wholesale and retail, and a large sum for improvements for the wharves. There was a disagreement as to the propriety of placing a large retail fish market on the outer edge of the While I believe that the accommodations for receiving the fish should be better than now, yet, in my judgment, a smaller building to receive them and, as it were, make it a wholesale department, and then distributing the fish in several retail markets in other portions of the city more convenient to the population would be preferable to a large single retail market down on the wharves. Yet I believe that the committee should have done something along those lines. At least, plans and specifica-tions should have been provided and appropriation made there-for. The chairman of the committee will no doubt put in the RECORD, in explanation of this bill, many figures which are contained therein. I wish to justify myself for the present by simply saying that the increase for governmental purposes in the whole bill is as follows, compared with previous years: For the year 1913 there was appropriated \$10,302,208; for the fiscal year 1914 there was appropriated \$11,222,964; and for the year 1915, for which this bill stands, \$11,473,938.45. Perhaps this slight increase is largely due to the increased number of new streets that the committee have ordered to be paved and otherwise improved. Mr. Chairman, I wish to coincide and agree, heartily and fully, not only with the District Commissioners along this line but with the subcommittee in every respect, not as to the number and amount which we granted but in the theory and idea that was carried out. Wherever a proposition was presented in which the owners had purchased their property and had built up both sides of the street, and they owned their houses, and there was no street paved between them, it was my idea, the idea of the commissioners, and the idea of the committee that such improvement should be granted first. In other words, that the small owners, the small householders, who had not heretofore received benefits from the District appropriation bill for improving their streets should have the first consideration.

And I believe that the major portion, at least 90 per cent. of the improvements granted are granted upon that basis, and properly and justly so. Perhaps there are some others that ought to be granted that were not.

Mr. GOULDEN. Mr. Chairman—
The CHAIRMAN. Will the gentleman yield to the gentleman from New York?

Mr. DAVIS. Yes. Mr. GOULDEN. Who pays for these street improvements? Are they assessed against abutting property owners or are they

assessed against the area of improvement?

Mr. DAVIS. At the present time, under existing law, the property owner pays for one-half of the improvement of the sidewalk, including the curb, not the gutter. The Treasury, of which the Government furnishes half, pays the other half. But, as I understand the law, the paving of the street, the improvement of the street, including the gutter, is paid for wholly out of the revenues of the Federal Government and the District, each half and half, the property owner paying no part thereof whatever.

Mr. GOULDEN. Does that seem to be just? The abutting

property owners having benefited so largely, should they not

participate more largely than they do in this matter?

Mr. DAVIS. Now the gentleman has touched a great question that will be discussed on this floor in a day or two, and posed street improvements, and, with very few exceptions, I am inclined to believe that the present District bill, as far as the expense of the management and government of the city is concerned, will not be very disastrous. There is one question, however, upon which some of us disagree and perhaps more will be said on that when the bill is to be finally read for amendarises in my mind now whether at one fell swoop the change should be made, perhaps to the injustice of some of the present small property owners, when others have already received that great benefit; whether great consideration should not be given the subject before embarking upon a new system in order that justice may be given not only to the Government of the United States but also to the people of the District of Columbia.

Mr. GOULDEN. I think the gentleman is clearly right in his

conclusion, but he and I have been here 10 years and neither one of us have made any particular move in the direction of removing what he and I both think should be changed.

Mr. DAVIS. Now, the gentleman is in error as far as I am

concerned. I will state to him that 10 years ago I was placed upon the legislative District committee. I brought with me these breezy western progressive ideas which some people in this vicinity do not appreciate fully, in my judgment, and I was placed upon a subcommittee with my friend, Mr. Cowherd, of Missouri, on the subject of taxation. I advanced some of of Missouri, on the subject of taxation. I advanced some of those ideas which I have now expressed, both as to the taxa-tion of personal property and real estate, and I was told, first, and I found afterwards, that I was up against, metaphorically speaking, a stone wall, and unless I changed my course my membership on the District Committee would fade away. And it. did. Hence the gentleman's statement that we have not attempted anything along that line may be correct as to himself, but it is not correct as to me, although I will admit that I have done or accomplished very little.

Mr. GOULDEN. I did not mean to insinuate for a minute

that the gentleman had not done his duty. I have watched his course very carefully here for all these years, and I know he has been one of our most active and progressive Members. regret, as he said, that he has lost some of the breeziness he had when he came here, although that is a natural result to all

of us who come here with those feelings.

Mr. DAVIS. Now, Mr. Chairman, those are matters about which, perhaps, I will have something to say when the bill is being read for amendment. But there are two or three matters I wish to speak about, on which I did not fully agree with the subcommittee.

Did time permit I would like to talk for an hour on the subject of the Public Library of the city of Washington. We have here one of the finest institutions, or the making of one of the finest institutions, in the United States. We have a library here that in 1904, the beginning in the new building, had a circulation of 278,178 volumes annually. In the last six or seven years it has almost trebled the circulation, until now it circulates 686,278 volumes. It shows that the people of Washington are anxious to obtain information. Of course I can not help but suggest, since the question of the breezy West has been spoken of, that the little city of Minneapolis, about the size of Washington, has a library with an annual circulation of 1,311,727 volumes. But I will say, Mr. Chairman, that is because the people of that section have seen fit to invest their money, to hire sufficient employees, to place substations and other places of contact with the people, that all so desiring can have access to this great blessing, even though the percentage of expense there is 2½ per cent annually.

Now, let me say that in 184 cities in the United States similar to Washington in population the average percentage of expense for libraries and their management is 1.6. That is the average percentage of them in all those 184 cities. Will it not surprise the good people of this country and, I think, surprise this Congress to know that the great and famous city of Washington, which has had the taxing power of its own citizens and the Federal Treasury also behind it, spends only eight-tenths of 1 per cent on its public library? That is but one-half of that which is spent by each of 184 cities of similar size throughout

the United States, North and South, East and West.

Mr. Chairman, when those figures were presented to me I felt like saying: "You ought to spend more money. You ought to give the people here an opportunity to read the 150,000 or 160,000 volumes contained within the walls of that library build-But, no; I discovered the force was not ample.

I discovered that instead of having what they ought to have and what other cities have they did not have one-half the necessary force employed. Hence my suggestion was—and I worked hard for it—that additional force be provided. I succeeded only in getting a compromise by which one or two additional assistants for this great and growing institution was added.

Now, I protest against this, because it is the lowest and poorest paid institution in the United States.

Mr. JOHNSON of South Carolina. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman yield?

Mr. DAVIS. I will.

Mr. JOHNSON of South Carolina. Has the gentleman taken, into consideration the fact that we have a great library right over here east of the Capitol, where there are millions of books, and that the people of the city of Washington have the advantage of it, and that large numbers of people in the Government service get books from the Congressional Library instead of the Public Library?

Mr. DAVIS. I have, and that was all thrashed out and gone over to a large extent in our subcommittee. But if the gentleman will ascertain the facts about that he will find that the Congressional Library is not open to the public except to a few to go in there. How many books can a resident of Washington get from that library? I can issue a favored permit to one or two friends to go there and get a book, to be returned in a little while; but do the masses of the people in Washington, the hard-working tollers, want to go there? Will they go up into that marble palace and sit down and read in the evening? That is the class of people I wanted to reach in the public library, and hundreds of them stand daily at the entrance of this public library and can not get in, and can not get the books because the help is insufficient even to wait upon them. That is the condition, and that is what I fought against.

I contend that the public library employees are the fewest in number and poorest paid in the city of Washington, although it is the best managed, considering the number of assistants, of any library in the United States. That condition ought to be changed. The expense of circulation in the Public Library here is from 10 to 11 cents. In other cities the lowest runs from 13

up to 19. That is the condition.

Some say, "Oh, it is because of the negro population here." My friends, the hearings upon this bill show that the negroes of the city of Washington are in many instances very anxious, indeed, not only for school privileges but for library privileges as well; and I think their desire for education compares well with the desire for education of the lower classes of people, so called, in other cities. But I shall not make an argument along that line, because I do not think it necessary.

The CHAIRMAN. The time of the gentleman from Minne-

sota has expired.

Mr. DAVIS. Mr. Chairman, I shall take 10 minutes more Now, Mr. Chairman, as to the salaries paid in this institution. It is well known by every Member here that the salary of an ordinary clerk, the low-priced clerk in the governmental departments, is \$720 per annum. What do you think of assistant librarians, men and women, engaged in library work and con-

sidered and classed as expert librarians, working for \$480 or

\$540 per year? It is a disgrace.
You ask, "Why do they not quit their places?" I can not tell you; but I will say that the statistics show that the personnel shifts in the public library in Washington-those who leave that employment and seek something better elsewhere-is very

great indeed. Some years the change of personnel amounts to as high as 53 per cent, and the last 10 years it has never been lower than 20 per cent. Think of the whole working force of an institution of this kind changing its personnel almost one-half every year because of low salaries and hard work. That is the condition.

Mr. Chairman, I desire to insert in the RECORD as part of my remarks a statement made by Theodore W. Noyes, the president of the board of trustees of this public library.

The CHAIRMAN. Without objection, the request is granted.

The Chair hears no objection. The statement is as follows:

The Chair nears no objection.

The statement is as follows:

Mr. Noyes. Mr. Chairman and gentlemen of the committee, in accordance with the custom, I present for the trustees some reasons why the commissioners' estimates concerning the library should be enacted in their entirety. After making my statement I will then make way for the librarian to explain the estimates in detail. We have asked this year, and the commissioners have approved in their estimates, not merely the slight annual percentage of increase that is customary, but a somewhat radical readjustment of the library appropriation, invoiving new positions and some increases of salary. We hope and believe that an examination of the law creating the library will convince you that the creation of these new positions is authorized by that law and that there are no limitations in the law which prevent Congress at the instance of this committee from fixing or changing salaries in accordance with its judgment; and I would like to have this law inserted in the record.

Mr. Page. We will be very glad to have it put in the record. Suppose you hand it to the stenographer.

Mr. Noyes. There are one or two sentences, however, I want to read now. In examining this law you will note that the only limitation in respect to salaries has reference to the trustees. Congress provides in regard to the board of trustees that they shall serve without compensation. Of course if any bill was reported from this committee proposing salaries for the trustees, it would conflict with existing law and would be subject to a point of order; but the law says nothing in the way of a limitation upon salaries or upon the fixing of salaries in regard to anyone else, and it says nothing in the way of limitation upon the number of assistants.

Mr. Page. Just at that point let me ask you this: In the original fixing of salaries—was that done by this committee?

Mr. Noves, Yes, sir. The provisions of law in regard to these appointments are as follows:

On the proper of the impartial enforcement of all raises and care and superintendence of said library, who shall be responsible to the board of trustees for the impartial enforcement of all raises and the proper of the control of the proper of the proper of said library, who shall be responsible to the board of trustees for the impartial enforcement of all raises and librarian shall appoint such assistants as the board shall deem necessary to the proper conduct of the library, and the law, have indicated the assistants which they deemed necessary for the proper conduct of the impartial control of the control of the same of the

one-fourth and fourteen and one-half millions. It is not known what division between maintenance and permanent improvement appropriations the commissioners have proposed in their estimates. In taking up this matter now before the convening of Congress and before the estimates have gone in, we do not know, naturally, what division between maintenance and permanent improvement appropriations the commissioners have proposed in their estimates. If the full amount is appropriated and it is distributed between maintenance expenses and permanent improvements in the same ratio as in 1910, there would be for maintenance considerably over \$10,000,000. Now, should the library appropriations be made to measure up to the average library expenditures of American cities—that is, should they be made 1.6 per cent of the total—there would be made available for the library work in 1915 over \$160,000. The trustees' estimate of about \$98,000 as needed for 1915 would be at the most 0.98 per cent of the total expenditure as against an average of 1.6 per cent in all other American cities. If the commissioners' estimate of about \$90,000 for the library were appropriated, it would be 0.9 per cent of the total expenditure, or a little over one-half of the American average or the average in all American municipalities. Thus, if the commissioners' estimates for 1915 were approved and appropriated in full, Washington's library expenditure would full far short of being as large a percentage of the total municipal expenditures as that of the average American city.

But the library maintenance is shown to be inadequate not only by comparisons from every conceivable angle with library expenditures in other American cities, but by the evidences of overwork and underpay supplied by the library itself.

The original library appropriations were slowly and inadequately made. Starting on a cramped basis, the increases in maintenance provision have been virtually at a standstill, suffering practical paralysis. As a result of this extraordinary increas

overwork and underpay the library force has suffered a constant shifting in personnal, losing by resignations 53 per cent of its entire force in the fiscal year 1907, 25 per cent in 1910, 33 per cent in 1912, and 25 per cent in 1904, 35 per cent in 1912, and 25 per cent in 1904, the first full year in which the present the name years from 1904, the first full year in which the present central building was occupied, the congressional appropriations for the library have increased 71 per cent and the total library expenditures 59 per cent; but in the corresponding period the book stock has increased in volumes 147 per cent. The library has grown in these nine years from 64,473 volumes to 150,263 volumes; and in volumes circulated the means of the library has grown in these nine years from 64,473 volumes to 150,263 volumes; and in volumes circulated, the meansure of the library's activity and usefulness, from 7 the control of the control of the volume in the years from 64,473 volumes to 150,263 volumes; and in volumes in the part of the volumes of the volume in the years there has been not only this wonderful increase in increase of maintenance and development provision at all. During these nine years there has been not only this wonderful increase in the quantity of library work, but as notable an improvement in its quality. The fiction percentage of the books circulated has been decreased, for example, from 84 per cut to 55 per cent. This centage of the first part of the community of the provision of the cost of the provision of the cost per volume. The public Library has been conducted both economically and other paraches of practical instruction and mental broadening and uplift.

The Public Library has been conducted both economically and officiently. Its scanty resources have not been permitted to paralyze or cripple its useful activities. It has done well for the community or the provision of the 20 cities of Washington's class. The economically and or cripple its useful activities, it has done well for the c

teachers who come for expert aid and guidance. Almost one-third of the library's home circulation of books is composed of juvenile literature. All the work of schools has been built up since 1904. From a stock of 6,000 volumes more than 76,000 volumes were circulated into homes from 82 public-school buildings. Semiweekly deliveries of requested books were made to the seven high schools. In 1904 the lecture halls and study rooms of the library were practically mused. Last year 23 organizations held 68 public meetings with lectures in the assembly room, with an attendance of 7,158 auditors, and 18 small organizations held 140 meetings in the study rooms. Such meetings are all held for study purposes.

The Takoma Park branch library has been erected and duplicates in miniature the work of the main library. In furtherance of the study and extension work of the library, it publishes monthly a four-page builletin, listing new books added. It issues a monthly educational bulletin to bring library resources to the attention of teachers; it issues a monthly social service bulletin in the interest of social workers; it publishes from time to time in pamphlet form the reference list of books needed in connection with lecture courses; it prepares numerous brief multigraph lists on divers subjects for groups of readers and thousands of reference lists for individual students. The library has collected about 20,000 mounted pictures, which in this age of visual instruction have large use, as is attested by the fact that 72,450 pictures were borrowed for school or home use last year. The foregoing is but an incomplete summary of some of the library's activities the trend of which is all in the direction of making it, in fact, a true "university of the people."

Should so important and valuable a branch of the local educational system be starved and stunted? The public library is active, efficient, useful; worthy of public consideration and support: worthy not only of protection against crippling, but of liberal development.

B

SALARY OF LIBRARIAN.

Mr. Page. You ask, Mr. Noyes, that the salary of the librarian be increased from \$3.500 to \$4.500?

Mr. Noyes, Yes, sir. The suggestion of inadequate compensation in our library force crops out here, there, and everywhere, from the charwomen to the librarian. The charwomen receive \$180 per year, against \$240 per year everywhere else. Many assistants who are trained librarians are paid \$480 and \$540 per year, when the minimum pay for merely clerical work in the departments is \$720. The librarian originally received \$2.500 and is now paid \$3,500 per year for labors which are compensated in other libraries of approximately the same size and usefulness as that of Washington by an annual salary of \$5,000 or more. For instance, in Cincinnati the salary is \$5,500; in Cleveland it is \$5,500; in Newark it is \$6,000; Pittsburgh, \$6,000; in Kansas City it is \$5,000; in Springfield, Mass., it is \$5,000; in \$6,000. The trustees have for several years been recommending the increase of the salary of our progressive and efficient librarian from \$3,500 to \$5,000. They made that estimate this year, but the commissioners, in the necessary pruning of the library estimates to bring the total estimates within the estimated revenue, have recommended that the librarian's salary be fixed at \$4,500.

Mr. GOULDEN. Will my friend from Minnesota yield?

Mr. GOULDEN. Will my friend from Minnesota yield?

Mr. DAVIS. Yes.
Mr. GOULDEN. Who is responsible for this condition of low

salaries and the constant change in the personnel?

Mr. DAVIS. I will say that it is probably because the Appropriations Committee, who make up the bill, have not heretofore considered it of sufficient importance. The pressure of other matters connected with the District was stronger than the pressure for that, and hence that has been neglected.

Mr. GOULDEN. Does not the gentleman think that is rather

a poor place to economize?

Mr. DAVIS. I think it is the poorest-absolutely the poorest. I should like to make a speech on the conservation of our natural resources, the greatest of which is our boys and girls. Here you neglect to conserve them and to give them facilities for the proper growth of their minds.

Mr. Chairman, the juvenile court is another item. My friend and colleague [Mr. Hinebaugh] explained it fully. Every year we have between 400 and 500 probationers in that court. Last year, with those on hand at the beginning of the year and those operated on, so to speak, the number ran up to 1,000 or more, and only the chief, assistant chief, and one probation officer to care for all these children. The result was that when Judge Latimer came on the bench a short time ago he was compelled to and did discharge over one-half of those under probation, simply because he did not have the officers to look after them. He simply selected those who were the best, as it were, and discharged them, until to-day, out of that entire number, the force at his command only warrants him in keeping 165 out of the 500 under observation. What a mockery; what a farce that is! Still that juvenile court enforces the husband and wife nonsupport law, and has collected in the last five or six years \$240,000 of money.

When one or two more probation officers are asked for they are denied. There should be at least five more—eight in all—to take care of 500 or 600 probationers. In the cities of Cleveland, Buffalo, and other places of similar size they have 12 or more probation officers.

Mr. PAYNE. How much money is saved by not having these

five people?

Mr. DAVIS. The judge of the municipal court wanted them to have \$1,000 a year each. There would perhaps be \$5,000

saved yearly by not having them. But the loss to those unfortunates and to the community is incalculable by not having

Mr. PAYNE. Half of that amount would aid considerably in

reducing the bonded indebtedness in the course of 12 months.

Mr. DAVIS. Mr. Chairman, I believe I shall reserve the right, when this bill is being read upon the floor, to ask for an increase of two or three of these probation officers in addition to those we have. Let me say, Mr. Chairman, that the necessity for this has impressed itself upon the people so strongly that that great, intelligent, philanthropic, and patriotic body of women, the Daughters of the American Revolution, who have a little fund at their command, have at their own expense provided one additional probation officer, who is down there now serving in the cause of humanity. Can we not afford to take care of those people ourselves when it costs so little? Must we look to organizations like the Daughters of the American Revolution to furnish that which the municipality is in duty bound to provide in order to properly care for this work? Such economy as that, Mr. Chairman, does not appeal to me, although by nature, when we are dealing with public funds, I must confess that I am considerable of an economist. We hold the funds of the public as a trustee, and we ought to spend them, not lavishly, but justly, properly, and judicially, in no case shirking our responsibilities.

Mr. Chairman, perhaps you will hear a complete and full statement from the gentleman from North Carolina [Mr. PAGE], the chairman of the committee; and I want to say right now that my association with him has been of the most friendly character, and I appreciate his ability and integrity as highly as that of any man I ever met. I think if he had had his full way on this committee, perhaps some other slight changes would

have been made, but he did not.

Mr. Chairman, I desire to insert as part of my remarks a communication from Judge J. Wilmer Latimer, of the juvenile

The CHAIRMAN. Without objection, the request is granted. The communication referred to is as follows:

JUVENILE COURT OF THE DISTRICT OF COLUMBIA, Washington, October 14, 1913.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA, Washington, D. C.

GENTLEMEN: In transmitting to you on October 3 the estimates for the juvenile court for the ensuing fiscal year, I stated that I should shortly forward a memorandum setting forth the reasons for the increases and additional clerks and probation officers. I have now to submit the following:

PROBATION OFFICE.

If the juvenile court is to do the important work for which it was created, it is imperative that the probation office be properly equipped and that sufficient trained officers be provided. At present there are but three probation officers, who must, in addition to their work with the children, keep all of the records of the office, and make the preliminary investigations in all of the children's cases. During the fiscal year ended June 30, 1913, there were approximately 450 children always on probation. Experience has everywhere demonstrated that one officer can not hope to get satisfactory results where the number under his supervision exceeds 50. In Louisville, Brooklyn, and Cleveland, for example, where the average number on probation is 400, they have 7, 8, and 12 probation officers, respectively; or, in Louisville, one probation officer to each 57 children; in Brooklyn, one to each 50 children; and in Cleveland, one to each 34 children. Our officers have each had about 150 children, and to this work could devote but a part of their time.

about 150 children, and to this work could devote but a part of their time.

It is probably unnecessary to present any argument in support of probation work with erring children. That splendid results can be obtained under proper conditions has been thoroughly demonstrated wherever those conditions exist.

In order to enable this court to look after the large number of children needing the care, supervision, and frequent counsel of the probation officer, it will be necessary to provide the additional officers requested in the estimates.

The chief probation officer should be a man of education, executive ability, and experience, and the services of such a person can not be long retained for less than the amount asked, \$2.500. This is the amount paid that officer in St. Louis, Cleveland, and Pittsburgh, while in New York and Chicago he receives \$3.000.

To provide an assistant chief probation officer, who must be a person of more ability than required of an ordinary probation officer, \$1,500 is asked.

In order that the probation officers may give their time to actual probation work rather than having to spend, as at present, so much

In order that the probation officers may give their time to actual probation work rather than having to spend, as at present, so much time in keeping up the details of the office, a clerk, at \$900, is requested.

DEPUTY CLERK.

An increase of \$300 in the salary of the deputy clerk is requested. This is a bonded officer who, in addition to his many other duties, is the financial clerk of the court. During the seven years since the court was established it has been the means of collecting \$240,930.95 under the nonsupport law, from delinquent husbands and fathers. These collections have increased from \$6,250.59 in 1907 to \$51,831.79 in 1913, thus greatly increasing the work of accounting by the deputy clerk.

STENOGRAPHER AND TYPEWRITER

One stenographer and typewriter, at \$900, is also requested. This clerical assistance is for the judge and to aid in keeping the records in the clerk's office absolutely necessary. No stenographer or typewriter is now provided by law.

The small increase submitted for the balliff and janitor ought to be made as a matter of justice to these officers, and would place their com-pensations at the same amount provided for those officers in the police

OTHER INCREASES.

The increase in the appropriation for furniture, fixtures, and equipments, and repairs to courthouse and grounds, from \$300 to \$600, and in the appropriation for miscellaneous expenses from \$1,000 to \$1,500 are made necessary by the tremendous increase in the volume of business of the court. Additional equipment must be provided in the clerk's office and in the probation office, including one adding machine and two new typewriters. There has been no increase in this appropriation since 1908, and the lack of necessary facilities has been a serious handicap in the work.

Because our estimates call for such a large increase in the appropriations for the court for the next fiscal year, and because I believe these increases are so necessary, I hope that the committees of Congress will afford me an opportunity to present the situation in person.

Respectfully,

J. W. Latimer, Judge.

J. W. LATIMER, Judge.

The CHAIRMAN. The gentleman has used 10 minutes. Mr. DAVIS. I will take about three minutes more. Chairman, it sounds large to say that there are 41 new employments and officers provided for in this bill. I ask the membership of this House to examine those 41 new employments and officers. Their salaries are small. You will see that they are \$600 people, \$480 people, and employees of that kind. I want these people employed, but it seems to me that the employment of only 41 new small employees for this great city

annually is virtually standing still.

It is virtually on the same theory that what we had three or four years ago, or last year, is sufficient. We have virtually left the personnel and the salaries with no increase, except in a few small instances-virtually left them as they were. In fact, the committee comes as near being a stand-pat committee as any committee I ever saw. I am not a standpatter in any sense of the word, and especially so with reference to the improvement of this city. Washington should go on and progress, and I know it is going to, but for the present I do not believe that it will progress as rapidly as it ought to if we are not a little more liberal. [Applause.] Mr. Chairman, how much time have I remaining?

The CHAIRMAN (Mr. SIMS). The gentleman has 19 minutes

remaining.

Mr. PAGE of North Carolina. Mr. Chairman, I think that every member of the subcommittee who has preceded me has been kind enough to make some pleasant reference to their association with the chairman, and as chairman of the subcommittee which prepared this bill for the House I can not let the occasion pass without saying that they have been a very

diligent subcommittee.

In my service of a little more than 10 years in the House of Representatives my observation has led me to the conclusion that every District of Columbia appropriation bill reported to this House has always been, from the standpoint of certain gentlemen who live in the city of Washington, the worst one. The bill that is reported from this subcommittee and now under consideration by the House, while it has been criticized by my colleague on the committee [Mr. Davis] because it did not carry a sufficient amount, and while he has termed that subcommittee as a committee of standpatters, I want to deny, so far as I am personally concerned, being a standpatter in this day of progressivism; but if there is anything on earth that a Democrat can afford to stand pat on, it is on the expenditures of Government money after 16 years of spending it by the Republican Party. [Applause on the Democratic side.]

The bill under consideration carries more money for the conduct of the government of the District of Columbia than any bill that has ever been reported to the House of Representatives from the Committee on Appropriations. It is true that the bill for the fiscal year 1912, as enacted into law, carried a greater amount of money than is now carried in this bill, but the excesses of that bill over this one were put on in another body. The bill as reported to the House was less than this bill.

The estimates, as submitted by the District Commissioners through the Treasury Department for appropriations for the conduct of the affairs of the District of Columbia, amounted to \$14,354,754.49, an amount almost \$2,000,000 in excess of the estimates submitted at any former period for the District

The bill as it is presented to the House carries in appropriations \$11,347,503.49. The excess in amount of the bill under consideration over the current bill is \$81,949.49. The net increase that is carried in the bill is more than covered by the increases that have been given to two single items.

The schoolhouses have come in for the largest amount of increase recommended over the current law. The law for 1914 carries, for the conduct of schools in the District of Columbia,

\$2,979,540. The present bill carries \$3,201,740, or an increase in appropriation for the conduct of the schools and the building of schoolhouses in the District of Columbia of \$222,200.

The other large increase over the current law occurs in the item for street improvement. The present law appropriates for improvement of the streets in the city of Washington \$67,800. The bill under consideration carries for that item \$110,700. You will readily see that the increases in these two items are largely in excess of the net increase in amount car-

ried by this bill over the former bill.

At this point, in connection with the appropriation for the schools of the District of Columbia, I want to digress briefly. We have appropriated in this bill for the construction of one new schoolhouse, to be situated in the extreme northern section of the city, where during the last half dozen years there has been a wonderful development. The subcommittee visited the site for this new school building. We found that by an appro-priation in the former bill the site had been acquired, and that there is a school already conducted in portable buildings on the site. We found that it has a densely populated section, and is removed a considerable distance from any other school building. We investigated as to the condition of the school buildings nearest to it, and discovered the fact that they were not only full but that they were crowded. Your committee was impressed that this community needed additional school facilities, and they have provided here for a building of 16 rooms, to cost \$132,000.

We also carry other new items in connection with the schools, for the purchase of small pieces of land adjoining the present school properties. I believe in every one of these instances the school building practically covers the school lot, and there was not an additional foot of ground upon which the children might play, except that they went into the streets or on the sidewalks. These buildings happen to be in sections of the city where the land values are low, and the ground can be purchased at a comparatively small price.

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. Yes. Mr. KELLEY of Michigan. Does the construction of the buildings which the gentleman has just described relieve the necessity for an addition to the Powell School, as asked for?

Mr. PAGE of North Carolina. No; I think not. It has no relationship whatever to the Powell School.

Mr. KELLEY of Michigan. I would like to ask the chairman if he visited the Powell School?

Mr. PAGE of North Carolina. No; the subcommittee did not. The chairman of that subcommittee did on another occasion visit that school.

Mr. KELLEY of Michigan. I went to see it for myself. was over there the other day, and I found it to be an old wooden structure, heated with stoves-a perfect fire trap.

Mr. PAGE of North Carolina. I think they do not need an addition to that Powell School. If the time comes when anything is to be done there, they will need a new school building.

In connection with the aggregate appropriation for the schools of the city of Washington there is only one item about which I have any quarrel, and only one toward which I shall direct any I am not convinced that a certain law placed upon the statute books for the District of Columbia is a proper law, nor do I think that any man, when he starts out, can tell where the end will be in complying with that law. I refer to the longevity pay of teachers. I have not found that it exists elsewhere, except in a very few municipalities.

Mr. MANN. It exists in the State of Illinois.

Mr. PAGE of North Carolina. Yes; I was going to make an exception. One who serves upon this subcommittee and comes in contact with the working of this law in actual practice will understand what I have in mind. In the estimates submitted to this committee it occurs time and time again that where this law has been in operation for a sufficient length of time for the teacher-who has been employed at a basic price, we will say, of \$600 with longevity increase under the law of \$25 per annum-to reach the maximum at \$750-and, in my judgment, it will continue for all time, as long as this law is on the statute books-there is a demand that this teacher, having reached the maximum in that grade, he or she be transferred to the next higher grade, with a longevity increase of \$50 per year, until the maximum of that grade is reached, and then to the next grade. It also appears that in these estimates those in the highest grade were asking in the estimates of the school board, submitted through the commission, that we change the basic salary and put it at the maximum of the highest, so that it might go on indefinitely, reaching as high as \$3,000 a year. The large increase of this \$222,000 that is written into the bill

is because of the increase of longevity pay, and I do believe there is not a mathematician in this House, and I doubt if there is one in Washington or elsewhere, who can tell with any degree of accuracy the amount of appropriations necessary to meet this obligation on the part of the District of Columbia. It is an absolutely uncertain amount, that has to be guessed at, and for one, in making appropriations of the people's money, I

do not believe at guessing at what you are doing.

As to the improvement of the streets, and the appropriations made for that purpose, any man who has served in this body for any length of time has not failed to hear repeatedly upon this floor in discussion of these appropriations the charge made that the Congress has discriminated against certain sections of the city in its street improvements and that it has been partial to one section of the city in the improvement of streets. I am not going to take the time at this juncture to refute that argument, but it can be refuted by the appropriations and the work that has been done in the past 20 years in the city of Washington. Based either on the taxable value or upon the population of these sections there has been a larger distribution of money for the improvement of streets in other sections of the city than there has been in the one great section, the northwest. But I am not here to defend the past. I am here merely to defend the items that are in this bill, and your committee in this street item, in submitting it to the House of Representatives, divided the city into five sections, the Georgetown section, the northwest section, the southwest section, the southeast section, and the northeast section. The current law carries for the Georgetown section appropriation for street improvement to the amount of \$6,500; the present bill for that section carries \$6,000, a decrease of \$500. The northwest, under the current law, has \$16,500 for street improvements; under the bill committed to the House at this time an appropriation of \$8,200 is recommended, a decrease of \$8,300 under the current law. In the southwest the current law carries an appropriation of \$6,300; the bill presented to this House carries for street improvements in that section of the city the sum of \$21,000, or an increase of \$14,700. In the southeast section the current law carries \$19,000; the bill before you carries \$45,500, or an increase of \$26,500. The northeast section under the present law has an appropriation of \$19,500, and the bill before you carries \$30,000, an increase of \$10,500.

As has been said by the various members of the subcommittee, who have mentioned these street improvements, these appropriations were recommended for the specific streets after your committee had personally viewed every one of them and inspected the need and were based upon their individual merits without regard to the section of the city in which they were located or in regard to the totals we might appropriate for their improve-

ment.

Mr. MANN. Will the gentleman yield? Mr. PAGE of North Carolina. I yield.

Mr. MANN. I have noticed the increases in the bill, of course, to which the gentleman has just referred, and the comparison with the current law. It seems like a very large increase in appropriations for streets in the southwest section, the southeast section, and northeast section. The southwest section increase is not very large. What are these streets to be im-

proved?

Mr. PAGE of North Carolina. These improvements in the southwest, one of them—speaking entirely from memory and without taking time to refer to the bill I think I can state it with approximate accuracy-is a street leading from Fourth Street SW. to the wharves of the steamboa; companies that has never been improved in any form. Another appropriation in that section was for a short space just south of the Capitol, where there formerly was a bridge over the old canal; the tearing down of the bridge and the filling in of the canal made necessary the paving of that space. Then there was a short street between Delaware and New Jersey Avenues in approximately the same section.

Mr. MANN. Really what I wanted to ask the gentleman for information was as to whether any of these streets that would be improved in these three sections of the city were streets where the Government had property or where there is Government construction for new Government buildings?

Mr. PAGE of North Carolina. I think there is not a single instance where there is Government property, existing or prospective, except possibly one quite near the location of the navy

Mr. MANN. Well, there is no street to be improved up by the new Bureau of Engraving and Printing?

Mr. PAGE of North Carolina. None in that locality at all.

Mr. MANN. There is need, by the way.

Mr. PAGE of North Carolina. It may have needed it, but that was not estimated for, and the committee did not take it under consideration.

Now, in the matter of new employment, referred to by the gentleman from Minnesota (Mr. Davis), I have not even taken the trouble to see how many there are. There are very few indeed, and only where, in the judgment of your subcommittee, this new employment was made necessary. In the executive office there is no increase of employment, but a slight increase of salary. Under the Excise Board there is one new messenger, this board having been created in the last appropriation bill and no appropriation for a messenger having been made. In the auditor's office we have increased the pay of one messenger from \$480 to \$600, and if gentlemen have the report before them they will find a number of places in these personal employments where the committee has increased the salary of men who re-ceived \$480 to \$600, and I want to say frankly that we did it upon the broad ground that \$480 was insufficient pay for any man holding a position under the Government. The simple reason was that unless he was more economical than we could imagine, even if he was a single man, he would find great difficulty in keeping body and soul together.

In the sinking-fund office, which is under the Treasurer of the

United States, we have omitted one clerk at \$1,600 and made an appropriation of \$500 that will be explained when that item is

reached in the bill.

In the free public library, that lies so near to the heart of my colleague, Mr. Davis, we have made more increases in personal employment than under any other department. We have increased the pay of the librarian from \$3,500 to \$4,000; we have increased the compensation of six charwomen to \$240 a year, and the following additional are recommended: One assistant to the children's librarian for work in the schools, \$900; one assistant at \$900, one assistant at \$720, one assistant at \$600, and one messenger at \$480. In other words, there are recommended in this bill five new employments in connection with the city

library.

I do not agree, except in small part, to the statements made by the gentleman from Minnesota [Mr. Davis] as to the needs of this institution. I believe that it needed what is in this bill or it would not have been written there. But he asked for very large increases, not only in employment, but in the salary of those now employed. And while I am ready to admit from the hearings submitted to our committee that this library is performing a very large service in the distribution of books among the reading public of the city of Washington, I do not admit that comparison of the city library in the city of Washington with the city library in any other city in the United States is a fair comparison, because in the city of Washington there exists the greatest library in the world to which the people of this city in large measure have access. In addition to that, there are library facilities in practically every governmental department in this city, to which the employees of that department have access. In addition to that, there is in every school practically in this District a library and librarian provided for, and a salary paid, in this bill, in order that books may be disseminated among the children who attend those public schools. These conditions do not exist in anything like the same degree in any other city than Washington, and I be-lieve that the appropriations in this bill for this institution are ample to meet all the needs of the present, at least, for the usefulness of that institution.

Mr. MANN. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. I yield.

Mr. MANN. Is the gentleman able to state how far books may be taken out of these libraries to which he has referred?

Mr. PAGE of North Carolina. So far as books in the Congressional Library are concerned, I presume every gentleman here by experience knows that Members of Congress can take them out, except that the circulation is limited. But I want to say to the gentleman that there is absolutely no limitation as to the reading room in the Congressional Library for any citizen of Washington who properly conducts himself.

Mr. MANN. Of course there is quite a limitation of space, as far as that is concerned, and other limitations. But I ask for information. Of course you are referring to the Congressional Library in the main. I receive every week from that

institution six books.

Mr. PAGE of North Carolina. Does the gentleman read those

Mr. MANN. I have not failed for several years in doing it every week. But as to the libraries in the departments, how far are the people in those departments permitted to take the books out and take them home?

Mr. PAGE of North Carolina. I confess to the gentleman that I am not informed. I can not answer his question, and I shall not undertake to make any statement in that connection.

Your committee, in the preparation of this bill, tried to avoid a conflict with the rules of the House of Representatives. Personally I can not say that I am in accord with all the rules of the House of Representatives, but I believe in an observance of the law, whether it is the law of the House of Representatives or the law of the land, and unless there is a special reason for it, I do not believe in transgressing that law. In the estimates submitted to the Appropriation Committee, covered by this fourteen million and odd thousand dollars, there were a great many provisions, most of them referred to by the gentleman from Wyoming [Mr. Mondell] in his address before the committee a little while ago, that were purely and entirely legislative propositions, unauthorized by any law upon the statute books, and, under the law of the House of Representatives, your committee has not the authority to appropriate for any moneys that have not been previously authorized by law.

In addition to that, it might answer all that my friend from Wyoming said as to the remissness of this subcommittee in not providing for a great many of the things that he mentions, but not all of them. Possibly by some construction of the law it might have been held in order to have written into this bill an appropriation for a fish wharf, which seems to be so near to his heart, because there already exists in a small way a fish market in this locality. But I say to him frankly that I will not put off the failure to provide this institution on the grounds that I have just stated, but that your subcommittee felt there were not only other things in these estimates, and numerous other things, that suggested themselves to their minds that the city of Washington needed vastly more than to spend \$160,000 in the construction of a fish wharf on the extreme side of the

city to retail fish to people who live 3 miles away.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. I yield.

Mr. MONDELL. Of course the gentleman realizes that you

would have to put a fish wharf near the water?

Mr. PAGE of North Carolina. I think we have already one sufficiently near and of sufficient capacity and facilities for the

Mr. MONDELL. My attention was diverted for a moment, and I did not catch the first item that the gentleman referred to as having been mentioned by me, which he said was not authorized by the bill. What item was that?

Mr. PAGE of North Carolina. I did not say what had been mentioned by the gentleman, but I said that the omissions from this bill had been left out because they were not authorized by law.

Mr. MONDELL. That is not true, of course, with respect

to a considerable number.

Mr. PAGE of North Carolina. It is not true as to the fish market, and I make an exception as to that. I confess that

would be in order on this bill.

The gentleman speaks also of the bathing beach. I think under the recommendation of the last appropriation bill that item would have been in order. And I might as well in this place as in any other say that your subcommittee did not write into this bill an appropriation for these bathing beaches for the reason that after the bill was under consideration, in fact after that item had been passed, so far as the hearings were concerned, by the subcommittee preparing this bill—and I believe it is not violating any confidence to say that it commended itself to the individual members of that subcommitteethere came a report from an eminent authority in this city to the effect, in plain and unmistakable terms, that the construc-tion of the bathing beaches at the points designated by the Commissioners of the District of Columbia and the use of them by the citizens of Washington would be greatly detrimental to the public health; in other words, that the water was affected from the sewage of the city of Washington, and that to construct them there would be a great mistake,
Mr. MONDELL. Now will the gentleman yield, Mr. Chair-

Mr. PAGE of North Carolina. I yield.

Mr. MONDELL. Does the gentleman take real seriously that

report of Dr. Anderson?

Mr. PAGE of North Carolina. I will say to the gentleman that I took it this seriously: Here is a report made by a gentleman recognized in his profession as a man of eminent ability making these statements as to the condition of this water, and as one member of the subcommittee preparing this bill I was unwilling to assume the responsibility, not being a scientist myself, of flying in the face of that report. And I think the gentleman from Wyoming will admit that that is a sufficient reason for the action of the subcommittee in leaving out this appropriation

Mr. MONDELL. If the gentleman will accept the amendment of inserting, in lieu of the word "reason," the word "ex-

cuse," I do not know but that I would accept it.

Mr. PAGE of North Carolina. At this stage in the consideration of the bill I am not accepting any amendments. The op-

portunity will be offered later for that.

Now, as I was saying, there are a few items written into this bill, anxious as your subcommittee was not to write legislative provisions into it, which may be considered as subject to points of order. Conditions arise in the preparation of an appropriation bill which sometimes prompt the committee preparing it to insert such provisions. In this instance your subcommittee felt that we should submit a few items that might be subject to a point of order, and I want briefly to call attention to those.

In the first place, I want to say that in the construction of the bill in former years the appropriations for the purchase and maintenance of motor-driven vehicles had been scattered throughout under the heads of the various departments to which they belong. Your committee believed that it was in the interest of good legislation, and possible harmony in this House, to segregate all the passenger-carrying automobiles now in the possession of the District and place them in one paragraph, so that Members of the House could see at a glance the ownership

of those automobiles by the District.

And we went further than that. We felt that they ought to be put under the direct control of the Commissioners of the District of Columbia; so you will find, by reference to the report, that we have put all passenger vehicles under the direct control of the Commissioners of the District of Columbia. We have also placed a limit upon the price that may be paid for passenger automobiles for city service in the future. In addition to that, we have provided that every one of these automobiles in the service of the city of Washington shall be painted a uniform color. We have also provided that they shall be lettered with the words "city service," in letters not less than 6 inches high, placed in a conspicuous place upon the car, so that Members of Congress and anybody else may know what those cars are for when they see them passing through the streets.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. I yield. Mr. MANN. The gentleman has just stated, I believe, that this bill carries an appropriation for an automobile for the two citizen commissioners?

Mr. PAGE of North Carolina. I had not stated it, but I was just going to state it.

Mr. MANN. I thought probably the gentleman had included

I knew that the bill did include it.

Mr. PAGE of North Carolina. In this bill provision is made for the purchase of a new automobile, at a limit of cost not to exceed \$2,000, for the civilian Commissioners of the District of Columbia, for their joint use. They asked for two; the committee gives them one. I have no apology to make, so far as I am concerned, for writing that into this appropriation bill. the men who have been selected as Commissioners of the District of Columbia are to discharge the very onerous duties that are imposed upon them under the law, if they are to familiarize themselves with the city government, with all its activities, covering a very large territory for a city of its population, I, for one, am thoroughly convinced that they can not do it without the aid of this more rapid and modern means of transportation.

go further than that and say that if I were a Commissioner of the District of Columbia and should be denied this facility for performing the duties of that office, if I did not have from my own private means the ability to have one, I should immediately resign the office, for the reason that I believe no man can properly discharge the duties of that office without this

Mr. MANN. That would depend somewhat on how much you wanted the job, would it not?

Mr. PAGE of North Carolina. I think I would never want

it that badly.

Mr. MANN. I think the gentleman himself might not. Will the gentleman yield for another question there?

Mr. PAGE of North Carolina. Yes.

Mr. MANN. These commissioners now have a carriage apiece, have they not?

Mr. PAGE of North Carolina. They have a carriage apiece. Mr. MANN. Is that eliminated? Mr. PAGE of North Carolina. I think so. There may be some question as to whether the language of this bill does eliminate them, but I think it does.

Mr. MANN. It did not seem to me that it did, although I would not be very sure. They are maintained out of the contingent fund, are they not?

Mr. PAGE of North Carolina. They are maintained out of

the contingent fund.

Mr. MANN. Now the proposition is to give the two together an automobile.

Mr. PAGE of North Carolina. Yes.

Mr. MANN. Of course, we all know, as a matter of fact, while the law says they can only be used for official purpose it is considered an official purpose to go from the house of the commissioner to the office and return, and also an official purpose to view the city along with your wife, or have her do it when you are not along, without any extra expense probably to the Government.

I am not criticizing that part of it; but if you have only one automobile for the two, will one of them have a carriage, and will they draw lots for the automobile?

Mr. PAGE of North Carolina. That is for them to decide. Mr. MANN. Is it not for us to decide whether they shall have both?

Mr. PAGE of North Carolina. I think so. Certainly it is for the House of Representatives to decide whether they shall have one or none, or whether they shall have two, for that matter.

Mr. FOSTER. Will the gentleman yield?

Mr. PAGE of North Carolina. Yes

Mr. FOSTER. How many automobiles are now in official use in the District of Columbia?

Mr. PAGE of North Carolina. There are 11 passenger automobiles.

Mr. FOSTER. Are those automobiles in use constantly, or

could they be exchanged?

Mr. PAGE of North Carolina. We have written in a provision here giving the commissioners the right to exchange them between the officers of the District of Columbia.

Mr. FOSTER. Does that apply to their own offices?

Mr. PAGE of North Carolina. Yes; it applies to all passenger automobiles in use by officials of the District of Columbia.

Mr. FOSTER. Then they do not need any automobiles them-

selves outside of these 11?

Mr. PAGE of North Carolina. That is a question.

Mr. FOSTER. I am asking the gentleman.

Mr. PAGE of North Carolina. I think they do, because I think the 11 that they now have are in pretty constant use by the officials. If I did not think so I would not have recommended the purchase of an additional automobile.

Mr. FOSTER. I am trying to get the information from the gentleman, because I do not know.

Mr. DAVIS. Does not the bill provide that the fire department, the Board of Charities, and the police department shall have separate control of their own automobiles?

Mr. PAGE of North Carolina. Perhaps I ought to have said that this provision giving the commissioners control of the interchange of these vehicles does not apply to the police department, the fire department, or the Board of Charities, for reasons which, I think, will be obvious without going into a detailed explanation to the Members of the House.

I must hurry on, for my time is limited, and there are a few

other things I want to say to the House.

I would be glad if members of the committee would avail themselves of copies of this report and read for themselves these provisions that have been written into the bill, because I see that I shall not have the time to make the explanation in detail.

Mr. CLARK of Florida. Will the gentleman yield?

Mr. PAGE of North Carolina. I yield to the gentleman.

Mr. CLARK of Florida. Did the gentleman say that the Dis-

trict had 11 passenger automobiles?

Mr. PAGE of North Carolina. That is my understanding, s. They range all the way from a small two-seated run-

Mr. CLARK of Florida. To a touring car.

Mr. PAGE of North Carolina. To a seven-passenger touring car that was given to the engineer commissioner some years ago. Mr. CLARK of Florida. Have not all of these automobiles

Maryland and Virginia licenses?

Mr. PAGE of North Carolina. I confess I can not answer that question. That was asked before I came on the floor, and I have not noticed them particularly enough to say. I do not know. It may be or it may not be so.

Now, in conclusion I want to call attention, last of all, to a limitation that is placed in this bill and designated as section 8, one that has been very greatly criticized by the newspapers in the city of Washington since last Monday afternoon and that I

has brought under severe criticism all of us who are responsible. for it; one that in my judgment means a great deal as to future adjustment. This limitation, which has been written by your committee at this time, is of particular importance because of the agitation in the House of Representatives and in the city of Washington over the participation of expense and the mainte-nance of the District government. Your committee, after very careful consideration, having before them estimates in the amount of more than \$14,000,000 and in their judgment the necessity for the expenditure of a little more than \$11,000,000, after very careful consideration of this question of what was going to be done with this money not appropriated, wrote into the bill section 8, which reads:

SEC. 8. That to the extent the revenues of the District of Columbia for the fiscal year 1915 shall exceed the proportionate part of the appropriations made in this or any other act and chargeable against said revenues; the same shall be covered into the Treasury of the United States to the credit of "Miscellaneous receipts."

Mr. MADDEN. That will be subject to a point of order, will it not?

Mr. PAGE of North Carolina. That will remain to be seen; that is a matter of opinion at this stage of the discussion. I think there has been, and there is, in the House of Representatives a good deal of misapprehension of the facts as to the relationship between the National Government and the government of the District of Columbia. There is very active agitation at the present time for the abolition of what is known as the halfand-half participation in the expense under a law that was written on the statute book in 1878; and which has been in existence from that time until now.

The legislative history leading up to the enactment of the act of 1878 is not only interesting, but, I think at this juneture, instructive. The District of Columbia found itself in the early seventies under a Territorial form of government and very largely in debt. There was a condition of appropriations, as far as the National Government was concerned, that was absolutely chaotic. The Congress of the United States appropriated and paid certain proportions of certain expenses in certain departments in the city of Washington. No one knew just what, and there was absolutely no system as to the participation of the National Government in those expenses. The charter of the city of Washington and the charter of the city of Georgetown were repealed, and Congress believed that it was the duty of Congress to supervise and govern and direct the activities of this particular territory, exempting it from other territory or States, and it appointed a joint commission, the chairman of which was the late Senator Allison, of Iowa. That commission made an exhaustive report, comprising three large volumes, and they concluded at that time that a fair and equitable division of the expenses of the city of Washington was half to be borne by the National Treasury and half to be assessed upon the property of the District of Columbia.

It may have been at that time a fair division. I am one of those who believe that that time has passed, and while I am here to say, and do say emphatically, that I do not accept the statements made by the gentleman a few days ago in the discussion of this bill, that this city ought to be turned over to govern itself, I think that no greater mistake could be made than for the Congress of the United States to relinquish the absolute control of this territory, in which is situated its National Capital. [Applause.]

I believe that the time has come when there is no longer a necessity that the National Government should contribute onehalf to the support of this great city. I believe there should be a modification and a rewriting of the law in this respect. I do not believe that the man lives who can work out upon a fair,

equitable division a system upon any percentage basis.

I think that is not a mathematical possibility, because conditions vary from year to year, and the obligations of the Government to this National Capital may and do vary from year to year. I believe that the policy that is written in this section 8 will meet the present conditions and the conditions for all future time. The Congress of the United States having control over this territory will have control over the tax rate; it can absolutely control, and if the tax rate is too low, the fault is with the Congress of the United States more than anybody else, and they can remedy it. They have absolute control over the machinery of the assessment in the District of Columbia.

There is a complaint made, and I share in it, that there is a large amount of property in the city of Washington that escapes taxation. I believe we ought to write into the law machinery that will tax capital stocks and bonds, bank capital, and other personal property of that character that exists in the city of Washington. But that is a matter for Congress to take care of, Mr. MADDEN. Will the gentleman yield?

Mr. PAGE of North Carolina. Certainly.

Mr. MADDEN. The banks do now pay a tax, do they not?
Mr. PAGE of North Carolina. They pay a tax on the capital

stock, but they do not pay on mortgages or bonds.

Mr. MADDEN. They pay 4 per cent on the earnings, do they

Mr. PAGE of North Carolina. Something like that; I do not remember the exact figures.

But I was going to say there is an obligation, and I think no greater calamity could befall the city of Washington and no greater calamity could befall the United States Government, since this is its seat of government and it has here the buildings and the property owned by the Government for the conduct of its business, than to relinquish its rights to the control of this territory, originally laid out and designated in the Constitution as being under the control of the Congress of the United States. The effect of the provision in this bill has had various interpretations placed upon it. The bill carries appropriations of something over \$11,000,000, and we find by an analysis of the estimates and hearings that the available revenues of the District of Columbia for the fiscal year 1915 amount to a little more than The appropriations carried in the bill, including the water department and the playgrounds, which are paid out of the District of Columbia, amount to \$11,347,503, and as the result of this proviso the revenues of the District of Columbia as collected, in the amount of seven million and odd dollars, will be expended for the benefits of the city of Washington, and they will be supplemented from the Treasury of the United States to the amount of \$4,172,726 to meet the appropriations made in That is the interpretation and the meaning of section 8 as written into the bill. Your committee believes it is fair not only for this fiscal year, but that this principle, once established, will be fair through all of the years in all appropriations for the District of Columbia. It will not satisfy the District of Columbia.

The truth is that if you were to write into the law an appropriation by which the National Government should pay \$2 for every dollar that was raised in taxes in the District of Columbia, there are citizens in the District who would still be dissatisfied and who would howl. There are certain associations that would hold meetings of indignation and condemnation, and they would talk about repudiation and all that sort of thing on the part of Congress. It makes me a little bit tired, as one Member of Congress, that certain people in the city of Washington are continually harping about the organic act, and any departure from an act by the party who made it is repudiation. There is nothing more sacred in the act of 1878 touching the appropriations for the District of Columbia than there is in any other act that is written upon the statute books by the Congress of the United States. It might have been repealed the next day or the next year or now without any repudiation on the part of Congress. [Applause.]

Mr. SIMS. Mr. Chairman, will the gentleman yield?

Mr. SIMS. Mr. Chairman, will the gentleman yield? Mr. PAGE of North Carolina. I yield for a question. Mr. SIMS. Did the District by reason of the so-called organic

Mr. SIMS. Did the District by reason of the so-called organic act suffer any loss which if the act were now repealed would be irreparable to it?

Mr. PAGE of North Carolina. I think not. The truth is, I meant to say that I was impressed in reading the debate and legislative history leading up to the enactment of the law of 1878 that that commission appointed, and the Congress in enacting into law its recommendation, did it as much to protect the Treasury of the United States as to help the city of Washington.

I can not close without some reference to some of the things that have appeared in some of the Washington rewspapers within the last few days. Their criticism of this subcommittee because of this section 8, and stating that we were repudiating and taking the money that was paid by the taxpayers of the District and putting it into the Treasury of the United States, is a misinterpretation, and in my judgment a willful misinterpretation of the language of the section.

Some associations have met and passed resolutions, and they are composed of people who are absolutely dependent upon the Congress of the United States for what they get. Yet they hold meetings and spend their time in villification of Members of this body. I notice that there was a meeting, as reported in a newspaper, a night or two ago of the Historical Society of the City of Washington. If there be any people in this District who ought to know and who ought to feel that the National Government has not only done its duty but most surely more by the District of Columbia, it ought to be these people who belong to the historical society. If they had looked up the incidents of the past, they would have convinced themselves that this was true. But I want to call attention to a few things that were said at this meeting. One of those who addressed it was a good

woman—I am not going to criticize her personally or call her name. She wound up her criticism of this particular paragraph and of the subcommittee that has reported the bill to the House of Representatives by saying: "It is up to us women of the District to defend our men." God save the mark! [Laughter.]

There was another speaker at that meeting, and, since he was a man, I will put his name into the Record. I do not know him and would not know him from Adam. His name is Edgar Robinson. In the course of his remarks, as reported, quite briefly, he says that it appears to be the policy of the men on the Capitol Hill to cut the District's throat, metaphorically speaking, every chance they get. He said:

It is a shame that we citizens of dear old Washington have to be badgered and insulted by these so-called statesmen from the West, many of whom never saw a city before in their lives.

[Laughter.]

I commend that statement to my colleague on the subcom-

mittee, the gentleman from Minnesota [Mr. Davis].

How the citizens of the District of Columbia expect to be treated any better than they are in the face of constant criticism of the men who hold the purse strings for them is more than I can conceive. So far as I am concerned, as I have said before, I recognize that there is a national obligation here. I believe that we ought to discharge it fearlessly and in full measure. I believe that the constituency of every man on this floor will stand for that principle. I believe that there is not in all this Government a constituency that does not take and will not take just pride in the proper maintenance of its National Capital. I wish that it were possible that every boy who lives in the congressional district I represent might come to this National Capital; I wish that he might have an opportunity to see this magnificent building that is his as well as ours; I wish that he might look at the other magnificent structures and the beautiful grounds maintained here at the expense of his Government. I believe that it would broaden his patriotism and make him a better citizen; and I am willing and he is willing and his father is willing to contribute in just proportion to the maintenance of our Capital City. [Applause.]

Mr. Chairman, will the gentleman from Minnesota now use

his time?

Mr. DAVIS. Mr. Chairman, I yield the remainder of my time to the gentleman from Illinois [Mr. Mann].

The CHAIRMAN. The gentleman from Illinois is recognized for 19 minutes.

Mr. DAVIS. How much has the other side left, Mr. Chair-

The CHAIRMAN. Thirty minutes.

Mr. MANN. Mr. Chairman, whatever criticism may have been indulged in by citizens of Washington concerning the distinguished gentleman from North Carolina [Mr. Page], the chairman of the subcommittee of the Committee on Appropriations. I feel that every Member of this House, at least, who has the pleasure of his acquaintance, and certainly every old Member of the House, has absolute confidence in the patriotism, the integrity, and the desire to do right of that gentleman. have noted that the gentleman himself seems to take a little exception to the criticism of the subcommittee by citizens of Washington, and I take it that in view of the attitude of the President concerning the Carabao dinner we will soon be reduced to the point where no man can either criticize or smile without asking the consent of the governing authorities first. [Laughter and applause on the Republican side.] Notwithstanding my personal obligation to the gentleman from North Carolina, I very greatly regret that owing to the superior numbers on the other side of the House who would follow the gentleman in any motion he might make, I will not be permitted at this time to say to the House that which I desire to say at the earliest opportunity I shall have concerning the condition of affairs in the country. I do not blame the Democratic Party for refusing to give a liberal latitude in the debate in order that the conditions which come may be presented to the country. do not wish the matter discussed, but, after all, Mr. Chairman. throughout the country to-day wherever men are congregated there is that quiet discussion going on now which when cold weather strikes the country, so fortunately held off so far, will end in a roar and a howl that will even penetrate the ears of the deaf statesmen on the other side of the aisle.

Mr. Chairman, I desire to take a few moments in discussing the District proposition. Early in November the Washington Post published an article, evidently inspired by the distinguished commissioners, purporting to state what great work the new District Commissioners had already performed and what they were to perform in the future. "Big things the new commissioners, backed by the President, have done to benefit the National Capital. Reforms accomplished and proposed which

presage great betterments." Then follows a list of things accomplished and proposed. I do not think any of them were accomplished or have been accomplished yet. The new commissioners, backed by the President, furnished this information to the press for publication in the District of Columbia. And what are these great things accomplished and proposed? "Advocated are these great things accomplished and proposed? "Advocated the harnessing of Great Falls for light and power." I have not found anything on the subject in the District appropriation bill. "Made provision for a municipal hospital and one for inebriates." Made provision for these, but it has not penetrated the minds of the subcommittee on appropriations yet, because there is nothing carried in this appropriation bill for this purpose. "Planned for many public comfort stations, new streets, bridges, lighting and parking improvements." They have not discovered it in the Committee on Appropriations yet. "Arranged for a model fish wharf and fish market." They have not discovered that in the Committee on Appropriations yet. "Drawn plans for a model reformatory at Occoquan." I do not think that is carried in the appropriation bill. "Asked for a larger appropriation for public playgrounds than any previous board."

Asked for it. The new commissioners, backed by the President, asked for it, and they will ask for it next year if they are still in office; but after that, if they ask for it, they will probably get it, because there will be a different control in this body. [Applause on the Republican side.] "Designed a new municipal lodging house." There is nothing in this bill concerning a new municipal lodging house, but the need for one will soon be apparent. Municipal lodging houses will soon be in demand all over the country. I can remember 20 years ago, when I was a member of the city council of Chicago, that the city hall was opened at night in order that the unemployed might lie on the marble floor in order to secure a little rest and, perchance, a little sleep.

I never have thought that it was possible in this great Nation for that condition to again be brought about, even by Democratic legislation. I thought the country had become too prosperous, too great, with too many industries well established, for even bad legislation or the threats of worse to reduce the country to the position where again men would be seeking opportunity to lie on the floors of public buildings for rest and sleep. And yet that is the condition to-day in my own town. And if the advices which come to me from all parts of the country are anywhere near the truth, that condition is largely prevailing all over the land. Here is an article in the Chicago Tribune of

December 16:

ARMY OF IDLE IN CITY GROWS—THOUSANDS ARE FED BY CHARITY AND MUNICIPALITY SHELTERS 1,200 A NIGHT—WORDS OF CHEER GIVEN—IMMANUEL CHURCH SUPPLEMENTS GOOD BREAKFAST WITH ENCOURAGE-

MENT.
The city's problem of housing and feeding homeless men grows greater. Yesterday the Rev. Johnston Myers gave 1,400 men breakfast at the Immanuel Baptist Church. Last night 1,200 men were sheltered by the city and over 1,000 stood in the bread line on Meridian Street.

Half a loaf of fresh bread, with butter, and two cups of hot coffee, with milk and sugar, were given to every man at the Immanuel Church, 2320 Michigan Avenue, and the Rev. Mr. Myers gave them a word of encouragement.

"They didn't have to stay for my talk," said the doctor, "but about 600 did. I talked on courage. I told them to go forth and look for work, and if they didn't find it, to come back to-morrow morning.

RECORD FOR NUMBER IDLE.

RECORD FOR NUMBER IDLE.

"This is the largest number we have ever had here, and it is stupendous for this time of the year."

Lodgers at the municipal lodging house have been getting "mulligan," with coffee and bread. Last night 100 gallons were passed outabout a thousand small bowls full.

A new organization, the Volunteer Slum Workers, held forth on West Madison Street last night, with drum and tambourine, and invited the homeless to their mission at 211 South Desplaines Street.

"Gen." Hattle Morgan asked for funds, while the "colonel," the "captain," and several "lieutenants" sang hymns. It was hard work. She begged for nickels or pennies.

SCANT FUNDS FOR WORK.

"We feed about 50 or 60 men at our mission every day," she said.
"We give them soup, bread, and coffee when we can get the money.
We haven't made a dollar all night."
Meantime work is going on in the building at Washington and Desplaines Streets. All but the electricians are done. The top floor of the Otis Building, at 913 Jackson Boulevard, will also be thrown open when a fire escape has been built. It will take about \$550 and necessitate a council order, according to Health Commissioner Young.

At a meeting of the unemployed in Hod Carriers' Hall it was voted that the agitation committee call upon the mayor and the city council to demand work at the full union rate of wages, and to hold parades to demonstrate the urgency.

Just a few headlines. One from the Chicago Tribune of December 7, as follows:

The mayor revives the committee on unemployed.

He is a distinguished Democratic mayor, and a very able one. It savs:

Mayor Harrison yesterday revived the committee on unemployed, giving it the same advisory powers it formerly had.

In the Tribune of next day, December 8, occurs the following: McCormick offers county building to house idle men.—Board to-day passes on tender of ninth floor to city as bed space for COO.—Labor heads ready to aid.—Chicago federation thinks Government embarrassed by condition.—Big river improvement urged.

Or something somewhere, provided that men may work who are willing to work, rather than men who are willing to work shall starve while the President is investigating the fun of a Carabao dinner.

From the Chicago Tribune of December 10, the committee on unemployed, consisting mainly of distinguished Democrats, and none of them distinguished Republicans, adopted resolu-

RESOLUTIONS URGE RELIEF.

resolutions read:

The resolutions read:

1. The committee on unemployment is convinced that a very large number of persons in Chicago are at present out of work—a number so large as to constitute a grave industrial and social cituation.

2. Temporary relief, such as food and shelter, should be at once undertaken for the really needy cases. Such relief should be undertaken by the municipality or through existing relief agencies.

3. The committee is further convinced that a large proportion of the unemployed are worthy and deserving persons, who desire work rather than charity.

4. Therefore the committee recommends that the city take immediate steps to consider the feasibility of establishing some form of municipal employment for as many of the unemployed as possible at a fair wage, preference to be given to those having families dependent upon them.

It says "preference being given to those having families de-pendent upon them." These men with wives and children, willing to work, who were at work three months ago, are now seeking the opportunity in this great land of ours, where the natural resources are beyond contemplation and where the possibilities of consumption by our people can never be outrun-these men with families, with wives and children, without food, without shelter, seeking an opportunity for employment, which you on that side of the House have taken away from them by closing up the establishments in this country in order that you may buy goods in foreign lands. [Applause on the Republican side.]

This morning's paper advertises that the Navy Department, which had just let contracts for some supplies to be purchased from other countries, was now expecting to receive bids for new supplies to be furnished from abroad, while these fathers, the heads of families, are walking the streets of Chicago and every other large city in the land hoping, praying, for a chance to earn an honest dollar with the hard labor of the arm.

I will now quote from the Chicago Tribune of December 11, 1913. I am giving extracts mainly with reference to one paper day by day, not because the information is peculiar, but because the consecutive statement gives some idea of the progress of the conditions. The Chicago Tribune of December 11 bears these headlines:

City opens new hotel for idle—Homeless men given beds at once in building to be used free by municipality.

Somebody furnished the building. I read further:

Order two job bureaus—Officials put light and water in lodging house too fast for permits.

The city of Chicago last night actively took up a solution of the problem of caring for the unemployed by opening an auxiliary to the Union Street municipal lodging house at 913 Jackson Boulevard.

First, they opened the municipal lodging house, and now they are beginning to add the auxiliaries to it. It will not be long until more and more auxiliaries are needed.

And what is your response to this? What are you doing to relieve these conditions in the country? Nothing. You are threatening more trouble for them.

Mr. Chairman, I never have been and never expect to be a calamity howler on the floor of this House or elsewhere. have preserved silence here in regard to the conditions in the hope that the cloud might pass over. No one desires to see the country lie prostrate. No political advantage will ever accrue to the man who helps to contribute to disaster. We hope that business will revive. But it were idle to say that we dare not speak about a condition in the country which everybody knows

about and concerning which we ought to take some steps.

The President of the country could do to-day much toward reviving confidence, if he would. That side of the House could do much toward reviving confidence, if they would. But they are pursuing the fatuous policy which they have talked about on the stunn for so many years regardless of the effect year.

on the stump for so many years, regardless of its effect upon the body politic or the people of the country.

I do not believe that we are justified in keeping entire silence upon this situation. I hope, with you, that the present discouraging conditions may change. But I think it is fair to the country that we should call attention to these matters, and I intend to do so from time to time, and much more fully if I can get the time.

Mr. LEVY. Mr. Chairman, will the gentleman allow me an interruption? Does not the gentleman think that this is on account of the debatable uncertainties of the Sherman antitrust law and the dilatory conduct of the Interstate Commerce Com-

Mr. MANN. Well, the country was very prosperous for a great many years while the Republicans were in control, and the Sherman antitrust law was on the statute book and the Interstate Commerce Commission was in existence, and no one discovered how bad they were until the gentleman's party got into control and commenced to legislate—contrary to the gentleman's desires, of course. He does not agree with anything that his party does, I believe. [Laughter on the Republican side.]

Mr. LEVY. Oh, no; I do agree with my party, but I think that the Sherman law as now constituted is unreasonable and uncertain. I think the Interstate Commerce Commission was

and is dilatory. They take two years for a decision.

Mr. MANN. It will take a great many years more than two

for the gentleman to have his way about any of them.

Mr. REILLY of Connecticut. Mr. Chairman, will the gentleman vield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Connecticut?

Mr. MANN. I do.

Mr. REILLY of Connecticut. The gentleman read a few moments ago from newspaper extracts. The gentleman did not say what year that was. Was it 1907 or 1913?

Mr. MANN. It was 1913; and if the gentleman knew enough to know anything about it, he would know that it was not so in 1907

Mr. REILLY of Connecticut. It was in my part of the

Mr. MANN. It was not so in any part of the country in 1907. The soup houses were not open in 1907. The free lodging houses were not open in 1907. The conditions were bad enough in 1907, God knows. But there was no bread line in 1907; there were no soup houses open; there were no free lodging houses open; there were no municipal buildings turned over in order that men might sleep on the cold marble floor. [Applause on the Repub-

Mr. REILLY of Connecticut. Mr. Chairman, will the gentleman yield further?

Mr. MANN. Certainly. Mr. REILLY of Connecticut. The gentleman attributes this to the tariff bill?

Mr. MANN. Oh, I attribute it partly to the tariff bill, in part to the threat of the political control of banking and currency. in part to other threats, and to a general lack of capacity on the part of your party to govern the country. [Applause on the Republican side.]

Mr. REILLY of Connecticut. Mr. Chairman, just a word. The people had great faith in our capacity and put us in power

and put you out.

Mr. MANN. Oh, yes; but they have not that confidence now. [Laughter and applause on the Republican side.]

Mr. REILLY of Connecticut. That remains to be proven.

Mr. MANN. It is already proven.

Mr. REILLY of Connecticut. So far as the tariff is concerned I want to say this: The condition of business in the section where I live and in my own city is just about the same as it was a year ago; no better and no worse. The silver industry is a great industry in my own city, and the tariff bill increases the duty from 45 to 50 per cent in that particular industry. We have had no material change there.

Mr. MANN. Fortunately, then, the gentleman has not lost anything by having the tariff reduced, but where it was reduced the country is killed. [Derisive laughter on the Democratic

side. 1

Mr. PAGE of North Carolina. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Thirty minutes.

Mr. PAGE of North Carolina. I yield 10 minutes to the gentleman from Missouri [Mr. CLARK]. [Applause.]

Mr. CLARK of Missouri. Mr. Chairman, if a Member without any reputation or standing in the country had made the statements and insinuations and charges which the gentleman from Illinois [Mr. Mann] has made on three separate occasions recently, I would not have paid the slightest attention to them. [Applause on the Democratic side.] But he is in the limelight constantly and people observe what he says; they listen to it; and it is to be regretted exceedingly that he made the threat he made on two separate occasions this week and that he has made the speech he made to-day. It will, I fear, do considerable damage in the country.

I think it is an incontestable statement that every good citizen of this Republic-Democrat, Republican, Bull Mooser, Prohibitionist, Socialist, or what not-wants to see continued prosperity, because we all have a stake in the Republic, especially those of us who have wives and children. Lord Bacon, who possessed the most exquisite intellect ever housed in a human skull, said that "He that hath wife and children hath given hostages to fortune."

I dislike exceedingly to say it, but it seems to me, touching the declarations of the gentleman from Illinois and several other more or less eminent statesmen made in the last week or so as to the imminence of a panic, that the wish is father to the

thought. [Applause on the Democratic side.]

One swallow does not make a summer; but when you find the eminent Senator from New York [Mr. Root], the eminent ex-Speaker of this House, Mr. Cannon, the eminent ex-governor of Missouri, Mr. Hadley, the eminent gentleman from Illi-nois [Mr. Mann], and the eminent chairman of the Republican national committee, Mr. Hilles, all giving out the same kind of a statement in less than a week, all on the same identical line, I do not believe I exceed the bounds of propriety or of fact when I state that it appears like a Republican conspiracy against the prosperity of the country. [Applause on the Democratic side.] Of course there are some minor ones who chip in, but they do not count. [Laughter.] It is to be hoped that their

predictions of disaster to the country will fail.

The greatest stump debates that ever took place on the face of the earth were the seven debates between Lincoln and Douglas in 1858 in Illinois. The part of Lincoln's speech which had the most effect, and the part which made Douglas maddest, was this kind of a statement about the Dred Scott decision, Franklin Pierce having gone out of the Presidency, James Buchanan having come in as President, Roger B. Taney being Chief Justice of the United States, and Stephen A. Douglas the leader of the Senate: Lincoln said that if it turned out on investigation that Franklin, James, Roger, and Stephen were all sent out into the woods at places a great distance apart to get out timbers, and when you got those timbers all together it was found that they fitted with exact nicety to go into a building, it was not an extreme or unfair conclusion to say that there must have been an agreement between James, Franklin, Roger, and Stephen. [Applause on the Democratic side.]

The gentleman from Illinois [Mr. Mann], while howling calamity, disclaimed that he is a calamity howler; but I undertake to say that the Senator from New York [Mr. Roor]; the ex-Speaker of the House, Mr. Cannon; the chairman of the Republican national committee, Mr. Hilles; the ex-governor of Missouri, Mr. Hadley; and the minority leader on this floor [Mr. Mann] have been the greatest calamity howlers in America

this fall. [Applause on the Democratic side.]

It is strange that nobody else seems to have heard of these remarkable signs of falling prices and all that which the gentleman has collated. There is not a big city in the country which has not idle men in it. There never was one that did not have idle men in it at any time [applause on the Democratic side], and unfortunately there never will be one. The gentleman from Illinois and I live in the richest portion of the civilized earth. The gentleman knows as well as I do, and everybody that in that country out there last summer there was an all-devastating drought, in Oklahoma, Kansas, a part of Nebraska, Missouri, Arkansas, Kentucky, and a part of Illinois, Now, what is the result of a short crop anywhere? It reduces the business of the merchants in Chicago, St. Louis, and Kansas City, and the great centers of trade which supply that region.

The main proposition that runs through the speech, the main proposition that runs through all these speeches and interviews to which I have referred, is that when the Democrats are in you have bad times and calamities and when the Republicans are in you have good times. There is not a

syllable of truth in it and there never was.

I do not like to talk about old things, but the panic of 1893-94 came under the McKinley bill, before the Democrats ever had a chance to put a law on the statute books. [Applause on the Democratic side.] I rejoice in the prosperity that began in this country in the fall of 1894, because it is true that as soon as President Cleveland sulked 10 days and let the Wilson tariff bill become a law without his signature, next day times began to get better. [Applause on the Democratic side.] There is no question about that, and if the Dingley bill had never been passed they would have continued to get better. The Dingley bill may have helped it along; I will not say yes or no to that. But they had prosperity in this country under the Wilson bill, under the Dingley bill, and under the Payne bill; and they had a panic under the Dingley bill. Senator Aldrich is pretty good authority on the Republican side. He is the best-looking Republican that has been in the Capitol since I have been here— 20 years. [Laughter.] He said that the panic of 1907 was the worst that ever struck this country. If anybody doubts the correctness of that statement, let him get the Congressional RECORD and read it. You could not get your own money out

of a bank with a jimmy. [Laughter.] I will tell you of an experience I had: Gen. Grosvenor and I went out on a lecture tour, so called. It was called a lecture tour because we wanted to get the money out of it. [Laughter.] We started out on a two weeks' tour. When I started out I took \$100 or so in my pocket to cover accidents. We went on this lecture tour and got \$150 a night each, and every night regularly we were paid in checks. When we got into Toledo at the end of 10 days I counted up the money I had and I had \$5.45. I said, "General, you will have to lend me money enough to get out of town, providing they do not pay us money to-night. He counted his money up and he had \$5.20. We notified the manager at 10 o'clock in the morning that we wanted our pay in money, and at 10 o'clock at night he paid us each \$75 in money and \$75 in a check, and said that he could not raise \$300 in money in the whole town of Toledo in 12 hours. [Laughter.] That was my personal experience in the Republican panic of 1907. Most assuredly you can not charge that panic up to us. As good luck would have it, we got our money on all the checks.

I want to tell you one thing, and it is one reason I am making these remarks. I heard a doctor say once that if a man would start down town in the morning feeling perfectly well, and every man that he met for five or six blocks would stop him and condole with him as to how badly he looked and inquire of him what was the matter, before he had gone another block he would feel sick sure enough. And that is precisely what these men are doing. [Laughter and applause on the Democratic side.] They propose to get into the newspapers every day, day after day, that the country is going to the dogs and business is going to the deuce; and people that never thought about a panic will begin to study about it. By all right thinking men this will be considered a monstrous and unpardonable performance.

What is the effect of this tariff bill? My kind-hearted friend from Tennessee, Mr. Austin, was talking about the tariff law that put everybody out of business. I went down to the Treasury Department and got the figures for the months of Novem-

ber, 1912, and November, 1913. These are the figures: November, 1912, imports free, \$89,688,024. November, 1913, \$91,468,577.

Now, there is a difference in that month of about \$2,000,000. Does any man in his senses believe that the increase of \$2,000,-000 in imports free of duty in the month of November would create a panic?

Dutiable goods, November, 1912, \$63,406,874; November, 1913, \$56,684,007; total, November, 1912, \$153,094,889; November, 1913, \$148,152,584.

Customs duties, November, 1912, \$25,660,535; November, 1913,

Now, if more goods come in free, the consumers get the benefit. [Applause on the Democratic side.]

I want to give you another experience I had, as a comment on this bill. I have two tailors in this city; one makes my frock coats and cutaways, and the other the sacks. About six or eight months after the Dingley bill got started I went down to one and wanted him to make me a good suit of clothes, and asked him what he would do it for. He stated a price \$10 higher than he made one for me of the same quality two years before. I said, "What are you putting the price up for?" He said, "The Dingley bill."

One day last week I concluded I would negotiate for another good suit, and I called the same tailor up. I asked him if the prices of suits of clothes had gone down recently. He said, "No; just the same as they were." I said, "Does not this tariff bill that we passed enable you to sell clothes cheaper than you did 12 months ago?" and he said, "No."

I will tell you what will happen. As long as they can hold up these old stilted prices they will do it, but some enterprising tailor will come along to this town before those artists know it, and he will sell goods to people at a fair price, and they will say good-by to a good deal of their trade, including my own.

Mr. MANN. The gentleman ought to buy ready-made clothes.

Mr. CLARK of Missouri. The gentleman was talking about soup houses. He says there were no soup houses in 1907. Along in the winter of 1907 I made a speech on the floor of this House and quoted a whole lot of this kind of stuff which he has been quoting here to-day. [Laughter.] Republican soup houses was my theme on that occasion.

Mr. MANN. Was it true? Mr. CLARK of Missouri. It was true. I have no doubt that there are soup houses now. The gentleman from Illinois [Mr. Mann] was talking about this soup house in the city of Washington. I will give you the history of that. There has always been a soup house in the city of Washington. It is a There has good thing there is, too. This municipal soup house in this town was maintained for a good many years by a private charitable association, and a short time ago they turned it over to the United States Government.

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield?

Mr. CLARK of Missouri. Certainly. Mr. FITZGERALD. One of the last acts of the last Republican Congress was to incorporate in an appropriation bill a provision accepting this municipal lodging house for the District of Columbia

Mr. CLARK of Missouri. Of course.

Mr. MANN. We knew what was coming. [Laughter.]
Mr. CLARK of Missouri. But the idea that the gentleman from Illinois tries to convey to the country is erroneous, namely, that under Republican administrations you do not have any soup houses in this town, and under Democratic administra-tions you have one. They have just shifted it over from private ownership to municipal ownership, and that is all there is to it.

If there is any hold up in the business of the country-and it may be that a good deal of prudence is being exercised about it-it is not on account of the tariff bill. The people of the United States are satisfied with that tariff bill. I will tell you an experiment that I tried not long ago. I represent one of the 12 finest agricultural districts in America and I made up my mind that as I could not get home-I was the only one of the whole crowd here that could not-I was going to find out what the opinion was about that tariff bill, and about what this Democratic Congress was doing, and about what the Democratic administration was doing. So I wrote out a sentence something like this, that on account of the extra session I had not been able to get home since the 13th day of November a year ago, and "I want you to take 30 minutes off, or an hour, and write me a letter and tell me what your acquaintances think of the Democratic Congress and the Democratic administra-I sent that to Democrats and Republicans. I have received about 150 letters in reply, some from Republicans, but most of them, of course, from Democrats, and with one exception those letters indorsed the Democratic Congress and the Democratic administration that passed the Democratic tariff bill. One disgruntled brother said that the whole crowd were a lot of damn fools. [Prolonged laughter.] There is a college professor in my district who happens to be a Democrat, though the college is in one of the very strong Republican counties, but they always vote for me. He replied to my letter that the people in that part of the State were absolutely satisfied with the tariff bill—all the Democrats and nearly all Republicans.

Mr. Chairman, if this currency bill that we passed in the House had been passed by the Senate in two weeks, neither the gentleman from Illinois, Mr. Mann, nor Mr. Root, nor Mr. Hadley, nor Mr. Cannon, nor Mr. Hilles would have dared to make the kind of speech the gentleman from Illinois has made here to-day. [Applause on the Democratic side.] I am not criticizing the Senate. There ought to be some place in this Capitol where you can have a thing talked out, but here is the situation about that. It is the uncertainty which hurts. Bankers do not like to lend their money out until they know what the bill is going to be, and if the Senate will pass the bill substantially as it passed the House, it will be the most popular banking bill ever passed in the United States.

There are two men from whom I always get information. Of course I manage to get information from almost everyone I run across, but there are two men to whom I never talk when they come to see me-I simply ask them questions. They are reservoirs of information. One of them is Mr. James J. Hill, the great empire builder of the Northwest, and the other is the Rev. Dr. John T. M. Johnson, a Baptist preacher out in Kansas City, who has had sense enough to make three or four million dollars. I talked to Mr. Hill last week-that is, he talked to me. He talked for over an hour, and he said that he does not believe there is going to be any panic in this country. [Applause on the Democratic side.] He said the banks were going slow until this banking bill was passed—until they knew where they were going to land.

I believe that the currency bill will be as popular as the tariff bill. [Applause on the Democratic side.] Dr. Johnson told me this, and I will give it to you; I have stated it here once in the caucus, and I will state it now so it will get into print. He said that the good points of that bill were that, so far as

human power could fix it, it kept all the money in this country from drifting into New York City. [Applause on the Democratic side.] Now, according to this Washington paper Mr. PAGE of North Carolina was reading, we western Members do not know anything because we never saw a big town. The doctor said that, as far as human ingenuity can control it, it broke up gambling on the stock exchanges; and the country people of this country are in favor of that proposition. [Applause on the Democratic side.] He said, in addition to that, it rigged up a scheme whereby the farmers could get loans at the national banks on farming lands, the best security for the money known among men. [Applause on the Democratic side.] He said, in addition to that, that it would increase the currency of the country and that it needed increasing. I knew there was a sort of scarcity of money in this country, because the rates of interest showed it, but I did not know it was world-wide. He says it is; that the interest rates have risen in France from 31 to 41 and 5 per the interest rates have risen in France from 3½ to 4½ and 5 per cent; in Germany from 4 and 4½ to 5 and 5½ per cent; and the same way in England, practically. I read a statement in the paper the other day that took my breath away. I knew, in a general way, that the East Indians, for some unaccountable reason, had been hoarding gold for a long time. That piece I read stated that last year they got hold of \$327,000,000 of gold. in bar gold and English coin, and it disappeared like the earth had swallowed it up.

Now, let us see another thing about this hard-times business In the last few years Canada and the British possessions could get all the money they wanted from Great Britain by asking for it and putting up any reasonable security. The upshot of it is they overbuilded themselves in the Canadian Northwest, and all of a sudden England closed down on them and they can and an of a state ringiand closed down on the day of the people in the British Northwest possessions that up there the other day at Victoria they passed some kind of a regulation—I do not know who had the authority to do it, but they did do it—that for the next four months no sort of immigrant artisan or methods and that the province. So it seems the gauge chanic could get into that Province. So it seems the cause which has operated in this country has operated there. Now next Monday or Tuesday we are going to pass this currency bill. [Applause on the Democratic side.] And unless there are some very contrary Members around here I think we will pass it Saturday night. [Applause on the Democratic side.] The very minute that bill becomes a law the banks will open up, people can get money to carry on the business of the country, and the country will blossom like a rose under these Democratic bills. [Applause on the Democratic side.] It would be very strange, indeed, if a man went out with a telescope and could not find a spot on the sun, but notwithstanding the sun goes on and warms and fructifies and lights the world.

Mr. MADDEN. Will the gentleman yield for a question? Mr. CLARK of Missouri. Certainly.

Mr. MADDEN. I think the gentleman made the statement that the banks had hoarded money and refused to extend loans.

Mr. CLARK of Missouri. What banks?

Mr. MADDEN. The banks of the country, and that was the reason for the conditions we find there. The records of the Comptroller of the Currency show that instead of making loans on a basis of 8 to 1 of cash in the vaults, since these condi-tions have arisen while this currency bill was under considera-tion they have increased their loans from 1 to 8 to 1 to 12, and have increased their loans by a hundred million dollars above what they have the right to do under their reserve laws.

And if that information was given to the public, as it is in the possession of the Secretary of the Treasury, a totally different situation would be shown than that shown by the state-

ment of the Speaker.

Mr. CLARK of Missouri. Let me ask the gentleman while he is up, if that is true, how does the gentleman from Illinois get any foundation for his claim that the business of the country is bad?

Mr. MADDEN. All I know are the facts, and these facts are in the possession of the Secretary of the Treasury and can be made public. It is known to every business man in the United States who has any knowledge of the situation.

Mr. MANN. Does the Speaker think because people owe a

great deal of money that they are prosperous?

Mr. CLARK of Missouri. No; I do not think that; but everybody, including the gentleman, knows that if the people can get money enough with which to carry on their business they will carry it on to the fullest extent. If they can not get money from the banks with which to carry on their business, they must curtail the volume of business.

Mr. MANN. If the Speaker will permit, what they need

now is not money so much as orders for goods.

Mr. CLARK of Missouri. One of the biggest cement plants on the face of the earth is in my district, is running full blast, and the other day it electrified itself from that great dam up there at Keokuk, and it works 2,400 men in three eight-hour shifts.

The OHAIRMAN. The time of the gentleman from Missouri

has expired.

Mr. CLARK of Missouri. I am sorry my time is up, but, nevertheless and notwithstanding, I have said about what I wanted to say, anyhow [applause on the Democratic side], except one other fact, which I will state, if the House will bear with me.

Mr. MANN. I am perfectly willing to ask unanimous con-sent that the Speaker may proceed for five minutes, although the House was discourteous enough to me not to let me have the

time I wanted.

Mr. CLARK of Missouri. Well, I will not take it. [Applause on the Democratic side.1

Mr. Chairman, I ask unanimous consent to print a part of an editorial on this same subject, from the St. Louis Republic, and revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The

Chair hears none.

Mr. CLARK of Missouri. Mr. Chairman, in a very able editorial on this subject recently the St. Louis Republic said:

editorial on this subject recently the St. Louis Republic said:

A deliberate attempt is being made by Republican leaders to bring on financial depression, without regard to the danger to the commercial community and the possibility of panic, with the express purpose of discrediting the Democracy and so restoring the Republican Party to power. These rule-or-ruin marplots do not care what happens to the country. They are striving, with ELIHU ROOT at their head, to kill the pending currency bill by statements concerning it which are financial nonsense. They are striving, with Uncle Joe Cannon at their head, to depress business by wild tales about the decline of values of property in the West. They are striving, under such leaders as Herbert Hadley, to disseminate lies about the new tariff and its effects. What answer will American courage and American common sense make to tactics at once so cowardly, so treacherous, so perilous—and so characteristic?

Mr. MANN, Mr. Chairman, I ask unanimous consent to print an editorial from the New York American and the Chicago Tribune on the same subject.

The CHAIRMAN. Is there objection? [After a pause.]

The Chair hears none.

Mr. DAVIS. Mr. Chairman, I desire to incorporate as a part of my speech some of the hearings before the subcommittee, particularly a portion of the testimony of Mr. Noves and Judge

The CHAIRMAN. Is there objection? [After a pause.] The

Chair hears none.

All time has expired, and the Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the half of the following sums named, respectively, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, and the other half out of the revenues of the District of Columbia, in full for the purposes following, being for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, namely:

Mr. CRISP. Mr. Chairman, I move to strike out the last word.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unani-mous consent that the gentleman from Georgia may proceed for 10 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the gentleman from Georgia may be allowed to proceed for 10 minutes. Is there objection?

Mr. MANN. Reserving the right to object, what is the request?

Mr. PAGE of North Carolina. He moved to strike out the last word.

Mr. MANN. Reserving the right to object, may I ask the gentleman from Alabama [Mr. Underwood] a question?
Mr. PAGE of North Carolina. Yes, sir.

Mr. MANN. In view of the statement made by the Speaker, for the information of the House, I would like to ask the gentleman from Alabama [Mr. Underwood] what are the apparent prospects in reference to the currency bill?

Mr. UNDERWOOD. The information that I get from the Senate indicates that the probabilities are that the bill will

reach a final vote this week.

Mr. MANN. They have agreed in the Senate to take a final vote before they adjourn to-morrow night. Assuming that it passes the Senate some time Friday night or Saturday morning, does the gentleman have any information about how long it is liable to take in conference?

Mr. UNDERWOOD. I do not speak by the card, but the information I receive is that there are some points of serious disagreement between the two Houses, but not many. I am inclined to believe and to agree with the Speaker that on Monday or Tuesday the conferees will be able to get together.

I hope so and I believe so, and if they do, I intend to offer a resolution for a recess until Monday, the 12th day of January.

Mr. MANN. How long will that be?

Mr. UNDERWOOD. A little over two weeks?

Mr. MANN. It would be three weeks lacking a day. Does

the gentleman think that is necessary?

Mr. UNDERWOOD. No; I do not think it is necessary for other purposes. The House has been in session for a year, and the Senate has been in continuous session since early last summer. A good many gentlemen say to me that they would like to go home to attend to their business—gentlemen that have not been home this year.

Mr. MANN. I think there are only four on that side who

have not been home. [Laughter.]
Mr. UNDERWOOD. There are a great many in the Senate who have not been home.

Mr. FITZGERALD. There are not that many on that side of

[Laughter.] the House.

Mr. MANN. I was wondering whether, in view of the haste with the appropriation bills, it was desirable to take so long a

Mr. UNDERWOOD. Of course, if the proposition does not meet with the desire of Members on this side of the House, I do not care to have any contest about it. While it is usual to take a holiday for two weeks, I imagine that we will not be able to adjourn until the day before Christmas. Of course we would take Christmas day anyhow. That is Thursday. Now, if we should recess until the 12th of January, we would take only two legislative days in addition to the usual two weeks' That is what it would amount to. holiday. That is what it would amount to. Mr. MANN. The 12th of January is what day?

Mr. UNDERWOOD. What is that? Mr. MANN. The 12th is Monday?

Mr. UNDERWOOD. The 12th is Monday.

Mr. MANN. Of course there would not be any quorum here

Mr. UNDERWOOD. I do not know why there should not be.

There never has been.

Mr. UNDERWOOD. We might transact business without it.

Mr. MANN. That might be.

Mr. UNDERWOOD. I am inclined to think that the House is entitled to a two weeks' holiday, and that the difference between the usual two weeks for Christmas and the recess proposed would be about three days' additional time.

Mr. MANN. Everybody here is asking these questions, so that the gentleman will pardon me for asking them. Assuming that we get through the District appropriation bill before the conference report on the currency bill is disposed of, is there an expectation of taking up any other important matter?

Mr. UNDERWOOD. I think we ought to push the appropriation bills as fast as we can, but I think it is probable that this bill will take until Saturday, and there probably will not be much time for other bills, but if they are here they ought to be disposed of.

Mr. MANN. I suppose there will not be other appropriation

bills in here, but I do not know.

Mr. UNDERWOOD. I think the appropriation bills ought to be pushed as fast as possible, I will say to the gentleman

Mr. MANN. That is the reason why I think it would not be desirable to take such a long recess as the gentleman suggests.

Mr. UNDERWOOD. I am inclined to think that the recess will not delay the appropriation bills, but, on the contrary, expedite them. So far as I am personally concerned, I am stating only my own view in regard to the matter. My disposition would be to offer a resolution for a recess until January 12, but if I find that there is serious objection among the Members of the House on either side, because this is not a party mat-

Mr. MANN. I think if the gentleman will come to a conclu-

sion about it, it will be accepted by the House.

Mr. UNDERWOOD. If there is any serious objection to taking that long a recess I will be glad if the Members would let me know, and I will be willing to cut it down. But I take it we should recess until that time on account of the long session we have had all summer. A number of Senators have stated to me that they would like to have a three weeks' recess.

Mr. MANN. I will say frankly to the gentleman that the Senate did take a virtual recess part of the time. I have been here practically all the summer, notwithstanding the times I have been away. I would really like to be home some time next

Mr. SHERLEY. What's your hurry? [Laughter.] Mr. FITZGERALD. Perhaps the gentleman had better be. [Laughter.]

Mr. MANN. Oh, I am not in the fix that the gentleman is in. have been reelected before and can be again. [Laughter.]

Mr. UNDERWOOD. I will say to the gentleman from Illinois that I think, if the House will promptly take up and pass the appropriation bills without undue delay after the 1st of January, there is no reason why this House can not reach an adjournment by the 1st of June, and I would like very much to see it done.

e it done. [Applause.] Mr. MANN. The gentleman from Alabama must know that it will be impossible for Congress at a long session, just after a tariff bill has been enacted and just after a currency bill has been enacted, to remain in session without the allowance of some partisan debate-a privilege we never denied to that side of the House when we were in the majority, and which for the

first time was denied to me to-day.

Mr. UNDERWOOD. I recognize that fact, I will say to the gentleman from Illinois; but there may be reasonable political debate and also a fair opportunity to adjourn before the 1st of June if we are willing to drive business when we are not de-

Mr. MANN. If we keep our noses to the grindstone, and I am willing to do that. That is the reason I question whether the gentleman would want to take so long a rest.

Mr. UNDERWOOD. I ask the gentleman candidly, Does he really think it seriously matters whether we take three days more than two weeks or the usual two weeks' holiday?

Mr. MANN. Frankly, I will say to the gentleman, I can see no reason why we should not meet here about the 3d or 4th of January. We have usually met on about Thursday, and I think we might go ahead with our business without interfering with the Senate at all. I think the Senators are entitled to a rest, but that is easily arranged in the Senate. And yet I am not tenacious about my opinion.

Mr. UNDERWOOD. As I said before, I will say to the gentleman from Illinois, if there is any serious objection on this side of the House, or on that side, as far as that is concernedbecause, as I say, I do not apprehend that it is a party question, but is a question of the convenience of the Members on both sides—I will not press the request. I shall be glad to hear if any considerable number of the membership of the House think that a recess until January 12 is too long.

Mr. MANN. I think that would depend largely upon the condition of the appropriation bills. If they are ready to be brought in, so that the House can proceed with them, without waiting for them to come in, it seems to me it would be de-

sirable to go on.

The CHAIRMAN. Is there objection to the request that the gentleman from Georgia [Mr. CRISP] be allowed to proceed for 10 minutes.

There was no objection.

The CHAIRMAN. The gentleman from Georgia [Mr. CRISP]

is recognized for 10 minutes. [Applause.]

Mr. CRISP. Mr. Chairman and gentlemen of the House of Representatives, I thank you for the courtesy extended to me of permitting me to address you for 10 minutes, but I doubt if I shall inflict myself upon you that long. I have never in my life sought publicity or to be in the limelight, but for the last few days I have had more of it than I ever had in my life before. I have no criticism or complaint to make of anything the local papers have said or may say about me. Neither can anything they say about me deter me from performing a duty I conscientiously believe I owe to the people of the United States. [Applause.]

Mr. Chairman, I had intended to offer an amendment to this appropriation bill providing for the repeal of the act of June, 1878, authorizing the United States to contribute half the expenses of the District government, because I believe that law to be unjust. I knew that when I offered such an amendment a point of order would be lodged against it, but I thought then and I think now that I could prepare such an amendment as would bring it within the purview of the Holman rule, and that it would be in order; but I could not attach to that amendment legislation that I think should logically and rightly follow the repeal of the act of June, 1878.

I stated that I should offer such an amendment, and I intended to do so, to bring up this issue-whether the people of the United States should longer be required to bear half the

burden of the government of a tract of land 10 miles square. Since I made that statement the Committee on the District of Columbia yesterday reported favorably the bill that I had introduced, providing for the repeal of this law, and that bill is now upon the calendar of the House; and under the rules of the House, on the second and fourth Mondays of each month it is in order for the District of Columbia Committee to call up legislation, and the bill can come up before the House for con-

Gentlemen, I am not acting for buncombe, I am not acting for home consumption; I am acting to right a wrong that I think I am a practical man, and I want to pursue the course that I think best to accomplish the end desired.

I realize that if I attempt to legislate on this appropriation I shall meet with the opposition of the Committee on Appropriations, some of whom are friendly to my bill, and I will also incur the opposition of many Members of this House who do not believe in legislating on an appropriation bill.

I realize further, Mr. Chairman, that under the laws now existing, under the low tax rate and low assessment prevailing in the District of Columbia, intangible personal property being free from all taxation, only \$7,000,000 were raised for the management of the affairs of the District this year, and that the amount carried by the bill is \$11,300,000, and that if an amendment was adopted to this bill repealing the act of 1878 and not providing any other revenue to meet this deficit, it might cause chaos, and it would necessitate the rereferring of this bill to the Committee on Appropriations to bring in a bill appropriating \$7,000,000. For these reasons I believe that it will be wiser to take up the bill as an independent, substantive proposition as to whether the United States Treasury ought to pay half the expenses of operating the District of Columbia, and that it will receive more support than it would if I attempted to attach it as a rider on this appropriation bill.

I believe the merits of the measure proposed by me are so strong that the Members of this House, irrespective of party for there is no partisanship in the matter-will consider it, and upon consideration will adopt the law repealing this half-andhalf plan.

Mr. Speaker, as far as I am personally concerned, I believe in local self-government, and I believe the people of the District are entitled to local self-government, and I will say to some of the new Members of the House that it is no new proposition.

From 1802 to 1871 the affairs of the District of Columbia were managed by a mayor and council, a legislature elected by the inhabitants of this city; and the Supreme Court of the United States, speaking of it, says:

This general review of the form of government which prevailed in the District of Columbia and city of Washington prior to 1871 is sufficient to show that it was strictly municipal in its character, and that the Government of the United States, except so far as the protection of its own public buildings and property was concerned, took no part in the local government, any more than any State government interferes with the municipal administration of its cities. The officers of the departments, even the President himself, exercised no local authority in city affairs. It is true, in consequence of the large property interests of the United States in Washington, in the public parks and buildings, the Government always made some contribution to the finances of the city, but the residue was raised by taxing the inhabitants of the city and District, just as the inhabitants of all municipal bodies are taxed.

Mr. Chairman, I have never contended that I wanted the Government of the United States to be a burden to the District of Columbia, neither do I want the District of Columbia to be a burden upon the taxpayers of the United States. I recognize that the Government of the United States has property here, that the Government receives services from the city in the way of sewerage and paving, and I would have the Government bear its legitimate part of the expenses, but I know that paying one-half of the expense is absolutely inequitable, and I am opposed to it.

Now, I have not in the bill introduced proposed any plan to remedy that, because in my judgment the issue must be fought out on the cardinal issue as to whether the act of 1878 shall be repealed. But it is my purpose, if the act of 1878 shall be repealed, to do what was done in 1874, when the present form of government was organized.

From 1802 to 1871 we had a local municipal government. In 1874 Congress passed a law providing a general commission, composed of Senators and Members of this House, who reported form of government for the management of the District of Columbia, and that report was made and adopted in 1874, and it is in the main, with certain amendments, the law that is in force now as to the regulation of the District of Columbia.

It is my purpose when this bill comes up on its merits, when the whole subject will be before you for consideration and amendments be in order, to amend it. The bill as reported from the Committee on the District of Columbia provides that it shall not go into effect until 1916, giving another fiscal year during which Congress can pass a law making intangible property, such as stocks, bonds, mortgages, and also jewelry and articles of adornment liable for taxes, so the District can raise revenue enough to run the government without being a burden upon the property owners.

It is my purpose, if my bill is passed, to offer a resolution providing for the appointment of a joint committee, consisting of Members of this House and the Senate, to report as to what form of government shall be in operation in the District, and report what amount, if any, the Government of the United States, in equity, shall contribute annually to the support of the government of the District of Columbia on account of property owned here and services received from the District.

The CHAIRMAN. The time of the gentleman from Georgia

has expired.

Mr. BORLAND. Mr. Chairman, I move to strike out the last two words. I did not take any time in general debate on this bill, because they wanted to limit it and expedite the business. This bill was drawn on the half-and-half principle, as it shows on its face. I hope that before another bill is drawn that principle will have been abrogated and we shall have a working law by which the District of Columbia shall contribute toward its own maintenance—the maintenance of its own governmentin a fair proportion, as other municipalities contribute, and the

balance required to be contributed out of the National Treasury. I want to say now that the claim that this proposal is aimed at the property owner, or small property owner, or the average citizen of the District of Columbia is a mistake and a palpable error on the face of it. The law now fixes the tax rate in the District of Columbia at 15 mills. That 15 mills tax and the general excise tax in the District raises about \$7,000,000 revenue. That 15 mills covers all that the citizen of the District contributes for what amounts to city, State, county, school district, and special-assessment tax. I undertake to say that there is hardly a city in the United States that does not contribute from 15 to 20 mills for city purposes alone, and outside of that they have the taxes for school district, tax for special improvements which are never included, and in addition to which there are the county and State tax, in all amounting to over 30 or 35 mills in the average municipality of the size of Washington. So there is no overtaxation in the District of Columbia, and that this can fall on the small property owner is a mistake.

The limit of taxation, 15 mills, is raised on the owner of the small home and the tangible property—the man who has a team or a wagon, a stock of goods on his shelves-whereas all the great wealth represented by stocks and bonds and investments of that kind go untaxed.

If we were to tax the untaxed wealth of the District of Columbia, instead of raising \$7,000,000 from the poor property owners, we would raise \$12,000,000, the other \$5,000,000 from the property holders who come here and bring their intangible wealth for the purpose of escaping taxation in the States back home, where they ought to stay. And right here in this paper, the Washington Times, of the issue of this evening, there is made what is evidently a slip of the pen. It says that the Washington real estate men look to the Senate and the President to check the onslaughts on the District. The Washington real estate men! That is a slip of the tongue; but it tells the true story as to who is fighting this reform. There is no onslaught on the property owners in the District of Columbia. I hope, without raising a dollar of additional revenue from any man who pays his dollar and a half tax on his little home or stock of goods, that by abolishing this iniquitous half-and-half principle, which has prevented a just reform in the District of Columbia, we shall be able to reach a vast amount of untaxed wealth that has come here from all over the Union, from your State and from mine, for the express purpose of escaping taxation back home, which remains untaxed here. We shall tax that, not only for the benefit of the average citizen of the Dis-We shall tax trict, but for the benefit of the National Capital and the people of the United States. When that time comes about no man need have fear but that a gathering of the representatives of the American people will do ample and liberal justice to the National Capital by contributing out of the Federal Treasury what is necessary to make up a higher form of government than the District itself could support on its ordinary revenues.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. SMITH of Minnesota. Mr. Chairman, I can not see just what bearing the remarks of the gentleman from Georgia [Mr. CRISP] and the remarks of the gentleman from Missouri BORLAND] have on the bill now under consideration, unless they be for the purpose of embarrassing those who feel that the District should have sufficient revenue to carry on its affairs. If the amendment which was suggested by the gentleman from Georgia were proposed, then I could understand why such a discussion would be in order, but in the absence of that suggested amendment to this bill it seems to me that the discussion has been wide of the mark.

I am not satisfied that the half-and-half principle is the best that can be devised for the District of Columbia and the National Government. If a change ought to be made, it should be one that is just and fair both to the United States and to the

District of Columbia.

The suggested amendment strikes down the half-and-half principle without offering a substitute. The District of Columbia has no voice in its own government, and the proposed amendment does not extend to its people any voice in the running of the District government; but it proposes to tax the citizens of this District, not only for the purpose of carrying on their own municipal affairs, but also for protecting and improving the property of the National Government, and in addition thereto turning over any surplus there may be to the National

Have we forgotten the remonstrances against the stamp act, the Boston tea party, and the other events which happened as a result of the belief that taxation without representation

is tyranny?

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Minnesota. Certainly.

Mr. CALLAWAY. As I understand the gentleman's line of argument, it is that these people having no representation in this Government are unjustly taxed. If that be the truth, we are doing them a great injustice to require them to pay half of the expenses of the Government, and following that line of argument we ought not to require them to pay any of this expenditure at all, but the Federal Government, because they have no vote in their own Government, should pay it all. Is that the position of the gentleman?

Mr. SMITH of Minnesota. If that position which the gentleman states suggests a wrong, I would say that half a wrong is

not as great as a whole wrong.

Mr. CALLAWAY. The gentleman would not contend for a minute that the Federal Government ought not to do a complete right for the District?

Mr. SMITH of Minnesota. Not at all.

Mr. CALLAWAY. Then, if it is half a wrong to require them to pay half the expenses, the gentleman suggests that we remove that entirely and that the Government pay it all?

Mr. SMITH of Minnesota. I am suggesting nothing except

that there has been drawn into this discussion an unwarranted proposition that is foreign to it and has nothing to do with it, and as I proceed with my remarks I think the gentleman will ascertain my views in reference to this particular subject. do not want to be put in a false attitude, and I do not think any Member here does. It must not be forgotten that the District of Columbia is a part of the United States.

While under the present system the District is governed by the National Government, the United States assumes one-half of the expenses. Under the proposed system the government of the District is to remain in the United States, but the District is to bear the whole burden of the expense of the municipal government, while the United States is to be entirely exempt, though its property, benefited by municipal improvements, streets, sidewalks, lights, maintenance, and upkeep of parks, squares, and other accessories established by the National Gov-

ernment, is worth hundreds of millions of dollars.

The more property there is in any city exempt from taxation the greater are the burdens upon the taxpaying portion of its citizens. What city in the United States of the size of Washington would stand for a proposition which would exempt from taxation as many million dollars' worth of property as is owned by the National Government in this city, and which by the suggested amendment it is proposed to exempt entirely from the payment of its proportional share? Half and half may not be the right proportion, but let us ascertain what is the right pro-Let us not go at it blindly and arbitrarily, as this portion. amendment does.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. SMITH of Minnesota. Mr. Chairman, I ask unanimous consent to proceed for two ininutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SMITH of Minnesota. When there is a measure brought before Congress that does away with the half-and-half proposition and at the same time offers a substitute that will do fustice to the citizens of Washington, who have no voice in this legislation, I will vote for it, and when there is brought before this House a bill that will spread upon the tax books of this city the millions of dollars of personal property now untaxed I will also vote for that.

But I am unwilling to place these burdens upon the smallsalaried Government clerk, who has no personal property and who is struggling along trying to pay for a home.

Mr. CALLAWAY. Mr. Chairman, I desire to ask the gentleman a question. The gentleman's statement was that the burden of taxation would fall on the Government clerks who had no property. I can not understand how that can possibly be, except in a poll tax, and I can not think that there has been any proposition to diminish or decrease any poll tax. I am just informed there is no poll tax levied in this city. If there is no poll tax, how could the raising or the lowering of a tax affect the poor Government clerks who have not been able, out of their meager salaries, to save anything?

Mr. SMITH of Minnesota. I spoke of the Government clerks who have no personal property but who are struggling along trying to pay for a home. If you strike down the half-and-half proposition under the present conditions and do not substitute something to take its place, and the personal property, or most of it, escapes taxation, as it does, then the great burden of the increase in the tax will be placed on the Government clerks who

have bought small homes in Washington.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move to strike out the last word. Mr. Chairman, a misstatement can be made so often that if it is left unchallenged people may finally accept the statement as true. There has been a misstatement many, many times during the last day or two, and it has been made here to-day, that under the bill which the District Committee reported to this House yesterday, and commonly known as the Crisp bill, that it strikes out the half-and-half principle and leaves nothing in lieu of it. There was never a greater mistake than that. The bill strikes out the half-and-half part of the organic act and then leaves the District government standing just as it is, with the power to levy taxes upon property in the District of Columbia and getting nothing from the United States. It leaves every power, taxing and otherwise, to stand just as it is now, except that it places the whole burden upon the District government and none upon the Federal Government. I want to say that much to challenge the statement in its early life, so that people may not believe hereafter that it is true.

Mr. SIMS. Mr. Chairman, I desire to speak in opposition to

the Borland amendment.

Mr. MANN. I want to ask if anybody on the other side of the proposition-

Mr. SIMS. I am speaking in opposition to the motion.

Mr. PAGE of North Carolina. May I inquire of the gentleman what is the motion?

Mr. SIMS. To strike out the last two words. Mr. MANN. I wondered if anybody in favor of the half-and-

half plan will have a chance to speak?

Mr. SIMS. Mr. Chairman, the gentleman from Georgia and the gentleman from Missouri are a little bit radical and extravagant in their opinions of reform. They want to tax all the intangible personal property of people now here or who may come here hereafter. Now, do not these gentlemen think it wrong after having had here all these years no tax on stocks, bonds, mortgages, and money; having thus induced many citizens, in their great desire to take advantage of a national tax exemption over State requirements, to leave their own States, where such property is taxed, and come here? Now, these gentlemen desire to modify, to change the law, after these parties have been induced to come here. induced to come here in order to evade those taxes? many men have come here, and out of the taxes they have thus evaded by leaving their own States are enabled to live here on the difference in the taxes they pay here and what they had to pay in their States. Now, these gentlemen want to stop that sort of thing! The idea that these gentlemen do not know and do not realize that charity becomes a vested right! want to overturn and destroy this thing. Now, all the millionaires who come here, or most of them, own railroad stocks and bonds, bank stocks and bonds, trust stocks and bonds. Now, tax these things and there will be no inducement for them to leave the States and cities in which they formerly resided and come here. I am surprised that these gentlemen want to prevent further immigration to this city of men who are able to pay large prices for land and houses, for servants, for automobiles, the cost of which is not coming out of their pockets, because they save that amount by dodging the State taxes, by coming to this city, the only haven we have in the United States where a man can come and save the payment of all taxes on such property. It is true that finally we have got an income tax, by which part of their earnings on such property may be taken. Do not ruthlessly destroy all this favoritism all at once.

Mr. McKENZIE. Will the gentleman yield for a question? Mr. SIMS. Certainly.

Mr. McKENZIE. I would like to ask the gentleman whether, if we adopt the amendment offered by the gentleman from Georgia or pass the bill that he has introduced, it will cure this

matter of unjust taxes in the District of Columbia?

Mr. SIMS. Oh, the gentleman and myself are on the same side; we are in favor of the millionaires. There is nothing for me to answer. I am opposing this discrimination. Why change These men would not come here if such property is to be taxed. Besides, let me ask my friends, who are in favor of this, what do you gain by it?

Under the theory that only half the burdens of the District shall be collected out of the District, what difference does it make, when you can only collect half, as to who pays it and what the rate is? Those who are taxed are the only ones who are interested, on the theory that is advocated here by some of the Members that only half the bills must be paid by the District taxpayers, and that Congress must appropriate a sum equal to the tax collected in the District, and must spend it all here. So you can have an ever-decreasing tax rate with an ever-increasing gross amount to spend in the District, and at the same time have the unrepealable, unamendable Constitution of 1878 saying that Congress is no longer at liberty to appropriate its own moneys as its judgment may indicate, but must by compulsion appropriate a sum out of the funds of the General Government equal to the amount of the taxes realized, whether we need the projects appropriated for or not.

Go on with your radicalism. Destroy this haven of the tax dodger and there will be no inducement for millionaires to come here hereafter. You will no longer have these citizens here to be proud of; no longer will you be able to see their costly automobiles, read about their great houses, which you will never enter unless you happen to be a friendly lawmaker and can be relied on to do something in favor of these self-sacrificing citizens who come here to avoid the duties and responsibilities of citizenship in the States, where they have accumulated their unearned millions. Tax these creatures? Perish the thought.

The CHAIRMAN. The gentleman from Illinois [Mr. Mann]

Mr. MANN. Mr. Chairman, if you consider the philosophy I suppose it is perfectly natural that the other side of the House, which ever since I have been in Congress-at least, until they became a majority-were trying to oppose and tear down things, should by the law of inertia continue in that direction after they have come in authority. I have not heard in more than two years any constructive propositions relating to the District of Columbia, but have heard propositions to destroy something which exists. There has been nothing in the way of something which exists. constructive legislation.

Now, for myself, I am proud of the Capital at Washington. I believe we have not only a great country, but that the people of the country are proud of Washington. I do not believe the people are in any opposition at all toward contributing the amount they have contributed toward the maintenance of the Government in this city and in this District. The half-and-half propositions are perfectly satisfactory to me, and, in my judgment, perfectly satisfactory to not only my constituents but to all the constituents throughout the country. In the last Con-

gress this House

Mr. JOHNSON of Kentucky. Will the gentleman yield to me, Mr. Chairman?

Mr. MANN. If I have the time, I will be glad to yield.

Mr. JOHNSON of Kentucky. I would like to ask him if he knows whether or not the half-and-half principles are entirely satisfactory to the Leiters, who moved from Chicago to Washington to avoid the payment of taxes?

Mr. MANN. I apprehend they did not move to Washington in order to avoid the payment of taxes. I do not know any-

thing about that, and neither does the gentleman.
Mr. JOHNSON of Kentucky. I was inquiring.

Mr. MANN. No; the gentleman was seeking to cast an insinuation, and that is the principal part of what he is doing all the time, casting an insinuation against somebody, and so he refers to the Leiters. Mr. Leiter has been dead for a number of

years, and Mrs. Leiter died but recently.

Mr. JOHNSON of Kentucky. I would like to interject the remark that the gentleman from Illinois can give cards and spades to anyone in this country in casting reflections.

Mr. MANN. If I can anywhere equal the gentleman from Kentucky [Mr. Johnson], I am a prince at the business.

Mr. Chairman, we can afford to maintain the Capital in good order. The committee presided over by the gentleman from Kentucky [Mr. Johnson] now proposes to put the burden of maintaining the District of Columbia entirely upon the local property, without even any reduction because of the great

governmental functions carried on in Washington. This is not an industrial city. I hope it never will be. It is a residential city on the one side, and with governmental activities on the other. In every other large city there are a great many industries, manufacturing establishments, and factories, which go to pay taxes. Here the principal manufacturing establishment is one maintained by the Government, which is the Government Printing Office. Other manufacturing establishments are maintained by the Government, but none of them pay taxes. And we require, and ought to require, better streets in Washington than would be needed in a town that is not the Capital of the

We require greater beauty here than we do in an industrial center. I do not believe any visitor comes to Washington for the first time without his visit increasing the patriotism of that visitor if an American, or without its increasing the respect and admiration for this country of the visitor if a foreigner. I am glad of it. I would maintain a city here which, when people came to visit it, would make them proud of their country, as

we all wish to be proud of our country.

Now, gentlemen are worrying for fear their constituents will pay some of the taxes. Why, in the last Congress this House passed a good roads bill, and it will pass another one in this Congress, the bill in the last Congress taking, I think, in the neighborhood of \$20,000,000, not a dollar of which was to be expended either in my district or in the city which I in part represent; and although we have a city with a population fully as large as the population of the entire State of Kentucky or of Georgia, they proposed to take the money which we contribute. We did not object. I voted for the bill. I have no objection to spending some money there, while you are terribly afraid to spend in Washington a little money which you may have contributed. [Applause. The CHAIRMAN. [Applause.]

The time of the gentleman from Illinois

has expired. The Clerk will read. The Clerk read as follows:

For transportation, means of transportation, and maintenance of means of transportation, \$1,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against this paragraph. I desire to ask the gentleman in charge of the bill if this is not a new piece of legislation?

Mr. PAGE of North Carolina. No, sir. This provision, exactly as it is, is carried in the current bill. There is absolutely no change, either in the language or the amount of the appropriation.

Mr. FOWLER. Was this carried in the appropriation bill of

last year?

Mr. PAGE of North Carolina. It is carried in the appropria-tion bill of this year in exactly the same language and in exactly the same amount. On the top of page 2, as it is printed in this form in the current law, the gentleman will find this item:

For transportation, means of transportation, and maintenance of means of transportation, \$1,000.

Mr. FOWLER. That is true, Mr. Chairman. In my investigation I had overlooked it. I withdraw my point of order.

The CHAIRMAN. The point of order is withdrawn. Clerk will read.

The Clerk read as follows:

Excise board: Three members of excise board, at \$2,400 each; clerk, \$1,500; inspector, \$1,500; messenger, \$600; hire of means of transportation, \$1,000; in all, \$11,800.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the last paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER]

reserves a point of order against this paragraph.

Mr. FOWLER. I desire to inquire of the gentleman in charge the provision for the three members of the excise board at \$2,400 each is not new legislation?

Mr. PAGE of North Carolina. No, sir. They were authorized in the last appropriation bill in an amendment put on in the Senate creating the excise board, and their salaries were fixed and the employment that they were to perform was fixed in the law creating the excise board, in the last District appropriation bill.

I discover in the last bill that you provided Mr. FOWLER. an excise board chief clerk, \$2,000; clerk, 1 at \$1,200 and 1 at \$1,000; messenger, \$600; in all, \$4,500. I see no provision there whatever for the three members of the excise board, and in examining it—not as carefully as I desired—I did not find

any provision for the three members of the excise board.

Mr. PAGE of North Carolina. The members were provided for and their salaries were provided for in the provision creating the board carried in the last bill.

Mr. MANN. A lump sum.

The CHAIRMAN. If the gentleman will permit, the Chair will call his attention to page 123 of the appropriation bill, section 9, paragraph 2, in which this provision is made of \$2,400 a year for these commissioners.

Mr. FOWLER. I would like also to inquire about the hiring

of means of transportation, \$1,000.

Mr. PAGE of North Carolina. That is new language in this bill. If the gentleman wants to know why it was placed there, I will undertake to tell him.

Mr. FOWLER. It is new legislation, is it not? Mr. PAGE of North Carolina. It is absolutely new. law creating the excise commission there was no provision for any means for them to get over the District. The law requires them to inspect places where applications are made for licenses and where licenses have been issued, and, in the judgment of the commissioners, this amount will be necessary during the next fiscal year to pay their street-car fare or carriage hire, or whatever means they take to get to the various places which they must visit.

I will say to the gentleman that the law makes it obligatory upon them to make these trips of inspection and to see these

places

Mr. FOWLER. I discover that there is a provision in this

bill for the purchase of automobiles and motor cycles.

Mr. PAGE of North Carolina. Not at this particular point. Mr. FOWLER. That may be true; and there is where the crux of the whole affair comes in—that there are provisions for plenty of transportation by automobiles, motor cycles, or any other cycling way—and yet if it does not occur in each item of this bill you interpose it as a defense for an appropriation for street-car fare.

Mr. PAGE of North Carolina. But, so far as the gentleman having the bill in charge is concerned, it is absolutely immaterial to him whether in going to the various places where the law demands they shall go the members of the excise board expend it for taxicab hire or carriage hire or whether they ride on a motor cycle or ride on a bicycle or whether they walk. That does not make any difference; but in the judgment of this committee they were entitled to an appropriation to enable them to carry out the mandates of the law under which they were created.

Mr. SISSON. Will the gentleman permit?

Mr. FOWLER. Yes, Mr. SISSON. The item to which the gentleman calls attention is nothing more or less than an effort on the part of this committee to control and keep track of the automobiles owned by the different departments of the District government, except three—the fire, health, and police departments, which must have their machines instantly. The excise board have absolutely no means of transportation at all, unless you give this item, because they own no automobiles and no machines, and yet the law requires them to go and enforce the liquor laws of this District. It is absolutely necessary that they have some means to do it.

Mr. FOWLER. Is there an emergency for them to go quickly? Mr. SISSON. None on earth, and no means of transportation unless you want them to walk from one place to another in the

Mr. FOWLER. I discover that there is a provision for an

inspector at \$1,500. Is that new legislation?

Mr. SISSON. It is provided for in the Jones-Works bill. It was put on in the Senate and passed at the last session of Congress, and is provided for by law.

Mr. FOWLER. The only new item you have in here is \$1,000

for transportation.

Mr. SISSON. That is all.
The CHAIRMAN (Mr. CULLOP). If the gentleman from Illinois will permit, the Chair will call his attention to page 124, paragraph 3, of the book of appropriations, in which provision is made for that item,

Mr. FOWLER. I thank the Chair. If the committee thinks

it is absolutely necessary

The CHAIRMAN. The time of the gentleman from Illinois

Mr. SISSON. I will say to the gentleman that if the committee did not think it was necessary they would not have put it into the bill. In view of the fact that the duty devolved on these people to enforce the liquor laws of the District, we felt that we ought not to deprive them of the means of doing it.

Mr. FOWLER. If they will enforce the liquor laws, I will

vote to double the appropriation.

Mr. CARY. Mr. Chairman, is there not also another item for

a messenger, that is new legislation?

Mr. PAGE of North Carolina. Yes; there was inserted a new employment, for one messenger at \$600. That was not pro-

vided for in the original personnel of the organization in the

Mr. CARY. Is that necessary?

Mr. PAGE of North Carolina. It was represented to our committee that it was necessary that this board should have a messenger, and one was provided at the lowest compensation. The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of corporation counsel: Corporation counsel, \$4,500; first assistant, \$2,500; second assistant, \$1,800; third assistant, \$1,600; fourth assistant, \$1,500; ifith assistant, \$1,500; stenographers—one \$1,200, one \$840; clerk, \$720; in all, \$16,160.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against this paragraph. I direct my point of order against the salary of the corporation counsel, as provided in this bill, which is an increase of salary.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to the gentleman from Illinois I will say that the salary of the corporation counsel carried in this bill is identically the same as was

carried in the last appropriation bill.

Mr. FOWLER. That is true. How long has it been carried

Mr. PAGE of North Carolina. For several years. I do not know. I have not looked up the record. It has been carried at \$4,500 for several years.

Mr. FOWLER, I will ask if the salary fixed by law is not

Mr. PAGE of North Carolina. It probably is, if the gentleman will produce the law. He has made the point of order, and it is his business to establish it.

Mr. FOWLER. Mr. Chairman, the rule is just the reverse; but if the burden is thrown upon me to show that that is the

law, I am able to do it.

Mr. PAGE of North Carolina. Mr. Chairman, the record we have here only runs back to 1911. During these years the corporation counsel has had an annual salary of \$4,500.

Mr. FOWLER. That was in the face of the plain provisions

of the existing law.

Mr. PAGE of North Carolina. I am free to confess that I have not the statute and I do not know. I make no assertion of what the salary is under the law unless I have the statute

The CHAIRMAN. The Chair will call the attention of gentlemen to the fact that the book of appropriations where this appropriation is estimated for contains the current law, and the amount is exactly the same as in this bill.

Mr. FOWLER. That is true, Mr. Chairman, but it is against the plain provisions of existing law and is not because the law

is or ever has been changed from the salary of \$3,000. The CHAIRMAN. Will the gentleman cite the statute that

he refers to?

Mr. FOWLER. If the Chair desires, I would be very glad to cite the statute and authorities which I have; but, Mr. Chairman, ever since 1878 there has been a violation of this plain provision of the law which fixes the salary of the corporation counsel at \$3,000.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that this item may be passed over for the present

and that we return to it later.

Mr. FOWLER. Mr. Chairman, I have no objection to this provision going over if the committee is not satisfied, but I have a compilation of the law here and I am fresh from the statutes myself now, and I know that the salary is only \$3,000.

Mr. PAGE of North Carolina. Mr. Chairman, I renew my

request that it may be passed over, in order that we may have an opportunity to look at it.

The CHAIRMAN. The gentleman from North Carolina asks

unanimous consent that this item be passed.

Mr. FOWLER. Mr. Chairman, reserving the right to object, if this provision can be taken up when I am present, and I will be present unless I am dead or somebody pulls me away, I have no objection.

The CHAIRMAN. The item will not be returned to or taken

up unless the gentleman is present.

Mr. PAGE of North Carolina. I will assure the gentleman that it will not be taken up in his absence. If the gentleman happens to die, I will concede the point of order. [Laughter.]

Mr. FOWLER. O Mr. Chairman, if that is the only condition upon which the gentleman will concede the point of order, I trust that the point of order will never be made. [Laughter.]
The CHAIRMAN. Is there objection to the request of the

gentleman from North Carolina? The Chair hears pone, and the provision will be passed over.

Mr. FOWLER. With the point of order pending? The CHAIRMAN. Yes; the point of order made by the gentleman from Illinois.

The Clerk read as follows:

Fish wharf and market: Market master and wharfinger, who shall have charge of the landing of vessels, the collection of wharfage and dockage rentals, and the collection of rents for fish houses at the municipal fish wharf and market, \$900; assistant market master, who shall also act as laborer, \$600; in all, \$1,500.

Mr. MONDELL. Mr. Chairman, I offer the following amend-

The Clerk read as follows:

After line 15, page 7, insert the following: "For reconstruction of wharves, \$50,000; for market buildings, \$125,000."

Mr. PAGE of North Carolina. Mr. Chairman, to that I

reserve a point of order.

Mr. MONDELL. Mr. Chairman, I do not think the amendment is subject to a point of order. It proposes an improvement of the present fish market at the foot of Sixth and Seventh Streets. As I said a short time ago, no one at all familiar with the conditions there would deny the necessity for the improvement of this fish market. This market is rather more than its name implies. It is not only a fish market but it is a market to which the gardeners, the farmers of Maryland and Virginia, bring their fruit and vegetables in the summer, particularly watermelons. I visited the market many times during the watermelon season last summer and witnessed the inefficiency of accommodations there. I have seen five of these little river and Chesapeake Bay sloops anchored one outside of the other, five deep, so that it was necessary to take the products, carry them from the farther vessel over four others, or unload it into a small skiff and bring it up to the wharf. That entails a great deal of additional expense, and it is an expense borne by the people of this District on the produce they consume.

It is also a great inconvenience to the people of Maryland and Virginia, who come here with fish, oysters, and produce, to have to bring them to this wharf with insufficient wharfage

accommodations.

The less said about the buildings the better. They are miserable, insanitary, tumble-down, wooden shacks. They would be a disgrace to a frontier country town, much more to the Capital

of a great Nation.

There was some question as to whether or not in providing for an improvement of this wharf provision should be made for the repair of the market or for the erection of market buildings. That is not really an important matter. What we need is the extension of a wharf, a permanent concrete structure, a permanent, concrete, sanitary building in connection with it.

Now, if it is deemed wise after we have gone on to that construction to provide for retail stalls in these buildings, well

and good; if not, it is not necessary to do it.

I understand that the excuse for not including these items is that there was some difference of opinion with regard to the retail feature of the proposition. That seems to me hardly a The committee could have written in the bill valid excuse. that no part of the building could be used for retail purposes if it saw fit, although that would scarcely be wise, because the best plan is to have this market used in the main as a wholesale market, but to give opportunity, as the District does now, for purchase at retail. It would not be wise to attempt to make this the only fish and produce market in the city. Far from it. Nobody proposes to do so, and we will not do so by providing for retail sales at the market. These retail sales would be patronized by the people who were convenient to the city or the people who desire to go there and would not in any way interfere with the construction of other markets in other parts of the city or the conduct of other markets in other parts of the city

The CHAIRMAN. The time of the gentleman from Wyoming

has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. The fact is that we are not treating the people of the District right, and we are not treating the farmers, the fishermen, the produce men of Maryland and Virginia as we should in our refusal to make this improvement. It is a matter that has been discussed for years. It is well understood by the commissioners, it is well understood by the committee, and there is no good reason why the appropriation should not be made.

Mr. DONOVAN. Mr. Chairman, will the gentleman yield for

a question?

tary shacks, and while the committee did not appear to be satisfied with the plans proposed, they made no provision for other plans, so that we remain just where we have been for years past, with no progress made and no progress contemplated. other words, this item, like many other items in the bill, illustrates the fact that the committee is not progressive in providing for the needs of the District.

Mr. CARY. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. CARY. Is there any revenue derived from this market? Mr. MONDELL. Some. I desire to be corrected, if I am not correct, but my information is that there is a revenue of about \$7,000.

Mr. JOHNSON of Kentucky. Eight thousand dollars.

Mr. CARY. Is that supposed to be divided equally between

the District and the United States Government?

Mr. MONDELL. I do not know about that; but that is about the revenue, and of course the revenue would be very much larger if we had adequate, modern, up-to-date wharves and good, sanitary, permanent buildings. There is not an institution in the District that requires improvement as much as this institution does

The CHAIRMAN. The time of the gentleman from Wyoming

has again expired.

Mr. JOHNSON of Kentucky. Mr. Chairman, it seems to ma that the amendment is certainly subject to the point of order. In the last appropriation bill this item was subject to a point of order, and the fact that they got an appropriation, notwithstanding the fact that the point of order was not urged against it, does not now leave it an open question or authorize an appropriation for a new building.

Mr. MONDELL. Do I understand the gentleman to say that these buildings that are there now were provided for last year?

They have been there for 20 years.

Mr. JOHNSON of Kentucky. No. I say that the last Conmr. Johnson of Kentucky. No. I say that the last Congress may have made an appropriation for some buildings down there. I do not remember what they did about it.

Mr. MONDELL. Mr. Chairman, if the gentleman from North Carolina insists upon the point of order, I would like to

be heard on the point of order.

Mr. JOHNSON of Kentucky. In addition to that, if I may be pardoned for just a moment, I will explain the situation to the House. If I am correctly advised, the United States Government owns the land on which they propose to erect these buildings. Under the law relative to the fish wharves all of the receipts that are taken in from it are divided between the United States and the District government—one-half each. When the Federal Government turns this property over to the District of Columbia and gives one-half of the proceeds to the District of Columbia as a gratuity, then the District of Columbia treats that gratuity as a revenue, and against that revenue the Congress puts up dollar for dollar to match it. In other words, the District of Columbia in the first instance gets onehalf of the revenues from that property as a present from the United States. Then, when the District of Columbia treats it as a revenue, against which Congress puts up, then the District of Columbia takes the other half. There is nobody to dispute that.

Do you wish to place yourself in the position of granting a gratuity of half of it and then let the beneficiary force you by that to give him the other half of it? Only a few days ago this House passed a bill doing away with this very proposition. Now you are asked to stultify yourself by voting to do what the other day you said you would not do.

Mr. CARY. Will the gentleman yield? Mr. JOHNSON of Kentucky. I do.

Mr. CARY. I would like to ask the gentleman what the conditions are in regard to the bridge which the street cars run over to Alexandria?

Mr. JOHNSON of Kentucky. The tolls over the Long Bridge are treated exactly the same way; and I would further say, for the information of the gentleman from Wyoming [Mr. MONDELL], who spoke of the fish wharf being a great watermelen market. Last summer, when watermelons were being brought there, and when the gentleman from Wyoming went there to buy some of them, he found that crowded condition to be true, yet an officer of the District of Columbia had taken it upon himself to forbid the sale of watermelons and canteloupes in less numbers than 25 to any one purchaser. Thereupon I introduced a bill——
Mr. MONDELL. Will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. DONOVAN. Do they not provide for repairs or improvements of this in any way in the bill?

Mr. MONDELL. They provide only for the salaries of the men who are now there in these tumble-down, miserable, insani-

instead of letting the farmers come there and sell them out as they chose, one or two at a time. Immediately the Commis-sioners of the District of Columbia revoked that order.

Mr. PAGE of North Carolina. Mr. Chairman, in regard to the point of order reserved against the paragraph, without making any pretensions to a very full knowledge of parliamentary proceedings under the rules of the House, I think the language of the amendment as offered by the gentleman from Wyoming [Mr. MONDELL! is subject to the point of order. The last law turned over to the commissioners the fish market—certain small buildings and a wharf to be conducted as a fish market down on the Potomac River—but the gentleman's amendment provides, not for the management or extension of those wharves or those buildings, but it provides for the erection of new buildings. It is practically a new proposition involving an appropriation of \$150,000. That, in my judgment, is not authorized by any existing law, and I am inclined to believe that the Chair will find this obnoxious to the rules of the House and that the point

of order ought to be sustained.

Mr. DONOVAN. Mr. Chairman, I do not wish to speak on the point of order, but I would like to ask a question of the chairman.

Mr. PAGE of North Carolina. Will the gentleman refrain until we have a ruling on the point of order, and I assure the gentleman I will not stand in the way of his making any re-

Mr. MONDELL. Mr. Chairman, I call the attention of the Chair to the language of the current District appropriation bill, page 3:

And the Commissioners of the District of Columbia are authorized and directed, in the name of the District of Columbia, to take over, exclusively control, regulate, and operate as a municipal fish wharf and market the water frontage on the Potomac River lying south of Water Street, between Eleventh and Twelfth Streets, including the buildings and wharves thereon, and said wharf shall constitute the sole wharf for the landing of fish and oysters for sale in the District of Columbia.

And so forth.

Now, Mr. Chairman, that wharf has been there for many years. These buildings were erected years ago, and for a long time they were leased. Last year we took the market over, and assumed control and jurisdiction over it. We are collecting rent. My appropriation is for the improvement of the wharf. property of the Government there in wharves, and so forth, cost \$50,000 to improve; the buildings are old and tumble-down, and some expenditures are necessary. It is in no sense a new project. This committee has full authority to erect buildings there in place of old tumble-down shacks that are there at the present time. It has full authority to improve that wharf. they have not, then the committee is certainly in a bad way.

If a bill must be brought in here every time the committee If a bill must be brought in here every time the committee desires to spend a few dollars for the improvement of that wharf, we may require a good deal of legislation. We will need bills every time money is needed to mend a road, every time a few dollars is required to improve a street. I do not care to take up the time of the Chair, but it seems to me very clear, indeed, that this is property of the District, an enterprise of the District, and the amendment proposing to improve it is entirely in order.

Mr. SISSON. If the Chair has any doubt about any point of order, I want to call his attention to the fact that this market was taken over by an amendment put in in the Senate, which has this language in it:

And the Commissioners of the District of Columbia are authorized and directed, in the name of the District of Columbia, to take over, exclusively control, regulate, and operate as a municipal fish wharf and market the water frontage on the Potomac River lying south of Water Street, between Eleventh and Twelfth Streets, including the buildings and wharves thereon.

Now, there is a great deal of difference between taking over a market, which is a complete institution there, and the total reconstruction of the old market. We carry an appropriation here for \$500 for the purpose of improving the market in the sense that we take care of the property which is there, or maintain the market, but here comes the proposition now, under this language, to build an entirely new market, an entirely new wharf, and for that reason the point of order, in our opinion, should be sustained.

Mr. JOHNSON of Kentucky. Will the gentleman yield?

Mr. SISSON. I yield to the gentleman.

Mr. SISSON. I yield to the gentleman.

Mr. JOHNSON of Kentucky. I would like to invite the attention of the gentleman to the fact, Mr. Chairman, that this fish-wharf market act is found on page 3 of the copy of the current law, which we all have before us, and in that there is no provision whatever for any expenditures toward building. Therefore they can not claim—

Mr. SISSON. Absolutely not.

Mr. JOHNSON of Kentucky (continuing). That this is a continuation of a work that is in progress.

The CHAIRMAN. The Chair is ready to rule.

The only provision covering this matter that has been referred to the Chair is found on page 3 of the current law, which reads as follows:

And the Commissioners of the District of Columbia are authorized and directed in the name of the District of Columbia to take over, exclusively control, regulate, and operate as a municipal fish wharf and market, the water frontage on the Potomac River lying south of Water Street between Eleventh and Twelfth Streets, including the buildings and wharves thereon, and said wharf shall constitute the sole wharf for the landing of fish and oysters for sale in the District of Columbia; and said commissioners shall have the power to make leases, fix and determine rentals, wharfage and dockage fees, and to collect and pay the same into the Treasury, one-half to the credit of the United States and one-half to the credit of the District of Columbia.

Now, the rule relating to this subject is section 2 of Rule XXI, which is as follows:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress.

This is not a work in progress, is not authorized by existing law, and therefore it is subject, in the opinion of the Chair, to the point of order made against it, inasmuch as it would be the construction of a new work. Therefore the point of order is sustained. The Clerk will read.

The Clerk read as follows

Fish wharf and market: Market master and wharfinger, who shall have charge of the landing of vessels, the collection of wharfage and dockage rentals, and the collection of rents for fish houses at the municipal fish wharf and market, \$900; assistant market master, who shall also act as laborer, \$600; in all, \$1,500.

Mr. DONOVAN. Mr. Chairman, I move to strike out the last

The gentleman from Wyoming [Mr. MONDELL] has stated here that these structures are ramshackle affairs, and he has practically stated that there has been no provision to make them good or to put them in good condition.

It strikes me, Mr. Chairman, that the people of the District of Columbia are wards of the Government. They are practically children of the Government. We should provide proper buildings for them and for their markets. I find here several thousand dollars appropriated for automobiles. I find, on listening in the House yesterday, that we are going to provide for many millions of dollars for several hundred miles of railway, and we will probably never see a penny of it again. Right here at the seat of your Government, the Capital of your country, you allow a man to rise and state that you are maintaining ramshackle buildings, buildings in decay, and have no provision in your great appropriation bill for putting them in good order. It ought to bring to shame a great lawmaking body to allow transactions of this character. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Office of superintendent of weights, measures, and markets: Superintendent, \$2,500; 2 assistants, at \$1,200 each; clerk, \$1,200; laborer, \$480; in all, \$6,580.

For purchase of small quantities of groceries, meats, provisions, etc., in connection with investigation and detection of sales of short weight and measure, \$50.

Mr. CARY. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the subcommittee on appropriations a question about this item for the purchase small quantities of groceries, meats, provisions, and so forth. I wish to inquire if before his committee he was told what becomes of these things after they had been used for investigation. What do they do with them afterwards?

Mr. PAGE of North Carolina. This appropriation is made so that some agent of the Commissioners of the District of Columbia can go into the grocery stores and elsewhere and buy some small articles for the purpose of testing the weights of the grocers and other people who are selling things to the people of the District of Columbia. It is a sort of measure to enable them to detect whether or not proper weights are given by the grocers

Mr. CARY. Then they are destroyed afterwards?

Mr. PAGE of North Carolina. Yes. Mr. FOWLER. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from North Carolina yield?

Mr. PAGE of North Carolina. Yes; I yield.

Mr. FOWLER. Does the gentleman object to extending that authority by giving them the right also to go into the markets? We have several of them here.

Mr. PAGE of North Carolina. I think the authority would include markets.

Mr. FOWLER. Not only to inspect the false weights, but also inspect false representations as to the quality as well as quantity?

Mr. PAGE of North Carolina. Well, I will say to the gentle-man that that falls under another department altogether of the city government. The health department of the District government has ample authority and means, and has employees for the very purpose of inspecting foodstuffs, as to their quality and everything in connection with them, before they are sold to the people of the District.

Mr. FOWLER. I will say to the gentleman from North Carolina that there is a practice in this city by men coming from the country as hucksters who pretend to sell fresh produce, such as fresh eggs, while, as a matter of fact, they go to coldstorage warehouses, load up their wagons with cold-storage eggs, haul them to the country, and bring them back and sell them

in the city as fresh eggs.

Mr. PAGE of North Carolina. I think that is within the purview of the food inspection, under the department of health. This committee has endeavored to provide that department of the city government with ample force to enforce these laws in the District of Columbia. We do not want a duplication of authority in the enforcement of the health laws, so that I think that has no place with this particular appropriation. to detect the fact if there are short weights.

Mr. FOWLER. I think quantity and quality should go together; an imposition in either of these instances is a great detriment. The one, shortage in weight, is perhaps not as important as the other, stale eggs, which affects the health of the

Mr. PAGE of North Carolina. I will say to the gentleman that he must realize that the determination of the quality of the food product may necessitate a chemical analysis.

Mr. FOWLER. That is true.

Mr. PAGE of North Carolina. And therefore-and properly, in my judgment—the appropriation is made to look after these things under the department of health, where they have an inspection force to do it. It would not be a proper place to have here an item of that sort. This item is under the direction of the commissioners, who are not to be expected under this provision to enforce the health laws.

Mr. FOWLER. The object is to prevent a fraud. You want to prevent fraud as to weight by this \$50 appropriation. I would like to prevent fraud in the false representations that are made in the markets, both as to quantity and quality.

Mr. PAGE of North Carolina. The proper place to do that, if the gentleman can find some place to suit his fancy, will be under the bureau of health and the inspection of foodstuffs in the District of Columbia.

The CHAIRMAN. Without objection, the pro forma amendment will be considered withdrawn. The Clerk will read:

The Clerk read as follows:

ment will be considered withdrawn. The Clerk will read:

The Clerk read as follows:

.ngineer Commissioner's office: Engineer of highways, \$3,000; engineer of bridges, \$2,250; superintendent of streets, \$2,000; superintendent of suburban roads, \$2,000; superintendent of sewers, \$3,300; asphalts and cements—inspector \$2,400: Provided, That the inspector of asphalts and cements shall not receive or accept compensation of any kind from or perform any work or render any services of a character required of him officially by the District of Columbia to any person, firm, corporation, or municipality other than the Distlet of Columbia; assistant inspector \$1,500; trees and parkings—superintendent \$2,200, assistant superintendent \$1,200; assistant engineers—one \$2,200, one \$2,100, four at \$1,800 each, two at \$1,600 each, four at \$1,500 each, one \$1,050; rodmen—four at \$900 each, eight at \$780 each, one \$1,050; rodmen—four at \$900 each, eight at \$780 each, inch \$1,050; rodmen—four at \$900 each, eight at \$780 each, one \$1,050; sasistant engineer, \$1,350; general inspector of sewers, \$1,200; bridge inspector, \$1,200 each, one \$1,050; assistant engineer, \$1,350; general inspector of sewers, \$1,200; inspectors—two at \$1,500 each, five (including two of streets) at \$1,200 each, one \$1,000, one \$900; transitman, \$1,200; foremen—twelve at \$1,200 each, one \$1,000, ten at \$900 each; foreman, Rock Creek Park, \$1,200; three subforemen, at \$1,500 each; bridgekeepers—one \$650, three at \$600 each; chief clerk, \$2,250; permit clerk, \$1,500; assistant permit clerk, \$1,000; findex clerk and typewriter, \$900; clerks—one \$1,800, three at \$1,500 each, one \$4,000 each; skilled laborers—one \$625, two at \$600 each; janitor, \$720; principal steam engineer, \$1,800; three steam engineers, at \$1,200 each; six ollers, at \$600 each; six firemen, at \$8750 each; inspector, \$1,400; store-keeper, \$900; superintendent of standers, at \$600 each; in all, \$175,010.

Mr. FOW

Mr. FOWLER. Mr. Chairman, I reserve a point of order

against the paragraph. Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

Mr. CULLOP. Mr. Chairman— Mr. PAGE of North Carolina. Mr. Chairman, will the gentleman from Illinois [Mr. Fowler] state his point of order?

Mr. FOWLER. I desire, on page 8, line 14, to ask the gentleman in charge of the bill if the assistant engineer at \$1,350 is not new legislation?

Mr. PAGE of North Carolina. No, sir; it is not. I will explain to the gentleman that that item makes no change whatever in the amount of the appropriation. It is merely a change

of title. He is now in the law as a draftsman at \$1,350. The change was made to an assistant engineer to conform to the man's real employment. He is in no sense of the word a draftsman, but is an assistant engineer, and the change was made to designate his employment properly.

Mr. FOWLER. It is only a change of name?

Mr. PAGE of North Carolina. It is only a change of name, and there is one other case exactly like it.

Mr. FOWLER. In line 18, a transit man.

Mr. PAGE of North Carolina. Yes. The same is true there. It is a change from inspector of streets at \$1,200 to a transit man at \$1,200, for the same reason, so that the designation may conform to the employment of the man who fills that position.

Mr. FOWLER. I withdraw the point of order. Mr. STAFFORD. I move to strike out the last word.

Mr. MANN. What became of the point of order?

Mr. MANN. What became of the point of order?

Mr. FOWLER. I withdrew it.

Mr. STAFFORD. I rise for the purpose of obtaining some information. I notice that you ferbid the inspector of asphalt and cement to receive any compensation for work of a public character performed for any person in the District. I assume that there is a general law forbidding employees and officials of the District to receive compensation for other work performed by them.

Mr. PAGE of North Carolina. I think the gentleman's presumption is a violent one, and that there is no such law.

Mr. STAFFORD. There is not?

Mr. PAGE of North Carolina. No.

Mr. STAFFORD. This is the only instance where you forbid District official from accepting any perquisites for the performance of work of a public character for pri ate individuals?

Mr. PAGE of North Carolina. I can not say it is the only place, but I can inform the gentleman that it has been carried for several years, and was put in particularly to protect the Government in this instance.

Mr. MANN. If the gentleman will permit me, I think I can

explain it.

Mr. STAFFORD. It needs explanation.

MANN. The inspector of asphalt was not formerly an official employed all the time by the District. In fact, in the nature of things he was a consulting inspector and was, in addition, doing inspection work outside. This provision was originally put in the bill to compel him to give his whole attention to District work, so that they could not employ him simply as a consulting inspector.

Mr. PAGE of North Carolina. I think, if the gentleman will allow me, that is correct, except that at the time this was done this gentleman had a designated salary and was drawing a salary from the District government, but was giving a part of his time to the inspection of asphalt for private corporations.

Mr. MANN. I understand that; but I say it was not under-

stood at the time his employment commenced that he should give his entire time to the District.

Mr. PAGE of North Carolina. That is true.
Mr. MANN. And it was decided to change it so that he would have to do that, or else allow the District to get some one else.
Mr. PAGE of North Carolina. That is correct.

Mr. STAFFORD. As I understand from the explanation of the gentleman, he is now giving his entire time to the work of the District?

Mr. PAGE of North Carolina. Yes. Mr. STAFFORD. As are hundreds of other District officials? Mr. PAGE of North Carolina. They are supposed to be do-

ing so.

Mr. STAFFORD. What is the need of singling him out for prominent mention that he is not to receive perquisites from

private sources?

Mr. PAGE of North Carolina. I will say to the gentleman that this particular subcommittee did not single him out. Undoubtedly there was a reason at the time it was put there, and to leave it out now might be construed as notice to this gentleman that he was at liberty to go out and do as he formerly did, and I do not think that would be wise.

Mr. STAFFORD. So far as the chairman is informed, there is no other instance of District officials performing outside work

and receiving perquisites from private individuals?

Mr. PAGE of North Carolina. None within the knowledge of the present chairman.

Mr. STAFFORD. I withdraw the pro forma amendment.

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. PAGE of North Carolina. I yield to the gentleman from Colorado.

Mr. SELDOMRIDGE. If this is the only place in the bill where such a provision is carried, would it not be possible to incorporate a general provision that would prohibit and forbid any District official from receiving any gratuity or any outside

employment?

Mr. PAGE of North Carolina. Certainly. I think, however, that it would occasion a very great demand for increase of salaries on the part of some gentlemen who are employed by the District.

Mr. CULLOP. I should like to ask the gentleman from North Carolina a question.

Mr. PAGE of North Carolina. I yield to the gentleman from

I find here an appropriation for an engineer

of bridges, \$2,250. What is the cuty of that official? Mr. PAGE of North Carolina. The District of Columbia is constantly constructing bridges. There are two large bridges

under authorization and contract, one concrete bridge on Pennsylvania Avenue, leading over to Georgetown, and the other at Q Street, leading over to Georgetown. He is employed in the capacity of superintendent of construction.

Mr. CULLOP. Do his duties require all of his time? Mr. PAGE of North Carolina. I think so.

Mr. CULLOP. I see there is a superintendent of suburban

roads, at \$2,000.

ads, at \$2,000. What are his duties? Mr. PAGE of North Carolina. His duties are to superintend and overlook the appropriations that are carried in the bill for suburban roads; roads not designated as streets, but which are constantly being repaired.

Mr. CULLOP. About a year ago a gentleman living over in Virginia adjacent to the city of Washington reported this kind of a case to me in which he said they wanted to build an interurban road into Washington from that locality, traversing a They found that they could not get admission part of Virginia. to the streets of the city of Washington, that they could only come to the line and then must be carried on the street railway of the city of Washington. Is there any such franchise granted to the street railways of the city of Washington which excludes

outsiders from the rights of the streets of the city?

Mr. PAGE of North Carolina. Without investigating the sub-

ject I should say that no, there was not.

Mr. CULLOP. If there was any such, it ought to be promptly repealed. Such a monopoly would be intolerable, and to permit it to remain would be most reprehensible.

Mr. PAGE of North Carolina. I agree with the gentleman.

Mr. CULLOP. Outside roads should have a right to come into the city and occupy the streets in order to accommodate the public and furnish competition in transportation.

Mr. MANN. Mr. Chairman, I move to strike out the last

word.

Mr. PAGE of North Carolina. Mr. Chairman, I suggest to the gentleman from Illinois that we proceed until half past 5 o'clock.

Mr. MANN. Suppose we read the next paragraph which the gentleman from Wyoming will offer an amendment to.

Mr. PAGE of North Carolina. I suggest that we let that be

The Clerk read as follows:

Municipal architect's office: Municipal architect, \$3,600; superintendent of construction, \$2,000; chief draftsman, \$1,700; draftsmen—1, \$1,400, 1, \$1,300; heating, ventilating, and sanitary engineer, \$2,000; superintendent of repairs, \$1,800; assistant superintendent of repairs, \$1,200; hoss carpenter, boss tinner, boss painter, boss plumber, boss steam fitter, 5 in all, at \$1,200 cach; boss grader, \$1,000; machinist, \$1,200; clerks—1, \$1,050, 1, \$620; copyist, \$840; driver, \$540; in all, \$26,250.

Mr. JOHNSON of Kentucky. Mr. Chairman, the Committee of the Whole has just been discussing the proviso on page 8 relating to an inspector of asphalt. There has been considerable complaint that the draftsmen in the municipal architect's office are taking fees from other people, and I believe that the proviso which applies to the inspector of asphalt should also be made applicable to this paragraph.

Mr. SELDOMRIDGE. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. SELDOMRIDGE. What objection would there be to inserting a general provision that will confine the services of all the employees in the District to the duties of their position?

Mr. JOHNSON of Kentucky. I think it would be a wise

Mr. SELDOMRIDGE. The gentleman from North Carolina says that if we did that there would be many employees who

would want an advance in pay.

Mr. PAGE of North Carolina. Oh, I said that they might do

Mr. SELDOMRIDGE. I want to say that there are several citizens in my district that would be glad to move into Washington and take those same positions.

Mr. MANN. I am glad that the gentleman is coming to my defense. Will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. MANN. The case of the asphalt inspector was entirely

different. When he took employment outside, very likely he got his employment through the asphalt company which had the contract where the inspector was to pass upon the job. But what objection is there to a clerk in the municipal architect's office going to the law school out of hours or doing some drafting work out of hours?

A good many Members of Congress have clerks employed here now who do work either for themselves in going to school or in some other way outside of the work that they do for Members of Congress, and I do not think that that is objectionable.

Mr. JOHNSON of Kentucky. I think the situation is quite different from the one that the gentleman pictures. There is a common complaint that draftsmen in the municipal architect's office find some kind of technical fault with many of the plans and drafts submitted by the architects in town, until finally it has become a business to find fault with the plans of other architects and approve only the drafts or plans made by themselves.

I am also told that one of them has an office in town and is doing this character of work. I have not had the time to ascertain whether these charges are true or not, but that is the common rumor. The rumor could be stopped if we apply to this the same provision that applies to the inspector of asphalt. Therefore, Mr. Chairman, I move to amend that paragraph by adding the following:

Provided, That none of the officers, clerks, or other employees provided for in this paragraph shall receive or accept compensation of any kind from, or perform any work or render any services of a character required of them officially by the District of Columbia—

The CHAIRMAN. The gentleman will send that amendment

to the desk in writing.

Mr. MANN. Mr. Chairman, I reserve a point of order to it. Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee determined to rise; and the Speaker having resumed the chair, Mr. Hull, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, and had come to no resolution thereon.

SESSION CLERKS FOR COMMITTEES.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk

The Clerk read as follows:

House resolution 351.

House resolution 351.

Resolved, That the Committee on Expenditures in the Department of Agriculture, the Committee on Expenditures in the Department of Justice, the Committee on Expenditures in the Department of Commerce, the Committee on Expenditures in the Department of the Interior, the Committee on Expenditures in the Department of Labor, the Committee on Expenditures in the Navy Department, the Committee on Expenditures in the Post Office Department, the Committee on Expenditures in the State Department, the Committee on Expenditures in the Trensury Department, the Committee on Expenditures in the Trensury Department, the Committee on Expenditures in the War Department, and the Committee on Expenditures on Public Buildings, each be allowed a clerk at the rate of \$125 per month during the second session of the Sixty-third Congress, the salaries of said clerks to be paid out of the contingent fund of the House; and H. Res. 260, adopted December 4, 1913, is hereby repealed.

The SPEAKER. Is there objection?

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I am not sure that the House can repeal a resolution. It can change it, but the proper thing to do would be to ask unani-

mous consent to reconsider the other resolution.

Mr. LLOYD. Mr. Speaker, in the resolution that was passed a day or two ago providing for pay of these clerks in these several committees, we left out the Committee on Expenditures in the Agricultural Department, and we also failed in the resolution to show out of what fund the money was to be paid.

Mr. MANN. The gentleman will remember I asked him whether it carried 10 committees?

Mr. LI.OYD. Yes; I remember and it did carry 10, but it should have carried 11.

Mr. MANN. What is the other committee—that is not an

expenditure committee?

Mr. LLOYD. Labor.

Mr. MANN. Oh, there is one on public buildings.

Mr. LLOYD. Yes.

The SPEAKER. Does the gentleman object?

Mr. MANN. I shall not object. I never before knew any-

body to repeal a resolution.

Mr. LLOYD. There was one repealed two months ago when

the gentleman and I were away.

Mr. MANN. Oh, there is no telling what happened then.

What time does this resolution date from?

Mr. LLOYD. This, the beginning of the session.

Mr. MANN. Is that what the resolution says?

Mr. LLOYD. Yes.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the resolu-

The resolution was agreed to.

ADJOURNMENT.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. Is there objection?

Mr. FOWLER. Reserving the right to object, I would like

to know the occasion for changing the time of meeting?

Mr. PAGE of North Carolina. The occasion in the mind of the gentleman who submits that request is a desire to get through with this appropriation bill.

Mr. FOWLER. I object.

Let us see if we can not get some sort of an ar-Mr. MANN. rangement otherwise. Supposing we should not conclude tomorrow, may we not be able to get an agreement to meet at 10 o'clock on Saturday?

Mr. PAGE of North Carolina. That would be entirely satisfactory; but it is useless for myself and the gentleman to argue it since the gentleman from Illinois [Mr. Fowler] objects.

The SPEAKER. The gentleman from Illinois [Mr. FOWLER]

objects

Mr. PAGE of North Carolina. Mr. Speaker, I move that the

House de new adjourn.

The metion was agreed to; and accordingly (at 5 o'clock and 28 minutes p. m.) the House adjourned until to-morrow, Friday, December 19, 1913, at 12 o'clock noon.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 8522) granting an increase of pension to Jefferson Hurst, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:
By Mr. EDMONDS: A bill (H. R. 10937) appropriating \$155, 000 to purchase additional ground at Frankford Arsenal, Phila-

delphia, Pa.; to the Committee on Appropriations.

By Mr. MERRITT: A bill (H. R. 10938) providing for a survey of Lake Champlain at Rouses Point, N. Y., and vicinity; to

the Committee on Rivers and Harbors. By Mr. LANGHAM: A bill (H. R. 10939) to provide for a site for a public building for post-office purposes at Blairsville, Pa.;

to the Committee on Public Buildings and Grounds. By Mr. POWERS: A bill (H. R. 10940) authorizing an appropriation and expenditure to make a survey and procure an estimate of the cost of the construction of a macadamized post road from Crab Orchard, Ky., to Cumberland Gap, in said State, said road to be known as "The Boone Way"; to the Committee on the Post Office and Post Roads.

By Mr. LEVER: A bill (H. R. 10941) authorizing the Director of the Census to collect and publish statistics of cotton seed and

cottonseed products; to the Committee on the Census.

By Mr. BALTZ: A bill (H. R. 10942) providing for the furnishing of information as to the yield of grain in the United States and Territories, and for other purposes; to the Committee on Agriculture.

By Mr. HAYES: A bill (H. R. 10943) to amend the naturalization laws; to the Committee on Immigration and Naturalization. By Mr. STEENERSON: A bill (H. R. 10944) prohibiting false

and misleading advertising; to the Committee on the Post Office and Post Roads

By Mr. DYER: A bill (H. R. 10945) amending section 2 of the pension act of June 27, 1890; to the Committee on Invalid Pensions.

By Mr. McCOY: A bill (H. R. 10946) to regulate the judicial procedure of the courts of the United States; to the Committee on the Judiciary

By Mr. COVINGTON: A bill (H. R. 10947) providing for the establishment of a life-saving station between Ocean City and Pensions.

North Beach, on the coast of Worcester County, in the State of Maryland; to the Committee on Interstate and Foreign Com-

By Mr. HARRISON: A bill (H. R. 10948) to encourage and promote commerce among the States and with foreign nations, and to remove obstructions thereto; to the Committee on Agri-

By Mr. BROWNING: A bill (H. R. 10949) to prohibit the payment of claims against the United States to public administrators, except in certain instances; to the Committee on the Judiciary.

By Mr. MOTT: A bill (H. R. 10950) to provide for an examination and survey of the Harbor at Oswego, N. Y.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10951) for the erection of a public building at Oneida, N. Y.; to the Committee on Public Buildings and

By Mr. JOHNSON of Kentucky: A bill (H. R. 11002) to amend the act of March 4, 1913, entitled "An act making appropriations to provide for the expenses of the government the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes"; to the Committee on the District of Columbia.

By Mr. SMITH of Minnesota: Joint resolution (H. J. Res. 174) regulating transmission of mails during holiday season; to the Committee on the Post Office and Post Roads.

By Mr. GRIEST: Joint resolution (H. J. Res. 176) providing for the adjournment of Congress; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:
By Mr. ADAIR: A bill (H. R. 10952) granting a pension to

Otho E. Gepler; to the Committee on Pensions.

By Mr. AINEY: A bill (H. R. 10953) granting a pension to Gilbert D. Smith; to the Committee on Invalid Pensions,

Also, a bill (H. R. 10954) granting an increase of pension to Solomon D. Brenckley; to the Committee on Invalid Pensions. Also, a bill (H. R. 10955) granting an increase of pension to

John Smith; to the Committee on Invalid Pensions.

By Mr. ANTHONY: A bill (H. R. 10956) granting an increase of pension to Judson N. Pollard; to the Committee on Invalid

Pensions. By Mr. BALTZ: A bill (H. R. 10957) for the relief of James

W. Kingon; to the Committee on War Claims.

By Mr. BARTHOLDT: A bill (H. R. 10958) granting an increase of pension to Loyd G. Harris; to the Committee on Invalid Pensions.

By Mr. BOOHER: A bill (H. R. 10959) granting a pension to William H. Watson; to the Committee on Pensions.

By Mr. COVINGTON: A bill (H. R. 10960) for the relief of William E. Bradshaw; to the Committee on War Claims. By Mr. CRAMTON: A bill (H. R. 10961) granting an increase

of pension to James Stewart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10962) granting an increase of pension to

William Adamson; to the Committee on Pensions.

By Mr. DAVENPORT: A bill (H. R. 10063) granting an increase of pension to Edword T. Parker; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 10964) granting an increase of pension to Charles H. Golden; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10988) granting an increase of pension to Frank Kesler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10989) granting an increase of pension to Ellen M. Mills; to the Committee on Invalid Pensions

Also, a bill (H. R. 10990) granting a pension to Maggie Martin; to the Committee on Invalid Pensions.

By Mr. SCULLY: A bill (H. R. 10991) granting a pension to Ada Smith Condict; to the Committee on Pensions.

Also, a bill (H. R. 10992) to remove the charge of desertion now existing on the records of the War Department against Alfred Jewett Cook; to the Committee on Military Affairs

By Mr. SHARP: A bill (H. R. 10993) granting a pension to

Emily Linehos; to the Committee on Pensions.

Also, a bill (H. R. 10994) granting a pension to John G. Schrock; to the Committee on Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 10995) granting an increase of pension to James W. Shields; to the Committee on Invalid Pensions

By Mr. SPARKMAN: A bill (H. R. 10996) granting a pension to Barbara E. Thomas; to the Committee on Invalid Pensions. By Mr. STEPHENS of Texas: A bill (H. R. 10997) to cancel

the allotment of Ollie House; to the Committee on Indian Affairs.

By Mr. TALBOTT of Maryland: A bill (H. R. 10998) for the relief of the heirs of Ann Gregory, deceased, widow of Charles N. Gregory, deceased, purchaser; to the Committee on War

By Mr. TAYLOR of Arkansas: A bill (H. R. 10999) for the relief of the legal representatives of Jennie Hunter, deceased; to the Committee on War Claims.

By Mr. WHITACRE: A bill (H. R. 11000) granting an increase of pension to Charles M. Reilly; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11001) granting an increase of pension to Franklin I. Gilbert; to the Committee on Invalid Pensions. By Mr. KINDEL: Joint resolution (H. J. Res. 175) for the

recognition of the services of the late Hon. John H. Marble, secretary and later a member of the Interstate Commerce Commission, and for the relief of Mattie Louise Marble; to the Committee on Appropriations.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANSBERRY: Memorial of the Youngstown Association of Credit Men, favoring the passage of a bill for flood control; to the Committee on Rivers and Harbors.

By Mr. BARNHART: Petition of business men of Elkhart, Goshen, New Paris, and four other towns of the thirteenth dis-

trict of Indiana, favoring the passage of legislation compelling concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the local community, county, and State; to the Committee on Ways and Means.

By Mr. CALDER: Petition of United Master Butchers' Association of America, of Brooklyn, N. Y., favoring the passage of the cold-storage bill; to the Committee on Interstate and Foreign Commerce.

By Mr. CARY: Petition of Merchants and Manufacturers' Association of Milwaukee, Wis., protesting against the passage of the seamen's bill (S. 136); to the Committee on the Merchant Marine and Fisheries.

By Mr. CRAMTON: Petition of citizens of the seventh congressional district of Michigan, favoring the passage of the Lindquist pure fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the common council of St. Clair and 14 other clubs, councils, associations, etc., of the seventh congressional district of Michigan, all protesting against the passage of Senate bill 136 unless amended to conform to the interests of the Great Lakes and river commerce; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Retail Grocers and General Merchants' Association of Michigan, favoring the passage of legislation to fix a Federal standard of measure for fruits, vegetables, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Michigan State Grange, favoring the passage of an amendment to the Constitution of the United States to grant suffrage to women, and asking the appointment of a House committee on woman suffrage; to the Committee on the Judiciary

By Mr. DALE: Petition of the E. C. Brown Co., of Rochester, N. Y., favoring 1-cent letter postage; to the Committee on the Post Office and Post Roads.

Also, petition of United Master Butchers' Association of America, of Brooklyn, N. Y., favoring the passage of the cold-storage bill; to the Committee on Interstate and Foreign Com-

By Mr. DYER: Petition of the Federation of Jewish Farmers of America, favoring the passage of a bill for adequate rural credit facilities; to the Committee on Banking and Currency.

By Mr. EAGAN: Petition of sundry residents of the eleventh

congressional district of New Jersey, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. ESCH: Papers to accompany bill (H. R. 10756) granting a pension to Charles P. Dyrud; to the Committee on Pensions.

By Mr. FRANCIS: Petition of the Youngstown Association of Credit Men, favoring the passage of such legislation that will prevent floods on the Mississippi River; to the Committee on Rivers and Harbors.

By Mr. GOEKE: Petition of Evans Bros., Cincinnati, Ohio, and 90 other firms of Ohio, in support of House bill 4322, the 1-cent letter postage rate; to the Committee on the Post Office and Post Roads.

By Mr. GREEN of Iowa: Papers to accompany bill (H. R. 10972) granting an increase of pension to Mary A. Slack; to the Committee on Invalid Pensions.

By Mr. GRIFFIN: Petition of the United Master Butchers' Association of America, of Brooklyn, N. Y., favoring the passage of the cold-storage bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Maritime Association of the Port of New York, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. GUERNSEY: Petition of citizens of the fourth congressional district of Maine, favoring the passage of House bill 5308, to compel concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Ways and Means.

Also, petition of citizens of the fourth congressional district of Maine, favoring the passage of the Lindquist pure fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWELL: Petition of Local No. 377, Journeymen Barbers' Union of America, favoring the passage of House bill 7826, for Sunday closing and shorter hours for barber shops in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of the Trades and Labor Assembly and the Utah State Federation of Labor, Ogden, Utah, both favoring the passage of House bill 1873, granting the use of the waters of

the Hetch Hetchy Valley to the people of San Francisco, Cal.;

to the Committee on the Public Lands.

By Mr. KENNEDY of Rhode Island: Petition of the Marathon Club, of Providence, R. I., protesting against the segregation of the colored employees in the Government departments; to the Committee on the District of Columbia.

By Mr. MacDONALD: Memorial of the Trades and Labor Council of Hancock, Mich., favoring an investigation of the strike situation in the upper peninsula of Michigan; to the Com-

mittee on Labor.

Also, petition of 700 residents of Hancock and residents of Ironwood, Mich., favoring an investigation by Congress of the strike situation in the Upper Peninsula of Michigan; to the Committee on Labor.

Also, petition of W. S. Felton and other citizens of Engadine and residents of Ironwood, Hubbell, and Lake Linden, Mich., favoring the passage of the Lindquist pure-fabric and leather bill; to the Committee on Interstate and Foreign Commerce.

By Mr. McGILLICUDDY: Memorial of Local No. 11 (Livermore Falls, Me.) of the International Brotherhood of Paper Manufacturers, favoring the passage of House bill 1873; to the

Committee on the Judiciary.

Also, petition of sundry citizens of the State of Maine, favoring the passage of the pure-fabric bill; to the Committee on Interstate and Foreign Commerce.

By Mr. PADGETT: Petition of citizens of the seventh congressional district of the State of Tennessee, favoring the passage of the Lindquist pure fabric and leather bill; to the Com-

mittee on Interstate and Foreign Commerce.

By Mr. POWERS: Memorial of sundry citizens of the State of Michigan, protesting against certain provisions of the seamen's bill; to the Committee on the Merchant Marine and Fish-

By Mr. SCULLY: Memorial of the council of the city of Benton Harbor and Benton Harbor Development Co., of Michigan, and citizens of Highlands, Red Bank, Sea Bright, and Elberon and other points in New Jersey, protesting against the passage of the seamen's bill in its present form; to the Committee on

the Merchant Marine and Fisheries.

By Mr. THACHER: Petitions of the Board of Selectmen of Plymouth, favoring bill for enlargement, deepening, and maintenance of Government basin near wharves in Plymouth Harbor, and the Onset (Mass.) Board of Trade and Boston Marine Society, favoring proper aids to navigation at either end of the Cape Cod Canal; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of the Ship Masters' Association, Lodge No. 4. at Cleveland, Ohio, favoring an investigation by the necessary committee of Congress of conditions on the Great Lakes before reporting out the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

SENATE.

FRIDAY, December 19, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

The Secretary proceeded to read the Journal of yesterday's proceeding, when, on request of Mr. Overman and by unanimous consent, the further reading was dispensed with, and the Journal was approved.

CALLING OF THE ROLL.

Mr. DU PONT. Mr. President, I suggest the absence of a

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Bacon	Gallinger	Martine, N. J.	Smith, Ariz.
Bankhead	Goff	Myers	Smith, Ga.
Brady	Gore	Norris	Smith, Md.
Brandegee	Gronna	O'Gorman	Smith, S. C.
Bristow	Hollis	Overman	Smoot
Bryan	Hughes	Owen	Sterling
Burton	Jackson	Page	Sutherland
Catron	James	Perkins	Swanson
Chamberlain	Johnson	Pittman	Thomas
Chilton	Jones .	Ransdell	Townsend

du Pont	McCumber	Shively	
Wlatahan	Mantin Vo	Cimmons	

RANSDELL. I wish to announce that my colleague [Mr. THORNTON] is unavoidably absent. He is paired with the and telegram be read.

Senator from South Dakota [Mr. STERLING]. I ask that this announcement may stand for the day.

Mr. SHEPPARD. I wish to announce the unavoidable absence of my colleague [Mr. Culberson] and to state that he is

paired with the Senator from Delaware [Mr. Du Pont]. This announcement will stand for the day.

Mr. REED. I wish to announce the necessary absence of my colleague [Mr. STONE]. He is confined to his room by sickness. My colleague is paired with the Senator from Wyoming [Mr. CLARK].

Mr. WEEKS. I wish to state that my colleague [Mr. Lodge] is absent on account of sickness and to have this statement stand for the day

The VICE PRESIDENT. Seventy Senators have answered to the roll call. There is a quorum present.

BATTLE MONUMENTS, BULL RUN, VA. (H. DOC. NO. 481).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a copy of the report of the board of officers appointed by the War Department to consider the protection of the monuments already erected on the battlefield of Bull Run, Va., and other monuments that may be there erected. communication will be referred to the Committee on Military Affairs and printed. It is accompanied by papers and illustrations, which will also be referred to the committee, but which will not be printed unless ordered.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House had passed the bill (H. R. 11003) to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the Vice President:

S. 2689. An act amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes; and

H. J. Res. 165. Joint resolution for recognition of the services of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis

Gaillard.

PETITIONS AND MEMORIALS.

Mr. JAMES. Mr. President, I send to the desk a telegram received yesterday from various national banks in Kentucky and ask that it may be read.

There being no objection, the telegram was read, as follows: Louisville, Ky., December 13, 1913.

Hon. OLLIE M. JAMES, Washington, D. C .:

Hon. Ollie M. James, Washington, D. C.:

We have sent the following telegram to Senator Owen:

"Referring to section 22, page 73, line 19, currency bill, should not the words 'or from the directors of such bank' be inserted after the words 'Comptroller of the Currency'? The Louisville Clearing House Association has recently appointed a special examiner, believing such a step to be in line with modern banking, safety, and developments. It is the unanimous opinion of the association that the scope of the examiner will be narrowed to such an extent that the value of the examinations will be greatly impaired."

National Bank of Kentucky, by H. D. Ormsby, cashier; National Bank of Kentucky, by S. Gaines, assistant cashier; Citizens National Bank, by S. S. Gaines, assistant cashier; Citizens National Bank, by H. C. Rodes, president; German Insurance Bank, by H. C. Walbeck, president; German Bacurity Bank, by Chas. Bohmer, president; German Bank, by P. Viglini, president; Louisville National Bank, by J. D. Stewart, president; Union National Bank, by J. D. Stewart, president; American National Bank, by L. C. Murray, president; Fidelity & Columbia Trust Co., by L. M. Render, secretary.

Mr. JAMES. I desire to state that an amendment has already been adopted to the substitute proposed by the Senator from Oklahoma [Mr. Owen] which incorporates the words suggested in the telegram.

Mr. BURTON. I present a petition signed by approximately 4,800 employees of the National Tube Co., of Lorain, Ohio. This is a constituent corporation of the United States Steel Corporation. The petition relates to the suit now pending for the dissolution of the Steel Co. I ask that the accompanying letter

Mr. KENYON. I think the heading of the petition might properly be read, too.

Mr. BURTON. Very well.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

LORAIN, OHIO, November -, 1913.

Hon. THEODORE BURTON, United States Senate, Washington, D. C .:

United States Senate, Washington, D. C.:

We, the undersigned employees of the National Tube Co., a subsidiary company of the United States Steel Corporation, noticing in the papers that suit has been instituted in the courts by order of our Government for the purpose of dissolving it, we, the signers of this petition, desire to enter this as a protest against such action, as we think our interests will be injured. The company that we are employed with has been very solicitous of our welfare, sparing neither time nor money to make our working conditions better. Conditions are better now under the United States Steel Corporation than ever existed before. Many of us workmen are reaching the age when we will be eligible for the pension fund, which will be of great benefit to us and our dependents. We have also taken advantage of the privilege of subscribing for stock, which has been of great benefit to many of us in the way of large returns. We all feel satisfied under the conditions we work: that when injured the company looks after our welfare, and also helps us in a financial way. We therefore ask you that you use your good offices and your good influence to have this suit stopped, as we think it will be an injury to all of us employees of the United States Steel Corporation.

LORAIN, OHIO, December 18, 1913.

Senator T. E. Burton,
Senate Chamber, Washington, D. C.:
Approximate number of signatures is 4,800.

W. W. ROBBINS.

LORAIN, OHIO, December 13, 1913.

Hon. THEODORE E. BURTON, Washington, D. C.

DEAR SIR: We, the signers of this letter, are a self-appointed committee of the employees of the National Tube Co., Lorain, Ohio, who have circulated a petition to the Government to stop its dissolution suit against the United States Steel Corporation, which we are forward-

suit against the United States Steel Corporation, which we are forwarding by express.

The signers to this petition were obtained without assistance from the officials of the company. In fact, more than 1,000 names were secured before the matter was brought to their attention. The sentiment expressed herein represents the feeling existing between the men of these mills and the United States Steel Corporation.

We therefore respectfully request that you use your good offices to the extent that this sentiment may be presented at the proper time and place

place. Yours, very respectfully,

W. W. ROBINS, Chairman. K. A. DAUGHERTY. JOHN W. PRICE.

The VICE PRESIDENT. The petition will be referred to

the Committee on the Judiciary.

Mr. THOMAS. I wish to offer, in connection with the petition just presented by the Senator from Ohio [Mr. Burton], a short editorial from the Saturday Evening Post, which was published some time ago, and which I think it appropriate should appear in the RECORD:

THE WRONG AND THE REMEDY.

Originally the common stock of the Steel Corporation was thinner than water, but it is not now. The last annual report shows that, first and last, \$600,000,000 of net earnings have been used for the purpose of solidifying the water. One hundred and seventy-five million dollars have been paid in dividends on the common stock. Four hundred and twenty-five million dollars of earnings have been appropriated for the purchase of additional property for new construction and for the retirement of mortgage liens—all to the benefit of the common stock.

Six hundred million dollars is far more than three years' full wages for every hand employed by the corporation. Last year, after deducting approximately \$45,000,000 from earnings for ordinary repairs and maintenance, the corporation further deducted twenty-two millions for extraordinary replacements and twenty-five millions for common-stock dividends. These two sums—applied to strengthen the common stock—would have increased the pay of every employee, from the president down, by 25 per cent.

That common-stock issue was an economic crime. It puts a perpetual handicap upon higher pay, shorter hours, and lower prices; but any corporation is still at liberty to issue all the common stock it pleases—if not in one State, then in another. Here is a very tangible trust evil that legislation can easily cure. Why does not legislation go about it? The wrong is patent; the remedy at hand. We should rejoice to see one practical step taken by the Federal Government on this trust subject.

Mr. WEEKS. I present resolutions adopted at a recent

Mr. WEEKS. I present resolutions adopted at a recent meeting of the Massachusetts State Board of Trade, relating to the pending currency legislation. I should like to have the resolutions read.

There being no objection, the resolutions were read and ordered to lie on the table, as follows:

MASSACHUSETTS STATE BOARD OF TRADE, Boston, Mass., December 17, 1913.

Hon. John W. Weeks.

United States Senate, Washington, D. C.

DEAR SIR: At a meeting of the executive council of the Massachusetts State Board of Trade held this day the following resolution was unani-

mously passed:

Resolved, That the Massachusetts State Board of Trade protests against the use of the words "gold and lawful money" whenever used in connection with the proposed new issue of currency.

It regards it as essential that the words "lawful money" be eliminated.

It believes there is danger to the stability of our currency if by any possibility it be redeemable in anything but gold.

Very respectfully, yours,

RICHARD L. GAY, Secretary, Per I. L. S.

Mr. WEEKS presented resolutions adopted by the Board of Selectmen of Dedham, Mass., favoring the enactment of legislation providing for the construction of the proposed supply ship for the Navy at the Boston Navy Yard, which were referred to the Committee on Naval Affairs.

Mr. THOMPSON. I desire to present a letter from E. V. Lanyon, president of the First National Bank of Pittsburg, Kans., pertaining to a guaranty of bank deposits, and expressing the sentiments of the bankers, as well as of the people generally, in my State on this important question. I ask to have the letter read at the desk.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

THE NATIONAL BANK OF PITTSBURG, Pittsburg, Kans., December 15, 1913.

WILLIAM H. THOMPSON,
Senate, Washington, D. C.

My Dear Sir: I notice from newspaper reports that there is quite a strong sentiment in the Senate to put a clause in the new currency bill guaranteeing deposits of banks operating under the new currency act.

Kansas, as you well know, has a State guaranty law, and a number of other States have been talking of enacting similar laws for the protection of deposits in State banks.

I think it would be much better for Congress to pass a guaranty law and make it a part of the new currency bill rather than to have the different States enact such laws.

I believe the guaranteeing of bank depositors has come to stay and that before many years all States will have such laws. For this reason I think Congress should enact such a law at this time.

Unless Congress takes some action of this kind national banks will be placed at a disadvantage as compared with State banks.

I think bankers generally have been opposed to the guaranteeing of deposits; but from my observation since Kansas enacted the present law I have changed my mind somewhat on this subject, and I would much rather see a national law passed than to have each State take it up individually.

Hoping that you will give this matter your kind consideration, I am, Yours, truly,

Mr. BURTON. I desire to have read a joint telegram from the president of the Chamber of Commerce and the president of the Credit Men's Association of Youngstown, Ohio, pertaining to the pending banking and currency legislation.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary proceeded to read the telegram-

Mr. SMITH of Arizona. Mr. President, I shall not object to the reading of this telegram, but I shall object to the reading of any other telegrams, thus burdening the RECORD with literature from the outside about matters which we have been studying and on which we have been working here for nearly a year. Now, just on the eve of the passage of the currency bill to be constantly burdening the Record with the opinions of every-body outside of the Chamber seems to me unnecessary so far as furnishing light that we should have on the subject. I repeat that as to this communication I shall not object to it being read, but I shall object to any further requests of this kind.

The VICE PRESIDENT. The Secretary will continue the reading of the telegram.

The Secretary resumed and concluded the reading of the telegram as follows:

Youngstown, Ohio, December 18, 1913.

T. E. BURTON, United States Senate, Washington, D. C.:

United States Senate, Washington, D. C.:

At a joint meeting of the chamber of commerce and the Credit Men's Association, of 494 business men, held this day in this city, the following expression regarding banking and currency legislation was unanimously adopted, and is urged to your earnest consideration:

We favor—

(a) The establishment of a central bank with branches rather than a number of regional banks.

(b) Control of this bank by the Government.

(c) A board of control composed of men representing various lines of business, including banking, who shall be appointed for long terms expiring at different times.

(d) The issuance of currency by this bank rather than by the Government itself.

(e) The maintenance of a gold reserve of not less than 40 per cent against all demand liabilities of the bank, including currency issued, and in addition the segregation by the bank of short-time commercial paper indorsed by national or other member banks in an amount equal to 100 per cent of all currency issued as and by way of special security for such issues.

(f) Retirement of all forms of paper currency now in use, excepting

(f) Retirement of all forms of paper currency now in use, excepting only gold and silver certificates, as soon as such retirement can be effected without disturbance of business or hardship to the Government or the present national banks.

(g) Ownership of this central bank in the hands of the public and of national and other banks complying with the requirements of the system, and so regulated that it can not be concentrated.
(h) Pald-in capital for this bank of not less than \$100,000,000.
(i) Restriction of this bank to Government and member banks' busi-

JAS. L. WICK,
President Youngstown Credit Men's Association.
J. G. BUTLER, Jr.,
President Youngstown Chamber of Commerce.

Mr. BURTON. Mr. President, the Senator from Arizona [Mr. SMITH] did not object to the reading of the telegram, for which I express my thanks to him. This is but one of a multitude of telegrams filed here, and I do not believe our constituents will approve, nor do I think the Senate will approve, the sentiment expressed by the Senator from Arizona, in which he speaks with disparagement of "the people outside." If anything, we have paid too little attention to the people outside in the framing of this bill.

Mr. SMITH of Arizona. Mr. President, in reply to the Senator from Ohio, I should like to say that it depends upon the point of view from which we look at the question. I notice that several Senators, for purposes of their own, have paid much more particular attention to the opinions of people outside than they have to the interests of the country.

Mr. SMITH of Michigan presented a memorial of the board of directors of the Association of Commerce of Grand Rapids, Mich., remonstrating against the passage of the so-called La Follette seamen's bill, which was ordered to lie on the table.

He also presented a petition of Local Union No. 67, Cigar Makers' International Union of America, of Grand Haven, Mich., praying for the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

REPORTS OF COMMITTEE ON MILITARY AFFAIRS.

Mr. WARREN, from the Committee on Military Affairs, to which was referred bill (S. 3592) to remove the charge of desertion from the military record of Daniel Carpenter, reported adversely thereon and the bill was postponed indefinitely.

He also, from the same committee, to which was referred the

bill (S. 3149) to remove the charge of desertion from the military record of Moses Chauncey, reported it with an amendment

and submitted a report (No. 143) thereon.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 1884) for the relief of Phoebe W. Chase, reported it without amendment and submitted a report (No. 144) thereon.

TREATIES AND CONVENTIONS.

Mr. FLETCHER. I am directed by the Committee on Printing to report Senate resolution 210, submitted by the Senator from Kansas [Mr. Bristow] on November 6 last, with an amendment in the nature of a concurrent resolution (S. Con. Res. 11), and I submit a report (No. 145) thereon. The committee finds that to have printed, as suggested in the resolution, the treaties, conventions, international acts, and protocols between the United States and other powers will cost an amount in excess of that fixed by law and that can be ordered by a Senate resolution, and have therefore reported a concurrent resolution as a substitute. The report of the committee may be read if desired, but I should like to have it printed in the RECORD, at any rate, if there be no objection. I ask unanimous consent for the immediate consideration of the concurrent resolution.

Mr. SMOOT. I should like to ask the Senator from Florida if this includes the third volume?

Mr. FLETCHER. It does include the third volume.

Mr. SMOOT. And the expense of the printing of it will not be above \$1,800?

Mr. FLETCHER. About \$1,800 bound in cloth, which will bring the whole publication down to last March.

The VICE PRESIDENT. The Secretary will read the concurrent resolution and report proposed by the committee.

The Secretary read as follows:

The Secretary read as follows:

Resolved by the Senate (the House of Representatives concurring),
That there be printed for the use of the Senate 1,000 additional copies
of Senate Document No. 357, volumes 1 and 2, Sixty-first Congress, and
Senate Document No. 1063, Sixty-second Congress, being a compilation
of the treaties, conventions, international acts, protocols, and agreements between the United States of America and other powers from
1776 to 1913; and that the superintendent of documents is hereby authorized to order reprinted such copies of the foregoing documents as
may be required for sale by his office in accordance with law.

[Senate Report No. 145, Sixty-third Congress, second session.]

Mr. FLETCHER, from the Committee on Printing supmitted the fol-

Mr. FLETCHER, from the Committee on Printing, submitted the following report, to accompany Senate concurrent resolution 11:

The Committee on Printing, to which was referre. Senate resolution 210, providing for the printing of 1,000 additional copies of Senate

Document No. 357, volumes 1 and 2, Sixty-first Congress, and Senate Document No. 1963, Sixty-second Congress, containing a compilation of treaties, conventions, international acts, protocols, and agreements between the United States and other powers from 1776 to 1913, report back a concurrent resolution as a substitute therefor and recommend that the same be adopted.

The supply of Senate Document No. 357, Sixty-first Congress, which contains a compilation of treaties, conventions, etc., from 1776 to 1909, is entirely exhausted, many Members of Congress being without a reference set of this valuable publication, of which only 500 extra copies were printed. Of Senate Document No. 1963, Sixty-second Congress, only 500 additional copies were printed for the use of the Senate, and these are about exhausted. Senate Document No. 1963 is a supplement to Senate Document No. 357, and brings the compilation of treaties, conventions, etc., down to 1913. The two documents are bound in three volumes.

conventions, etc., down to lead, three volumes.

The concurrent resolution as reported by the committee also authorizes the superintendent of documents at the Government Printing Office to reprint such copies of the two documents is may be required for sale by his office in accordance with law, which directs that public documents shall be sold at cost of printing from stereotyped plates, the proceeds from such sales being covered into the Treasury of the United States to the credit of the appropriation for the public printing and binding.

proceeds from such sales being covered into the Treasury of the United States to the credit of the appropriation for the public printing and binding.

The superintendent of documents, in a letter to the chairman of the committee requesting authority to reprint the compilation of treaties, conventions, etc., for sale, stated:

"We note also in yesterday's proceedings in the Senate the resolution of Senater Batsrow favoring a reprint of the three compiled volumes of the United States treaties. You may perhaps remember that this office suggested the usefulness of such a reprint, owing to the fact that there is a continuous demand all the year round for the compilation of the United States treaties. As the compilation now corrent, and of which the plates are still available in the Printing Office, is considered to be the most complete and accurate composition yet made, it including all treaties, those which are still operative, and those which have become obsolete but remain of historical value, the time seems opportune for producing more economically than has been possible before, a reasonable supply of this publication to be made available for sale at a moderate price to all persons interested. Of this authentic diplomatic history of the country, this office can undoubtedly sell 500 sets, and if no new compilation were to supersede the present one for several years, could readily sell 1,000 sets, it seems to this office rather disagreeable to be compelled to deny citizens a knowledge of these publications when they are willing to pay the cost of their production."

The Public Printer estimates that the cost of printing 1,000 additional copies of Senate Document No. 357, Sixty-first Congress, and Senate Document No. 1063, Sixty-second Congress, will be \$1,847.03 for the three volumes, cloth bound. This estimated cost, being in excess of the \$500 limitation fixed by law upon printing ordered by a simple resolution, he committee therefore substituted a concurrent resolution, herewith submitted, for that introduced b

Mr. BURTON. Mr. President—
The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Ohio?

Mr. FLETCHER. I do.

Mr. BURTON. I should like to know if the proposed publication will include all the treaties to date?

Mr. FLETCHER. All down to last March, as I understand; all that are available and can be printed.

Mr. BURTON. To March, 1913?

Mr. FLETCHER. 1913. I ask for the immediate consideration of the concurrent resolution.

Mr. NORRIS. Mr. President, from the reading of the resolu-

tion I notice there is a provision only for copies of this document for the use of the Senate. Is there any provision in it for copies of the document for the use of Members of the House of Representatives?

Mr. FLETCHER. I have not the resolution before me.

Mr. NORRIS. I may be mistaken. I have not, of course, examined it.

Mr. FLETCHER. I think there is not. It was introduced as a Senate resolution, and we changed it to a concurrent resolution because the cost exceeded the limit of \$500; but we provide for the publication of additional copies, to be placed in the hands of the superintendent of documents.

Mr. NORRIS. Yes; but they could not be used by the Members of the House of Representatives unless they paid for them. It seems to me the resolution ought to provide for the publication of some copies for the House as well as for the Senate.

While I am on that point I wish to ask a further question. Is it the design of the resolution that these documents shall be divided up pro rata, according to the quota to which each Senator is entitled, or will they all be in the document room, subject to the order of the first Senator who happens to come along?

Mr. FLETCHER. I take it they will go to the document room

and be apportioned out.

Mr. NORRIS. I ask the question in good faith, because the publication is a very valuable one. I think we all get requests for it. I know I have and I have been unable to comply with them. It is a publication that is very much sought after in certain localities, especially by attorneys who are engaged in the settlement of estates in localities where there is a large foreign population.

Mr. SMOOT. Mr. President, I will say to the Senator that the concurrent resolution provides that a thousand additional copies shall be printed for the use of the Senate. That means that they shall go to the folding room and each Senator shall have his pro rata of the thousand copies.

Mr. NORRIS. That is the way it ought to be.
Mr. SMOOT. The resolution does not say that they shall go to the document room. If it did, then the Senators calling for them first would secure the copies.

Mr. NORRIS. The resolution does not say they shall go to

the folding room.

Mr. SMOOT. All documents as to which it is not specifically provided in the resolution that they shall go to the docu-ment room go to the folding room, and the division is made

there according to the number of Senators.

In answer to the Senator in relation to the lack of a provision in the resolution for a number of copies for the Members of the House, I will say that in all of our concurrent resolutions we always leave that question to be decided by the House itself. If the House desires any copies of this document, it will amend the concurrent resolution and include in it the number the House may want. That has always been the rule in the House, and it has always been the rule in the Senate to introduce resolutions in that way.

CRAWFORD. Mr. President, I shall object to the present consideration of the resolution. I realize that the document is a valuable one and one that Senators will want. have had calls for it myself. I wish, however, to examine the resolution more carefully than I am able to do in the short time given here. I am also opposed to coupling a reasonable need of the Senate for its own Members in the way of printed documents with a consent to be secured from the House of Representatives before the Senate's reasonable request can be granted. I am opposed to it and shall oppose the consideration of the resolution on that ground.

Mr. FLETCHER. In that connection, I will say that we shall be unable to supply the Senate with the documents within the limit fixed by law that the Senate can control by simple Therefore it is necessary to have a concurrent resolution.

I will say further, in answer to the Senator from South Dakota, that while his point is doubtless well taken—that the Senate ought to control the documents it desires to have printed-we found upon investigation that the amount fixed by law in the control of the Senate-\$500-would not give us the publication that was desired. Hence we had to put it in the shape of a concurrent resolution, which requires the action of both Houses. The Senate can use only \$500 by a simple resolution, and we could not print a sufficient number of these three volumes to supply the Senate within that limit. Hence we had to report a concurrent resolution.

will say, further, that the Senator from Utah is correct. I did not have the resolution before me when the Senator from Nebraska asked the question. It is true that these documents will go to the folding room instead of to the document room. and will be apportioned out there as far as the Senate is concerned. We apprehend that the usual thing will nappen, and that is that when the concurrent resolution passes the Senate and goes to the House it will be referred to the House committee, the House will put in the number it may feel it ought to have, and then the concurrent resolution will come back here for final action. That is the situation. Of course, if it is desired to have the resolution go over, I can not prevent it.

Mr. CRAWFORD. No serious harm can be done

The VICE PRESIDENT. The introduction of bills and joint resolutions is in order.

Mr. CRAWFORD. Does the presiding officer take a Member of the Senate off the floor by an announcement of that kind

when the discussion that was pending had not closed?

The VICE PRESIDENT. The president officer was out of the Chamber temporarily and was informed upon his return that the resolution had gone to the calendar.

Mr. CRAWFORD. I was simply going to make an observation that would not have taken 10 seconds.

The VICE PRESIDENT. The Senator from South Dakota is recognized. The Chair did not know that the Senator from South Dakota was on his feet.

Mr. CRAWFORD. I simply desired to say that I am not objecting on any hypercritical grounds; but under the circumbe printed, and that we shall have an opportunity to examine

The VICE PRESIDENT. The concurrent resolution had gone to the calendar, and the Chair did not observe that the

Senator from South Dakota had the floor. The Chair thought the Senate was proceeding in regular order.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 3777) to protect the dignity and honor of the uniform of the United States; to the Committee on Military Affairs. By Mr. SAULSBURY:

A bill (S. 3778) granting an increase of pension to William H.

White; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (8. 3779) to authorize the appointment of Joshua L. Chamberlain, late a brigadier and brevet major general of volunteers, to be a brigadier general in the Army on the retired list (with accompanying papers); to the Committee on Mili-

By Mr. SHAFROTH:

A bill (S. 3780) for the relief of John H. Williamson; and A bill (S. 3781) for the relief of Dennis Sexton; to the Com-

mittee on Claims.

A bill (S. 3782) granting an increase of pension to John H. Williamson;

A bill (S. 3783) granting a pension to Ella Nickerson;

A bill (S. 3784) granting an increase of pension to Daniel

A bill (S. 3785) granting an increase of pension to Jacob A.

A bill (S. 3786) granting a pension to Henry C. Doll;

A bill (S. 3787) granting a pension to Alice B. Stowe; and

A bill (S. 3788) granting an increase of pension to Jane Hubbard; to the Committee on Pensions.

By Mr. GRONNA:

A bill (S. 3789) granting an increase of pension to Harry N. Medberry (with accompanying papers); to the Committee on

By Mr. WORKS:

A bill (S. 3790) to correct the military record of Arthur W. Taylor to show honorable discharge from the service and to expunge and declare of no effect certain words in his discharge (with accompanying papers); to the Committee on Military

By Mr. ASHURST:

A bill (S. 3791) to provide for the construction of a fence on the international boundary line from the Rio Grande River to the Pacific Ocean on the southern boundary of the United States, and appropriating \$350,000 therefor; to the Committee on Foreign Relations.

By Mr. SHERMAN:

A bill (S. 3792) granting an increase of pension to Edward McMillan; to the Committee on Pensions.

By Mr. KERN:

bill (S. 3793) for the relief of Herbert Pennington (with accompanying papers); to the Committee on Military Affairs. A bill (S. 3794) granting an increase of pension to Jacob W.

Perkins; and A bill (S. 3795) granting an increase of pension to James R. Beaty (with accompanying papers); to the Committee on Pensions

By Mr. COLT.

A bill (S. 3796) granting an increase of pension to Abby P. Randall (with accompanying papers); to the Committee on Pensions.

WOMAN SUFFRAGE.

Mr. TOWNSEND. Mr. President, I should like to ask the chairman of the Committee on Woman Suffrage, if it would be of any avail to him or his committee to have filed the hundreds of telegrams which Senators receive both for and against the proposition to submit a constitutional amendment providing for woman suffrage? I ask this question because I have received literally hundreds of telegrams on one side or the other of this question. I have not submitted them because it was my opinion that the committee would not have time to consider this vast number of telegrams and petitions.

Mr. THOMAS. Mr. President, the Committee on Woman

Suffrage, through the Senator from Arizona [Mr. ASHUEST]. has made a favorable report upon Senate joint resolution No. 1, which is now on the calendar. That report was made some time ago, and the Senator from Arizona has, on several occasions since then, sought to have it taken from the calendar for immediate consideration, but unsuccessfully. It is his purpose. well as my own, to press it for as early consideration as possible, consistent with the consideration of the pending measure,

which has the right of way.

Replying directly to the inquiry of the Senator from Michigan [Mr. Townsend], I may say that his experience has been my own. I also have been in receipt of a great many telegrams both for and against, and a great many letters both for and against, this measure. I have not brought them to the attention of the Senate, because it has seemed to me that it would simply be to encumber the RECORD with surplus literature on the subject. My impression is that during the course of the discussion a great many of these papers might be referred to with a good deal of benefit, but I can not see the advantage of doing so at present by anything that has occurred up to this time.

Mr. GALLINGER. Mr. President, in connection with the matter brought to the attention of the chairman of the Committee on Woman Suffrage, I am glad of the opportunity to say that I have received hundreds and hundreds of letters, most of them opposing the constitutional amendment providing for woman suffrage. They came from women of standing in my own State, but they are largely an appeal to me to vote against the amendment when it comes up for consideration. For that reason I have not burdened the RECORD with them. I am glad to make this statement, so that the good women may know that I have received and have read their communications, and while they will probably not influence my vote in the least degree, yet they have been given respectful consideration.

MARKETING OF APPLES.

Mr. POINDEXTER. Mr. President, in connection with the work of the Division of Markets, which has recently been established in the Department of Agriculture, I have a paper, quite brief, with a special bearing upon the great problem, particularly interesting to the people of the Pacific Northwest, on the marketing of apples, a study of the causes and conditions in which tons and tons of fruit, the best in the world, rot upon the ground, while millions upon millions of people in almost all of the thickly populated parts of the country are suffering for the want of food of that kind. I ask leave to have this article, prepared by a very able student of the subject, printed as a public document.

Mr. President, may I ask the Senator who is Mr. SMOOT.

the author of the article?

Mr. POINDEXTER. Mr. John P. Hartman, of Seattle, Wash. Mr. FLETCHER. Mr. President, I think the paper should go to the Committee on Printing.

Mr. POINDEXTER. I have no objection to that.

The VICE PRESIDENT. The paper will be referred to the Committee on Printing for action.

SAN FRANCISCO WATER SUPPLY.

Mr. PITTMAN. Mr. President, I have here a statement issued by the President of the United States upon signing the Hetch Hetchy bill, the bill to provide a water system for the city of San Francisco. The statement is very short, and I desire to have it incorporated into the RECORD. I ask that the Secretary may read it with the consent of the Senate.

The PRESIDING OFFICER (Mr. SHIVELY in the chair). Is unanimous consent given for the reading of the statement? The Chair hears no objection, and the Secretary will read as

requested.

The Secretary read as follows:

The Secretary read as follows:

I have signed this bill because it seemed to serve the pressing public needs of the region concerned better than they could be served in any other way, and yet did not impair the usefulness or materially detract from the beauty of the public domain. The bill was opposed by so many public-spirited men, thoughtful of the interests of the people and of fine conscience in every matter of public concern, that I have naturally sought to scrutinize it very closely. I take the liberty of thinking that their fears and objections were not well founded. I believe the bill to be, on the whole, in the public interest, and I am the less uncertain in that judgment because I find it concurred in by men whose best energies have been devoted to conservation and the safeguarding of the people's interests, and many of whom have, besides, had a long experience in the public service which has made them circumspect in forming an opinion upon such matters.

INTERNATIONAL COMMISSION OF PHYTOPATHOLOGY (H. DOC. NO. 504)

INTERNATIONAL COMMISSION OF PHYTOPATHOLOGY (H. DOC. NO. 504).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Agriculture and Forestry and ordered to be printed: To the Senate and House of Representatives:

In view of the provision contained in the deficiency act, approved March 4, 1913, that:

Hereafter the Executive shall not extend or accept any invitation to participate in any international congress, conference, or like event without first having specific authority of law to do so.

I transmit herewith, for the consideration of Congress and for its determination whether it will authorize the acceptance of the invitation, a report from the Secretary of State, with accompanying papers, being an invitation from the Government

delegates to an international commission of phytopathology to meet at Rome on February 24, 1914, and a letter from the Secretary of Agriculture showing the favor with which the Depart-

ment of Agriculture views the proposed gathering.

It will be observed that the acceptance of the invitation will involve no special appropriation of money by the Government.

Woodrow Wilson.

THE WHITE HOUSE, December 19, 1913.

HOUSE BILL REFERRED.

H. R. 11003. An act to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea was read twice by its title and referred to the Committee on Appropriations.

BANKING AND CURRENCY.

Mr. OWEN. I move that the Senate proceed to the considera-tion of House bill 7837.

The VICE PRESIDENT. Without objection, the Chair lays

Without objection, the Chair lays

before the Senate House bill 7837.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States,

and for other purposes.

The VICE PRESIDENT. The pending amendment is the amendment offered by the Senator from South Dakota [Mr. Crawford] to the amendment of the Senator from Oklahoma

[Mr. OWEN]

Mr. CRAWFORD. I ask that the amendment offered by me may be read.

The VICE PRESIDENT. The Secretary will read the amendment to the amendment.

The Secretary. It is proposed to strike out section 24 as printed in the amendment of the Senator from Oklahoma and in lieu thereof to insert:

All national banks not located in central reserve cities may make loans secured by improved, occupied, and unencumbered farm land situated within the Federal reserve district where the loaning bank is located to the extent of one-half of its value; but no such loan shall be made for a longer period than five years, nor shall the aggregate of such loans by any bank exceed one-third of its time deposits.

Mr. CRAWFORD. Mr. President, the State banks of the country, as a rule, under the laws of the States in which they are located, are allowed to loan money upon farm mortgages to the extent of a certain proportion of their loanable assets. This gives them a material advantage in that respect over the country national banks. There is, and has been for a long time, a demand that the national-bank act shall be amended so as to permit, within safe and reasonable safeguards and restrictions, the loaning of a part of the funds of national banks upon farm mortgages.

The provision in the Owen bill designed to afford relief of that kind is, to my mind, entirely inadequate. It confines the amount which may be loaned on mortgages upon improved and unencumbered farm land for the term of not to exceed five years to an amount not exceeding 50 per cent of the actual value of the property offered.

The class of banks that need this authority to loan are the small country banks, not banks in central reserve cities, nor even to any considerable extent banks in reserve cities, but small banks capitalized for \$25,000 and \$50,000 and dealing

almost exclusively with farmers.

To say that a bank with a capital of \$25,000 or \$50,000 may loan only one-fourth of its capital upon farm mortgages of this kind is to say that it shall loan practically nothing upon that kind of security. With a capital of \$25,000, one-fourth of it would be less than \$7,000. With \$50,000 capital, one-fourth of it would be less than \$15,000. That amounts to nothing.

I have talked with these small bankers about the provision.

I discussed with them the provision in the original bill which allowed them to loan on farm mortgages for the term of nine months. They all said that it was a farce; it meant nothing in practice in their business. This, too, is a farce. It means nothing so far as any substantial accommodation that is needed along that line affects their business.

The amendment I offer is that one-third of the time deposits held by these banks may be loaned on farm mortgages. It is safeguarded. They can not go above 50 per cent of the value of the land. It must be an actually occupied, unencumbered, improved farm for which the security is given.

I hope the amendment may be adopted.

Mr. SMOOT. May I ask the Senator a question?
Mr. CRAWFORD. Certainly.
Mr. SMOOT. The Senator's amendment provides that no of the French Republic to that of the United States to send loan shall be made on a farm exceeding 50 per cent of its value,

Would not the amendment be in better shape if the Senator would say "assessed value," rather than to leave the question open as to the value? If it is left open, who is to decide the valuation?

Mr. CRAWFORD. The assessed value is oftentimes only one-fourth of the value of the land. As a rule, it is from onethird to one-fourth the value of the land. Then, if you restrict it to 50 per cent of that, you practically exclude

Mr. SMOOT. Does the Senator mean to say that the as sessed valuation of farm lands in this country is only about 25 per cent of their value?

Mr. CRAWFORD. As a rule, it is. I think in a large section of the country the assessment is based on one-third and onefourth of the actual value.

Mr. SMOOT. It is not so in my State.

Mr. CRAWFORD. Then the Senator's State is an exception. I am satisfied that all through the great agricultural region the assessed valuation is only a small part of the value. course, now, in some States, and my own is one of them, there is a statute or a movement to require property to be assessed at its full value. It is the first time in a generation that it has been attempted, but they are going up to 100 cents on the dollar on all lines, real property and personal property. The prevailing rule all through that country is, and has been for years and years, that this property should be assessed at onefourth and one-third, and in some States it is provided that the

assessment shall be on some ratio like that.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota [Mr. Crawford] to the amendment. [Putting the question.] The noes seem to

have it.

Mr. CRAWFORD. I ask for the yeas and nays.

Mr. OWEN. I will say to the Senator from South Dakota that I think that matter may be adjusted in conference. I do not believe there is any real opposition to it, but to take it as presented would be objectionable.

Mr. SMOOT. I should like to ask the Senator from Oklahoma how it is possible to adjust it in conference? I understand that the conferees can not put new matter into the bill. This is entirely new matter.

Mr. OWEN. I think the conferees can do so, in the form in which this bill would be presented to them.

Mr. SHAFROTH. We have a clause in our substitute con-

cerning farm mortgages.

Mr. SMOOT. There may be a clause concerning farm mortgages, but it would not give the conferees the right to put in this matter merely because the subject matter is mentioned in the bill.

Mr. SHAFROTH. There is a determination that farm mortgages may be discounted for a period of five years and notes secured thereby. This is a mere matter of detail, it seems to me, as to that.

Mr. SMOOT. If the conferees had that power, they could make an entirely new bill. They have no right to do it and no power to do it.

Mr. CRAWFORD. Mr. President-

Mr. OWEN. If the Senator from South Dakota will permit me a moment, I will move an amendment to that section that will cover the case, and I am sure it will not be objected to. On page 58, line 17, I move to strike out the words "a reserve city or" and to add at the end of line 24 the words "or to one-third of its time deposits." That will accomplish the purpose which the Senator has in mind.

Mr. CRAWFORD. Would not that leave it uncertain as to

what it means?

Mr. OWEN. It would leave the reserve city banks the right to make a loan of that kind, limiting it to one-third of the time deposits of such banks.

Mr. CRAWFORD. Then, should not the Senator strike out the words "equal to 25 per cent of the capital and surplus"

Mr. OWEN. "Or" gives the alternative, "or to one-third of its time deposits."

Mr. CRAWFORD. But they do not mean the same thing.

Mr. OWEN. Certainly they do not mean the same thing, but it would give the alternative; they might do one or the other, as the bank pleased. It gives them the broad liberty.

Mr. CRAWFORD. This is the capital of a reserve bank.

Mr. OWEN. No; it does not have anything to do with a re-It relates only to member banks. serve bank.

Mr. CRAWFORD. Let us see if I understand it. It is a bank of \$25,000 capital. This would in effect be fixing a maximum and a minimum for these loans on farm mortgages.

Mr. OWEN. Section 24, I will say to the Senator, relates to national banks alone and does not relate to the Federal reserve banks.

Mr. CRAWFORD. I understand that.

Mr. OWEN. Since the Senator desires to enlarge the number of the banks that might make these loans so as to include the banks in reserve cities, that is accomplished by striking out the words "a reserve city or," in line 17; and since he desires to have one-third of the time deposits made available, that is accomplished by adding the words "or to one-third of its time deposits" after line 24.

Mr. CRAWFORD. Would not that be equivalent to saying that loans of this class might be made in amounts not less than one-fourth of the capital of a bank and not more than onethird of its time deposits? What is the use of having this minimum limitation there? That is what I am getting at,

Mr. OWEN. The use of the minimum limitation is to prevent commercial banks tying up their funds in long-time loans. The limitation, however, as to time deposits on a part of the capital is free from the larger objection that would apply to the general use of their deposits for that purpose.

Mr. CRAWFORD. If the Senator will permit me, that would leave the value the maximum limit. Why have the smaller amount named at all? That is what I have in mind.

Mr. OWEN. I do not think the Senator understands the proposal made by the chairman,

Mr. CRAWFORD. I think I do. The language would give these banks authority to loan upon these farm mortgages an amount equal to one-third of their time deposits. Am I correct about that?

Mr. OWEN. That is right.

Mr. CRAWFORD. Now, that is the extent to which they could make such loans if this amendment were adopted.

Mr. OWEN. It is.

Mr. CRAWFORD. That answers the entire purpose of putting on the limitation. Then why name a smaller amount

Mr. OWEN. They might not have any time deposits.

Mr. CRAWFORD. That would be an extraordinary situation. Mr. OWEN. Yes; it would be an extraordinary thing, perhaps; and the time deposits might not be as large in one case as the other

Mr. CRAWFORD. It does not seem to me necessary, but I am perfectly willing to accept it.

Mr. OWEN. It gives the Senator more than he asks for, and

I do not think anyone has any objection to it whatever. I move, in line 17, page 58, that the words "a reserve city be stricken out, and, after line 24, that there be inserted "or

to one-third of its time deposits." Mr. SMOOT. Let me suggest to the Senator that the article "a" should be retained. It should read "not situated in a cen-

tral reserve city." Mr. OWEN. That is right. Let it read "in a central reserve

city.

The VICE PRESIDENT. The amendment to the amendment will be stated as modified.

The Secretary. On page 58, line 17, before the word "central," strike out the words "reserve city or," and at the end of line 24, after the word "surplus," insert a comma and the words "or to one-third of its time deposits."

The VICE PRESIDENT. The question is on agreeing to the

amendment to the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question recurs on the amendment proposed by the Senator from South Dakota.

Mr. CRAWFORD. I withdraw the amendment that I offered

in view of what the Senator from Oklahoma has presented.

Mr. NELSON. Mr. President, I should like to have the at-

tention of the Senator from Oklahoma for a minute. I should like to have certain words added after his last amendment in line 24. I think the Senator will have no objection to it. I suggest that these words be added:

and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

Mr. OWEN. I have no objection to the amendment. I know very well what is the meaning of it.

Mr. NELSON. The Senator knows why I am in favor of it,

and I think the Senator has no objection to it.

The VICE PRESIDENT. The Secretary is taking down the

words. Mr. NELSON. I will read it:

and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

Mr. OWEN. 'The Senator means such banks-

The VICE PRESIDENT. Let us see if the Secretary gets it. It is very difficult for the Secretary to take the language of Senators.

The Secretary. It is proposed to add after the amendment proposed by the Senator from Oklahoma and already agreed to a comma and the following words:

and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.

The VICE PRESIDENT. Is there objection to the amendment to the amendment? The Chair hears none, and it is agreed to.

Mr. OWEN. I move the adoption of my amendment as amended.

Mr. NEWLANDS. Mr. President-

Mr. OWEN. I yield to the Senator from Nevada.

Mr. NEWLANDS. I ask the Senator from Oklahoma whether he can not accept an amendment, on page 2, to strike out the words "nor more than 12 cities," in lines 9 and 10, and the words "not to exceed 12 in all," in line 21, so that the section will stand as follows, "shall designate not less than eight cities to be known as Federal reserve cities"?

Mr. OWEN. Mr. President, that has been a matter of very great controversy. It has been debated over and over again. The chairman does not feel at liberty to accept so serious an amendment.

Mr. NEWLANDS. I will ask the Senator whether there is to be any further conference among the Democratic Senators to-day?

Mr. OWEN. It has not been called, that I know of.
Mr. NEWLANDS. Mr. President, I will move that the words
"nor more than 12 cities" be stricken out of lines 9 and 10,
and also the words "not to exceed 12 in all," in line 21, page 2, of the print of the amendment of the Senator from Oklahoma bearing the date of December 18.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 2, lines 9 and 10, the last print of
the amendment of the Senator from Oklahoma, strike out the
words "nor more than 12 cities," and in line 20, after the words "Federal reserve board," strike out the comma and the words "not to exceed 12 in all."

Mr. NEWLANDS. Mr. President, I want to say a few words in regard to this amendment. I propose to follow it up by another amendment, on page 30, at the end of line 6, by inserting the following words in the enumeration of powers of the Federal reserve banks:

And to require from the Federal reserve banks such proportion of the reserve deposits by member banks with the Federal reserve banks, not exceeding one-third, as they may require, for the purpose of advancing to any Federal reserve bank in order to rediscount the discounted paper of member banks.

Mr. President, the purpose of these amendments which I offer is to enable the Federal reserve bank, if it deems it wise, to organize more than eight Federal reserve banks and not to limit the number. My hope is that ultimately, as the result of a gradual growth, a reserve bank will be established in every State, and in keeping with that organization that there shall be a Federal reserve bank at Washington which will control directly one-third of the reserves turned over by the member banks to the Federal reserve banks, so that instead of calling upon Federal reserve banks to rediscount the notes of other Federal reserve banks it can act directly in aid of any Federal reserve bank in the country.

Thus, if any Federal reserve bank finds that it is unable to take care of the discounts that may be required within its district, to prevent a bank panic or to relieve a stringency the Federal reserve board can directly give the relief to the Federal reserve bank without the tedious process of calling upon some

Federal reserve bank to give the relief required.

This amendment, if adopted, will throw the matter in conference, and I trust that some provision on the line of my suggestion will be carried out there.

Mr. President, I hear on every side the statement made that if it were not for the plank in the Democratic platform which announces the opposition of the party to the Aldrich plan or a central bank, the central reserve organization would be more efficient than the regional reserve organization in meeting these conditions. There are a large number of votes on this side of the house that will be cast against a centralized system, not because their judgments are convinced, but because they feel that their party platform is opposed to such a procedure.

Mr. President, I do not believe myself in a central-bank system, but I do believe in a Federal system, which has the advantages of both the regional system and the central-bank system. The Federal system means that you will have a reservoir in each State controlled by a Federal reserve bank composed of National and State banks within that State, and that you will also have at Washington a great central reservoir controlled by the reserve board, through which relief can be directly given

to any State reserve association which requires it. That plan is not forbidden by the Democratic platform under any construction, however strained, and it conforms to our entire theory of government, which regards the States as the basic units and the Nation as the union of these basic units for national and interstate purposes.

Mr. President, in pressing this motion I find myself met by the embarrassment that the Democratic conferences, in which I have shared, have not seen fit to accept the view which I have urged. I feel, also, that if I should attempt to exercise entire independence upon this matter, my single vote might mar the symmetry of this bill and throw this whole legislation into confusion. I believe that the plan which I suggest is absolutely in harmony with the Democratic platform, is in harmony with the regional system which the Democratic Party has presented, and is only a modification of that regional system leading, by a process of evolution, to an organization of a Federal reserve bank in every State and the union of those Federal reserve banks in a Federal reserve bank at Washington that can give aid to each member Federal reserve bank; but I am unwilling to press my individual judgment in this matter to the point of marring the general symmetry of this bill and producing con-

The conferences which the Democratic Senators have held whilst this bill has been pending have been necessarily hurried; so many views have been pressing upon their consideration that has been impossible to fairly consider all the views entertained by each individual member. The bill has now reached such a stage that I believe it would be wise and judicious to hold a Democratic conference to-day for two or three hours, and review this entire amendment which is presented by the Senator from Oklahoma [Mr. Owen] practically as a substitute for the House bill.

Individually, I believe that the House provision in this particular is better than this, because it provides for not less than 12 regional banks, but does not limit the entire number, as does the Senate amendment. I should like to have that question further discussed by a conference.

There is another question which is of vital importance, and that is the question as to whether we have put proper restraints in this bill upon inflation. I do not believe that we have; and I should like to have that subject further discussed in conference. We all admit that the country and the world are suffering from inflation both of basic money and of credits. We all know that in this country the basic money has vastly increased since the agitation of 1896 against contraction and that the bank credits of the country have vastly increased. We all know that the rising prices, of which we all complain, are due mainly to that economic cause, the tremendous increase in the output of gold and the tremendous increase throughout the world of bank credits as the result of that increase. Our purpose here is not to increase the volume of money but to make the flow of money in the channels of commerce so easy, continuous, and unobstructed as to prevent the occasional breaks in exchange, from which at varying periods we suffer. There is enough blood flowing in the arteries of commerce. What we want to prevent is an obstruction of the flow. As soon as the obstruction is removed we want the flow to go on, but not swollen in volume in such a way as to threaten the bursting of the arteries them-When, as a result of a bank panic, basic money is either withdrawn from the banks and put into the vaults of safe-deposit companies or remains congested in certain localities we propose to increase the circulating medium just for that emergency, and not to leave the emergency currency out continuously in circulation. The Senate bill provides for greater expansion than the House bill, and in that respect is, in my judgment, inferior to the latter.

The VICE PRESIDENT. The time of the Senator from Nevada has expired.

Mr. NEWLANDS. Mr. President, I will not at the present time press the amendment which I am urging, but I will take another opportunity, in the hope that meanwhile there will be a Democratic conference upon the subject.

Mr. CRAWFORD. Mr. President, I offer an amendment, which I send to the desk.

The VICE PRESIDENT. Does the Senator from Nevada withdraw his amendment?

Mr. NEWLANDS. I reserve the amendment.

The VICE PRESIDENT. The Chair does not understand whether the Senator from Nevada withdraws the amendment or whether the question is to be put upon it.

Mr. GALLINGER. Why not move its reference to a Democratic conference?

Mr. NEWLANDS. That would be hardly regular, I think. I will withdraw the amendment for the present.

The VICE PRESIDENT. The amendment proposed by the Senator from South Dakota [Mr. Crawford] will be stated.

The Secretary. It is proposed to strike out the first paragraph of section 14, and in lieu thereof to insert:

SEC. 14. Any Federal reserve bank may under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals, notes, drafts, bills of exchange, cable transfers, and acceptances of the kinds and maturities by this act made cligible for rediscount.

Mr. CRAWFORD. Mr. President, that amendment simply includes notes with bills and the other paper which is eligible to discount, and proposes to bring them within the scope of open-market operations. The House bill, while it is not that broad, apparently was believed to be sufficiently broad to include this paper, because that is indicated by the report made by the committee in the other House. I discussed this matter briefly the other day in connection with some quotations from Mr. Untermyer's article in the North American Review.

It seems to me that one of the purposes of this section is to give the Federal reserve board and these new banks the power to control discount rates. In my judgment it will be ineffective for that purpose, unless it is broadened to include notes. Hence I have proposed the amendment.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota to the amendment.

Mr. OWEN. I hope that the amendment will not prevail. The amendment to the amendment was rejected.

Mr. CRAWFORD. I offer another amendment, which I send to the desk

The VICE PRESIDENT. The amendment to the amendment proposed by the Senator from South Dakota will be stated.

The SECRETARY. In the last print of the bill, in section 24, page 59, at the end of line 4, it is proposed to insert:

No person shall be qualified to hold the position of director in a member bank who is a director in another competing bank. Any other bank which seeks to do a general commercial banking business in the same city, town, village, or community in which a member bank does business shall be deemed a competing bank within the meaning of

business shall be deemed a competing bank within the meaning of this act.

Any bank permitting a director of a competing bank to act as one of its directors shall be ineligible to membership in a Federal reserve bank, and any bank which violates this provision after becoming a member shall, if found guilty thereof by the Federal reserve board after hearing and notice in writing specifying such charge, be suspended from all privileges as a member of a reserve bank. Said suspension shall remain in full force so long as such violation continues to exist.

Mr. CRAWFORD. Mr. President, all the outcry against the Money Trust and against undue concentration and control in the great banks of New York, and all the outcry against interlocking directorates, the voting-trust habit, and all that sort of thing, is either a sham and unfounded or else it is a matter of tremendous import and seriousness. We are dealing here with the question of revising the banking law and removing abuses, and it seems to me this is the time and place to put a provision of this kind in the statute. There is no need of any extended discussion, and under the limitations here I do not propose to enter into an extended discussion of this question, but I give the opportunity through this amendment for the Senate to pass upon it.

The VICE PRESIDENT. The question is on the amendment of the Senator from South Dakota to the amendment of the Senator from Oklahoma.

The amendment to the amendment was rejected.

Mr. NEWLANDS. Mr. President, I move to amend, on page 30, at the end of line 6, by inserting the following:

And to require from the Federal reserve banks such proportion of the reserves deposited by member banks with the Federal reserve banks, not exceeding one-third as they may require for the purpose of advancing to any Federal reserve bank in order to rediscount the discounted paper of member banks.

Mr. SMOOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Utah?

Mr. NEWLANDS. Certainly.

Mr. SMOOT. I wish to ask the Senator if that is not the identical amendment he offered some 10 minutes ago?

Mr. NEWLANDS. No; the amendment I offered a few moments ago was one in reference to the number of regional banks. I said that I would offer this amendment later on.

Mr. SMOOT. This is not included, then, in the amendment which the Senator offered before?

Mr. NEWLANDS. Oh, no.

Mr. SMOOT. I simply want to say, Mr. President, that if it is the same amendment it is virtually a technical violation of the unanimous-consent agreement.

Mr. NEWLANDS. Oh, no; it was not included.

Mr. SMOOT. Of course, I take it for granted that the Senator from Nevada is in perfect harmony with every other Senator in desiring the passage of the bill at the earliest hour possible.

Mr. NEWLANDS. Certainly.

The VICE PRESIDENT. The amendment was stated at "one-fourth" before, was it not; and it is now "one third"?

Mr. NEWLANDS. The amendment was not offered at all before. I simply said in the course of my argument that I would offer such an amendment. The amendment which I had printed last night did say "one-fourth" instead of "one-third." I have now changed that to "one-third."

Mr. President, the section proposed to be amended relates to the powers of the reserve board, and the particular paragraph is the one which authorizes that board-

to permit or require Federal reserve banks to rediscount the dis-counted paper of other Federal reserve banks at rates of interest to be fixed each week or oftener by the Federal reserve board.

The amendment which I offer gives the board, in addition to that power, the power of taking from the Federal reserve banks one-third of the reserves deposited with them by the member banks and utilizing them directly in aiding any Federal reserve bank which may require funds with which to rediscount the notes of its member banks.

Mr. President, this bill in giving the Federal reserve board the power "to permit or require Federal reserve banks to re-discount the discounted paper of other Federal reserve banks" clearly admits that a contingency may arise where a Federal reserve bank may not be able to take care of the contingencies that will arise within its district; that the condition of panic or stringency may be so extensive as to be entirely outside of and beyond the control of the regional reserve bank. It seems to me that in that case the Federal reserve board should not be called upon to exercise the indirect method of requiring an individual reserve bank to rediscount for another individual reserve bank, but it ought to have the power itself to put these funds directly into the reserve bank which requires aid; otherwise the process may be defeated by the protest of the individual reserve bank that is called upon to rediscount for another Federal reserve bank.

The power is one of emergency, and the Federal reserve board should have it in its power to act quickly and directly, and it should not be subjected to the necessity in a case of extreme emergency or crisis of arguing the matter out with other reserve banks which may be so solicitous regarding the conditions in their own districts as to make them unwilling to comply with the requirement of the Federal reserve board.

Mr. President, I wish to say one word further regarding the

possibility of inflation under this bill.

I was unable to conclude what I had to say upon that subject when I addressed myself to the preceding amendment. my judgment, this bill contains more facilities for inflation than does the House bill. In the first place, the House bill provides for the gradual retirement, within a period of, I believe, 20 years, of all the national-bank notes now outstanding. within a time fixed by the law, it will relieve us of a vast quantity of uncovered paper money, which certainly ought not to exist during any period of inflation.

The only justification for the existence of uncovered paper money is a contraction of the money volume such as necessitates the issue of uncovered paper money in order to give the people enough units of money with which to do their business. It is absolutely unjustified in such conditions of inflation as exist to-day, when the production of gold in the world is \$450,000.000 annually, as against \$150,000,000 twenty years ago, when bank credits have been so swollen as to furnish the people of practically every civilized country with all needed facilities for quick exchange in transactions, and when the inflation both of credits and of money has been such as to lead to an enormous rise of prices throughout the world. It ought to be the policy of every wise Government under such conditions gradually to retire its uncovered paper money and to rely simply upon the basic money itself supplemented by the bank credits based upon it. Yet in this bill we are doing away with the wise requirement of the House bill for the gradual retirement of the uncovered paper money represented by national-bank notes. There is no civilized country in the world to-day that has anywhere near the amount of uncovered paper money that we have.

In addition to that we are providing for enormous issues of reserve notes, and, in my judgment, without proper requirements as to their retirement when the emergency is over. It is true that the reserve notes are intended, so it is claimed, for emergencies, and yet the rate of interest which we exact for the reserve notes is not such as to force an automatic retirement when an emergency is over; so the reserve notes put out for purposes of emergency may be allowed to remain out for purposes of inflation. In addition to that, the banks are authorized by the bill to hold the reserve notes in their re-

I claim that as an elemental principle of banking the reserves of banks should be basic money and nothing else. There is no excuse for using anything else, unless it may be in a period of contraction, when it is of the highest importance that the number of units of money should be increased, even at the risk of abandoning temporarily the safety devices which experience has

proved necessary in a sound monetary system.

In this period of inflation we have no justification at all for permitting the reserve notes, which are mere promises to pay money, to be used as the cash reserves of the banks in compliance with the law requiring a certain percentage of their deposits to be represented by cash. It is true that if the State banks come in under this system with their inadequate reserves to-day, averaging only 8 per cent, they may be compelled to reduce their loans in order to come within the requirements of the act as to a 12 per cent reserve. It would be a misfortune to force a reduction of the loans, but that matter can be met by giving the reserve board power to force the reserves of the State banks to be gradually brought up to the requirements of this statute by giving them five years' time under the provisions of the law, and authorizing an extension in the discretion of the reserve board.

It seems to me that is very much better than to adopt the vicious principle of allowing mere promises to pay to be put into the cash reserves of a bank as a basis of an enormous

inflation of bank credits.

Then there is another inflation of credit that is provided for by this bill, by the very reduction required in the reserves Under the national-bank act an average reserve of at least 18 per cent is required. We propose to substitute for that an average reserve of about 13½ per cent, 4 per cent less. What does that mean? Why, instead of doing as we are now and permitting national banks to issue bank credits to the extent of about \$6 for every dollar of cash they have, under this law we will permit those banks to issue \$7 or \$8 of credits to \$1 of cash. So we are permitting an expansion of bank credits under this bill.

If the reduction in the reserve requirements is to be accomplished simply for the purpose of enabling the State banks to get the discarded portion of the national-bank reserves, in order that they may put such portion in their reserves, and thus come up to the average of this law, I have no objection to it; but instead of stimulating the State banks to secure the discarded portion of the reserves of the national banks under this lessened requirement we are absolutely discouraging them from maintaining their present meager allowance of basic money by permitting them to use reserve notes, mere promises to pay,

as cash reserves.

With reference to the amendment I have offered, I propose to withdraw it for the present until a Democratic conference can act upon it.

Mr. CUMMINS. Mr. President, I offer an amendment to be added to section 13.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. It is proposed to add at the end of section 13, page 37, of the last print:

13, page 37, of the last print:

Whenever in the judgment of the board of directors of a Federal reserve bank the banking institutions of any community are unable or unwilling to loan money to an individual, copartnership, or corporation in that community of such financial responsibility or offering such security as would, under the general and ordinary rules recognized in the banking business, entitle the individual, copartnership, or corporation applying for the loan to the credit asked for, then and in that case the bank may make a loan to any such individual, copartnership, or corporation for a period not exceeding three months, at such rate of interest as may be agreed upon and with such security, either by way of guaranty or collateral, as may be acceptable to the bank: Provided, The board shall establish a general rule fixing the minimum amount of any such loans: Provided further, That no such loan shall be made to any officer or director of a banking institution or to any corporation engaged in the business of banking: And provided further, That not more than an amount equal to 10 per cent of the deposit of reserves shall be outstanding in such loans at any one time.

Mr. CUMMINS. Mr. President, the effect of the amendment

Mr. CUMMINS. Mr. President, the effect of the amendment I have proposed is to permit a Federal reserve bank to loan not to exceed 10 per cent of the deposit of reserves to an individual or a corporation directly, provided the individual or the corporation presents such security as is acceptable to the bank.

Senators will not have failed to observe in the course of the consideration of the bill that we have first coerced the capital of the Federal reserve banks, and, second, as compensation for that coercion, we have given to the banks the absolute control over the new institutions called the Federal reserve banks. regret very much-it is impossible for me to say adequately how much I do regret-that we have departed from the almost

universal sentiment of the country, which, I think, requires that the Federal reserve banks should be controlled by the Government of the United States, for two reasons: First, in order that they might distribute the reserves so as best to serve or promote the general welfare; second, to counteract what might be called, and what has been called, the conspiracy of wealth.

I do not mean a conscious conspiracy. I do not mean an explicit agreement entered into between the banks or between the men of wealth. I mean the effect which grows out of the intimacy of wealth, the business connections of men who possess great wealth. If there is one thing for which the American people are waiting, it is some relief from the consequences of the close intimacy of great bankers with business transactions of unusual magnitude.

Our Democratic friends have decided that the Federal reserve banks shall be controlled by the banks. I accept that as a final conclusion. I should like to know, however, why our Democratic friends are not willing to give the Federal reserve banks, controlled as they will be by the banks themselves, the right, the power, to loan a limited amount of money-not enough money to enter into general competition with the individual banks, but a very little of their money-in order to meet the cases that have been presented in the past, and that will be presented in the future, in which some man entitled to credit, by reason of his attitude toward public affairs or toward business affairs is denied credit not only by the banks in the larger cities, but by the banks in his own community.

I know there have been such instances in the past. The Democrats must know there will be such instances in the future. Why not give the Federal reserve banks the power, at least, to

meet that emergency?

What have you done? You have given the Federal reserve banks the power to buy notes without the security or indorsement of a member bank, provided they are offered by the bank itself; the purchase must be made from the bank. The new institution is not permitted to go directly to the individual. must approach this new source of relief through the medium of the banks. Again, you have provided, with respect to certain transactions which are had only by men of the largest affairs indeed, international affairs-that the Federal reserve banks can buy, from the individual, paper related to or growing out of international trade. Why not allow the Federal reserve bank a little power, a little opportunity to relieve instances of distress and remedy injustice that may be perpetrated upon our own people engaged in domestic trade?

Allow me to refer the Senator from Oklahoma to the early

part of section 14:

Any Federal reserve bank may, under rules and regulations pre-scribed by the Federal reserve board, purchase and sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals, cable transfers and bankers accept-ances and bills of exchange of the kinds and maturities by this act made eligible for rediscount with or without the indorsement of a member bank.

I also call his attention to a paragraph, with which, of course, is very familiar, farther on in section 14, in which the Federal reserve bank is given the power to purchase from member banks and to sell, with or without its indorsement, bills of exchange arising out of commercial transactions as hereinbefore defined; and also in that part of the bill which relates to foreign business it is declared that it may

open and maintain banking accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell with or without its indorsement, through such correspondents or agencies, bills of exchange arising out of actual commercial transactions which have not more than 90 days to run and which bear the signature of two or more responsible vertices.

In these three instances there has been given in this bill to the Federal reserve bank the power to deal in commercial paper without the indorsement of a member bank.

I ask, therefore—I ask earnestly, and I expect an answer to it—when you have legalized the combination of bankers, when you have thought it desirable and necessary that the Federal reserve bank shall be controlled by the bankers, why is it that you will not give to this new bank not a mandate but the power to take 10 per cent of the deposit of reserves and loan it to individuals? If it shall find that the banks are inflicting an injustice upon some individual, one who is denied credit without reason, one who is denied credit simply because it may be for the interest of some banks to deny him credit, why will you not give to these banks this pittance of power, this meager and inadequate instrument to correct an injustice which is becoming more and more prevalent with passing years?

Of course, I do not expect any consideration for this amendment from the other side. I do not know whether it will have much consideration on this side, but it is one of those advances

which is required by the times.

I think, Mr. President, that we ought to amend our rules, if necessary. I think it ought to be in order to refer a particular amendment to the Democratic caucus. We can move to refer any proposal to any other committee of the Senate for its consideration, and I can not see why we should not be permitted to move to amend this bill and then move to refer that amendment to the Democratic caucus. In that way we might secure some fair consideration.

Mr. President, I do not know how much strength this proposal has in the Chamber. I believe in it thoroughly. I believe it is necessary. I believe that we ought to do something anyhow in this bill to counteract the great power of the banking capital of this country. Therefore I intend to ask for the yeas and nays upon this amendment.

The VICE PRESIDENT. Is the demand for the year and navs seconded?

The yeas and nays were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll, and Mr. ASHURST

answered " nay.

Mr. BURTON. I ask to have the amendment read again.
Mr. CLAPP. Let it be read.
The VICE PRESIDENT. The Chair would be very glad to

comply with the request of Senators, but the roll call has begun and the Senator from Arizona has responded.

Mr. CLAPP. Before the roll call was begun Senators here tried to get the attention of the Chair.

The VICE PRESIDENT. The Chair will assume that he did not hear the response of the Senator from Arizona, and the amendment will be read.

Mr. ASHURST. Mr. President, the Chair is correct; but I must protest against a continued violation of the rule. After my name was called I made a response. The rule should not be violated and the roll call should be proceeded with. However, I shall not object at this time under the circumstances.

Mr. CLAPP. A strict adherence to the rule would be war-ranted if it related to something rather than the mere seeking to obtain information as to the reading of a proposed amend-

The VICE PRESIDENT. The Chair will have the amendment again read.

The Secretary. It is proposed to add at the end of section 13 the following words:

Whenever, in the judgment of the board of directors of a Federal reserve bank, the banking institutions of any community are unable or unwilling to loan money to an individual, copartnership, or corporation in that community of such financial responsibility, or offering such security as would, under the general and ordinary rules recognized in the banking business, entitle the individual, copartnership, or corporation applying for the loan to the credit asked for, then and in that case the bank may make a loan to any such individual, copartnership, or corporation for a period not exceeding three months, at such rate of interest as may be agreed upon, and with such security, either by way of guarantee or collateral, as may be acceptable to the bank: Provided, That the board shall establish a general rule fixing the minimum amount of any such loans: Provided further, That no such loan shall be made to any officer or director of a banking institution, or to any corporation engaged in the business of banking: And provided further, That not more than an amount equal to 10 per cent of the deposit of reserves shall be outstanding in such loans at any one time.

The Secretary resumed the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is ill and unable to reach the Chamber. I therefore withhold my vote. I ask that this announcement may stand for the day. If I were at liberty to vote I would vote " yea."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson].

transfer that pair to the junior Senator from Maine [Mr. Bub-LEIGH] and vote. I vote "yea."

Mr. SMITH of Arizona (when his name was called). I again announce my pair with the Senator from New Mexico [Mr. FALL]. I transfer that pair to the Senator from New Hamp-

shire [Mr. Hollis] and vote. I vote "nay."
Mr. STERLING (when his name was called). I announce my pair with the senior Senator from Louisiana [Mr. THORNTON]. If I were at liberty to vote, I would vote "yea.

The roll call was concluded.

Mr. REED. I again announce the necessary absence of my colleague [Mr. Stone], on account of illness. If he were present he would vote "nay." In his absence he is paired with the Senator from Wyoming [Mr. CLARK].

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the junior Senator from Kansas [Mr. Thompson] and vote. I vote "Nay."

The result was announced-yeas 33, nays 47, as follows:

	YE	AS-33.	
Bradley Brady Bristow Catron Clapp Colt Crawford Cummins Dillingham	du Pont Gallinger Goff Gronna Jackson Jones Kenyon La Follette McCumber	Nelson Norris Page Penrose Perkins Poindexter Sherman Smith, Mich, Smoot	Stephenson Sutherland Townsend Warren Weeks Works

So Mr. CUMMINS's amendment to the amendment was rejected.

Mr. WEEKS. I offer an amendment, which I ask to have read.

The VICE PRESIDENT. The Secretary will read the amendment.

Mr. WEEKS. Before the Secretary commences to read the amendment, I should like to have the attention of the Senator from Oklahoma, because it is an important amendment. If adopted it will establish a Government policy, and it ought not to be considered in such confusion as has been prevailing during the last hour.

The VICE PRESIDENT. The Chair is informed by the Secretary that in the print of December 1 the words "Secretary of the Treasury" do not appear in line 12, on page 20.

Mr. WEEKS. The amendment is to the print of the amend-

ment of the Senator from Oklahoma of December 18.

The Secretary. On line 19, page 20, after the words "Secretary of the Treasury" insert:

In providing for the disposition of the surplus earnings of the reserve banks it is the fixed policy of the United States to apply all surplus revenues of every character to the liquidation of the public debt, and to make effective this policy, it is hereby provided that any surplus revenue which remains in the Treasury unappropriated at the close of the fiscal year, except an amount needed to provide a suitable working balance, shall be applied to the purchase of United States bonds now ourstanding. outstanding.

Mr. OWEN. I should like to have the amendment stated again.

The Secretary again read the amendment to the amendment. Mr. OWEN. Mr. President, the Senate has already in a previous part of the same section provided for the disposition of these earnings. This would change what has been already done and put the remaining part of the section in confusion. I therefore hope that the amendment proposed will not be adopted.

Mr. WEEKS. Mr. President, I want to call the Senator's attention to the fact that this does not in any way affect what has been done. This proposes that surplus earnings of all kinds at the end of the fiscal year shall be used to liquidate the public debt. It does not apply alone to the earnings of reserve banks, which may be applied to that purpose, but it applies to the earnings of all kinds and all characters. If the Senator does not wish to consider the amendment at this time, I will offer it when the bill gets into the Senate. I prefer to take it up now, because

Mr. SHAFROTH. Mr. President, I understand the amendment provides that all the surplus in the Treasury now shall be turned over for the purpose of purchasing bonds.

Mr. WEEKS. It does not provide for any such thing. It provides that the surplus money at the end of a fiscal year—
Mr. SHAFROTH. Well, at the end of the fiscal year. Here

you are predicting a deficit in the Treasury, and you want this money to go right to the purchase of bonds, when, if your prediction is true as to a deficit in the Treasury, we will need all the money to meet the expenses of the Government.

Mr. WEEKS. That shows the difficulty of legislating in the midst of confusion and when Senators are not paying attention to their duties on the floor. Here is a Senator making objection

to an amendment because it will use all the revenues, when this amendment specifically provides that a sufficient working balance shall be left in the Treasury, and that over and above the working balance the revenue shall be used to liquidate the national debt.

Mr. President, it is the purpose of this amendment to establish as a Government policy that hereafter, whenever there is any surplus which is not needed for the expenses of the Government for the fiscal year, that surplus shall be used as it would be used in the case of a corporation or any individual in civil life,

in paying the funded debt.

The sinking fund of the Government has been suspended for many years for the very good reason that the bonds which were outstanding were needed as a basis for our circulating medium. If the sinking fund had been in operation and we had issued bonds against the cost of the Panama Canal and other unusual expendes we would in the last 13 years have had a surplus revenue of \$579,000,000, which could have been applied to the liquidation of the debt. There were 3 years during that period of 13 years when there was a deficit amounting to \$98,000,000. In other words, there would have been a net income of \$481,000,000, which could have been applied to liquidating the public debt.

I want to see the Government out of debt. There is no reason why it should not go out of debt, now that we do not need the bonds as a basis for circulation. If we were, it would be a condition of immeasurable strength from every standpoint. It would be morally right, it would be financially right, and we should provide at this time a definite policy which will enable the liquidation of the public debt in the shortest pos-

sible time.

I hope that Senators on the other side will take the matter into consideration carefully before voting against a policy which would once for all free us from debt, and that then we could keep ourselves out of debt, providing for our annual

expenditures as they develop.

Mr. OWEN. Mr. President, the chairman did make a mistake in interpreting the language suggested by the Senator from Massachusetts [Mr. Weeks]. The mistake was a natural mistake, because he supposed that the matter referred to the section to which it was proposed as an amendment. He supposed that the reference was to the surplus of the reserve banks, and that the Senator was not attempting in disposing of the earnings of the reserve banks to declare a new fiscal policy with regard to the general revenue of the United States,

which was not germane to the section.

While there is force, of course, in the suggestion that the United States ought to pay its debts, that is a matter which is not germane to the establishment of a reserve banking sys-It is a matter which ought to be considered and which will be considered at a very early date, determining the policy of the Government with regard to the payment of its outstanding obligations and at the same time taking care of the currency which is based upon that outstanding currency. the bonds of the United States should be summarily paid to-morrow it would contract the Federal currency through the national-bank notes \$740,000,000, a thing which can not be done without the most serious disturbance unless some adequate provision were made to supplement the retirement of such national-bank notes.

The amendment proposed by the Senator from Massachusetts has no proper place in this bill, and much less has it any place in the section disposing of the net earnings of a Federal reserve

Mr. WEEKS. Mr. President, I do not think the Senator from Oklahoma need worry about retiring all the bond-secured circulation, as a result of surplus earnings, in the immediate future. Under the tariff law which is now in operation I doubt if there will be any considerable surplus earnings at present. But we are establishing a policy in providing for a disposition of the surplus earnings of the Government. For the first time, I think, in the history of the Government we are providing that surplus earnings which would go into the Treasury shall be applied to debt-paying purposes. This provides that such policy shall be followed in the use of the general revenues. If an amendment making it a definite policy, that the surplus earnings shall be applied to a reduction of the national debt, is not germane, then I very much misunderstand what would be germane.

Mr. BRISTOW. Mr. President, it seems to me there should not be an objection to the amendment which has been offered by the Senator from Massachusetts [Mr. Weeks]. It is purely a business proposition. At times, when the fiscal year closes, we have a surplus, and it has been a matter of a good deal of con-

cern as to what to do with the surplus.

The amendment simply provides that when there is a surplus, when we have abundant revenues on hand to carry on the business of the country at the end of the fiscal year, whatever that surplus is shall be applied to the reduction of our indebtedness.

As has been suggested to me by the Senator from Utah who sits by me [Mr. SUTHERLAND], it would take away the temptation for extravagance. I am in sympathy with the pretensions that are made by the administration and by both branches of

Congress along the line of economy.

If you want to start right, let us put something in the bill that indicates that we mean at least to try to pay some of our debts. There is not an intelligent man in the country who, when he has money on hand, does not reduce his indebtedness. That is all the Senator from Massachusetts is asking to do in this amendment; that is, to apply the ordinary common sense, honest business principles to the administration of our Government.

Mr. WEEKS. Will the Senator yield?

Mr. BRISTOW. Certainly.
Mr. WEEKS. I should like to call attention to the fact that the bonded interest-bearing debt of the Government 20 years ago was \$585,000,000. It is now \$965,000,000. If the sinking-fund provisions had been in operation during that time, and we had levied sufficient taxes to have made them workable, we would have no debt now. As a matter of fact, we have increased the debt \$360,000,000 during this time of great prosperity, and we have done it because we have had unusual expenses in building the Panama Canal and in other ways. But under the provision of this amendment we would in a similar time-that is, within 20 years—pay every dollar of our national debt.
Mr. BRISTOW. Without any excessive tax

Without any excessive taxation or even any

unusual taxation.

I have quite intimate personal relations with Senators on the other side of the Chamber in committee work and I know that this appeals to their judgment. I hope that we can have an expression of honest judgment from the Senate in regard to

this very plain and proper amendment.

Mr. SMITH of Michigan. Mr. President, I hope the amendment offered by the Senator from Massachusetts [Mr. WEEKS] may find some support on the other side of the Chamber. It has been a matter of very serious concern as to the appropriate function that the bonds of this Government may perform after this bill becomes a law. They now perform a dual function. and have an artificial value by reason of that fact. That will be practically withdrawn and, unless some stable policy of government is adopted providing for their retirement, I believe that the value of our national bonds will become impaired and their present high value shattered.

The remark of the Senator from Colorado [Mr. Shafboth] a moment ago attracted my attention, when he said that this side of the Chamber were proclaiming that there would be a deficit. I do not know that we have proclaimed that, although there was a deficit last month of over \$4,000,000. The other side of the Chamber have deliberately thrown away vast millions of income by their recent tariff legislation; they presented over \$60,000,000 a year as a gift to the American Sugar Refluing Co. in remitted duties. This does lead to the fear that possibly there will not be revenue enough collected in the manner provided to insure any great surplus as long as they are

This last 13-year period of Republican ascendancy referred to by the Senator from Massachusetts interests me very much. Senators upon the other side of the Chamber who have seen fit to impose new legislative conditions upon the country can not be very familiar with that record. It is a record of which we feel proud. We are proud that the national wealth of the country during those 13 years referred to by the Senator from Massachusetts has increased from \$90,000,000,000 to over \$140,-000,000,000. We are proud of the fact that the savings of the people during that identical period increased from over two and a half billion dollars to over four billion dollars, representing in large part the savings of labor. The wages of those employed in manufactures during those 13 years increased from two and a quarter billion dollars to four and a half billion dollars, while the products of manufacture during that period increased in value from nearly twelve billion dollars to over twenty billion dollars. During the same period the number of employees in the industries of our country increased from over five million to over seven million two hundred and fifty thousand people. To-day many of those people are looking for employment, which has been seriously jeopardized by legislation which has been enacted during the present administration.

The value of farm lands increased during that period of 13 years from \$13,000,000,000 to nearly \$30,000,000,000; our ex-

ports increased from \$1,500,000,000 during that period of 13 years to \$2,100,000,000. The manufactures exported last year under the law for which this side of the Chamber was responsible, not including foodstuffs, amounted to the unprecedented

sum of over a thousand million dollars.

Mr. President, with such a record we had hoped that there would continue to be a sufficient balance in the Treasury to warrant the policy advocated by the amendment proposed by the Senator from Massachusetts. But is there to be a deficit? Is the policy of the other side of the Chamber to bring ruin upon the country? There is scarcely a city or a town in this broad land that has not been unfavorably affected by this overdose of Democracy; scarcely a city or town in which men have not been driven from their customary and remunerative employment by the hostile legislation for which the present national administration is largely responsible.

As I said yesterday, and as I shall not repeat in detail, there is as much money in the country to-day as there was a year ago, when we were at the very height of our prosperity, when the credit of the country was at its highest point; there is to-day the same amount of money in circulation; there has been no curtailment of our circulating medium; it amounts to more per capita than it ever did before, and in its aggregate represents more than three and a half billion dollars of the best money that the people of this country have ever had or desired.

Mr. President, surely this amendment can not be in contravention of any well-settled principle of our opponents on the other side. Opposition to it surely can not voice the wishes of an administration that has so recently injected the new freedom into the affairs of government and plumes itself upon its solicitude for the welfare of the country; surely there should be no opposition to a simple declaration of governmental policy that when there is ample surplus it shall be devoted to the payment of the obligations of the Government, which, in my opinion, is about the only way in which the credit of the country, as represented in its Government bonds, can be maintained. hope Senators on the other side of the Chamber will not vote this amendment down; I hope they will consent to a policy so wholesome and helpful and beneficial. I know that Senators upon the other side are patriotic and have the interest of the country at heart; many of them perhaps differ from us in the details of governmental management, but in the general principle enunciated in this amendment there should be general and universal acquiescence.

The PRESIDING OFFICER (Mr. SHIVELY in the chair). The question is on the amendment submitted by the Senator from Massachusetts [Mr. WEEKS] to the amendment of the Senator from Oklahoma [Mr. OWEN].

Mr. WEEKS. On that I ask for the yeas and nays,

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). cause I am paired with the senior Senator from Missouri [Mr. STONE], who is ill and therefore absent, I withhold my vote. If

at liberty to vote, I should vote "yea."

Mr. DU PONT (when his name was called). eral pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

The roll call was concluded.

Mr. STERLING. I am paired with the senior Senator from Louisiana [Mr. Thornton] and therefore withhold my vote.

Mr. REED. I renew my announcement with reference to the absence and pair of my colleague, the Senator from Missouri [Mr. STONE]

Mr. SMITH of Arizona. I announce my pair with the Senator from New Mexico [Mr. Fall]. If the Senator from New Mexico were present and I were permitted to vote, I should vote "nay."

Mr. SMITH of Georgia (after having voted in the negative). I withdraw my vote, as I have a pair with the Senator from Massachusetts [Mr. Lodge].

The result was announced—yeas 40, nays 44, as follows:

YEAS-40.

Borah Bradley Brady Brandegee Bristow Burton Catron Clapp Colt	Cummins Dillingham du Pont Gallinger Goff Gronna Hitchcock Jackson Jones	La Follette Lippitt McCumber Nelson Norris Oliver Page Penrose Perkins	Root Sherman Smith, Micl Smoot Stephenson Sutherland Townsend Warren Weeks

So the amendment of Mr. WEEKS to the amendment of Mr. Owen was rejected.

Mr. BURTON. Mr. President, I offer an amendment, which ask to have read from the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The Secretary. On page 30 of the last print of the bill, line 7. subdivision (c), it is proposed to strike out:

To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirement specified in this act: *Provided*, That.

Mr. BURTON. The first word of the remaining portion of the subdivision should then begin with a capital letter—"It." Subdivision (c) is found on page 37 of the original print of December 1, on page 29 of the amendment as introduced by the Senator from Oklahoma on December 1, and on page 30 of the

revised print of last night. In order to understand the matter which it is proposed to

strike out, and also the object of this amendment, it is necessary to read two other provisions of the bill, to which I will refer later; but, in the first place, Mr. President, I question the desirability of a substantive law providing for the suspension of reserve requirements. One of the most essential conditions to safety and stability in the banking business is confidence. An order for the suspension of reserve requirements would spread alarm over the entire country. We have now definite requirements for reserves-25 per cent in central reserve cities and reserve cities, and 15 per cent outside of reserve cities. It is perfectly well known that on many occasions the percentages of reserves have fallen below the requirements; indeed, in the panic of 1907 certain banks, although they were entirely solvent, reduced their reserves to 11 per cent. This infraction of the law was connived at because it was thought best to utilize reserves for the purpose for which they were intended, namely, that of meeting emergencies.

What makes especially objectionable this permission to suspend reserve requirements is the existence of two further provisions in the bill. On page 32 of the print of last night this provision is found among the powers of the Federal reserve

board:

(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

Thus it is permitted to use as reserves, not merely gold nor that which can be immediately changed into gold, but the very obligations of the regional banks, which are a debt. On page 52 of the print of last night there is another provision, as follows:

Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper as described in section 14 properly indorsed and acceptable to the said reserve bank.

So in this bill we see a departure from the salutary rules of banking. First, authority is given to the Federal reserve board to use the notes issued, it is true, in form by the Government and obligations of the Government, but really the obligations of the regional banks; second, to use a certain class of paper as reserves. To that is added the right to suspend reserve requirements.

In each of these instances, in the acceptance of obligations or paper and in the authority to use notes that are the obligations of banks of the system, the bill transgresses the safe rules of banking; and now it is proposed to add to all these the right to suspend the reserve requirements for 30 days. Mr. President, that makes a system which is subject to inflation and which is most unsafe.

Mr. OWEN. Mr. President, the Bank of England has approximately 62 per cent of gold against its notes. It holds as reserves against its liabilities, its deposits, 40 per cent of those notes. In effect 40 per cent of 60 per cent is about 25 per cent of gold against the deposits of the Bank of England, which is the reserve bank of England. The Bank of England operates

under the law of 1844. Three times by ministerial permit a tremendous panic and crisis in England has been immediately averted by suspending the reserve requirements. They have done that in violation of law. We have preferred to permit by law that which in England has been done on three great occasions in spite of the law and in defiance of the law, just as in this country we do not permit clearing-house certificates, and yet the clearing houses have been compelled by the exigencies of our national system to emit clearing-house certificates for the safety of themselves and their member banks. I am opposed to the proposed amendment.

Mr. BURTON. Mr. President, the situation presented by the action of the Bank of England is not at all parallel. rency system of Great Britain is perhaps the most rigid in the world. It has authority to issue £18,500,000 of notes based upon Government debt or stock. Not a dollar can be issued in addition to that unless there is an equivalent amount of gold on which the note is based. It is true there were suspensions of this rule, by the authority of the Government, in 1847, in 1857, and in 1866, but on only one of those three occasions were extra notes issued. But here in this bill you have commercial paper as a reserve, you have Federal reserve notes as a reserve. Thus you have already the authority for, and the possibility of an indefinite expansion of your reserves. Still further, in addition to all that, you intend to say there may be a suspension of the reserve requirements.

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from Ohio to the amendment.

The amendment to the amendment was rejected.

Mr. BRISTOW. Mr. President, I offer the amendment which

The PRESIDING OFFICER. The amendment to the amend-

ment tendered by the Senator from Kansas will be stated.

The Secretary. On page 30, line 10, after the word "act," it is proposed to amend the amendment of Mr. Owen by insert-

Except the provisions relating to gold reserve against Federal reserve notes.

Mr. BRISTOW. That permits the suspension of the reserve requirement so far as the deposits are concerned, but it does not permit the suspension of the reserve requirement so far as the notes and the gold reserve against the notes are concerned.

The objection which the Senator from Oklahoma made to the amendment offered by the Senator from Ohio can not lie against this amendment. Certainly we should not permit any board to suspend the gold reserve that is behind the circulating notes of the country. That should be fixed by law. It is a dangerous power. It might lead to the gravest trouble. stability of the gold reserve should be hedged about with the greatest care.

I hope the Senator from Oklahoma will not resist this amend-

Mr. OWEN. Mr. President, I must protest against the constant reiteration that there is a lack of stability in the American banking system as to its note issue. The American notes are better secured than the notes of the Bank of England. have \$1,100,000,000 of gold against the gold certificates. have \$150,000,000 of gold against the greenbacks. We have \$110,000,000 of free gold in the Treasury. We have \$225,000,000 We have of silver on a gold basis in value. We have in the Treasury approximately \$1,500,000,000 of value in gold measure against the issue of \$1,100,000,000 of gold certificates, \$346,000,000 of greenbacks, and \$480,000,000 of silver certificates, making a total of about \$1,500,000,000 against \$1,900,000,000.

The national-bank notes are not only secured by bonds, dollar for dollar, but they are secured also by the assets of the national banks, which amount to approximately \$10,000,000,000, and they have \$600,000,000 of gold in their vaults.

I deny this idea of American notes being inferior to European notes. It is not true. No American ought to protest that these notes are defective in quality or character and are not

equal to the European notes.

Mr. BRISTOW. Mr. President, the Senator is discussing the question as to what our wealth is in money. I know we have over a billion dollars in gold down here in the Treasury. It does not belong to us, however. It belongs to the people of the United States.

This amendment simply takes from a board the authority to suspend the gold-reserve requirement for the notes. The Democratic caucus has increased that gold reserve from 331 per cent to 40 per cent. Why did it do it? Because it felt that 331 per cent was not a sufficient reserve behind those notes; but of what account is such increase if authority is given to a board to suspend the requirement?

Personally, I am in favor of putting into the law the goldreserve requirement, and fixing the amount as nearly as we can at what we believe is necessary. I agree that in case of a gradual decline below the reserve requirement, the deficiency can be taxed so as to stop the decline in the reserve; and provision has been made for that, though, I think, in a very imperfect way, by the caucus action. What I want, however, is to take out of the hands of this board the authority to suspend the requirement as to the gold reserve behind the currency.

The fact that there is in the Treasury of the United States a lot of gold, belonging to hundreds of thousands of people, for which certificates are out, has not anything to do with the gold reserve behind these notes. That is simply an asset of the American people. To be of any use, so far as the notes are concerned, it must be in the hands of the banks that issue the notes and stand responsible for them. It simply means that we have gold in the United States that the banks can get; but we do not know how long it will be before that gold stock may be depleted. To provide against such depletion it is necessary to have fixed in the law the gold reserve that is required.

Mr. WILLIAMS. Mr. President, as I understand the Senator's amendment, it is that this reserve is never to be less than

the percentage fixed in the bill.

Mr. BRISTOW. Yes; that is right.
Mr. WILLIAMS. That is true, is it not?

Mr. BRISTOW. Yes. Mr. WILLIAMS. That it shall be a violation of law for it

to fall below the minimum stated in the bill?

Mr. BRISTOW. Yes; that is correct-not a violation of the law, but the proposed law takes from the board the authority to suspend that requirement.

Mr. WILLIAMS. I understand; so that under no circum-

stances whatsoever can it ever be varied from.

Mr. President, I want to say that no more absurd idea ever was thrown out than the notion of a fixed, anchored, immovable reserve in a banking system—a reserve which can not work; a reserve which, no matter what the emergency may be, is worth John Stuart Mill said that a reserve of that sort might just as well be sunk 4 miles deep in the middle of the ocean, and he was exactly right.

In the old times the Austrian monarchy had what was called the Aulic Council. It was a board of military men who sat in Vienna and directed the campaign. They drew up beforehand the manner in which a campaign had to be fought by the generals in the field. A great many stories illustrating their stupidity have been told or written, and amongst others this

story:

It was said that they once gave a general in command of an army the order that when he went into battle at a certain place, fixed by them beforehand—the enemy to be there all right—he should hold 20,000 men in reserve all through the battle. At no stage of the battle was the reserve to be fought. At no stage of the battle were those 20,000 men to be used. The fool Aulic Council did not see that they were passing an order to subtract 20,000 men from the total number of the army engaged in the It was solemnly related that later on, when the general put the 20,000 men into battle anyhow and won the battle, which he could not have won but for them, they summoned him before a court-martial in Vienna, and had him temporarily

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. WILLIAMS. I do.

Mr. BORAH. That was an instance in which the military

general broke over the caucus rule.

Mr. WILLIAMS. That was an instance in which the military general broke over a fool law, or regulation with the force of law, just like the one that the Senator from Kansas is trying to put upon this bill, providing for a fixed, immovable, anchored reserve, sacred, not to be used. Why, you might just as well sink it 4 miles deep in the middle of the Atlantic for all the good

England tried that fool thing, and put it upon the statute books. It is a law there yet. What is the consequence? When-ever they get into a tight place the board of governors go to see the premier, and the premier promises a bill of indemnity from Parliament if they will violate the law—pursuing the uniform course of our cousins across the water of making a law and then making its breach respectable by precedent.

Our present national-banking law has the same foolish thing upon the statute books. There never is a strain upon the financial system of this country when it is not necessarily violated, and no man ever has been bold enough to propose to punish the

I am speaking in all due seriousness and not humorously when I say that this proposition is precisely equal in intelli-gence to the order which the jester said had been issued by the Aulic Council to the general about to engage in a great battle.

Every now and then we come to a situation of things where it requires every financial nerve of the country to support the system and where a bank ought to pay down to the very last dollar in its till in the hope that the rush may stop before the last dollar is reached. Meanwhile, while paying out, it can be making arrangements to reinforce the reserve through other means.

It is hard for me to believe that the Senator from Kansas means anything more by this amendment than to embarrass the majority or to get an opportunity on which to found a

speech about an insufficient gold reserve.

If there is an insufficient gold reserve, of course it ought to be raised. Experience will teach us whether there is or not. Whatever it may be, however, it ought not to be held there without any use, without any possibility of use, without any utility, without any work to perform, no matter how great the

crisis of the battle may be.

Mr. BRISTOW. Mr. President, of course the Senator from Mississippi, in his usual dogmatic way, has pronounced every opinion that is offered contrary to his views to be ridiculous, silly, foolish, absurd, and unworthy of serious attention by anybody. If the great English nation in its administration for hundreds of years has done anything that does not meet his approval, he pronounces it a foolish and ridiculous thing. The same is true of any other of the great civilized nations, or of any great statesman, as far as that is concerned. If he has done anything that does not meet the approval of the Senator from Mississippi, he at once pronounces it the most ridiculous and absurd thing of which a sensible man could have been

The Senator from Mississippi has proceeded to discuss this matter as though the amendment I have proposed undertook to forbid a bank from paying out money to its depositors if its reserve is below the legal requirement. It does not have anything to do with the deposits. It relates to the gold notes.

Mr. WILLIAMS. I did not say that. I said you forbid it to be used when a rush of notes is brought upon the bank.

Mr. BRISTOW. It has not anything to do with the payment It is the issuing of notes that it would forbid. It does not forbid the payment of notes, but it does forbid a bank from going further into debt, unless it has the resources to meet that debt. It is as sound a business proposition as could be incor-

Let me use an illustration. If a man is in debt as much as it is safe for him to go in debt with his available resources, he ought not to go in debt any more and run the risk of injuring his credit. If the gold reserve behind the Federal notes gets down to a certain point, we think, and the majority caucus thinks, it should then stop. So I suppose after full deliberation this provision was inserted in the bill yesterday:

And provided further. That when the gold reserve held against Federal reserve notes falls below 40 per cent, the Federal reserve board shall establish a graduated tax of not more than 1 per cent upon such deficiency until the reserves fall to 32½ per cent, and when said reserve falls below 32½ per cent, a tax at the rate increasingly of not less than 1½ per eent upon each 2½ per cent or fraction thereof that such reserve falls below 32½ per cent.

That amendment provides that the gold reserve may go down and notes may be issued when the reserve is below the legal requirement, but the banks that receive those notes must pay additional interest and an additional tax because of the condition of the gold reserve.

The illustration about the use of reserves which the Senator from Mississippi makes with such confidence has no application whatever to this amendment. Not only has the Democratic caucus provided that the reserves may be depleted, and that when they are depleted a tax shall be imposed to stop further depletion, but it goes further and nullifies the very provision which is incorporated in it by giving the Federal reserve board power to suspend it.

What is a gold reserve for except to maintain the credit of the Government's obligations-for these are made the Government's obligations-to sustain the credit, to sustain the value and usefulness of the notes that are based upon that reserve? When it is depleted, when it is paid out to the last cent, the notes will be below par and demoralization will ensue. A gold reserve against notes can not be paid out to the last cent, and it never should be thought of.

Mr. WILLIAMS. I should like to ask the Senator a question, to see if I understand him. I understand his position to be

that if people shall bring notes to a reserve bank for redemption, when the gold in the vaults of the reserve bank has been decreased by a process of redemption to a point where it is less than 40 per cent of the notes still outstanding, the bank must stop the process of further redemption of its notes. Is that the case, or not?

Mr. BRISTOW. If the Senator will yield to me, he of course does not understand what the Senator from Kansas has been saying. I can not understand why. The very paragraph I have read does not maintain it at 40 per cent. It lets it go down to the bottom, but it puts on a tax, and the result of imposing that tax would be to prevent it from going to the bottom.

not want that salutary provision suspended by any board.

Mr. WILLIAMS. The amendment of the Senator from Kansas provides that the reserve held against the notes shall never

be reduced below the minimum.

Mr. BRISTOW. The Senator from Mississippi has not heard the amendment, and does not know what it means, nor what it says. He had better ask for a reading of the amendment.

Mr. WILLIAMS. A moment ago, when I started out, I asked

the Senator from Kansas if that was not his amendment, and he said "yes."

Mr. ROOT. May I ask that the amendment which is before the Senate may be read?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from New York?

Mr. WILLIAMS. Yes.
Mr. ROOT. I ask for a reading of the amendment.
The PRESIDING OFFICER. The amendment will be read.
The Secretary. The amendment comes in section 11, subdivision (c). In the last print of the amendment of the
Senator from Oklahoma it is on page 30, line 10. After the word "act" it is proposed to insert a comma and the words:

Except the provisions relating to gold reserve against Federal reserve notes

So that, if amended-

Mr. WILLIAMS. I understood the amendment perfectly, and I understand it now. We have provided there that it shall be within the power of the Federal reserve board to suspend all reserve requirements in the act. The Senator now offers an amendment to the effect that that shall not apply to the re-serves behind the notes. Therefore it necessarily follows that if bank has paid its notes, redeemed them, down to the point where it has less than 40 per cent or only 40 per cent left, it can not proceed further in paying out the reserve for the redemption of notes

Mr. BRISTOW. Mr. President, will the Senator yield to me? Mr. WILLIAMS. No; I decline to yield right now. I will in a minute.

Just one word more. The clause which the Senator has read about the tax applies to the reserve held for deposits. In that way we put into the body of the act an automatic tax which shall operate upon the reserve when the reserve is held for deposits.

I said a moment ago-and I want the attention of the Senator from Kansas-that that applies to the deposits. I do not mean it applies to the deposits alone; it applies to all the reserv

The Senator's amendment applies only to the reserve held behind the notes. What he proposes to do is to provide that under no circumstances, either by law or by order of the board, shall the reserves held behind the notes ever be less than 40 per cent, or the minimum requirement, whatever it is. If that be the case and a Federal bank had a run upon it with notes for redemption, the Senator would stop the redemption of those notes at the 40 per cent line. If that is not the case, then I have said what I have said under a misapprehension of the Senator's amendment. If so, it is because in order to understand it I asked the Senator before I said a word if that was what he meant, and he said, "Yes"; and the RECORD will show it.

Mr. BRISTOW. The Senator is mistaken in every instance.

should like to have the amendment read again, please, and I should like to have the attention of the Senator from Mississippi to the reading of the amendment.

The Secretary. On page 30, line 10, after the word "act," it is proposed to insert a comma and the words "except the provisions relating to gold reserve against Federal reserve notes," so that if amended it will read:

(c) To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirements specified in this act, except the provisions relating to gold reserve against Federal reserve notes.

Mr. BRISTOW. Now, what is that provision? I will read it:

And provided further, That when the gold reserve held against
Federal reserve notes falls below 40 per cent, the Federal reserve board
shall establish a graduated tax of not more than 1. per cent upon such
deficiency until the reserves fall to 32½ per cent, and when said reserve

falls below $32\frac{1}{2}$ per cent, a tax at the rate increasingly of not less than $1\frac{1}{2}$ per cent upon each $2\frac{1}{2}$ per cent or fraction thereof that such reserve falls below $32\frac{1}{2}$ per cent.

I take from the Federal board the authority to suspend that provision, and under that provision the Federal bank can pay out as long as it has a dollar of gold; but the tax piles up, and of course it will not pay the tax, because it will get the gold.

Mr. WILLIAMS. Yes; I understand that; and if the tax should grow, let us say, to 15 or 20 per cent, where it would become prohibitive, they could not pay out another dollar of

Mr. BRISTOW. Why, no; but that is the provision incorpo-ated in the bill. The principle, I think, is all right. The PRESIDING OFFICER. The time of the Senator from rated in the bill.

Kansas has expired.

Mr. ROOT. Mr. President, the best way to ascertain the effect of an amendment which takes away the power of suspension pro tanto is to see what the law is now, unsuspended, without the exercise of the power of suspension, and then see what would be the effect upon it if the power of suspension

The Senator from Oklahoma introduced yesterday evening, and the Senate adopted, an amendment which fixed the gold reserve against circulating notes at 40 per cent, and provided, not that the payment of notes that were presented to the bank should cease at the point of 40 per cent, not that the payment should cease at any other point, but that whenever the payment brought the reserve below 40 per cent there should be a progressive tax-not a very heavy one; in my judgment, not a sufficient one-a tax of not more than 1 per cent upon the deficit from 40 per cent down to 321 per cent, and then a larger tax as the reserve is reduced below 321 per cent.

Mr. WILLIAMS. Not less than 14.

Mr. ROOT. Not less than 11, as against, preferably, 21 per

Now, that is what can be done by the law as it is now. The banks, while the reserve is fixed at 40, nevertheless are at liberty, it would be lawful for them to keep on paying, to keep on reducing their reserves down from 40 to 32, and below 32, without limit. The only thing which tends to discourage that is that it will be increasingly expensive for them to do it. That is the law now, and that will always be the law so long as no provision is suspended. So, if you take away from the reserve board the power to suspend it will continue the law that the banks can go on reducing the reserve lower and lower, discouraged only by the increasing expensiveness of doing it.

Now, what would be the effect if the board were to suspend these provisions? It would be not to confer upon the banks power to pay out but to repeal, nullify, set aside the whole taxing provision. That is to say, while the Senate in its wisdom has now determined to discourage a reduction of reserves below 40 per cent by a progressive tax, the former provision giving power to the board to suspend reserve requirements leaves it in the power of the board to nullify the provision the Senate has just put in. The effect of suspending reserve requirements to the gold reserve would be not to permit the banks to keep paying, for that the law gives them the power to do, but it would enable the board to repeal the progressive-tax provision; it would enable them to nullify the very mandatory provision that by the amendment adopted last night we put upon them; that is

Mr. WILLIAMS. Does not the Senator from New York think that when we put into the bill an automatic tax which we think ordinarily will work well there still ought to be discretion left in the board, when peculiar circumstances show that it is not working well, giving them the authority to dispense with it or suspend it for the nonce? At any rate, that was the idea in our minds, that while for the ordinary normal working of the system this rule was the best we could contrive, there might come a very remarkable set of circumstances for a time during which it would be well for the board to have the power to suspend all the regulations concerning the reserve.

Mr. ROOT. No, Mr. President; I do not think that ought to be done. Of course, it will always be abnormal when the banks go very much below their reserves. All that leaving this power in the board amounts to is that whenever this progressive-tax provision is brought into operation the board can dispense with it. It makes our provision of a tax brutum fulmen; it makes it of no avail. It declares a rule and authorizes this subordinate agency to set aside the rule. I think it makes the whole provision a vain pretense.

Mr. WILLIAMS. Let me put a case to the Senator before he takes his seat. Suppose the condition should be such that it would be evident to everybody that an immediate tax of 5

per cent would stop a wild inflation. When the reserve had reached 40 per cent this provision says that this board shall fix a tax of 1 per cent and on down to 321. It seems to me it would be very wise to let the board have the power under those peculiar circumstances to make that tax 3 or 5 or 6right down-if it was considered necessary in order to check the speculation.

Mr. ROOT. But the provision to which the amendment offered by the Senator from Kansas is directed does not touch that at all. The power to suspend, from which he would exempt this tax provision, does not carry the power to impose a larger

Mr. WILLIAMS. Oh, the power to suspend in whole carries the power to suspend in part.

Mr. ROOT. Yes.

Mr. WILLIAMS. If the board, instead of fixing a tax of 1 per cent at that time for the fall below 40 per cent and not below 32½, would fix a tax of 5 per cent, that would be a suspension of that much of it.

Mr. ROOT. It would be more than a suspension; it would be imposing a tax for which no power is given in the bill, for the provision which did give them power to impose a tax has now been stricken out. If you want to accomplish that, instead of giving the board power to suspend, change the terms of this provision and instead of a requirement of a tax of not more than 1 per cent make it a requirement of a tax not less than 1 per cent. Then the board would have the power to which the Senator refers.

Mr. WILLIAMS. It would be better to strike it out and leave it entirely in the discretion of the board?

Mr. ROOT. I did not say that. I said that the provision which gave the board discretion had been stricken out.

Mr. WILLIAMS. I will tell the Senator why we thought, under a normal working system, it would be better to have the rule laid down in the law, even if the board could at times suspend it. When it works automatically it creates no excitement; everybody knows beforehand just what must happen; but if it were left entirely within the discretion of the board without this automatic rule, of course the board would sound an alarm unnecessarily, psychologically, whenever it issued an order to suspend a reserve requirement. So it was thought better to have in the body of the act that which would work in normal times and ordinarily automatically and perfectly, and still leave the board with some authority for abnormal and very remarkable cases.

Mr. HITCHCOCK. Mr. President, the Senator from Mississippi evidently labors under the delusion that if the amendment offered by the Senator from Kansas is adopted a reserve bank will be prohibited from paying a note which may be presented at any time. That is not the case. As I understand the amend-ment adopted by the Senate last night on the motion of the Senator from Oklahoma, it provided that the reserve should be 40 per cent against the notes, and that when banks issued those notes so that their reserves fell below 40 per cent a graduated tax should be imposed, increasing as the deficiency increased. During all the time, however, the reserve bank would be under obligation to redeem any note presented, no matter how low its reserve might be at the time, the only restriction imposed upon it being against the issuance of new notes, and even then the only restriction being that it was taxed increasingly as its deficiency increased.

Under those circumstances it seems to me entirely unnecessary to empower the board to suspend the reserve requirements. I agree with the Senator from Kansas and the Senator from Ohio that it would be manifestly a weakening of the bill and a suspension of its safeguards to repose discretionary power in the reserve board or anywhere else to nullify the safety provisions which the Senate has seen fit to place in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Kansas to

the amendment.

Mr. BRISTOW. On that I ask for the yeas and nays.

The yeas and nays were ordered.
Mr. SHAFROTH. Mr. President, I suggest the lack of a quorum.

SEVERAL SENATORS. Oh, no. Mr. SHAFROTH. Senators who are in the Senate Office

Building-

Mr. GALLINGER. It is not debatable. Mr. SHAFROTH. Are unable to reach the Chamber before the conclusion of one roll call.

The PRESIDING OFFICER. The Secretary will call the

The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Borah Myers Nelson Newlands Sherman Shively Simmons Gallinger Goff Gore Newlands Norris O'Gorman Overman Owen Page Perkins Poindexter Pomerene Ransdell Gronna Hitchcock Hollis Hughes James Smith, Ariz. Smith, Ga. Smith, Md. Smith, S. C. Bradley Brady Brandegee Bristow Bryan Burton Smoot Stephenson Johnson Jones Kenyon Kern Lane Burton Catron Chamberlain Chilton Clapp Clark, Wyo. Clarke, Ark. Cummins Dillingham Flotcher Sutherland Swanson Thomas Thompson Reed Robinson Lane
Lea
Lewis
Lippitt
McCumber
Martine, N. J. Townsend Vardaman Walsh Warren Weeks Root Saulsbury Shafroth Sheppard Fletcher

Mr. REED. I renew my announcement in reference to the necessary absence of my colleague [Mr. Stone], on account of illness.

Mr. GALLINGER. I desire to announce the absence of the junior Senator from Maine [Mr. BURLEIGH], on account of illness

The PRESIDING OFFICER. Seventy-two Senators have answered to their names. A quorum is present. The question is on the amendment submitted by the Senator from Kansas, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary called the roll.

Mr. CHAMBERLAIN. I ask if the junior Senator from Pennsylvania [Mr. OLIVER] has voted.

The PRESIDING OFFICER. He has not voted.

Mr. CHAMBERLAIN. Having a pair with the junior Senator from Pennsylvania, I withhold my vote.

Mr. SMITH of Arizona. I again announce my pair with the Senator from New Mexico [Mr. Fall]. If I were at liberty to vote, I would vote "nay."

Mr. WILLIAMS (after having voted in the negative). The Senator from Pennsylvania [Mr. Penrose] voted upon the last yea-and-nay call, and I thought he was in the Chamber. Thinking that, I voted under a misapprehension. I have a pair with

that Senator, and I wish to withdraw my vote.

Mr. REED. I renew my announcement in reference to the enforced absence of my colleague [Mr. Stone] and his pair with the Senator from Wyoming [Mr. CLARK]. If my colleague were present, he would vote "nay."

Mr. CHILTON (after having voted in the negative). thinking that the junior Senator from Maryland [Mr. Jackson] was in his seat. He has not voted, and, as I have a pair with him. I ask leave to withdraw my vote.

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. Culberson]. I will transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I

Mr. STERLING. I transfer my pair with the senior Senator from Louisiana [Mr. Thornton] to the junior Senator from California [Mr. Works] and vote "yea."

The result was announced—yeas 37, nays 41, as follows:

YE	AS-37.	
Cummins Dillingham du Pont Gallinger Goff Gronna Hitchcock Jones Kenyon La Follette	Lippitt McCumber McLean Nelson Page Perkins Poindexter Root Sherman Smith, Mich.	Smoot Stephenson Sterling Sutherland Townsend Warren Weeks

So Mr. Bristow's amendment to the amendment was rejected. Mr. OWEN. I move the adoption of my amendment.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma.

Mr. BURTON. What is that amendment?

Mr. OWEN. The amendment in the nature of a substitute for the House bill.

Mr. BURTON. The whole bill?

Yes. Mr. OWEN.

Mr. BURTON. I have several amendments that I desire to offer first.

The VICE PRESIDENT. The Senator from Ohio proposes an amendment, which will be read.

The Secretary. On page 39, line 5, strike out subdivision (k) in the following words:

(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

Mr. BURTON. Mr. President, I regard this as one of the most objectionable portions of the bill. It did not appear in the measure as it passed the House and, according to the best of my recollection, it was not included in the bill as first presented to the Senate by the Senator from Oklahoma. What does it mean? That debts, debts for which the Federal reserve banks are responsible, can be used as reserves. It is in its essential feature no different from the position of a man who having borrowed \$10,000 proposes to use his debt of \$10,000 as a basis for further credit.

Are we to have reserves or not? There are strong arguments against the maintenance of any fund or security in the form of reserves and leaving it to the discretion of the individual bank or banker; but whatever we do, we ought to make a requirement that the reserve, however provided for, shall be actual money and not debts.

All over the world, at least in the more civilized countries, gold is the favorite reserve. Silver is still employed in some nations, and to some extent notes, which can be readily exchanged for gold, may be used for this purpose.

It is argued on the other side, "Why, these notes are redeemable in gold; they are well secured; they ought to be placed on the same basis with the greenback." But, Mr. President, do not let us deceive ourselves in this regard. The law of the country for the last 50 years has excluded national-bank notes from use as reserves by national banks. Why? Because they did not have that same quality of money which gold has or which greenbacks have.

Let us compare the gold or the greenbacks with these Federal reserve notes. Gold, of course, is accepted as money the world over. Greenbacks can be immediately exchanged for gold. The silver certificates can be exchanged for silver dollars, and those silver dollars rest on the faith that the United States Government will fulfill its promise, expressed in the most explicit terms, that their value shall be maintained on a parity with gold.

So all these are either metallic money, the money of the world, or else transferable into it, and they may be a credit of the banks that hold them. But these regional reserve notes, though in form an obligation of the Government, though the Government must issue them, apportioning the amounts to the different banks, are the debts of the regional banks. Whatever may be the form or the manner in which they are issued, when a Federal reserve note is put out, it may be taken to the regional bank or to the Treasury to be redeemed. The Government may, in the first instance, redeem it, but it must call on the bank to which it was issued to pay immediately in gold. The distinction is perfectly manifest. The fact that they are stable notes has nothing to do with it, because they are the obligation of this system of regional banks. It is a new kind of currency which is entirely different from the greenback, from gold, or any form of reserve money which has been used in the banks.

Dangers of inflation lurk in this to a degree that is unthinkable. After a bank might have used all its gold, all the greenbacks, all the forms of money which are now in vogue for reserves, it might go still further, and proceed indefinitely to issue these notes, pyramiding the reserves, basing loans on false credit, until there would be a degree of expansion not only dangerous to the country but, I insist, even ruinous.

It may be said that this is within the discretion of the Federal reserve board. But, Mr. President, in the mutations of politics we do not know what may happen. We know one thing, that in the past there has been grave danger to this Republic and to its people from unsound views on the subject of money. If we had a Federal reserve board that believed, as a very numerous class of thinkers have believed, that you can add to the wealth of the world by setting the printing press at work, there would not only be danger but financial disaster to the very last degree.

So, Mr. President, I move that this provision be stricken out. There is abundant opportunity to secure reserves without it.

There is another provision that I do not think ought to be left in here, and I shall move to strike it out. It is that certain kinds of paper or obligations may be used for half of the

There is another provision that the Federal reserve board may suspend all requirements; and not only is this piling Ossa on Pelion, but you have brought a whole mountain range and

piled it upon the two.

Mr. SHAFROTH. Mr. President, I wish to say just a word. This matter has been discussed very thoroughly; it is not a proposition that is at all new. The dangers which the Senator from Ohio [Mr. Burron] indicates might occur are so remote that they are hardly a possibility. We find, as a matter of fact, that it is not a compulsory provision. The necessity for something of this kind arises from the fact that there is now a shortage in reserve money, even for the national banks. We have invited the State banks to come into this system, and the Senator from Oklahoma [Mr. Owen] has estimated that if they come into the system there will not be enough reserve money by

\$239,000,000.

According to my calculation, the sum will be even greater than that; but even taking that figure, there is evidently not enough. That being the case, the Federal reserve board are not going to exercise this power unless it be necessary to exercise it. On that account it seems to me that this is a precautionary measure. We ought not to have a central board here with no discretion whatever with relation to matters. This is a matter which, it seems to me, is wisely placed within their discretion. If there was plenty of reserve money, the position of the Senator from Ohio might be well taken. Even then, however, it would not be wise, but we know that there is not now enough reserve money even for the national-bank notes, because they would not be sent to the United States Treasury for redemption to the extent of \$600,000,000 a year, unless it was for the purpose of getting reserve money that they can use. That being the case, when we are short even of national-bank notes, when we are short of reserve money for national banks, it seems to me when we invite the 18,000 State banks into the system we ought to permit them to come in and not put a barrier against them so that they can not come in.

Mr. BURTON. Mr. President, in saying that there is a shortage of reserve money in this country and that this measure should be passed it seems to me the Senator from Colorado has fallen into one of the very worst fallacies which anyone could entertain. Shortage of reserve money! What does that mean? It means a shortage or a shrinkage of credit. If the Senator's theory is correct, whenever there is a shortage of reserves, as he calls it, all that we have to do is to print pieces of paper and place tokens in circulation among the people. What does a shortage of reserve money mean? That you have gone to the very limit of what you can loan, that you have entirely exhausted the credit which should be extended. The whole basis of commerce and of all kinds of credit depends, in the first instance, on the quantity of ultimate money, gold or silver or whatever it may be. That quantity of gold or silver depends, in the last analysis, upon the amount of capital existing in the world and the reproduction of that capital. When you reach a point where there is a shortage in any of them you must slow down—indeed, you must stop—because you have gone further than is safe. If you go beyond that, you have a crisis; your whole structure topples over; there is a smash, because in the extension of and it and the critical structure. extension of credit and the resultant expansion people have gone on recklessly.

It is said the State bank can use national-bank notes. Why, Mr. President, there is no comparison between the two. The State banks are entirely outside of the national banking system. State banks can take these national-bank notes to a national bank and ask for greenbacks in their place, or they can take them to the Federal Treasury and ask for greenbacks in return for them. Then they can take the greenbacks to the Treasury and have them redeemed in gold. The process involves some indirection, two steps, but the State banks may obtain the gold upon the greenbacks. However, the national banks are in an entirely different position. These are their notes. To use their notes as reserves would be using their debts as reserves. So, ever since the formation of the national banking system every national bank has been forbidden-and the provision has been a wise and necessary one—to use national-bank notes as reserves. This bill, I may say, Mr. President, includes notes issued on the security of bonds as well as Federal reserve notes.

Mr. SHAFROTH. Mr. President, in answer to the Senator from Ohio, with relation to printing paper money and using it as reserves, I will say that it has been demonstrated time and again here that these will be the best secured notes that have

ever been issued by any Government or by any bank in the world. They are the notes not of the member banks, but they are the notes of the Federal reserve bank of the United States. They are not to be held as the reserves of the Federal reserve banks, but they are to be held as reserves in the reserves of the member banks. That being the case, it seems to me there

can be no objection to them whatever.

Mr. ROOT. Mr. President, I will not take up the time of Mr. ROOT. Air. President, I will not take up the time of the Senate, but I want to make one remark. I think I never saw anything more preposterous than this proposition since Mr. Micawber discharged his pecuniary obligations by giving his personal note of hand. I never saw anything so absurd as to authorize banks to secure their debts by a reserve consisting of a part of their debts. It seems to me, Mr. President, that our friends on the other side, having introduced into the bill a measure of protection against inflation, however unsatisfactory and inadequate it may be, are bound to keep the bill filled with other provisions which will make that protection entirely

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Ohio.

Mr. BURTON. On that I ask the yeas and nays, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Nelson Norris O'Gorman Owen Page Perkins Pittman Poindexter Pomerene Goff Gore Gronna Hitchcock Hollis Hughes Simmons Smith, Ariz. Smith, Md. Smith, Mich. Smith, S. C. There is a quorum present. ing question is on the amendment submitted by the Senator from Ohio [Mr. Burton] on which the yeas and nays have been ordered. The Secretary will state the amendment to the amend-

The Secretary. In section 11, outlining the authority and powers of the Federal reserve board, it is proposed to strike out subdivision (k), which appears on page 32 of the last print. The subdivision reads as follows:

(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called).

I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. SMITH of Georgia (when his name was called). I have a pair with the senior Senator from Massachusetts [Mr. LODGE] and therefore refrain from voting. If I were at liberty

to vote, I should vote "nay."

Mr. STERLING (when his name was called). I announce my pair with the senior Senator from Louisiana [Mr. Thorn-

TON] and therefore withhold my vote.

Mr. REED (when Mr. Stone's name was called). I again announce the illness of my colleague [Mr. Stone] and his enforced absence from the Chamber. He is paired with the Senator from Wyoming [Mr. Clark]. If present, my colleague would vote "nav

Mr. WILLIAMS (when his name was called). I wish to inquire whether the senior Senator from Pennsylvania [Mr. Pen-

Rosel has voted?

The VICE PRESIDENT. The Chair is informed that he has not.

Mr. WILLIAMS. I have a pair with that Senator. If he were present, I should vote "nay." As it is, I withhold my The roll call was concluded.

Burleigh Chamberlain Chilton

Mr. CHILTON. I inquire if the junior Senator from Maryland [Mr. Jackson] has voted?

The VICE PRESIDENT. The Chair is informed that he has not.

Mr. CHILTON. I have a pair with that Senator and therefore withhold my vote.

Mr. SMITH of Arizona (after having voted in the negative). voted inadvertently. I have a pair with the Senator from New Mexico [Mr. Fall] and therefore withdraw my vote.

Mr. CHAMBERLAIN (after having voted in the negative). Having a pair with the junior Senator from Pennsylvania [Mr. OLIVER | and he not having voted, I desire to withdraw my vote.

Mr. STERLING. I transfer my pair with the Senator from Louisiana [Mr. Thornton] to the junior Senator from Minnesota [Mr. Clapp] and vote "yea."

The result was announced—yeas 37, nays 40, as follows:

Stone Thornton Williams

Mr. BURTON. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 52 of the last print of the bill, it is proposed to strike out lines 15 to 18, inclusive, as follows:

Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper as described in section 14, properly indorsed and acceptable to the said reserve bank.

Mr. BURTON. Mr. President, here is another flagrant violation of the principles of banking. It grants a permission never before given in any Federal law, namely, that a bank may carry as a part of its reserves not money, not even Federal reserve notes, but eligible paper. That experiment was tried a great many times by the State banks under the old system, and I am safe in saying that, without exception, it worked badly.

The eligible paper described here is no doubt useful. It might constitute what is termed by the best writers on banking "a secondary reserve." A secondary reserve is composed of that secondary reserve." A secondary reserve is composed of that which can be changed into money in a brief time, such as Government bonds, securities that have a value readily ascertainable in the market and which can easily be sold on the exchanges. It includes bills of exchange, which have a special value because of the standing of the acceptor or the indorser. In time of stress, when the bank fears trouble, these can be realized upon promptly. But this is a bolder proposition than has been accepted by any State or country for many years in that it proposes to make of bills of exchange and other claims for money the equivalent of money.

Yesterday I called attention to the fact that the tendency in every one of the great banks of Europe has been to increase its metallic reserves. The quantity against circulating notes increased from a percentage of 29 in 1883 to 59 in 1904, and in all countries where there are reserve requirements the conditions have been made more severe. Shall we take a backward step by granting authority for the use of what is merely the obligation of others as the equivalent of gold or lawful money?

Both these provisions remind me very much of the device of the navigator who set up a bellows on his sailboat and placed it behind the sail, thinking that by manipulating it he could provide a capable substitute for the favoring breeze. You can not make a substitute for that which, according to the experience of the banking communities of other countries, is the one requisite for reserves-gold, or money that can be immediately changed into gold.

Mr. BRISTOW. Mr. President, let me ask the Senator if it is not equivalent to a man starting a bank with a capitalization, we will say, of \$300,000, and instead of paying the capital stock in he pays one-sixth of it, or \$50,000 in cash, and then the depositor, instead of depositing money, deposits his notes?

Mr. BURTON. The Senator means the stockholder?

Mr. BRISTOW. Yes; the stockholder deposits his notes in-

stead of cash.

Mr. BURTON. It is in principle just the same. Mr. BRISTOW. Instead of paying \$250,000 in cash he puts up his notes for that amount.

Mr. BURTON. That policy is exactly what wrecked banks by the hundred under the old State-bank system. One of the great advances made by the national banking law was the requirement, that the capital should be paid, one-half in cash and the remainder in not more than five months. That was not intended as a mere arbitrary provision of law. It was the result of long experience with a system under which there had been

disastrous failures. The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Ohio to the amendment.

The amendment to the amendment was rejected. Mr. BURTON. Mr. President, after the first amendment had been rejected I had little expectation of securing favorable action on the one just voted upon. They are of the same general type, but the former provision which I sought to have stricken out I think was more objectionable than the one intended to be eliminated by the last amendment. I now desire to offer another amendment.

The VICE PRESIDENT. The amendment will be stated. The SECRETARY. On page 45 of the last print of the bill, line 7, it is proposed to strike out "\$1, \$2," so as to read:

And shall have printed therefrom and numbered such quantities of such notes of the denominations of \$5, \$10, \$20, \$50, \$100, as may be required to supply the Federal reserve banks.

Mr. BURTON. Mr. President, as the bill now stands, authority is given to issue notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50, and \$100. We have had a great deal of experience along this line. Greenbacks in denominations of \$1 and \$2 were issued, and at the same time national-bank notes of the same denominations were allowed, but when we took a stock of our monetary supply in the latter part of the last century it was found that many varieties of our currency were redundant. It was realized that our silver did not have intrinsic value, and that it might cause us serious trouble. We had a large amount of money dependent on the faith of the Government, and we had other money which, like silver, was dependent in part, you may say one-half, on the faith of the Government, because it had, say, 50 cents of intrinsic value and the other 50 cents was like our paper money. Provision was made for a redemption fund for the \$346,000,000 of greenbacks by a gold reserve of \$150,-000,000. The question was, How can we float the rest of this very large quantity of paper money? But for a perfectly obvious fact it would have caused embarrassment at a very early The fact is that a certain amount of circulation is required in every nation-money to pass from hand to hand as a medium of exchange. There was the further fact that in many portions of the country metallic money, silver dollars certainly, was not in favor for pocket money; persons disliked the weight of silver, and did not wish to carry it around in their pockets.

In other portions of the country a generation had grown up accustomed to using paper money during the time when gold was out of circulation. Because of these conditions a very considerable quantity of paper money of small denominations was required.

What was done? What was the general policy adopted? The national banks had been issuing small bills, ones and twos, but they were forbidden thereafter to issue bills in denominations of less than \$5. The issuance of greenbacks in dennations of less than \$5 was forbidden at a later time. The issuance of greenbacks in denomiplan was to float this great amount of silver, whether in the form of silver dollars or in the form of silver certificates, by giving it the function of supplying small amounts, small change, \$1 and \$2 amounts. As the result of that policy, it appears from the report of the Secretary of the Treasury for 1912 that there were in circulation in June, 1912, the following amounts in small bills:

United States notes, greenbacks, \$1,830,994 in \$1 bills; in

\$2 bills, \$1,374,959.

Those are the survival of earlier laws, during which they were issued by the Government; no doubt a part of these amounts represent bills which have been lost.

Of national-bank notes outstanding issued before the lowest denomination was fixed at \$5 there were, in ones \$343,588, and in two-dollar bills \$164,312.

Now we come to silver certificates, which make up the great bulk of the circulation of one and two dollar bills.

In \$1 bills there are \$161,327,436; in \$2 denominations there

are outstanding \$62,854,116 of silver certificates.

The circulation of larger bills is left to other kinds of money. The minimum of the national-bank note is \$5. That of the greenback is also \$5. The minimum of the gold certificate is \$10. I may say, in this connection, to digress for a moment, that I think it is unfortunate that the minimum gold certificate is not larger than \$10, because the partial void which would be created in circulation would be supplied by greenbacks or other bills, such as silver certificates.

In England the minimum bank note is £5 (\$25). In Germany until recently it was 100 marks, or nearly \$25. In France it is 50 francs, or \$10. The rest of the money that is required is supplied by coins. It is the usual custom in other nations to utilize bank notes, such as are frequently brought to the treasury or to the bank for redemption in amounts of \$10 or more.

What will be the result if you put out these one and two dollar notes? In the first place, it will tend to drive the silver dollars out of circulation. In the next place it will cause trouble from the redundancy of those small bills—this great mass of silver, which has only been prevented from becoming an embarrassment to us through our need for small change-and by small change I do not mean merely the 50-cent pieces, the quarters, and so forth, but I mean also that the dollars and the two dollars will find a rival in the notes of the Federal reserve bank. Indeed, I think it would be best if the denominations were limited to \$10 and over rather than otherwise, but with a view to asking only what seems reasonable and for which there are unanswerable arguments, this amendment has been drawn so as to exclude merely the one and the two dollar notes.

Mr. BRISTOW. Mr. President, I should like to inquire of the Senators representing the Western States if they do not think it would be far better, and in the interest of the West, to strike out these one and two dollar notes, and let the smallest of the regional bank notes be \$5? Will it not encourage the use of silver as a subsidiary coin and be beneficial to the entire Rocky

Mountain region?

Mr. SHAFROTH. I presume that question is directed to me. If it were compulsory that they should issue one and two dollar notes, that might be; but we can not foresee the contingencies that may occur. The Federal reserve board, having this entire system at hand, would naturally conclude, I think, that the ones and twos probably should be left to silver and silver certificates. It is not a matter of importance, however, because it is a question of power only, and in all likelihood they will not exercise that power unless there is necessity for it. I do not believe in

curtailing that power unnecessarily.

Mr. BRISTOW. Does not the Senator think there might be some grave emergency where it would be necessary for the people to use one and two dollar bills instead of silver dollars

in the ordinary marts of trade?

Mr. SHAFROTH. We do not use one and two dollar bills in our part of the country. We use silver dollars, the coins themselves, and we seldom come across a one or two dollar bill. A condition of grave emergency which might arise is one of the things the Federal reserve board should take into consideration. In addition to that, I will say that even if such bills are issued in case of great emergency, the board can cancel them in 30, 60, or 90 days when the notes mature. They can hypothecate money with the Federal reserve agent, and they can exchange that money for ones and twos and retain the ones and twos and not let them out. It is all in their hands, and it is something that can be withdrawn at any time.

Mr. SUTHERLAND. Mr. President, the Senator from Colorado, like myself, comes from a silver-mining State. The Senator knows that for many years the quantity of coined silver dollars has not been materially, if at all, increased. Does not the Senator think that is very largely due to the fact that 1-dollar and 2-dollar bills are circulated in place of the silver? And does not the Senator think that if we were to-day to retire all of the 1-dollar and 2-dollar bills, the result of

that would be an increased coinage of silver?

Mr. SHAFROTH. Why, no; because we have no right to purchase silver. Ever since 1893 the law has been that you are prohibited from purchasing silver, except practically for subsidiary coinage; and the silver certificates have been used in place of the silver all over the United States. I do not think it would increase the coinage of silver.

Mr. SUTHERLAND. Of course, the Senator is right when he says that the purchasing clause has been repealed; but is it not true that if these 1-dollar and 2-dollar bills were retired, the need for smaller denominations of money would bring

about a change of the law in that respect? Is it not true, further, that it would increase the coinage of the subsidiary coin, the 50-cent pieces and 25-cent pieces, which to a very large extent are kept from circulation by reason of these paper

Mr. SHAFROTH. The difficulty with the position of the Senator is that he assumes that the ones and twos are going to be issued and can not be retired, whereas, as a matter of fact, it is only a matter of discretion. In the course of the administration of this law, if it is deemed proper to do it, we have confidence in board that they will do the proper thing,

Mr. SUTHERLAND. Let me ask the Senator another ques-What exigency does the Senator foresee that would call for the printing of the \$1 and \$2 bills provided for in this bill?

Mr. SHAFROTH. I do not foresee the contingency; of course not; but it possibly may occur. We do not foresee many of the contingencies that arise. Consequently, under such contingencles as we can not foresee, we do not want to foreclose or tie the hands of this board. If an emergency arises in which it is proper to do this, we have imposed various limitations. Our limitation now upon the coinage of subsidiary silver is \$200,-000,000. It used to be \$100,000,000; and notwithstanding the Treasury begged for a long while to have that increased, Congress would not do it, until at last it was increased from \$100,-000,000 to \$200,000,000; and now I understand there probably may be some shortage in that.

Mr. SUTHERLAND. Whatever may be the opinion of the Senator from Colorado, I have no doubt in my own mind that if this provision is left out of the bill, and if we were to go further and prohibit the printing of \$1 and \$2 bills altogether, the result would be an increased demand for silver, and that we necessarily would have to provide for the purchase of more

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Colorado?

Mr. SUTHERLAND. I do.

Mr. THOMAS. I was simply going to say that I thought the last suggestion of the Senator was the most pertinent one. If the use of one and two dollar bills as the representative of silver coin could be discontinued, so that money of those denominations could be based entirely upon the metal itself, there could be no question that that would encourage the further use of silver. Personally, I should be very glad to see that done, because I believe that would have the effect which the Senator from Utah suggests. I do not perceive, however, how the provision here for the use of one and two dollar bills can in any manner affect the increased use of silver, in view of the fact that under the present law, instead of having silver in circulation, we have its paper representative.

Mr. SUTHERLAND. To the extent that there is utilized

the power that is provided in this bill for the printing of \$1 and \$2 bills, just to that extent it will shut out the demand for

additional silver.

Mr. THOMAS. I do not think so.

Mr. SUTHERLAND. If we require more money of small denomination and the demand is supplied by this paper money, quantity of silver.

quantity of silver.

Think it is it seems to me inevitably it must shut out from coinage that

Mr. SUTHERLAND. I think it is a distinct discouragement to it; and whatever may be the position of others, I can not understand how any Senator coming from a silver State can support a provision of that sort, and not be willing to give what little encouragement he can to an industry of that character in

Mr. THOMAS. I will join the Senator and go him one better on any proposition to increase the use of silver money; and that, I think, is true of a majority of the Members on the Democratic side of the Chamber. So long, however, as under the statute the paper representative of silver money is being circulated, so long as the efficiency of the act of 1893 rests upon the clause forbidding the purchase of more silver, it is impossible for me to conceive how the injection into the present currency system of \$1 and \$2 bills is going to improve the silver situa-

If I thought it could do so, I certainly should be very glad to see this amendment prevail; and I may say personally that it might be a good thing, anyhow. In so far as it affects the use of silver, however, unless we go a step further and prohibit the use of paper representatives of the silver dollar, and then go another step further and provide for further coinage, free or otherwise, of the silver dollars, I think we are helpless so far as the silver situation is concerned.

Mr. SUTHERLAND. I wish to make just one further observation.

In what I have said about the coinage of silver, both in the form of the dollar and in the form of subsidiary silver, I do not mean to indicate any disbelief in the necessity for sound money or the gold reserve; but I do believe that if we can legitimately increase the use of silver for coinage in this country, it will be a direct encouragement to one of the very important industries of I think the demand for the small paper money-\$1 and \$2 bills—in place of silver is very largely a superstition, very largely a matter of prejudice. In the West, and perhaps in the whole country west of Chicago, until very recent years, the \$1 and the \$2 bills were seldom seen. We took the silver dollar and the 50-cent piece and carried them about and used them in our business with perfect satisfaction. Our people out there had become used to coin, and we preferred the coin to the paper. That condition still exists to a very large extent, particularly in the far West. As the Senator from Ohio has said, there is scarcely a great country upon the globe that prints paper of as small denominations as we do. I do not at this moment recall any great country, except Canada, which does.

Mr. BURTON. I will substitute "any highly advanced coun-Some large countries and some of very great powers do

print small bills.

Mr. SUTHERLAND. In England the gold coin and the silver coin in small denominations circulate almost exclusively. The same is true of France, as the Senator says. The same is true of Germany, and no hardship results. The people are quite satisfied to use it, and we would be, in this country, if it were not in large measure for the prejudice which has grown up in the eastern section of the country against the use of silver.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Ohio to the amendment of the

Senator from Oklahoma.

Mr. BURTON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I desire to transfer that pair to the junior Senator from Maine

[Mr. BURLEIGH] and vote. I vote "Yea." Mr. WILLIAMS (when his name was called). I inquire whether the senior Senator from Pennsylvania [Mr. Penrose]

has voted? The VICE PRESIDENT. He has not.

Mr. WILLIAMS. Then I shall be compelled to withhold my vote.

The roll call was concluded.

Mr. REED. I again announce the necessary absence of my colleague [Mr. STONE], on account of illness. He is paired with the senior Senator from Wyoming [Mr. CLARK]. If my colleague were present, he would vote "nay."

I make the announcement as to his absence and pair for the day, and the general announcement that upon all votes that may be taken if he were present he would vote with his party.

Mr. STERLING. I again announce my pair with the senior Senator from Louisiana [Mr. THORNTON] and withhold my vote. The result was announced—yeas 35, nays 44, as follows:

YEAS-35. Dillingham du Pont Goff Smith, Mich. Smoot Stephenson Sutherland McCumber McLean Bradley Brady Brandegee Bristow Nelson Newlands Oliver Page Perkins Root Sherman Gronna Hitchcock Townsend Warren Burton Catron Colt Crawford Jackson Jones Kenyon La Follette Works Cummins NAYS-44. Norris Penrose Poindexter Smith, Ga. Culberson Sterling Borah Burleigh Fall Lippitt Lodge Stone Thornton Williams Clapp Clark, Wyo.

So Mr. Burron's amendment to the amendment was rejected. Mr. BURTON. I should like to call the attention of the chairman of the committee to the third section, which is very

brief. I read it in the form in which it appears in the print of this morning. It is on page 8, at the top:

Each Federal reserve bank shall establish branch offices within the Federal reserve district in which it is located and also in the district of any Federal reserve bank which may have been suspended, such branches to be established and conducted at places and under regulations approved by the Federal reserve board.

Now, suppose you omit the last portion of the paragraph, which is merely a matter of regulation, and leave out also the other portions which are not material. Then it would read

Each Federal reserve bank shall establish branch offices in the district of any Federal reserve bank which may have been suspended.

Suppose you have 8 or, say, 12 of these regions, in each of which there is a bank, the New England States constituting one, the States on the Pacific coast another, the remaining States being divided into regions or districts. Then, suppose the regional bank in New England fails. Why, under this provision must not the regional bank located on the Pacific coast, and every other regional bank, establish a branch in the New England district? Is that the intent of this provision?

Mr. OWEN. That could not be the intent of this provision. The Senator obviously ignores the latter part of the section, which says that such branches are to be established and conducted at places and under regulations approved by the Federal reserve board, unless the Senator would imply that the Federal reserve board would authorize and direct the bank located on the Pacific coast to put a branch in the New England district, which, of course, is unreasonable and not to be anticipated. But if there should be a Federal reserve bank suspended within the Mississippi Valley, surrounded by three other districts, there would be no reason why branches might not be established at places contiguous to any one of the three districts which were attached to the districts in which the suspended bank might happen to be, and in that way it should be broader than to confine it to a single reserve bank.

Mr. BURTON. It seems to me the chairman of the committee reads into this paragraph or section something which it would be sensible to include, but that he overlooks the sub-stantive portions of it which contain an express direction, whether it be absurd or not:

Each Federal reserve bank shall establish branch offices-Where?

within the Federal reserve district in which it is located and also in the district of any Federal reserve bank which may have been suspended.

Mr. OWEN. Under what condition?

Mr. BURTON (reading):

Such branches to be established and conducted at places and under regulations approved by the Federal reserve board.

Now, what does the word "places" mean? The towns in those districts. You have an absolute direction that such a branch shall be established before you reach the subject of regu-

When you are reading a statute it is perhaps an excellent regulation to read it sensibly, according to the meaning that was intended, but nevertheless you can not be governed by that rule. You must read it according to its express language. language here declares that you shall establish a bank in the district of any Federal reserve bank which may have been suspended. It then goes on to say:

Such branches to be established and conducted at places and under regulations approved by the Federal reserve board.

That does not at all contradict that which precedes.

Mr. OWEN. No; it qualifies it.

Mr. BURTON. That merely refers to the fact that a direction is given as to specific localities in that district, cities or towns, in which the branch banks are to be located. It seems to me that that provision, in the form in which it now appears, is faulty.

I have no desire to move any amendment in regard to it unless

the chairman of the committee desires to do so, Mr. OWEN. Mr. President, I do not think that the section requires any amendment. It is perfectly clear and need not be misinterpreted by anyone.

Mr. BURTON. I understand there is now no section or clause in the bill providing for interest on Government deposits.

Mr. OWEN. There is none. Mr. BURTON. Mr. President, I desire next to introduce an amendment relating to the comparative or the relative powers of the Federal reserve board and the Secretary of the Treasury. In the form in which the print now appears the amendment should be inserted on page 37. It is intended to restore the language of the Glass bill. Let the Secretary read the amendment to be inserted on page 37.

The VICE PRESIDENT. The amendment will be read. The Secretary. Insert, on page 37, the following words:

The Secretary of the Treasury shall, subject to the approval of the Federal reserve board, from time to time, apportion the funds of the Government among the said Federal reserve banks, distributing them as far as practicable equitably between different sections.

Mr. BURTON. That provision is stricken out in the Owen

Mr. President, the powers given to the Federal reserve board under this bill are enormous, but in a very important sense the authority vested in the Secretary of the Treasury is greater still. I suppose the question of the relative position of the board and the Secretary has been considered by the Democratic caucus, and I do not know that I care to criticize that further than to call attention to some possible cases of difficulty.

It is exceedingly desirable, it seems to me, that the House provision, which is the amendment that I have introduced, should remain in the bill, so that in the location of funds the Secretary of the Treasury should act in concert with the Federal reserve board. Otherwise this very peculiar situation will arise: The Federal reserve board may be commanding one regional bank to lend its money to another, as it can do under this bill, while the Secretary of the Treasury, working at cross purposes, may order money transferred from the borrowing bank to the lending bank. That is, there are two ways of furnishing money to a regional bank when it is required. Under the order of the Secretary of the Treasury the Treasury De-partment may deposit funds, or the regional bank may borrow money from another bank.

That authority should be invested in the same agency or oard. Otherwise the Secretary of the Treasury may thwart the action of the Federal reserve board. I can not make that situation too clear. Suppose St. Louis desires to borrow from Chicago; the Federal reserve board orders Chicago to lend to St. Louis. At that same time a Secretary of the Treasury might demand that money be transferred the other way, from St. Louis to Chicago. The two powers ought to act in unison. For that reason I trust in the conference that the House provision may remain, and I shall ask a vote upon it here.

I wish to call attention to a few of the special powers of the Secretary of the Treasury under this bill. In the first place, if this public stock is subscribed by the Government, at his own free will he can order it sold to anyone at a price not below par without any provision for public announcement and without any competitive bidding. Such an opportunity leaves the door open for assisting favorites and for grave scandal.

Again, while there is some ambiguity in the bill, who is to determine the matter of examining banks? Apparently the authority to direct examiners to inspect the banks in a system is now given to the Federal reserve board with a provision that there shall be two examinations each year and as many more as the Federal reserve board may desire. But it is also said in a very important provision in section 10 on page 25—and this paragraph shows the extent to which the power of the Secretary of the Treasury is reserved—that he shall continue to exercise all the powers which are now vested in him. The virtual effect of the paragraph is that in case of any doubt arising between his authority and that of the Federal reserve board that doubt shall be resolved in his favor.

I think that ought to be made clear. In the very case to which I have referred, who is to control the examinations of banks under this bill? Does that power remain vested in the Secretary of the Treasury in the same degree as it is now, or is it transferred to the Federal reserve board?

The depositors' insurance fund is under the supervision of the Secretary of the Treasury, although the Federal reserve banks are organized and the money of the Treasury-at any rate, that of the general fund-is to be deposited with these banks. The depositors' insurance fund is to be under a division of the Treasury to be organized and managed under such regulations as may be prescribed by him.

Net earnings derived by the United States from Federal reserve banks shall be applied to the reduction of the bonded indebtedness or to the creation of gold reserves, according to the discretion of the Secretary of the Treasury. Whatever the banking situation may be, he can at will demand that money be withdrawn from one bank and transferred to another. This opens the door for favoritism quite as reprehensible as

existed under the system of pet banks in the days of Jackson.

I may concede that in the first instance the Secretary of the Treasury ought to select the bank in which the deposit is made; but after a bank has received this deposit and has extended ac-

commodations on the strength of it, to say that the Secretary can then demand that it shall be transferred to another bank permits a very dangerous exercise of power. In fact, under the terms of this bill the Secretary of the Treasury would have practically unrestricted control of \$200,000,000 of funds. He would be the predominant figure in the Federal reserve board. The judgment of the other six members might be contrary to his, but such are his powers that he could compel them, however reluctantly, to acquiesce in his opinion, because by a transfer of deposits or by any other means he might make the action they desired to take entirely nugatory.

Mr. President, I ask a vote on this amendment restoring the House provision to the effect that, subject to the approval of the Federal reserve board, the Secretary of the Treasury shall from time to time apportion the funds of the Government.

I repeat what I have already said. I think their joint action is necessary for the success of this system. We may readily conceive of a case where the Secretary of the Treasury would belong to an administration the political complexion of which differed from its predecessor, and his views would be out of harmony with those of the remainder of the Federal reserve board.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Ohio to the amendment. The amendment to the amendment was rejected.

Mr. BURTON. I desire to offer as an amendment another bill for a central bank. I do not wish to have it read, nor do I intend to ask for the yeas and nays upon it. It is the bill which I introduced on the 1st of December, and of which I gave a brief explanation at that time.

I move to strike out the substitute bill as introduced by the Senator from Oklahoma [Mr. Owens] and as perfected and insert this bill in its place. I explained it very briefly when introduced, and I will say now that it provides for the organization of a Federal reserve bank owned by the people and entirely controlled by the Government; the capital stock to be in the sum of \$190,000,000, open to popular subscription, in shares of \$100 each, the stockholders to receive dividends of 5 per cent per annum. The seven directors are to be chosen for a long term by the President and confirmed by the Senate, and they are to establish branches wherever they may be needed, and select the officers for those branches throughout the country.

Mr. President, I believe the pending bill is based on a wrong principle. In a day when all the great activities of this country are concentrating more and more, keeping pace with the railroad, the telegraph, the telephone, and all those means which bind us together in one hope as by golden chains, the proposition is here presented to divide this great united country of ours into eight sections and have a separate bank in each of them. Possibly this plan may prove a success. It is possible that by the process of evolution this bank may become so similar to a central bank that most of the benefit of one unified institution may be secured. It is my humble opinion, however, that the chances are against such a possibility and that in due time we shall become convinced that we must follow the example of every other advanced nation of the globe and have a central bank. If by process of evolution in time this approximates a central bank, how much better it would be to make the right start at this time rather than get out of line with the course already pursued everywhere else and sanctioned by the teachings of experience. They have had our experiences, the same alternations of prosperity and distress, the same increasing reliance on credit and banking, and every one of them has come to the conclusion that the central bank is best.

I recognize the degree of misapprehension in regard to this proposal. I realize also the amount of prejudice that exists in some localities; but, after all, to the student of banking it is perfectly evident that one great institution would more readily respond to the popular will and more adequately provide for the wants of a growing people than would a plurality of institutions with scattered heads and presumably with inefficient control for some of them.

It is more democratic, if I may use the word, because this measure contemplates that the stock shall be subscribed not by banks but by all the people of the United States. the stock of such an institution is offered, preference would be given to the smaller holders; and I am satisfied there would be such a rush for subscription that in a fortnight after the stock was offered the \$100,000,000 would be subscribed several times over.

Mr. President, it is not with hope for present success that I submit this bill, but it is as an appeal to the future, the best judge of all our actions. I think it should be printed in the RECORD, though I do not ask to have it read.

The VICE PRESIDENT. It will be so ordered, in the absence of objection.

The substitute referred to is to insert the following in lieu of the substitute proposed by Mr. OWEN:

That this act shall be known as the Federal reserve act.

Sec. 2. That the words and phrases used in this act, except where the context clearly indicates a contrary intention, shall be defined as follows:

The word "committee" shall mean the context of the Follows:

SEC. 2. That the words and phrases used in this act, except where the context clearly indicates a contrary intention, shall be defined as follows:

The word "committee" shall mean the organization committee of the Federal reserve bank of the United States.

The word "bank" shall mean the Federal reserve bank of the United States and shall include all the branches, subbranches, and agencies thereof.

The word "board" shall mean the board of seven directors of the Federal reserve bank of the United States, known as the Federal reserve board.

The word "branch" shall mean a branch of the Federal reserve bank of the United States established in the United States.

The words "executive committee" shall mean the executive committee of a branch of the Federal reserve bank of the United States.

The words "national bank" shall mean a national banking association now or hereafter organized or existing.

The word "depositor" shall mean a national bank or a bank or trust company, organized under the laws of a State or the laws of trust company, organized under the laws of a State or the laws of a deposit in the Federal reserve bank of the United States.

The word "district" shall mean a banking district from time to time created and designated by the Federal reserve board.

The word "district" shall mean a banking district from time to time defined for national banking associations by the Comptroller of the Currency, not inconsistent with law.

The word "subbranches" shall mean subordinate offices of branches of the Federal reserve bank of the United States.

The word "agencies" shall mean agencies of the Federal reserve bank of the United States, and insular possessions of the United States.

ORGANIZATION COMMITTEE.

ORGANIZATION COMMITTEE.

ORGANIZATION COMMITTEE.

Sec. 3. That as soon as practicable after the passage of this act the President shall appoint a committee of five, to be designated the "Federal reserve-bank organization committee." The committee—

(a) Shall select a chairman and secretary and such other officers as it may deem necessary from its own members and appoint assistant officers, clerks, and other necessary employees;

(b) Shall accomplish the corporate organization of the Federal reserve bank of the United States;

(c) Shall adopt a seal for the bank, which shall, during the process of organization thereof, be the seal of the committee, and adopt seals for the several branches, which shall correspond to the seal of the bank with the name of the branch added;

(d) Shall invite and receive popular subscriptions to the capital stock of the bank, in accordance with the provisions of section 5 of this act and under regulations to be prescribed by the committee;

(e) Shall make the certificate provided in section 6 hereof;

(f) Shall do all other things necessary to accomplish the corporate organization of the bank.

Appropriation for expenses.

APPROPRIATION FOR EXPENSES.

SEC. 4. That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sum sufficient to establish and provide accommodations for the bank and its branches, not to exceed \$500,000 for the bank, and an equal amount for each branch thereof, and for the purpose of carrying out the provisions of this act, in accordance with the following limitations, viz: Each member of the committee shall receive in full compensation for his services the sum of \$10,000, besides his actual and necessary traveling expenses, and in carrying out the provisions of this act the committee is authorized to incur such expenses as it shall deem necessary, not exceeding the sum of \$250,000, including compensation and expenses, all of which shall be payable by the Treasurer of the United States upon vouchers approved by the committee. The balance of the appropriation herein made shall be disbursed by the board for the purposes herein set forth, payments to be made by the Treasurer of the United States upon vouchers approved by the board. The total amount of the appropriation herein made shall, from time to time, be reimbursed to the United States by the bank as hereinafter provided.

STOCK ISSCE.

STOCK ISSUE.

SEC. 5. That the capital stock of the bank shall be \$100,000,000, divided into 1,000,000 shares of a par value of \$100 each; such stock shall have no voting power, and shall be free from all Federal, State, municipal, or other taxes, except that the holders thereof shall be subject to the provisions of Federal income-tax laws with respect to the income derived therefrom. The holders of such stock shall be entitled to dividends thereon at the rate of 5 per cent per annum and no more, which dividends shall be cumulative, and upon dissolution of the bank such holder shall receive the par amount of such stock and all the balance of the assets shall become the property of the United States.

States.

Such stock shall be offered for popular subscription at par by the committee, under regulations to be prescribed by it, not more than six months after the passage of this act. In case the amount of capital stock is oversubscribed, the committee shall first allot the shares of stock to the subscribers for the smallest number of shares. Every subscriber shall accompany his subcription with cash or a certified check for 5 per cent of the total amount thereof. The proceeds of the 5 per cent payment of the stock subscription shall be deposited in national banks to the credit of the committee, and by the committee assigned and transferred to the credit of the bank upon its organization.

ORGANIZATION CERTIFICATE.

ORGANIZATION CERTIFICATE.

ORGANIZATION CERTIFICATE.

SEC. 6. That after the popular subscriptions to the capital stock of the bank shall have been closed the committee shall make an organization certificate specifying—

(a) The names of the subscribers to the stock, with the number of shares allotted to them respectively;

(b) The form of stock certificate adopted by the committee and the methods for the transfer thereof and such other details in connection with the organization as the committee may determine.

Such certificate shall be executed under the name of the committee by the chairman and secretary thereof and attested with its seal, and shall

be forthwith transmitted to the Comptroller of the Currency, who shall file, record, and carefully preserve the same in his office.

CHARTER,

SEC. 7. That upon receipt of such certificate the Comptroller of the Currency shall issue a charter of incorporation to the persons appointed by the President and confirmed by the Senate as the board hereinafter provided for, which charter shall contain a rectial of the compliance with the provisions of this act by the committee and a statement of the subscriptions that have been made to the capital stock of \$100,000,000 of the Federal reserve bank of the United States; and the issuance of such charter by the Comptroller of the Currency, countersigned by the Secretary of the Treasury, shall complete the corporate organization of the Federal reserve bank of the United States. Upon such organization of the Federal reserve bank of the United States is upon such organization of the board and their successors and the stockholders of the bank as they may from time to time exist shall be a body corporate, to be known as "The Federal Reserve Bank of the United States"; to have a term of existence of 50 years from the date of the issuing of such charter; to have the power to contract, to sue and be sued, to acquire, own, lease, sublease, hold, and sell such real and personal property as may be necessary for the conduct of its business; to buy, sell, and deal in gold coin and gold bullion, promissory notes, and other evidences of indebtedness, and to discount notes, bills, and acceptances; and to have such further powers, privileges, and functions as are hereinafter specific in this act. The bank shall be located in the city of Washington, D. C., and shall have 12 branches located in cities selected by the board and subbranches wherever designated.

GOVERNMENT OF THE BANK.

and shall have 12 branches located in cities selected by the board and subbranches wherever designated.

GOVERNMENT OF THE BANK.

Sec. S. That the government and control of the bank shall be, and hereby is, vested in a board of seven directors, to be known as the Federal reserve board, who shall exercise the powers conferred upon them by the provisions of this act. Such directors shall be appointed, and one of them shall be designated as governor, and another of them shall be designated as deputy governor by the President of the United States, all by and with the advice and consent of the Senate. Such selections shall be made from persons who are citizens of the United States and are qualified by experience and training for the proper discharge of the duties imposed upon them by this act, and in making such selections due weight shall be given to the agricultural, commercial, and industrial interests of the different sections of the country, and at least three of the members shall be persons recognized as possessing exceptional banking and financial experience.

The term of office of each member of the board shall be 14 years, and until his successor is appointed and qualified, except that the terms of office of six of the persons first appointed shall expire at the end of 2, 4, 6, 8, 10, and 12 years, respectively. The President shall have power to remove any member of the board for cause, such removal and his reasons therefor to be communicated by him to the Senate. The governor and the deputy governor shall, subject to the supervision of the board shall be an officer or director of any bank or banking institution, or hold stock in any bank or banking institution, or hold stock in any bank or banking institution, or hold stock in any bank or banking institution, or hold stock in any bank or banking institution, or other members of the board shall be filled by the President by and with the advice and consent of the Senate, and any person appointed to fill such vacancy shall hold office for the unexpired term o

BRANCH RESERVE BANKS.

Sec. 9. That the board shall create and designate in the continental United States, exclusive of Alaska, 12 banking districts for the purpose of establishing within each of such districts a branch of the bank. Such districts shall be established with due regard to the convenience and customary course of business of the various sections of the country, and shall not necessarily coincide with the boundaries of such State or States as may be wholly or in part included within any given district. The board shall also establish within each district a branch of the bank which shall be designated by prefixing the name of the city in which such branch is established to the words "Branch, Federal Reserve Bank."

The board, after two years from the time of the city in which

such branch is established to the words "Branch, Federal Reserve Bank."

The board, after two years from the time of the organization of the bank, may create new districts and establish branches therein, and may readjust the boundaries of districts.

The management of such branches shall be vested in an executive committee consisting of five persons to be appointed by the board, who shall be citizens of the United States and residents of the districts in which they serve, shall devote all their time to their official duties, and shall retire at the age of 70 years. Such selections shall be made from persons qualified by experience and training for the proper discharge of the duties imposed upon them by this act, and at least two of the members shall be persons recognized as possessing exceptional banking and financial experience. Each member of an executive committee before entering upon the discharge of his duties shall take an oath of office, to be prescribed by the Federal reserve board, and which shall be filed with the board. The term of office of each member of such executive committee shall be 10 years, except that terms of office of four of the persons first appointed by the board upon each such executive committee shall expire at the end of 2, 4, 6, and 8 years, respectively. The board shall fix the compensation to be received by the members of the executive committee and shall designate a chairman and vice chairman for each executive committee. The chairman, or in his absence the vice chairman, shall

preside over the meetings of the executive committee and, subject to the supervision of the executive committee, shall be the active executive officers of the branches. The executive committee shall have authority to establish and discontinue subbranches within their respective districts. No member of an executive committee shall be an officer or a director of any bank or banking institution, and before entering upon his duties as a member of such committee he shall certify under oath that he is eligible under this requirement. Vacancies caused by death, resignation, retirement, or removal shall be filled by the board, and any person appointed to fill such vacancy shall hold office for the unexpired term of the member to whose place he is appointed. Members of executive committees may be summarlly suspended and subsequently removed for cause by the board after due hearing, and shall be so removed at the request of a majority of the depositors of a district expressed by resolutions of the respective boards of directors of such depositors. Each such executive committee shall annually, and more frequently if required by the board, make a report of the operations of its branch to the board to be by it incorporated in or transmitted with its annual report to the Speaker of the House of Representatives. Such report of the executive committee shall also embody reports from each subbranch established in the district.

All actions of the executive committees shall be subject to the approval of the board.

POWERS OF THE FEDERAL RESERVE BOARD.

Sec. 10. That the board shall be authorized and empowered:

(a) To govern and control the operations of the bank;

(b) To supervise and control the actions of the executive com-

(c) To supervise and regulate the issue and retirement of notes of the bank, and to prescribe the form, tenor, and denominations of such

notes;

(d) To suspend in whole or in part in an emergency all reserve requirements of the bank for 30 days, and to continue such suspension for periods not to exceed 15 days;

(e) To suspend in whole or in part in an emergency all reserve requirements relative to national banks for 30 days, and to continue such suspension for periods not to exceed 15 days;

(f) To examine, at its discretion, the accounts, books, and affairs of depositors;

(g) To examine at its discretion, the accounts, books, and affairs of depositors;

depositors;

(g) To call for statements of the condition of all depositors, in such form as it may prescribe;

(h) To open and maintain banking accounts in foreign countries, to establish agencies in foreign countries, and to make regulations for the conduct of the foreign business of the branches through such agencies;

(l) To open and maintain banking accounts, establish branches or agencies, or require the establishment by a branch of subbranches in the Territories of Alaska or Hawali and in the insular possessions of the United States.

The enumeration of the powers hereinabove set forth shall not be deemed to be a limitation upon the general authority of the board to perform and exercise all the services, duties, functions, or services specified or implied in this act.

APPLICATION OF EARNINGS.

APPLICATION OF EARNINGS.

Sec. 11. That the net earnings of the bank, after deducting taxes, expenses, and proper reserves against the acquisition of permanent property, shall be devoted, first, to the payment of a 5 per cent cumulative dividend upon the stock; and, second, after the reimbursement to the United States of the advances appropriated under section 4 of this act, to the accumulation of a surplus of \$20,000,000, and after the accumulation of such surplus, one-half of such earnings above said dividend requirements shall be paid to the United States and the other one-half devoted to the accumulation of a further surplus until the total surplus reaches \$50,000,000, at which amount it shall be maintained, and thereafter all earnings beyond such dividend and surplus requirements shall be paid to the United States. The earnings so distributed to the United States shall be applied by the Secretary of the Treasury, within three months after the receipt thereof, to the redemption of outstanding bonds of the United States, after advertisement published in each district at least once a week for four successive weeks immediately preceding the date fixed for such redemption, which advertisement shall call for the tender of bonds, and the Secretary of the Treasury shall thereupon, in his discretion, purchase of the bonds so tendered those offered at the lowest prices up to the amount of such earnings in his hands at such redemption date.

BUSINESS OF THE FEDERAL RESERVE BANK.

Sec. 12. That, except as otherwise provided in this act, the bank

SEC. 12. That, except as otherwise provided in this act, the bank shall conduct business solely with the United States Government, with the national banks, and with such other banks and trust companies as may from time to time be permitted to deposit their reserves with the bank. The accounts and transactions of all depositors shall be confined to the branch and subbranches of the banking district in which such depositors are located, and to foreign agencies of the bank, as herein defined.

FISCAL AGENCY.

SEC. 13. That the bank shall be the fiscal agent and sole depository of the United States, except with respect to deposits authorized by the postal savings bank act, and except that for purposes of collection and transfer only the Secretary of the Treasury may designate national banks as Government depositories.

The Secretary of the Treasury shall gradually effect a transfer of the general fund of the Treasury shall gradually effect a transfer of the general fund of the Treasury to the bank, which transfer shall be completed within 12 months after its organization. Such transfer, however, shall not include the 5 per cent fund for the redemption of outstanding national-bank notes, nor that portion of the general fund of the Treasury held by Government depositories in the insular possessions or Territories of the United States or balances of disbursing officers there held so long as no branch or subbranch of the bank exists in such possessions or Territories.

On and after a date to be determined by the Secretary of the Treasury and the board, but not later than six months from the organization of the bank, all the revenues of the United States shall be regularly deposited in the bank and disbursements shall be made by checks drawn against such deposits, except revenues and disbursements in the insular possessions and Territories of the United States,

FIVE PER CENT REDEMPTION FUND.

FIVE PER CENT REDEMPTION FUND.

SEC. 14. That the bank shall be required in behalf of the national banks which have notes in circulation to make good the 5 per cent redemption fund held in the general fund of the United States Treas-

ury, and any deficiencies in the said fund shall be forthwith paid by the bank to the Treasury of the United States upon demand, and the bank shall be forthwith reimbursed by the national bank in whose behalf such payment is made.

GENERAL FUNCTIONS OF THE FEDERAL RESERVE BANK.

GENERAL FUNCTIONS OF THE FEDERAL RESERVE BANK.

SEC. 15. The bank shall have power:
(a) To purchase and sell the obligations or other securities of the
United States, as defined by section 5413 of the Revised Statutes, and
also such of the obligations of the Territories and insular possessions
of the United States as are guaranteed principal and interest by the
United States;
(b) To purchase, sell, and deal in gold coin and gold bullion, to
make loans thereon, and to contract for loans of gold coin and gold
bullion, with or without giving security therefor, which security may
include the bonds and other obligations of the United States owned by
the bank;
(c) To receive from any described to

make loans thereon, and to contract for loans of gold coin and gold bullion, with or without giving security therefor, which security may include the bonds and other obligations of the United States owned by the bank;

(c) To receive from any depositor for deposit or collection current funds in lawful money, national-bank notes, notes of the bank, or checks, drafts, notes, or bills of exchange payable upon presentation;

(d) With the acceptance or indorsement of any depositor, to discount notes, drafts, and bills of exchange arising out of commercial transactions, such notes, drafts, and bills to be of a character to be determined and defined by the board. Such definition shall only include notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or which shall represent a bona fide sale of agricultural products or other goods, wares, or merchandise, or which shall have been issued for the purchase or sale of the bonds or other obligations of the United States. Such definition shall not, however, include notes, drafts, or bills of exchange issued or drawn for the purpose of holding for future sale and delivery agricultural products or other goods, wares, or merchandise, or for carrying or trading in stocks, bonds, or investment securities, other than the bonds and obligations of the United States. Notes, drafts, and bills of exchange admitted to rediscount;

(e) With the acceptance or indorsement of any depositor to discount notes, drafts, or bills of exchange which are based upon the exportation or importation from or to the United States of goods, wares, merchandise, or agricultural products, as determined and defined by the board, and which mature within not exceeding six months from the date of rediscount;

(f) To purchase from depositors and to sell, with or without its indorsement, bills of exchange arising out of commercial transactions as determined and defined by the board and payable in foreign countries, but such bills of exchange must mature in not e

cable transfers;

(h) To open and maintain banking accounts and establish agencies in foreign countries for the purpose of purchasing, selling, collecting, discounting, and dealing in foreign bills of exchange, gold coin and gold bullion, and cable transfers, and to buy and sell, with or without its indorsement, through its foreign correspondents or agencies, such prime foreign bills of exchange, arising out of commercial transactions, as may be defined by the board, which have not exceeding 90 days to run and which bear the signature, acceptance, or indorsement of two or more responsible parties;

DOMESTIC EXCHANGES.

Sec. 16. That the bank shall receive at par all checks, drafts, or other obligations of the bank and each of its branches or sub-branches. The executive committee of each branch shall from time to time, subject to the approval of the board, determine and publish exchange and collection charges to be made with respect to all checks, drafts, and other exchange and collection items, other than those of the bank, received in accordance with paragraph (c), section 15, of this act. Such charges shall not be in excess of the approximate actual cost of collection of such checks, drafts, and other items.

PRIORITY OF LIEN.

SEC. 17. That the bank shall have a first and paramount lien upon all of the assets of every national bank for all debts and liabilities due from it to the bank, except as to taxes and the claims of the United States, and the bank shall likewise have a first and paramount lien upon all the assets of every other depositor for all debts and liabilities due from it to the bank, except debts due by such a depositor to the United States and to the State of its incorporation, and except with respect to trust funds held by trust companies.

LIMITATIONS OF DISCOUNTS.

SEC. 18. That no depositor shall be entitled to discount notes, drafts, bills of exchange or acceptances, with the bank, in excess of the amount of the unimpaired capital and surplus of such depositor, nor shall the aggregate of such notes, drafts, bills of exchange, and acceptances, upon which any one person, company, firm, or corporation shall be primarily liable be rediscounted for any one depositor, at any time exceed 10 per cent of the unimpaired capital stock and surplus of such depositor; but this restriction shall not apply to the discount of bills of exchange payable outside of the continental United States, drawn in good faith against existing values.

RESTRICTION OF INDEBTEDNESS OF NATIONAL AND STATE BANKS.

SEC. 19. That no national bank shall at any time be indebted or in

RESTRICTION OF INDESTEDNESS OF NATIONAL AND STATE BANKS.

SEC. 19. That no national bank shall at any time be indebted or in any way liable to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:

(a) Notes of circulation;

(b) Moneys deposited with or collected by it;

(c) Bills of exchange or drafts drawn against credits due to it, or money actually on deposit to its credit or due to it;

(d) Liabilities to the stockholders of the national bank for dividends, surplus, and undivided profits;

(e) Liabilities incurred under the provisions of paragraph (d), section 15, of this act;

(f) Liability as indorser on notes, drafts, and bills of exchange, arising out of commercial transactions, as defined in paragraph (f), section 15, of this act;

(g) Liability as acceptor of drafts or bills of exchange; subject to the limitations of section 20 of this act: Section 5202 of the Revised Statutes of the United States is hereby

repealed. Depositors other than national banks shall be subject to the provisions of this section.

ACCEPTANCES.

SEC. 20. That any national bank may, at its discretion, accept drafts or bills of exchange drawn upon it, having not more than six months' sight to run, and growing out of commercial transactions as described in this act and so defined by the board, but no national bank shall accept such drafts or bills of exchange to an amount at any time exceeding in the aggregate one-half of its paid-up and unimpaired capital stock and surplus fund.

CIRCULATING NOTES

SEC. 21. That the bank may issue its circulating notes, which shall be receivable at par in all parts of the United States in payment of all taxes and excises and all other dues to the United States, and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States and its possessions except interest on the public debt. Such notes shall be a first lien on all of the assets of the bank and shall be redeemable on demand at any office of the bank in gold or lawful money of the United States, at the option of the holder. As long as any such notes are outstanding the bank shall segregate in its own vaults and carry in a special reserve account on its books gold coin or gold buillon or United States gold certificates to the amount of the face value of the notes from time to time so outstanding, or at its option shall so segregate gold coin or gold buillon or United States gold certificates to the amount of not less than 50 per cent of such face value, and collaterals, consisting of promissory notes and bills accepted for rediscount under the provisions of section 15 of this act, or refunding notes of the United States hereinafter provided for, or both such collaterals and refunding notes, equal at their cash value to 100 per cent of the face value of the notes from time to time so outstanding. Such collaterals may be exchanged from time to time for other collaterals or refunding notes within the limitations aforesaid and of equal cash value.

PRINTING, DENOMINATIONS, AND FORM OF THE CIRCULATING NOTES OF THE BANK.

SEC. 22. That in order to furnish sultable notes for the bank the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved, in the best manner to guard against counterfeiting and fraudulent alterations, and shall have printed therefrom, upon the distinctive or special paper which has heretofore been or may hereafter be lawfully adopted by him for printing United States notes, and numbered, such quantity of notes, in blank, of the denominations of \$5, \$10, \$20, \$50, \$190, \$500, \$1,000, and \$10,000, as may be required by the bank. Such notes shall express upon their face the promise of the bank to pay on demand, attested by the written or engraved signature of the governor or deputy governor and cashler, and bear the engraved imprint of the seal of the bank.

RESERVES OF NATIONAL BANKS

SEC. 23. That from and after a date to be fixed by the board, in no event longer than 5 years nor less than 30 months from the date of the organization of the bank, every national bank shall be required to keep and maintain a reserve of not less than 12 per cent of its net deposit liabilities, as defined by the Comptroller of the Currency. Any part of such reserve, but in no event less than one-half thereof, may consist of a deposit with the bank, and the remainder shall be in gold and lawful money in the vaults of the national bank.

From and after the organization of the bank the board shall effect as rapidly as it may deem wise under commercial conditions from time to time existing, and complete within the periods herein provided, the change to the minimum reserve requirements above set forth. Such change shall be effected by the issuance of notices to all national banks which shall state the percentage of the total reserve which must 30 days thereafter, and until further notice, be deposited with the bank, and the amount which thereafter may be held in gold and lawful money in its vaults. Such requirements, however, shall fairly consider the agricultural, commercial, and industrial conditions of the country and its various sections, and be so apportioned and determined as to cause the least restrictions upon the business of national banks, and compliance with such directions of the board shall be mandatory, and in such direction the board shall give due weight to the distinctions recognized under existing laws between country banks, reserve city banks, and central reserve city banks, but such directions shall be uniform with respect to banks of each of such classes.

Abolition of National banks classification.

ABOLITION OF NATIONAL BANK CLASSIFICATION.

SEC. 24. That from and after the organization of the bank no action shall be taken under the provisions of section 1 of the act of March 3, 1903, or section 2 of the act of March 3, 1887, providing for the designation of cities as additional reserve cities and additional central reserve cities, respectively, and from and after the establishment of the new minimum reserve provided in this act the classification of national banks, as now provided by section 5491 of the Revised Statutes of the United States, as amended, shall be abolished.

RESERVES

Sec. 25. That the bank shall establish and maintain at all times a reserve equal to not less than 50 per cent of the net deposit liabilities of the bank. Such reserve shall consist of gold coin, gold bullion, United States gold and silver certificates, and other lawful money of the

RATES OF DISCOUNT.

SEC. 26. The board shall establish, from time to time, a normal rate of discount, which shall be uniform at branches and subbranches of the bank, except as herein provided, and the board shall renew or change such normal rate at stated meetings to be held at least once in each week and shall immediately announce the normal rate so renewed or changed. The normal rate of discount so established shall be charged by the branches and subbranches of the bank to depositors with respect to all rediscounts of such depositors up to an amount not exceeding the amount of 20 per cent of the unimpaired capital and surplus of each such depositor; and the rate of discount charged by the branches and subbranches of the bank upon all rediscounts in excess of such 20 per cent shall be increased by the board for each 10 per cent of increase in such rediscounts. The additional rates of discount established by the board upon such rediscounts in excess of said 20 per cent shall in like manner be uniform through-

out the United States, but such additional rates may be established by the board in progressively increasing amounts for each 10 per cent of increase, and the additional rates of discount above the normal rate shall, in like manner, be announced from time to time by the board.

PROVISION FOR THE ISSUE OF REFUNDING NOTES AND REFUNDING BONDS.

shall, in like manner, be announced from time to time by the board.
PROVISION FOR THE ISSUE OF REFUNDING NOTES AND REFUNDING BONDS.
SEC. 27. That the Secretary of the Treasury is hereby authorized and directed to refund one-half of the 2 per cent United States bonds having the circulation privilege and on deposit with the Treasurer of the United States to secure national-bank note circulation at the date of the organization of the bank at the times and in the manner provided in section 28 of this act. He shall accomplish such refunding in part by the issue of refunding notes. Such refunding notes shall be a direct obligation of the United States, shall bear interest at the rate of 3 per cent per annum, shall be payable in gold of the present standard of weight and fineness and only at the bank or any of its branches, and shall mature at various periods, as determined by the Secretary of the Treasury, not exceeding one year from their respective dates of issue, and shall be issued under regulations to be prescribed by the Secretary of the Treasury as to the form, tenor, and denominations thereof: Provided, That such notes may, at the option of the Secretary of the Treasury so extended for periods of one year during a period of 20 years from the date of the organization of the bank.

The Secretary of the Treasury is further hereby authorized and directed to refund such of the 2 per cent United States bonds having the circulation privilege, the refunding of which is not hereinbefore provided for and at the times and in the manner provided in section 28 of this act. He shall accomplish such refunding by the issue of bonds. Such bonds shall be a direct obligation of the United States, shall bear interest at the rate of 3 per cent per annum, shall be payable in gold coin of the present standard of weight and fineness, shall mature 20 years from the date of issue thereof, shall not have the circulation privilege, and shall be issued under regulations to be prescribed by the Secretary of the Treasury as to the ferm, te

secretary one Treasury as to the form, tenor, denominations, and nature these. In both the refunding notes and the 3 per cent bonds and other taxation, both as to income and the process.

FURCHASE ARN HEMPLONEOUS OF 2 PER DAY PONDS.

SEC. 28. That the bank shall from time to time purchase from the several national banks at prices not exceeding par and accrued interest 2 per cent bonds of the United States up to an amount not exceeding one half of the total of such bonds on deposit at the date of the organization of the bank with the Treasurer of the United States to secure circulation. Such purchases shall be made from the several national banks up to amounts not exceeding the par value of one-half of the amounts of bonds owned by the respective national banks, and of the amounts of bonds owned by the respective national banks, and of the hank, and thereupon the bank and to red of the organization of the bank, and thereupon the bank and to red of such national banks to the amount of the purchase price of the bonds, less interest, so purchased from it, which responsibility shall constitute payment to such national bank shall be relieved from all further liability in respect of such notice of such national bank shall be relieved from all further liability in respect of such notice of such national bank, the responsibility for the redemption pay the same on demand and receive in exchange therefor from the bank and to the face amount of such notes. So much of section 18223 of the Revised Statutes of the United States Statutes, page 164, and a specific or the section of the such notes. So much of section 18223 of the Revised Statutes of the United States Statutes, page 164, and of the act of July 12, 1882, chapter 290, section 9; Twenty-second United States Statutes, page 164, and of the section of several manufactures are provided to lawylor may national bank of circulation notes, and as prevides that the amount of bonds on deposit for circulation shall not be reduced below \$50,000 for any such national bank and as

STATE BANKS AS DEPOSITORS.

SEC. 29. That from and after the organization of the bank any bank or banking association or trust company organized under any law of any State or under any law of the United States relating to the District of Columbia may make application to the board and shall by the board be authorized to become a depositor in the branch organized or to be organized within the district where the principal office of the applicant is located, but before granting such application, and from time to time thereafter, the board shall satisfy itself that no provision of the charter of such applicant or of any law applying to it prevents a lawful compliance with the requirements of this act and the regulations of the board, and unless so satisfied the board shall refuse such application or require the retirement of such depositor.

Before being admitted as a depositor, and during the period when it shall continue as a depositor, each applicant shall comply with the regulations promulgated from time to time by the board and with the following requirements:

(a) To establish and maintain a reserve of the character defined in this act equal to 12 per cent of its net deposits as defined by the board.

(b) To establish and maintain a paid-up and unimpaired capital to an amount not less than that required of national banks under the provisions of section 5138 of the Revised Statutes, as amended.

(c) To be subject to such examinations of its books and affairs as the board may from time to time direct.

(d) To prepare and submit reports of its condition and transactions at such times and in such forms as the board shall direct.

Upon the issuance of a certificate of authority by the board each applicant shall be entitled to have all the rights and privileges enjoyed by national banks as depositors in the bank.

If at any time it shall appear to the board that any such applicant which has become a depositor has falled or ceased or become unable to comply with the provisions of this section or the regulations of the board, it shall be within

BANK EXAMINATIONS.

BANK EXAMINATIONS.

Sec. 30. That the board shall, at least once in each calendar year, cause an examination to be made of the assets and affairs of every depositor, and more frequently if the board shall consider special examinations necessary, in order to furnish a full and complete knowledge of the condition of any such depositor. The reports of such examinations shall be made in triplicate, one copy thereof filed in the office of the Comptroller of the Currency, one copy in the principal office of the bank, and one copy in the office of the branch of the bank of the district in which such depositor has its principal office. The person assigned to the making of such examinations shall have power to call together a quorum of the directors of the depositor under examination, and they may be required to state under oath the character and circumstances of any asset or liability of such depositor. All examiners, their assistants and clerks, other than those appointed by the board, shall be appointed and employed by the executive committees of the respective branches, subject to the approval of the board, and for service within the districts where such branches are located. They shall receive fixed salaries, the amounts whereof shall be determined by the board. The expenses of the examinations herein provided for shall be assessed by the executive committee upon the depositors of the respective districts, in proportion to the assets or resources held by such depositors upon the dates of the examinations.

Upon request of any depositor the executive committee of any branch may arrange for special or periodical examinations of its affairs, the

mittee upon the depositors of the respective districts, in proportion to the assets or resources held by such depositors upon the dates of the examinations.

Upon request of any depositor the executive committee of any branch may arrange for special or periodical examinations of its affairs, the cost and expenses of such examinations to be borne by such depositor. All examinations, whether thus regularly provided or specially authorized, shall be so conducted as to inform the bank of the actual condition of the depositor, and any other information essential to a knowledge of the condition of such depositor, as may be required.

The board shall, at least once each year, order an examination of each branch and subbranch, and a report of such examination shall be made in triplicate and one copy thereof filed in the office of the Comptroller of the Currency, one copy in the principal office of the bank, and one copy in the office of the respective branch. Such examinations and reports shall be so conducted and made as to exhibit the actual condition of the assets and liabilities of the respective branches and subbranches, and the amount and character of their reserves, and of the amount, character, and maturity of all their investments and rediscounted paper.

The Comptroller of the Currency shall, at least once in each calendar year, make an audit and examination of the books, accounts, and affairs of the bank, a report of which he shall include in his annual report to the Congress. The cost of such examination shall be borne by the bank. No depositor, nor any officer, director, or employee thereof shall make any loan or grant any grantity to any examiner. Any bank officer, director, or employee violating this provision shall be deemed guilty of a misdemeanor, and shall be fined not more than \$5,000 and a further sum equal to the money so loaned or grantity given. Any examiner accepting a loan or grantity from any depositor shall be deemed guilty of a misdemeanor, and shall be fined not more than \$5,000, and a fur

have their offices.

Section 5241 of the Revised Statutes is hereby amended to read as follows: "No association shall be subject to any visitorial powers other than such as are authorized by this title, or are vested in the directors, officers, or employees of the Federal reserve bank of the United States, or are vested in the courts of justice."

PROHIBITED COMPENSATION.

Sec. 31. That no officer, director, or employee of a national bank shall be beneficiary of or receive, either directly or indirectly, any fee (other than the usual salary or director's fee paid to such officer, director, or

employee by the national bank and other than a legitimate fee paid to an attorney at law for legal services) or any commission, gift, or other consideration other than as aforesaid for or on account of his services, vote, or influence as such officer, director, or employee, in connection with or in respect of any loan, purchase, sale, payment, exchange, or transaction with respect to stocks, bonds, or other investment securities or notes, bills of exchange, acreptances, bankers' bills, cable transfers, or mortgages made by or on behalf of a national bank of which he is such officer, director, or employee. Any person violating any provision of this section shall be punished by a fine of not exceeding \$5,000 or by imprisonment not exceeding five years, or by both such fine and imprisonment, in the discretion of the court having jurisdiction: Provided, That this restriction shall not be construed to cover transactions in good faith and in the ordinary course of business between a national bank and another national bank or a banking firm or a State bank or a trust company.

POWERS OF NATIONAL BANKS.

Sec. 32. That from and after the passage of this act any national bank having a paid up and unimpaired capital stock of not less than \$1,000,000 shall be authorized to establish agencies or branches in foreign countries, and such agencies or branches shall be established and maintained under regulations to be prescribed by the Comptroller of the Currency; and any national bank whose place of business shall be in a city of not less than 50,000 population shall be entitled to establish branches within the corporate limits of the municipality within which its principal office is located, and all national banks shall be authorized to exercise such trust company powers and functions as may be permitted by the laws of the State within which its principal office is located; and section 5190 of the Revised Statutes is hereby amended accordingly.

REPEAL OF BOND REQUIREMENT.

SEC. 33. That so much of the provisions of section 5159 of the Revised Statutes of the United States, and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes as require that before any national bank shall be authorized to commence banking business it shall transfer and deliver to the Treasury of the United States a stated amount of United States registered bonds be, and the same is hereby, repealed, and hereafter a national bank, having retired all of its national-bank note circulation, may withdraw all United States bonds deposited with the Treasurer of the United States. From and after the organization of the bank no national bank not having Government funds on deposit with it shall be required to maintain on deposit with the Treasurer of the United States any bonds of the United States in excess of the amount required to secure the outstanding circulating notes of the national bank.

EXEMPTION FROM TAX.

amount required to secure the outstanding circulating notes of the national bank.

EXEMPTION FROM TAX.

Sec. 34. That sections 19 and 20 of the act of February S, 1875, shall be amended to read as follows:

"Sec. 19. That every person, firm, association other than national bank associations, and every corporation, State bank, or State banking association other than the Federal reserve bank of the United States shall pay a tax of 10 per cent on the amount of their own notes used for circulation and paid out by them."

"Sec. 20. That every such person, firm, association, corporation, State bank, or State banking association, and also every national banking association, shall pay a like tax of 10 per cent on the amount of notes of any person, firm, association, other than a national banking association, or of any corporation, State bank, other than the Federal reserve bank of the United States, or of any town, city, or nunicipal corporation, used for circulation and paid out by them."

Sec. 35. That all existing statutes relating to the control and examination of the plates and dies for the printing of the notes of national banks, and replacing of worn-out, lost, stolen, and mutilated notes of national banks, and to the maceration of notes of national banks, and prescribing penalties for imitating or mutilating all notes of the national banks, and for counterfeiting notes of the national banks, and for using or having control, custody, or possession of any such plates without authority, and for passing counterfeit circulation, and for taking unauthorized impressions of tools used in the preparation of notes of national banks, or having the same in possession, or for dealing in counterfeit circulation, shall apply in all respects to the notes of the bank and to the plates, dies, and tools of all descriptions connected with the issuance thereof; and all penal provisions of existing laws in connection with any acts done with respect to any of the matters or things above described shall be applicable to such acts done

SEC. 36. That the district courts of the United States shall have jurisdiction to hear and determine all causes to which the bank shall be a party, and such causes shall be brought in the judicial district in which any party to the action other than the bank is a resident, and service of all process may be made upon any officer of the bank at its office in Washington or at any of its duly authorized and established branches or subbranches.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Ohio [Mr. Burton] to insert the matter proposed by him in lieu of the words proposed to be inserted by the Senator from Oklahoma [Mr. Owen].

The amendment to the amendment was rejected.

Mr. OWEN. I now move the adoption of my amendment as amended.

The VICE PRESIDENT. The question is on the amendment of the Senator from Oklahoma as amended.

Mr. BURTON. Mr. President, the Senator from Iowa [Mr. Cummins] wishes to still further present an amendment.

Mr. OWEN. The Senator can do that when the bill is reported to the Senate, if he likes.

Mr. BRISTOW. As I understand, there will be opportunity to amend this amendment after it is in the Senate.

Mr. OWEN. Certainly.

Mr. BRISTOW. The question now is, as I understand, on the adoption of the amendment as in Committee of the Whole? Mr. OWEN. The bill will be reported from the Committee of

the Whole to the Senate, and in the Senate Senators will have a right under the rule to offer amendments.

Mr. BURTON. To foreclose any possibility of any error, as to parliamentary rules, I desire to give notice now that I shall

ask for a separate vote on the so-called civil-service amendment

when the bill is in the Senate.

The VICE PRESIDENT. The Chair will be compelled to rule against the Senator from Ohio on that question. The amendment comes from the Committee of the Whole as a whole, and it must either be agreed to by the Senate as a whole or rejected by the Senate as a whole; but that does not prevent the Senator from Ohio from again introducing an amendment

in the Senate and having it voted upon.

Mr. BURTON. Then, I give notice that in the Senate I shall move to strike out of the amendment that portion relating to

civil service.

Mr. BRISTOW. Now, Mr. President, that I may understand this matter, I ask if the amendment of the Senator from Okla-Mr. BRISTOW. homa is adopted as in Committee of the Whole, and then as amended the bill passes into the Senate, will it be in order to move to strike out any part of the bill or to offer an amendment to it?

The VICE PRESIDENT. The Chair has ruled that amendments may continue from now until every Senator has had every opportunity to introduce every amendment he wishes to introduce, whether such amendments have been introduced in Committee of the Whole or not. Mr. OWEN. Question!

The VICE PRESIDENT. The question is on the adoption of the amendment of the Senator from Oklahoma as amended. The amendment as amended was agreed to.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The bill is in the Senate and open to amendment.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. The question is, Will the Senate concur in the amendment made as in Committee of the Whole? Mr. NELSON. I offer an amendment to a portion of section

11, subdivision (c), on page 30 of the last print of the bill.

Mr. BRISTOW. Mr. President, there are quite a number of Senators who are absent who did not expect the bill to come into the Senate at this time, and I suggest the absence of a

quorum in order that we may have a full Senate.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators

answered to their names:

Gallinger Goff Gore Gronna Hitchcock Hollis Hughes Jackson James Johnson Ashurst Bacon Bankhead Martine, N. J. Myers Nelson Norris O'Gorman Oliver Shively Simmons Smith, Ariz. Smith, Ga. Smith, Md. Smith, S. C. Borah Bradley Brady Brandegee Bristow Oliver Overman Owen Page Perkins Pittman Poindexter Pomerene Ransdell Reed Smoot Sterling Sutherland Bryan Burton Catron Chamberlain Swanson Thomas Thompson Tillman Jones Kenyon Kern La Follette Chilton Clapp Clark, Wyo. Clarke, Ark. Colt Crawford Townsend Lane Reed Robinson Lea Lewis Lippitt McCumber McLean Martin, Va. Walsh Warren Weeks Williams Root Saulsbury Shafroth Cummins Dillingham Fletcher Sheppard Sherman Works

The VICE PRESIDENT. Eighty-three Senators have answered to the roll call. There is a quorum present. The Sena-

tor from Minnesota is entitled to the floor.

Mr. NELSON. Mr. President, I offer the amendment which

I send to the Secretary's desk.

The VICE PRESIDENT. The amendment proposed by the Senator from Minnesota will be stated.

The Secretary. In the print of the amendment of December 18, which has just been agreed to as in Committee of the Whole, on page 30, beginning with line 13, it is proposed to strike out the provise which begins "And provided further," down to and including the words "one-half per centum," on line 22, and in Heu thereof to insert the following words:

And provided further, That whenever and so long as such reserve shall fall and remain below 50 per cent the Federal reserve bank shall pay a special tax upon the deficiency of reserve at a rate increasing in proportion to such deficiency, as follows: For each 2½ per cent or fraction thereof that the reserve falls below 50 per cent a tax shall be levied of 1 per cent.

The VICE PRESIDENT. The question is on the amendment of the Senator from Minnesota [Mr. Nelson] to the amendment made as in Committee of the Whole.

Mr. ROOT. Mr. President, the effect of the amendment offered by the Senator from Minnesota [Mr. Nelson] is to make the tax which controls the reduction of reserves an effective control in lieu of the very weak and ineffective provision included in the amendment which was offered and adopted last evening. The provision for maintaining the gold reserve of 40 per cent, which was adopted last evening on the motion of the Senator from Oklahoma [Mr. Owen], was that when the reserve falls below 40 per cent down to the point of 321 per cent the Federal reserve board shall impose a tax of not more than 1 per cent-in itself but a trifling restraint. It will be quite ineffective to discourage the reduction of the reserve. The discouragement comes from making it expensive to reduce the reserve—that is to say, making it expensive to increase the amount of the reserve notes in proportion to the reserve. A tax of 1 per cent would be quite ineffective for that; but under the provision which has been adopted it is to be not more than 1 per cent. It could be one-fiftieth of 1 per cent if the board saw fit; so that the Congress of the United States really does not put its heavy hand upon the reduction of reserve practically at all until the reduction of reserve comes down to 324 per cent.

The effect of the amendment proposed by the Senator from Minnesota is that we begin with the amount fixed as a reserve and make it increasingly more and more expensive for the banks to reduce the reserve beyond the amount fixed. I hope the amendment will be adopted.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Minnesota [Mr. Nelson] to the

amendment adopted as in Committee of the Whole.

Mr. THOMAS. Mr. President, the discussion of this bill has centered so largely around the gold reserve and there have been so many predictions of the dire consequences which must ensue. unless it is much larger than that required by other nations. and so many prophecies of coming misfortune not only to the bill but to the purpose which is sought to be subserved by it have been made that I have been constrained to remind the Senate of the fact, although it is a trite one, that history repeats itself, and does so with each recurrence of the same species of legislation. I want therefore to trespass upon the Senate for a moment or two to read an extract from Mr. Blaine's Twenty Years of Congress, which recites some of the utterances that attended the discussion of the legal-tender act-an act, Mr. President, which became necessary because of its exigencies to prosecute the greatest war in history, when gold and silver, like the cowards they are, had crawled into their holes, found their hiding places, and left the Nation face to face with nothing to sustain it but the credit of its people upon which, after all, this contemplated currency and all currency must eventually rest. I read from page 417 of the first volume of Mr. Blaine's work:

of Mr. Blaine's work:

Mr. Conkling agreed with some other gentlemen, who said this bill was a legislative declaration of national bankruptcy. He agreed with still another gentleman who said that we were following at a humble and disgraceful distance the Confederate Government, as it is called, which has set up the example of making paper a legal tender and punishing with death those who deny the propriety of the proposition. Mr. Conkling declared that insolvency is ruin and dissolution, and he believed that in passing this bill, as was said by the gentleman from Massachusetts [Mr. Thomas], we are to realize the French proposition about virtue—that it is the first step that costs. Another and another and another \$100,000,000 of this issue will follow. We are plunging into an abyss from which there are to be no resuscitation and meresurrection. Mr. Conkling thought it right to learn of an enemy, and already the London Times halls this \$150,000,000 legal-tender bill as the dawn of American bankruptcy, the downfall of American credit. The public debt by the 1st of the ensuing July, within less than a year from the first battle of the war, was already estimated at \$806,000,000.

I read from page 421:

I read from page 421:

Mr. Owen Lovejoy sought occasion to give the measure a parting malediction, declaring there is no precipice, no chasm, no yawning bottomiess guif before this Nation so terrible, so appalling, so ruinous as the bill before the House, and Mr. Roscoe Conkiling sought the flow to say that he concurred in every word Mr. Lovejoy had spoken.

I read further from page 421:

SENATE.

In the first section they provided that the interest on the national debt should be paid in coin. Upon this point Mr. Fessenden considered that the public credit in large degree depended. As to the legal-tender feature of the notes he could not make up his mind to support it. Wil your legal-tender clause, he inquired, make your notes any better? He you imagine that because you force people to take these notes, they are to be worth the money, and that no injury is to follow? What is the consequence? Does not property rise? You say you are injuring the soldier if you compel him to take a note without its being a legal tender, but will not the sattler put as much more on his goods? And if the soldier sends the notes to his wife to be passed at the country store for necessaries for his family, what will be the result? The goods

that are sold are purchased in New York, the price is put on in New York, a profit is added in the country, and thus the soldier loses just as much. You are not saving anything for anybody.

Mr. Fessenden then inquired, What do we offer without this legaltender clause? We are offering notes with the interest secured beyond a question if the amendments proposed by the Committee on Finance of the Senate are adopted, based on the national faith, and with the power to deposit and receive 5 per cent interest in any subtreasury, and the power of the Government to sell its stock at any price to meet whatever it may be necessary to meet. Will notes of this kind stand better when going out if you put the confession upon their face that they are discarded by you and that you know they ought not to be received and would not be unless their reception is compelled by legal enactment?

The argument against this view, according to Mr. Fessenden, is simply that the banks will not take the notes unless they are made a legal tender, and therefore they will be discredited. It was thus reduced to a contest between the Government and the banks, and the question is whether the banks have the will and the power to discredit the notes of the United States Treasury.

On page 424 Senator Sumner said:

Is it necessary to incur all the unquestionable evils of unconvertible paper forced into circulation by act of Congress to suffer the stain upon our national faith, to bear the stigma of a seeming repudiation, to lose for the present that credit which is in itself a treasury, and to teach debtors everywhere that contracts may be varied at the will of the stronger? Surely there is much in these inquiries which may make us pause. * * He could not give his vote without warning the Government against the danger of such an experiment. The medicine of the Constitution must not become its daily bread.

Mr. President, Congress in that crisis rose to the occasion and enacted that law, the celebrated legal-tender act, in spite of the fierce opposition it encountered and the prophecies of disaster which attended its birth. With the money thus ob-tained and thus created the Union was saved, for it gave it the means for the equipment of its armies and the supply of its navies. It strengthened the credit of the Government by test-

ing its staying powers.

I am one of those old-fashioned men who believe that the currency which was then issued was and is and will continue to be the most popular currency in the country. No party has dared since 1878 to propose the retirement of the remaining Treasury notes issued under its provisions. Mr. President, in the years to come, when this bill shall have been tried in the crucible of experience and found equal to the needs and welfare of the country, Senators may have occasion to remind the country by similar historical references to what has been said in this discussion concerning the operations of this bill and the character of the money which it proposes to quicken into life.

Mr. OWEN. Mr. President, I ask to submit for the Record a memorandum of comments upon the national-bank bill at the

time it was passed, and prophecies of evils that it was said

would follow.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

The matter referred to is as follows:

The matter referred to is as follows:

[Extracts from the New York Herald upon the currency bill of 1863.]

New York Herald, February 14, 1863: "The Secretary should understand that everybody approves the object of his bill. * * * But, in the first place, it is not considered wise or fair, when the northern banks have invested every dollar of their capital in United States securities, to choose this moment to make war upon them; nor is it considered politic in the present delicate condition of the relations between the States and the General Government to provoke a conflict on the subject of banking, which would inevitably be the result in the event of an attempt by Congress to override and annul the banking laws of New York, Massachusetts, New Jersey, and Ohio. In the second place, the idea which seems to be entertained by the Secretary of the Treasury that the passage of this banking bill will provide money for the prosecution of the war and enable the Government to dispense with further issues of greenbacks, is scouted in business circles as a monstrous delusion. * * Mr. Chase's incomprehensible belief in his bank scheme has created no little uneasiness among commercial men."

(In Financial and commercial column.)

February 19, 1863 (Financial and commercial): * * * "It is to be hoped that there may be some men of sense and business experience on the committee, as otherwise there is reason to fear that the childish annoyance which the advance in gold causes at Washington and the extraordinary hallucination which prevails in official circles with regard to the effect of the bank bill, may lead to the adoption of a policy which may leave the Government without means before the summer ends. If Congress relies to any extent whatever upon the bank bill or upon loans before further issues of greenbacks have been made for means to carry on the war, it is certain as fate that the Government will be bankrupt and that Mr. Chase will find himself before the year ends obliged to solicit more money from Congress. Should [Extracts from the New York Herald upon the currency bill of 1863.]

understood that the House, deeming it a dead letter, agreed to pass it on condition that the Senate would adopt the House scheme for \$300,000,000 more legal tender, bearing no interest."

February 23, 1863 (Financial and commercial): "The bank bill has now passed both Houses. The bill was forced through the House of Representatives by the party spur and against the conviction of a majority of Members. * * * Our conservative financiers are somewhat alarmed at the prospect and do not conceal their opinion that the new bank law is likely to produce an inflation more general, more dangerous, and more certain to generate wild speculation than direct issues of legal-tender money by Government. It is clear that the bill as passed imparts to the bonded debt of the United States the same inflation capacity as is possessed by the legal-tender notes; in other words, it 'mobilizes' the whole Government debt, bonded and floating, and places it in the light of an irredeemable currency, which is certain to enhance values of all kinds. Meanwhile it provides the Government with no money."

February 26, 1863 (Financial and commercial): "Mr. Chase believes that he will get money under his bank act. Some of his confidential advisers, who have made fortunes by their intimacy with him since the war, are generally understood to be short of stocks. * * ° The premium on gold seems to have deprived the Washington financiers of the little financial capacity they possessed, and they seem likely to legislate in view of that premium only."

Farther articles appear in subsequent issues of the Herald, which can be obtained or summarized for the Secretary, if he desires. They all flout the idea that the bill will check expansion or that it can fail to inflate prices of all kinds. These articles are all under the "Financial and commercial" headings.

[Extract from the Detroit Free Press on the currency bill of 1863.]

Editorial, February 25, 1863: "The effect of the passage of the banking bill of Mr. Chase * * was most disastrous on the price of gold in Wall Street, it having suddenly advanced from 65 to 71 per cent. At this rate, long before the issue of \$300,000,000 is completed, \$1 in gold will be worth \$2 in paper. * * The immediate effect of this inflation is already visible in the advance of prices."

[Extract from the Life of Salmon P. Chase, by Shuckers.]

[Extract from the Life of Salmon P. Chase, by Shuckers.]

Senator Collamer summed up the chief objections against it (the bill). They were: That it proposed to tax the State banks out of existence; that it substituted for the 1,300 or 1,400 banks doing business in what were called the loyal States at least 3,000 and perhaps 6,000 institutions entirely independent of the power of visitation by those States; that it removed from all forms of State taxation all the capital employed in local banking corporations, thus interfering with the school funds of many of the States; that it made the Government responsible for the ultimate redemption of the circulation of the associations; that it put great political power into the hands of the Secretary of the Treasury; that it hired the banking associations to circulate three hundred millions of currency at a yearly expense of twelve millions in gold to the people, who were at last responsible for the circulation; in short, the people of the country would derive no benefit from the operations of the bill; and that, after all, the profits derivable to the banks would be too small.

[Extracts from the Bankers' Magazine, 1863.]

[Extracts from the Bankers' Magazine, 1863.]

The September number (pp. 162-166): "Section 46 of the bill is said to be unjust, since an association formed in Connecticut, where the interest is but 6 per cent, must take 1 per cent less than an association formed in New York or 4 per cent less than one formed in California, while at the same time it is subjected to all the restrictions of either of the others.

"2. It is, in a measure, subversive of the objects of the law, since by this clause it renders it impracticable for banks in many of the States to avail themselves of its privileges. In the first place, in many of the States commercial necessity has forced the legislatures to make laws authorizing parties to fix the interest of money by contract at rates higher than that established as the legal rate of interest in the absence of the contract, in some cases so high as to amount to a virtual repeal of the usury laws. Yet this law provides that associations may take the rate of interest established for parties in the absence of contract, and no more."

This forms the themse for quite a long article.

Page 816 begins an article by H. H. Van Dyck, superintendent of the banking department of New York, entitled "Banking in New York." This is included in the April, 1864, number. I have copied parts of it, as follows:

"The first obvious effect of the national system must be the incredictions."

banking department of New York, entitled "Banking in New York." This is included in the April, 1864, number. I have copied parts of it, as follows:

"The first obvious effect of the national system must be the inordinate multiplication of banks of small capital throughout the country."

"He first obvious effect of the national system must be the inordinate multiplication of banks of small capital throughout the country."

"He designed merely as conduits through which the circulation received from Washington is to flow out upon the community."

"Under these seductive influences, aided by the hope of becoming depositories of the public funds, it is not improbable that the number of national banks will be rapidly multiplied and that a large accession to the irredeemable currency already afloat will serve further to illustrate the problem of the rising properties of gold."

Fear is expressed that uniformity of appearance in the notes will not produce the expected suppression of counterfeiting, as the experiment of uniformity had been tried in New England and New York and abandoned. The uniformity of design is also said to be a very great inconvenience in counting, assorting, etc.

"The lessons of experience, as well as the principles of sound reasoning, are repugnant to the theory that the currency to be issued from the banks can be kept at par at the commercial centers by the mere fact that they are received for the public dues." (An argument follows supporting this proposition.)

"Time and experience will also demonstrate the inutility of attempting to make Washington the focus for the business incident to furnishing currency to the banks of the whole country, with the attendant receipt and transfer of securities, which a state of continual financial change requires." (A long paragraph devoted to working out this idea.)

"Under existing laws two-thirds per cent of the stockholders of

cial change requires. (A long paragraph devoted to working idea.)

"Under existing laws two-thirds per cent of the stockholders of any banking association may give notice of a discontinuance of business and proceed to wind up its affairs. But the process is a lingering one and may require years. A proceeding of this kind entered into at the same time by all the institutions of the State would be destructive of business interests.

" In what manner can the legislature trans-

fer the issues of this currency in a body to the jurisdiction of the National Government and still retain its hold upon these securities, enforce the regulations under which the trust is now managed, and yet shorten the almost interminable period which must clapse before this circulation can be returned? The banks organized under the national currency act are restricted in their suits, actions, and proceedings to the circuit, district, and Territorial courts. These courts are too few and far between to answer the demands of a system as extended as that proposed. On what terms and under what restrictions shall the State courts be brought into requisition for the collection of debts and the adjustment of controversy?"

Bankers' Magazine for June, 1864 (p. 964): "A report of the committee expresses the most serious apprehension in regard to the financial situation."

[Extracts from National Monetary Commission report on origin of the national banking system.]

Page 90. "In May, 1863, Hon. Amasa Walker published in the Bankers' Magazine some remarks which he had prepared for a speech in the House of Representatives, but which he was prevented from delivering through the application of the previous question. After having shown that the proposed currency was full of imperfections, that at best it was a 'feeble and imperfect currency,' he nevertheless says he prefers it 'to that it was designed to supersede, because it will be uniformly current everywhere, because there is a tax on it, because it will aid the Government in financial operations, and because it will identify the interests of our moneyed institutions with the credit of the Government."

Page 92. "On the 2d of Newerbor Security 1997.

Government in financial operations, and because it will identify the interests of our moneyed institutions with the credit of the Government."

Page 92. "On the 2d of November, Samuel Hooper wrote Mr. Chase from Boston, inclosing with comments a slip cut from the London Examiner, which he thought might interest Mr. Chase as expressing the opinions of an intelligent writer on financial subjects. He closed his letter with the following expression of his disappointment at the situation: 'I do not like having the small banks only organized under the new law, and regret that no large banks are yet organized in the principal commercial cities, to be made depositories of public money, as it seems to me very desirable, though I doubt if any large banks here or at New York would receive deposits of the public money on conditions that I understand to be prescribed by the Treasury Department.

"The new organizations were attacked on the 28th of November, 1863, by a committee of the New York Clearing House, composed of John E. Williams, president of the Metropolitan Bank, of New York, and John L. Everett. The preparation of the report was attributed to Mr. Williams. It was submitted to the clearing house at a meeting on the 5th of December, 1863, and was accepted and ordered to be printed and distributed. The following clause of the report is of interest: 'It must have been observed by all that the applications for banks under this law, though numerous, are for small amounts, many of only \$50,000 or \$60,000 capital. Your committee know of but very few who are designed to do a legitimate banking business. There may be others, but from the small amount of capital of more than a hundred of them, and the localities of several, your committee know of but very few who are designed to do a legitimate banking business. There may be others, but from the small amount of capital of more than a hundred of them, and the localities of several, your committee know of but very few who are designed to do a legitimate banking business. Ther

[Extracts from report of the New York committee on banks, made April 1, 1864, to the legislature.]

This report criticizes bitterly the action of Secretary Chase in unsettling the rates of interest at which legal-tender notes could be converted into interest-bearing securities. It complains because Congress has "carried the immunity annexed to investments in the stocks and securities of the United States so far as to exempt them from taxation by or under State or municipal authority." The primary effect of this exemption is said to be more particularly evident in the case of corporations. "The banks of this State hold United States stocks to an amount far beyond their aggregate capital. Could this exemption therefore be made operative in their case, it would at once remove \$109,000,000 from the reach of State and local taxation and throw the accumulated burden upon property in other forms. When it is borne in mind that the aggregate amount of the national debt already exceeds two thousand millions of dollars, and that an equivalent amount of property is to be withdrawn from taxation, we can not but apprehend disastrous results." * * *

two thousand millions of dollars, and that an equivalent amount of property is to be withdrawn from taxation, we can not but apprehend disastrous results."

"The payment of the tax imposed under this law was resisted by the banks who were parties to the suits not from an unwillingness to contribute toward the public expenses, but from the inequalities known to exist in other sections of the State in regard to the taxation of investments in United States securities and the belief that the corporations established under the authority of Congress would, under the exemptions authorized by that body, evade all taxes for State and municipal purposes. It is due to the distinguished and able representatives from the New York banks who appeared before the bank committees of the senate and assembly to say that they emphatically declared their entire concurrency in causing all capital * * * to pay its legitimate share of the public burdens; but that a discriminating tax, which should reach only the institutions of this State, whilst those of congressional origin would escape with impunity, could not fall to be fatal to the existence of the former." Further complaint is made that the New York banks have encountered the determined hostility of the Secretary of the Treasury, and through him of congressional action, until their continued existence is problematical. "It is the crime of our system that it stands in the way of a gigantic scheme of centralization, by which the whole banking capital of the country is to be brought under the dominant influence at Washington, and if not made subservient to the ambitious views of a financial Secretary, at least to become the football of congressional politicians. Questions of constitutional prerogative are disposed of in a manner so flippant as to leave a reasonable doubt whether the provisions of the Constitution are regarded as of binding validity. * * * Corporations with special privileges are planted within the States, without the consent of the latter. * * The sovereign right of

a bounty for enlisting under the banner of congressional banking." It is further said that the legitimate wants of government could be provided for by the State banks. A crisis in the near future is predicted.

[Extract from Hugh McCullough's Men and Measures of Half a Century.]

Extract from Hugh McCullough's Men and Measures of Half a Century.]

There were four causes for the unwillingness of the State banks to become national banks:

First. The apprehension that the national system might prove a repetition of the free-bank system of the West, which had been a disreputable failure.

Second. The opinion that in becoming national banks, and issuing notes secured by Government bonds, their interests would be so identified with the interests of the Government, their credit so dependent upon, so interwoven with, the public credit, that they would be ruined if the integrity of the Union should not be preserved.

Third. The danger of hostile legislation by Congress or the annoyance to which they might be exposed by congressional interference with their business for partisan purposes.

Fourth. The requirement that in order to become national banks they must relinquish the names to which they had become attached and be known by numerals.

[Extracts from the New York Times in regard to the currency bill of 1863.]

The Times of January 29, 1863, prints and editorially indorses a plan for restoring the national credit, which the writer offers to take the place of Mr. Hooper's and Mr. Spaulding's bills. "Unless the public is willing to exchange the paper money for bonds and by thus returning to the coffers of the Government limit the issues to a reasonable amount, the whole system must tumble to pieces, involving everybody in the common ruin."

Editorial, February 16, 1863, quotes and opposes an article in the Albany Atlas and Argus, in which that papers says, "This favorite measure of the administration and of the Cabinet would not have elicited the opposition of those Senators (extreme upon all questions of party) if it had not been liable to the most serious objections on grounds both of expediency and constitutionality."

In addition to these, it is asserted that Messrs. Howe, Howard, and Lake, of Indiana, were up to the last moment opposed to Mr. Chase's scheme.

Lake, of Indiana, were up to the last moment opposed to Mr. Chase's scheme.

"The bill may be defeated, but if so, some other nearly as objectionable will be submitted." The Times criticizes this article very bitterly and throughout the course of legislation upholds the administration in respect to the bill.

February 18, 1863, a letter signed J. says, in part, "The objection to this scheme is that it is too slow in its operation to aid the Government, and it is still inflation in another form and will not prevent a depreciation of the currency any more than the issue of greenbacks without banks." Further, this man advocates a central bank located in New York.

[Extracts from Bolles's Financial History of the United States.]

depreciation of the currency any more than the issue of greenbacks without banks." Further, this man advocates a central bank located in New York.

[Extracts from Bolles's Financial History of the United States.]

Page 201. "The bankers of New York having heard that Mr. Chase would recommend a national banking system in his annual report, James Gallatin prepared and read to him 'an exposition of the futility of resorting to such a scheme, and explained how it would fail to yield to him the supply of capital which he required.' The banks had not yet fully learned how Mr. Chase regarded their advice; their doubt, however, was solved within a few months. """ "At this time public opinion was divided and opposition to the plan was not confined to the banks nor to interests allied with them. In an able and elaborate report on the finances and resources of the country adopted by a very respectable society in January—the Geographical and Statistical Society—the following criticism was expressed: Were this plan of banking adopted the circulating currency of the country would redeem at par at the center of exchanges. Not only so, but would be constantly varying in amount, producing perpetual change in values, for marketable value depends on the quantity of the circulating medium. Each bank would sell its security and call in its circulation whenever the high price of United States stocks or the wish of the owner might suggest the course. And, again, from other sources large amounts of bank notes would at different times be thrown out for circulation, and thus inevitably would perpetual change in the quantities of circulating medium perplex and embarrass commercial transactions.

"'It is true that in New York this system has worked well, but it is equally true that in Hilmois it has been a failure; and it would have been a failure in that State on the first financial pressure had no rebellion occurred. The larger part of the banking capital of the State of New York is in the city of New York, and the center of exchange be

and to distribute the \$300,000,000 of stock which could be put into these institutions. 'If the Secretary of the Treasury can be furnished with these powers and chooses to use them,' said Senator Collamer. 'he must be a very bungling politician if he can not make himself President any day.' Other objections were raised by him, but the most fully discussed feature of the law was the proposed tax of 2 per cent on their capital.

"James Gallatin, of New York, wrote to Senator Fessenden during the debate: 'In our State, as well as in the West, the system of banking on public stocks has proved delusive in seasons of great depression in the prices of such stocks, being less reliable than banking upon real business mercantile paper (not accommodation) at short dates; and the banks dealing in the latter in this city having been compelled to protect circulation of the public-stock banks in order to save the latter from bankruptcy."

in the prices of such stocks, being less reliable than banking upon real problems of the public stock banks in order to save the latter from bankruptcy.

"The principal speech delivered against the bill in the House was by Mr. Baker, of New York. Many objections were stated, one of which was that the bill did not provide a central place for the redemption of notes. Each bank was to redeem its circulation at the place of issue. The New York banking system provided for the redemption of notes. Each bank was to redeem its circulation at the place of issue. The New York banking system provided for the redemption of all bank notes in the chief city of the State. When the previous safety-fund system existed there bank notes were from one-eighth to 2 per cent discount, varying by their distance from the place of redemption." Such would be the case, said Mr. Baker, with the notes which we propose to Issue under this system in each individual State, but the points from their place of issue. To remedy this evil and make this currency of uniform value throughout the United States, it is absolutely necessary that these associations should be compelled to redeem their notes at their counters, at the commercial center of the State in which they are located, and also at New York.

"Another objection stated by him was the requiring of the banks to keep on hand 25 per cent of their circulation and deposits in lawful money. (The States generally allowed banks to issue notes without reference to the amount of specie in their vaults. The only exceptions were the State of Louislana, which required a reserve of 33 per cent upon circulation and deposits, and Massachusetts, which after 1858, required a reserve of 15 per cent. No other case is recollected where any definite proportion between specie and immediate liabilities was essentially the proportion between specie and immediate liabilities was essentially and the committee of the banking department of New York, at the beginning of 1864."

Note: This article by Mr. Van Dyyck is su

[Extracts from adverse congressional comment on the national-bank bill of 1863.]

SENATE.

Senator Powell, of Kentucky: "I am " " " of the opinion that a bank note issued upon any other than a specie basis will be injurious to the country in which it is issued. " " I am opposed to this bill in every form, but if it is to be passed, I think it should be given at least a little stiffening." (He was presenting an amendment requiring banks to keep in their vaults in gold and silver coin, at all times, an amount equal to one-fourth of their issues.) The note holders had but little security. "All the States which have adopted this free banking system require the banks to keep in their vaults a limited amount of specie, some 12 per cent, some 30 per cent. " " Here, however, is a scheme for a series of banks, a gigantic scheme, that absolutely does not require them to pay coin or keep any on hand at all. I have conversed with intelligent merchants and business men from New York, Boston, and Philadelphia, and have yet to find the first one who does not condemn it." The Senator gave notice that he would offer a further amendment to prevent the resulting money from being received for customs. (Feb. 9, 1863.)

Senator Powell. February 10, 1863: "The whole object of the bill is a grand consolidated scheme for the issue of paper money."

Senator Henderson, February 10, 1863: "I have not nearly the confidence in this bill that others seem to have. " * " I do not desire to fasten such a system for all time on the country, " * " It is thought by the Secretary of the Treasury, the President, and others that this bill will give any at all."

Senator Carille, February 10, 1863: "If this bill passes in its present shape " * every man * " will have a little bank at every crossroads, throwing out upon the country, \$15,000 of paper based upon an outlay of his own of \$6,000. " A large portion of the stock of the State banks is owned by widows and orphans, and you strike the most deadly blow at these State institutions that you could do by the passage of this bfil."

Senator Collamer, of Vermont, February 10, 1863: "You propose to set up these banks, put out their circulation as a national currency, and guarantee its payment. Wherein is that any better than the paper we have got now? Is it any better? What is it founded on? United States credit, United States stocks. Whom do the bill holders look to for final redemption? The United States Treasury. We say we will redeem them. The system has no other foundation. All these fictitious contrivances about the responsibility of the individual stockholders amount to nothing at all. "" It is simply founded upon the public responsibility, and indeed to the Senator from Ohio [Mr. Sherman] that seems to be their great value."

On another sheet will be found a summing up of the opinions expressed by Senator Collamer, who really led the opposition, which was taken from Mr. Hugh McCullough's Men and Measures of Half a Century.

HOUSE OF REPRESENTATIVES.

Representative Fenton, one of the supporters of the bill, read a letter to the House from a New York banker, who expressed the opinion that the scheme proposed by Secretary Chase would inevitably destroy the State banks. (Feb. 19, 1863.)

Representative Baker, February 20, 1863, expressed the opinion that the State banks would be ruined by the bill, and also objected to the section requiring every association to keep on hand 25 per cent of its circulation and deposits in lawful money; also, he disliked the proposal to issue circulating notes secured by United States bonds, which were to be redeemed by "inconvertible" and irredeemable notes. He asserted that when the expenses were deducted the banks would find the terms of the act in nowise conductive to large or even ordinary profits; that the feature of the bill which provides that only 90 per cent of the face value of the bonds shall be issued depreciates the security of the United States bonds; and says the whole system is based on the idea of a permanent public debt and would confer upon the Secretary of the Treasury extraordinary power, politically, through the manner and extent of its patronage. "With a Comptroller of the Currency unworthy of the trust, the slender reed on which this system is based would break and involve all in one common ruin." Special stress is laid in this speech upon the idea of the State banks being ruined.

Representative Alley said the inevitable effect of expanding the currency and increasing its volume to \$1,000,000,000 would be to "enhance the prices of everything to twice or thrice their present value * * thus ultimately occasioning widespread disaster and ruin to an extent never before witnessed."

Representative Noble (Feb. 20) did not believe the framers of the Constitution ever intended to grant such power to Congress, and discussed the eighth section of the Constitution, saying the Secretary (Chase) himself found it difficult to tell where the power might be found.

These addresses are in some cases very long. I have marked their places in the volumes and can supply them if desired.

[Extract from New York Commercial Advertiser.]

Editorial, February 21, 1863: Although we have not felt oversanguine as to the great benefits which the banking bill would accomplish, we shall be the last to countenance any factitious opposition to it.

* * It affords some consolation that there is a tolerable prospect of having "touched bottom" on the issuing of Government paper as legal tender, with the probability of its gradually returning to a specie level.

tender, with the probability of its gradually returning to a specie level.

[Extract from proceedings of the meeting in relation to the establishment of a large national bank in this city (New York).]

October 21, 1863: Mr. McCullough, Comptroller of the Currency (afterwards Secretary of the Treasury), stated that he had been opposed to the currency bill before its passage, but later on, on examination, thought it might suffice. * * * " It was his opinion that the system of internal-revenue taxes of itself created a necessity on the part of the Government for a national circulation which could be received and held with safety." Besides, "the people have got a taste for notes that will go everywhere." In relation to the organization of a large national bank in New York, Mr. McCullough said he trusted that such a bank would be organized as the result of this meeting.

In regard to amendments of the law, Mr. McCullough said he considered some amendments necessary. It went too much into detail in the regulations of the affairs of the banks and contained some provisions that he thought unnecessary and unwise. He thought that the rate of interest should be the same in all States, and that the provision in regard to usury was too severe. While many laws might still be needed where capital was not abundant they were hardly necessary in the older and richer States, and in no State should usury make vold the contract. There had been times in the history of the country when the banks of New York might have saved large amounts of coin from exportation and the excessive importations of goods had they possessed the privileges of the Bank of England, of raising or depressing the rate of interest as the public interest required. The law also might need amendments to compet the banks to keep their notes from being depreciated at commercial points, and other amendments not necessary to mention might be well. "The main features of the law are right, but not perfect."

Mr. BRISTOW. Mr. President, I intend to support the amendment offered by the Senator from Minnesota, because I believe it is very much better than the provision which is found in this bill.

The bill as it is now before the Senate, in my opinion, will result in an inflation of our currency. It provides that all of the national-bank notes shall continue in circulation. Therefore, there can be no reduction in the amount of paper currency now in circulation. The bill as it came from the House sought to substitute the regional-bank notes for the national-bank notes. As it has been amended by the Senate it does not substitute the regional-bank notes for the national-bank notes, but adds to the present circulation whatever regional notes are issued.

There is no gold reserve behind the national-bank notes. That is a bond-secured circulation. There is a gold reserve of something over 40 per cent behind the greenbacks. Now it is proposed to add to the circulation, besides the national-bank notes that are out, a bond-secured circulation which represents no gold reserve, an additional circulation of paper, and to require for that additional circulation but 40 per cent gold reserve,

That reduces the gold that is behind the paper circulation to a very low point, in my opinion. If we were, as the bill proposed in the first place, substituting these regional reserve notes for the national-bank notes, then there would stand behind the paper money 40 per cent of gold, less, of course, whatever reduction might be made under the provisions of the bill when it fell below the 40 per cent, as provided against by the tax. The tax will not be effective, however, as has been very clearly pointed out by the Senator from New York; so we are in fact providing for only $32\frac{1}{2}$ per cent gold reserve, in my opinion.

I do not believe that is enough, when we have in circulation \$750,000,000 of paper money that is not secured. We are adding to the circulation of the country all that can be added to it upon a 32½ per cent basis. I think that will lead to an inflation of the currency. I do not believe any one of the great commercial nations of the world has any such danger in its currency laws as that which we are now about to incorporate into this bill.

I think, therefore, the amendment of the Senator from Minnesota is absolutely essential. I believe it would be wise if this currency were being substituted for the national-bank notes; but since it is not to be substituted for the national-bank notes, I believe it is imperative that the gold reserve shall be maintained at a higher point than that provided in the bill. So far as I am concerned, I intend to support the amendment, believing it to be very essential.

I voted against the amendment of the Senator from New York [Mr. Root] last night because in that amendment there was a limitation on the amount of currency that could be issued in addition to the gold reserve required. I intend to vote against the provision in the present bill because there is a minimum limitation. The present bill says that our paper money can not be less than it is now, whether the commercial interests of the country demand it or not.

The amendment offered by the Senator from New York last night said that if the paper money aggregated more than \$900,000,000 there should be a tax put upon the circulation, regardless of the business or commercial necessities. I do not believe there should be either a maximum limitation or a minimum limitation as to the amount of paper money that is put into circulation. That should be regulated, in my opinion, wholly by the gold reserve that is required. If you fix your gold reserve at the proper amount, it will serve as the barometer that will regulate and act according to the commercial necessities of the country, and our money will expand or contract as business requires. It will always be sound if the gold reserve is sufficient. If the gold reserve is not sufficient, it will not be sound. If the gold reserve should be too high, it would be contracted too much. At 50 per cent it is approximately the same percentage of gold that we have now in the country, as compared to our total circulation.

So I am very much in favor of the amendment, because I think it is sound, and at the same time it will give the widest opportunity for the expansion of business, with no impediment, so far as the law is concerned, either up or down.

Mr. NELSON. Mr. President, I am unwilling at this hour of the day to take up the time of the Senate further in discussing the amendment. I think all Senators understand its merits, and in view of that fact I ask for a yea-and-nay vote

The year and nays were ordered.

Mr. CLARKE of Arkansas. I ask that the amendment which constitutes the pending question may be stated to the Senate.

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

The Secretary. In the last print of the amendment of the Senator from Oklahoma, on page 30, beginning on line 13, it is proposed to strike out the proviso down to and including the words "one-half per cent," on line 22, and in lieu of the words stricken out to insert:

And provided further, That whenever and so long as such reserve shall fall and remain below 50 per cent, the Federal reserve bank shall pay a special tax upon the deficiency of reserve at a rate increasing in proportion to such deficiency, as follows: For each 2½ per cent or fraction thereof that the reserve falls below 50 per cent a tax shall be levied of 1 per cent.

Mr. CLARKE of Arkansas. I think the Chair should state the pending question, so that it may be understood. Some of us have not been in the Chamber during the discussion.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Minnesota to the amendment which has just been stated, and on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I desire to announce my pair with the senior Senator from Missouri [Mr. Stone]. In his absence, I withhold my vote.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson], I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and will vote. I vote "yea."

Mr. STERLING (when his name was called). I announce

my pair with the senior Senator from Louisiana [Mr. Thornton]. If at liberty to vote, I would vote "yea."

The roll call was concluded.

Mr. STERLING. I transfer my pair with the senior Senator from Louisiana [Mr. Thornton] to the senior Senator from New Mexico [Mr. Fall] and will vote. I vote "yea."

Mr. GALLINGER (after having voted in the affirmative). have been informed that the junior Senator from New York [Mr. O'GORMAN] did not vote. Am I correct? The VICE PRESIDENT. He did not vote.

Mr. GALLINGER. I have a standing pair with that Senator, and I therefore withdraw my vote.

The result was announced—yeas 41, nays 44, as follows:

o Mr. Nelson's amendment to the amendment was rejected. Mr. BURTON. I move to strike out subsection (m) in section This subsection exempts appointees chosen under the terms of the bill from the operation of the civil-service law. I ask that the subsection be read.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 32, of the last print, the Senator from Ohio [Mr. Burton] proposes to strike out all of subsection (m), which reads as follows:

(m) To employ such attorneys, experts, assistants, clerks, or other employees as may be deemed necessary to properly conduct the business of such board and to accomplish the purposes of this act. All salaries, allowances, and expenses of those employed to be fixed in advance by said board and to be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees to be appointed without regard to the provisions of the act of January 6, 1883 (22 R. S., 403), and amendments thereto, or any rule or regulation made in pursuance thereof.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Ohio to the amendment.
Mr. BURTON. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). Again announcing my pair with the senior Senator from Missouri [Mr. Stone], I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. STERLING (when his name was called). I again an-

nounce my pair with the senior Senator from Louisiana [Mr.

Thornton] and withhold my vote.

The roll call having been concluded, the result was announced-yeas 40, nays 43, as follows:

Sterling Stone Lane Lodge Thomas Thornton

So Mr. Burton's amendment to the amendment was rejected. Mr. BRANDEGEE. The amendment just voted upon provided for striking out subsection M, running from line 13 on page 32, to the bottom of the page. The subsection provides that the board shall employ attorneys, experts, assistants, and so forth, and that they shall be exempted from the operations of the civil-service law. I now move as an amendment to strike out the language commencing in line 19 with the words "all such attorneys" down to and including the last word on the page.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 32, subsection M, beginning in line 19, strike out the following words:

All such attorneys, experts, assistants, clerks, and other employees to be appointed without regard to the provisions of the act of January 6, 1883 (22 Rev. Stat., 403), and amendments thereto, or any rule or regulation made in pursuance thereof.

Mr. BRANDEGEE. The effect of this amendment, if it prevailed, of course would be to authorize the board to employ these attorneys, experts, and assistants just as is provided in the bill, but not to exempt them from the operation of the civil-service law.

Mr. BURTON. The motion I made before included the whole subsection. The motion as now presented raises solely the question in regard to exemption from the civil-service law. I regard the two preceding paragraphs as extremely objectionable. In the first place, they give unlimited authority to this board to employ such attorneys, experts, assistants, and so forth, as may be deemed necessary, and, in the next place, in the second paragraph the right is given to fix all salaries.

The authority given in both paragraphs is unprecedented. It takes away the control of Congress and gives to an executive body the determination as to the number of appointments they shall make, and also the determination of the salaries, without the usual rule that the authority must first be given by Congress

Mr. ROOT. Mr. President, as I understand it, the amendment as now offered by the Senator from Connecticut does not raise either of the questions the Senator from Ohio has just stated, but it relates solely to the exemption from the civil-service system, and if adopted it leaves it still competent for the President to exempt any one of these positions from the operation of the civil-service requirements.

Mr. BRANDEGEE. That would be my understanding of it. It would strike out from the bill the mandatory provision that they should not be subject to the civil-service rules.

Mr. BACON. Mr. President, if I correctly understand the Senator from Connecticut, I think his amendment is not in order. I am not sure that I correctly understand him. Therefore I make the point subsequent to that correction, if I should be in error.

I understand that the motion which was previously made, and upon which we have just voted, was to strike out the entire paragraph, and it was not a motion to strike out and insert. I understand the motion of the Senator from Connecticut now to be to strike out simply a part of the same paragraph with no additional motion to insert.

If that be the case, Mr. President, I submit that under Rule XVIII the motion is not in order. If the prior motion had been to strike out and insert, then the motion would be in order, or if the present motion were to strike out and insert, it would be in order; but the prior motion having been simply to strike out and having been negatived by the vote of the Senate, a motion now merely to strike out a part of the same paragraph is not in order under Rule XVIII.

Mr. BRANDEGEE. Will the Senator be kind enough to read the rule?

Mr. BACON. I was about to read the rule. I will read the rule, Mr. President:

If the question in debate contains several propositions, any Senator may have the same divided, except a motion to strike out and insert, which shall not be divided—

Now, the part directly applicable follows-

but the rejection of a motion to strike out and insert one proposition shall not prevent a motion to strike out and insert a different proposition, nor shall it prevent a motion simply to strike out.

Mr. President, there is a statement as plain as it can be that after a motion to strike out a paragraph has been negatived, a motion to strike out a part of the same paragraph is not in order, unless it be accompanied by a motion to insert in the part that is sought to be stricken out.

I understand the motion of the Senator is simply to strike out; the prior motion was simply to strike out, and therefore it is not in order.

Mr. BRANDEGEE. I have not looked at the rule in the book, but, of course, I know the Senator has read it correctly. However, as near as I am able to understand it, as the Senator read it, it does not apply to this case at all. Under the interpretation of the rule for which the Senator contends, if a Senator moved to strike out all after the enacting clause of a bill, and that motion failed, it would not be in order for a Senator to strike out any paragraph in the bill. The motion of the Senator from Ohio was to strike out half a page of the bill, to wit, all the language of lines 13 to 24, inclusive, containing various provisions. The Senate was unwilling to strike out all those provisions; but it does not seem to me that it can be seriously contended, under the rule read by the Senator, that because the Senate is not willing to strike out all those provisions it may

not be allowed to strike out any one of them.

It seems to me the amendment that I proposed is an entirely different amendment from the one proposed by the Senator from Ohio. Indeed, it is only one of several different provisions. I think the mere statement of the case carries conviction. I am quite sure I could not by amplifying it make any Senator take my view of it who does not take it upon the mere statement of the case. I submit the question to the judgment of the Chair.

Mr. BACON. Just one word, Mr. President. The suggestion of the Senator that the rule would lead to the conclusion he mentions in the case of a motion to strike out all after the enacting clause does not change the proposition, because there would follow exactly what the Senator suggests would be the case. A motion to strike out, when negatived, is in parliamentary law equivalent to a motion affirmatively retaining it, the same as a motion which adopted it. The suggestion of the Senator is based upon the possible hardship which might follow from the application of such a rule to the case of a motion to strike out an entirety after the enacting clause. But that is not a hardship at all, because in the same rule there is provided a method by which Senators who do not wish to strike out the whole may protect themselves by asking for a division of the question. The very first clause of the rule is as follows:

If the question in debate contains several propositions, any Senator may have the same divided, except a motion to strike out and insert, which shall not be divided.

Therefore, when a motion to strike out is presented, if Senators present are in favor of striking out a part but not in favor of striking out the whole, their method is not to wait until the motion has been negatived and then seek to strike out another part, but their proper procedure is in the beginning to ask for a division of the question. That should have been done in this case. When the motion was made to strike out this paragraph there was a distinct proposition in which it was available for Senators to ask for a division, that being a right which can not be denied. It is the right of any one Senator to have the different portions of this paragraph voted upon separately.

So there is no hardship flowing from the enforcement of the rule. The only thing is that Senators shall have the right at the proper time to avail themselves of that right.

I repeat, Mr. President, that it is a recognized rule and a proper rule, that a vote refusing to strike out is treated the same as a vote affirmatively adopting, and that therefore those who desire to strike out a part and who do not desire to strike out another part have their remedy in advance by asking that the question be divided and that the vote be taken separately.

Mr. President, the language of the rule, it seems to me, is too plain to admit of any possible doubt as to the meaning. It expressly provides the cases in which a motion to strike out a part may be made after a motion to strike out the whole of it has been negatived, what part of it may be stricken out, and to that extent there is an exception to the general rule which I have spoken of which makes a negative equivalent to an affirmative vote; that is, affirmatively voting in favor of the provision which it is refused to strike out. If the motion

is to strike out and insert, there is an exception. Why should it be specified that a motion to strike out and insert should be permitted if any motion to strike out is to be permitted? The expression of the one is necessarily the exclusion of the other. If it be true that the motion to strike out, unaccompanied by a motion to insert, were legitimate, the rule would simply say that a motion to strike out a part would be permitted, but it says a motion to strike out and insert as to a part shall be permitted; but there is no place where there is any sanction for the proposition that a motion to strike out a part without an accompanying motion to insert in lieu thereof can be entertained after the motion to strike out the whole has been negatived by the body.

Mr. BRANDEGEE. Mr. President, of course I am not claim-

Mr. BRANDEGEE. Mr. President, of course I am not claiming there is any hardship about this matter; I am not denying that any Senator could have asked for a division of the question; but no Senator asked for a division of the question. The question now is, as it seems to me, this: The amendment has been agreed to as in Committee of the Whole; it is now in the Senate; the Senate has decided that it will not strike out from line 13 to line 24, both inclusive. According to the contention of the Senator from Georgia, it is not in the power of the Senate now to amend that language in any respect.

Mr. BACON. No; I beg the Senator's pardon. He can amend it if he accompanies the motion to strike out with a motion to insert anything in lieu thereof, but he can not make a motion to strike it out in its entirety and propose nothing in lieu thereof.

Mr. BRANDEGEE. Very well, Mr. President, rather than take the chance of the point of order raised by the Senator being sustained by the Presiding Officer, I will modify my motion to this extent: I move to strike out the language I have indicated, on line 20, page 32, and to insert what I send to the desk.

Mr. BACON. What are the words which the Senator moves to insert?

Mr. BRANDEGEE. I offer the amendment which I send to the desk in lieu of the amendment I have heretofore proposed.

The VICE PRESIDENT. The amendment proposed by the Senator from Connecticut will be stated.

The Secretary. It is proposed to strike out, on page 32, all of line 19, after the word "board," and all of the remainder of the paragraph, and to insert in lieu thereof the following:

In employing such attorneys, experts, assistants, clerks, and other employees regard shall be had to the provisions of the act of January 6, 1883 (22 R. S., 403), and all amendments thereto, and to all rules and regulations made in pursuance thereof.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Connecticut to the amendment.

Mr. BRANDEGEE. On that I ask for the yeas and nays.

Mr. CLARKE of Arkansas. Let me inquire of the Senator
from Connecticut whether or not he has withdrawn his original
motion?

Mr. BRANDEGEE. Oh, yes.

Mr. CLARKE of Arkansas. That is all right. I did not want the occasion to pass with the assumption that the point of order raised by the Senator from Georgia [Mr. Bacon] was conceded by all the Members of the Senate on this side of the Chamber.

Mr. BRANDEGEE. It was not conceded by any on this side, either; but I did not know what might happen to the amendment in another place.

Mr. CLARKE of Arkansas. The concession made by the Senator from Connecticut by withdrawing his amendment must not be accepted as an admission, by some of us at least, that the point of order was well taken.

Mr. GALLINGER. I agree with the Senator from Arkansas. I should have taken a different view from that taken by the Senator from Georgia.

Mr. SMOOT. I also should have taken a different view.
Mr. BRANDEGEE. There was no ruling on the point.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts [Mr. Lodge] I withhold my vote.

Mr. Lodge] I withhold my vote.

Mr. STERLING (when his name was called). I transfer my pair with the senior Senator from Louisiana [Mr. Thornton] to the senior Senator from New Mexico [Mr. Fall] and vote. I vote "ven."

The roll having been concluded, the result was announced—yeas 43, nays 43, as follows:

THE PROPERTY AND ADDRESS OF THE PARTY OF THE	4.44	10.

The VICE PRESIDENT. On the amendment of the Senator from Connecticut [Mr. Brandeger] to the amendment made as in Committee of the Whole, the yeas are 43 and the nays are 43. The Vice President votes "nay." The amendment is rejected.

Mr. CUMMINS. Mr. President, I now offer the amendment which I proposed on December 12 and upon which I submitted some observations. I do not ask that the amendment be read, unless the Senate insists upon it. It is found upon page 733 of the Congressional Record in the proceedings of December 12. The references in the amendment are to the print of the bill bearing date December 1. I ask unanimous consent, Mr. President, that the reading of the amendment be dispensed with, because I intend to state its purport.

The VICE PRESIDENT. If there be no objection, the amendment will not be read.

Mr. CUMMINS. Mr. President, the amendment was read in full several days ago. I do not desire to protract this session by having it again read. It is sufficient to say that in the fewest possible changes in and with the least possible disturbance of the text of the substitute offered by the Senator from Oklahoma [Mr. Owen], it opens the subscriptions of the capital stock of the Federal reserve banks to the public and provides that these banks shall be controlled and managed by a board of nine directors, six of whom shall be appointed by the Government.

I believe, Mr. President, that the new institution which we are creating, whether it shall consist of 1 bank or 4 banks or 8 banks or 12 banks, should be owned by the people of the United States. I believe that the affairs of the reserve banks should be controlled absolutely by the Government of the United States.

The principle embodied in this amendment has been set forth in many proposals upon which many votes have been had. I do not intend to ask for the yeas and nays upon my amendment, but I take this opportunity to emphasize my protest against consolidating the banks of the United States into either 1 or 8 or 12 combinations. Whenever we have a combination of this character, it ought to be entirely controlled by the people of the country through the Government which they have established for their safety and protection.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Iowa [Mr. Cummins] to the amendment made as in Committee of the Whole.

The amendment to the amendment was rejected.

Mr. JONES. Mr. President, at the conclusion of paragraph (m), on page 32, I move the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.
The Secretary. On page 32, line 24, at the end of the paragraph, it is proposed to insert a colon and the following:

Provided, That nothing herein shall prevent the President from placing said employees in the classified service.

Mr. JONES. Mr. President, last evening I withdrew that amendment on the assurance of the chairman of the committee, or rather on the opinion he expressed, that there was nothing in this provision in the bill that would prevent the President from hereafter placing these employees under the civil service. I believe that the language of the provision does expressly prevent the President from doing that; and, if we are going to start this new banking institution under the spoils system, I

think the President ought to have the right to put it under the civil service at any time that he deems it advisable to do so.

Mr. BRANDEGEE. Will the Senator from Washington tell me, if a lot of employees are to be put in office in violation of the civil service, whether he thinks it would be good policy, then, to apply the rules of the civil service to them to keep Mr. JONES. I think so.

Mr. OWEN. I have no objection to the amendment offered

by the Senator from Washington.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Washington [Mr. Jones] to the amendment. Those in favor of the amendment will say "aye," those opposed "no." [Putting the question.] The "ayes" have it, and the amendment is agreed to.

Mr. GALLINGER. I ask for the yeas and nays on that

amendment.

The VICE PRESIDENT. The Senator from New Hampshire asks for the yeas and nays. Is the demand seconded?

Mr. REED. Mr. President-

The yeas and nays were ordered; the Secretary proceeded to call the roll, and Mr. ASHURST responded to his name.

Mr. REED. I rise to a point of order. The vote was announced finally by the President. The President gave time for a call, and it was not made, and then, after he had finally decided the matter, a call was made for the yeas and nays

Mr. GALLINGER. Mr. President, I rise to a point of order. A response has been made, and debate is not in order.

The VICE PRESIDENT. A response has been made to the

roll call.

That does not interfere with the point of order, if the Chair please. A point of order affecting the roll call is

Mr. BRANDEGEE. Nothing is in order except the roll call.

The VICE PRESIDENT. No; nothing is in order except the roll call. The Secretary will proceed with the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Bur-LEIGH] and will vote. I vote "nay."

Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts [Mr. Lodge], I refrain from voting. Were I at liberty to vote, I should vote "yea."
Mr. STERLING (when his name was called). I transfer my

pair with the senior Senator from Louisiana [Mr. Thornton to the senior Senator from New Mexico [Mr. Fall] and will vote. I vote "nay."

The roll call having been concluded, the result was announced—yeas 63, nays 19, as follows:

	YE	CAS—63.	
Ashurst Bacon Bradley Brady Bryan Burton Chilton Clapp Clarke, Ark, Colt Cummins Fletcher Gore Gronna	Hollis Hughes Jackson James Johnson Jones Kenyon La Follette Lane Lea Lewis Lipplit Martin, Va. So Mr. Jones's amendment to the amendment was agreed to. Mr. CRAWFORD. I send to the desk an amendment which ask to have read.

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. At the end of section 9 it is proposed to add the following:

No person shall be qualified to hold the position of director in a member bank who is a director in another competing bank. Any other bank which seeks to do a general commercial banking business in the same city, town, village, or community in which a member bank does business shall be deemed a competing bank within the meaning of this act.

Any bank permitting a director of a competing bank to act as one of its directors shall be ineligible to membership in a Federal reserve bank, and any bank which violates this provision after becoming a member shall, if found guilty thereof by the Federal reserve board after hearing and notice in writing specifying such charge, be suspended from all privileges as a member of a reserve bank. Said suspension shall remain in full force so long as such violation continues to exist.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota to the amendment. Mr. CRAWFORD. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. STERLING (when his name was called). I again announce the transfer of my pair with the senior Senator from Louisiana [Mr. Thornton] to the senior Senator from New Mexico [Mr. Fall] and will vote. I vote "yea."

The roll call was concluded.

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and will vote. I vote "vea.

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Nevada [Mr. Newlands] and will vote. I vote "nay."

The result was announced—yeas 29, nays 53, as follows:

	YE	AS-29.	
Borah Bradley Brady Bristow Catron Clapp Crawford Cummins	du Pont Gronna Hitchcock Jackson Jones Kenyon La Follette Lippitt	McCumber Nelson Norris Oliver Penrose Perkins Poindexter Smith, Mich.	Smoot Stephenson Sterling Townsend Works

	NOT V	OTING-13.	
Burleigh Burton Clark, Wyo. Culberson	Fall Lodge McLean Newlands	Sherman Stone Thornton Warren	Weeks

So Mr. CRAWFORD's amendment to the amendment was rejected.

Mr. JACKSON. I offer an amendment, which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The Secretary. On page 35, line 7, after the word "shall," it is proposed to strike out the rest of the sentence down to and including the word "States," in line 11, and to insert in lieu The SECRETARY. thereof:

also include notes, drafts, or bills covering investments in stocks, bonds, and other investment securities when same are used as collateral to secure said notes, drafts, or bills.

Mr. REED. Mr. President, a moment ago I voted against a proposition to prohibit interlocking directorates. I do not want to have that vote stand without an explanation.

I voted as I did simply because the amendment is brought in at this time, when the debate is limited, in the closing hours of this contest, and no fair opportunity is afforded for an examination of the amendment. I do not say that to criticize its author, but because I have felt there was not sufficient time to understand and comprehend fully the effect of the amendment, I voted as I did.

I am heartily in favor, however, of an amendment to the law embodying the idea expressed in that amendment. A further reason for my vote lies in the fact that I am confident that at an early date an amendment of that kind will be attached to the banking act.

Mr. CRAWFORD. Mr. President, I think it is only fair to say that I offered that amendment in committee before the bill was reported, and immediately afterwards I presented it to the Senate, and it was printed and placed upon the desks of Senators. It has been at their disposal for examination for several weeks; I would not undertake to say how long, but for a considerable period of time.

When I addressed the Senate several days ago on some features of the bill I dwelt upon this, among other things. I think the amendment has been placed before the Senate for a sufficient length of time, and notice given of the fact that it would be offered has been before the Senate for a sufficient length of time for it to be fairly considered, and not be regarded as a matter of surprise here to-day.

Mr. JACKSON obtained the floor.

Mr. REED. Mr. President—
The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Missouri?

Mr. JACKSON. I do.

Mr. REED. In reply to what the Senator from South Da-kota has said, I wish to say that I did not undertake to I did not undertake to say that the resolution criticize him. or amendment had not been pending. What I meant to convey was that it was brought forward at this time, and that, as far as I am personally concerned, I have been so engaged with the work of the committee that I have had no opportunity to examine it

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Maryland [Mr. Jackson] to the amendment, on which he is entitled to the floor.

Mr. LA FOLLETTE, Mr. President-

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Wisconsin?

Mr. JACKSON. Certainly.

Mr. LA FOLLETTE. I wanted to inquire of the Senator from South Dakota [Mr. Crawford] while he is on his feet about this amendment of his, whether it was presented to the Committee on Banking and Currency of the Senate and whether there was a vote had upon that amendment, and whether it was rejected by the committee before the report was made upon the bill.

Mr. CRAWFORD. That is true. It was presented by me in the committee several days before the committee reported, and

it was rejected there.

Mr. LA FOLLETTE. With ample time for its consideration? Mr. CRAWFORD. With ample time for its consideration. Mr. JACKSON. Mr. President, I simply desire to make a few remarks in behalf of the amendment which I have offered.

It seems to me the class of people whose investments consist largely of bonds or stocks are unduly criticized in the bill. If I understand the bill correctly, a regional bank has a right to discount any note offered to it by a local bank, provided the notes do not extend over 90 days; but if the notes of the individual, as I understand the way the act is now drawn, should be secured by any stocks or bonds excepting United States Government bonds, the regional banks are not allowed to rediscount the notes for local banks.

I know of some institutions in the East that are not allowed to discount anyone's paper, regardless of the wealth of the maker, unless the paper is secured by collateral. It certainly is no detriment to anyone's note to have it further secured by collateral, and often a business man can secure money at a less rate of interest if he can properly secure the banking institu-tion in good collateral. I think that paper ought to be allowed to be rediscounted by the regional bank.

I ask for the yeas and nays on the amendment.

Mr. GORE. Mr. President, I wish to say that I favor legislation in regard to the subject of interlocking directorates. The sentiment in favor of such legislation, I assume, is unanimous on this side of the Chamber. It will be taken up at an early day, when the national-bank laws are revised and codified. It is indeed a part of our general program of legislation.

Mr. President, I have not heretofore wasted either the day or the night with words. I have been so anxious to speed the or the night with words. I have been so analysis to speak passage of this measure that I have observed unbroken silence. Speaking under the 15-minute rule, I need not now promise to be brief. On another occasion I discussed the subject of banking and currency at great length—some Senators thought at too great length. I shall not pursue that path again. Neither do I intend at this time to discuss either the principles or the details of the pending measure. That would be vain repetition. shall content myself with merely enumerating the principal evils which it is intended to correct and the principal benefits which it is intended to secure. My first and present purpose is to refer briefly to the overpowering obligation back of this measure which has impelled its early consideration and passage.

The Democracy came to power on the 4th of March last. It came to power after an enforced absence of 16 years. It came to power with an unprecedented victory. That victory was not due entirely to the distraction of our opponents or to the unity of our friends. It was due in part to the character of our candidate and to the promises contained in our platform.

Government was committed to our charge. That platform and its promises constitute a solemn covenant between the Democratic Party and the American people. That platform and its promises also constitute a specific program of progressive legislation.

We promised certain definite reforms. Tariff reform was "nominated in the bond." That promise has been redeemed in That promise has been redeemed in good faith. Banking and currency reform was "nominated in the bond." That pledge is now being redeemed in good faith. That pledge is now being redeemed in good faith. Trust reform was likewise named in this solemn compact, and in due season that obligation will be fulfilled with prudence and

not, as some have suggested, with precipitation.

These three reforms are but parts of a whole. They are parts of a definite program looking to the betterment of conditions in the United States. The supreme purpose and object of this program is the emancipation of the people from the tyranny of privilege. This emancipation is essential to what has been fitly called "the new freedom." It is our hope that the reign of privilege will be ended, not mended, during this administration. In order to accomplish this end, not only unity of purpose but unanimity of action has been and will continue to be indispensable. To secure such action we have had re-

course to the party caucus.

Senators on the other side have animadverted upon the caucus method. They have confused the means with the endone of the worst blunders alike in science, philosophy, and politics. They have imagined that the people will confuse and confound the means and the end. Sir, they will be disappointed. The American people are intelligent; they are discriminating; they will distinguish not only between end and means, but between the use and abuse of means which are innocent within themselves. When Congress passes a measure, when Congress accomplishes an end desired by the people, they will not condemn honorable methods employed in the execution of their own

will or in the redemption of plighted party faith.

The one comment upon the lips of all to-day is the splendid teamwork which has prevailed among the Democrats in the two Houses of Congress. Republicans have charged for years that the Democratic Party was incapable of organization or concerted action. All Republicans believed and many Democrats feared this was true. The unparalleled harmony which has prevailed here is at once the delight of all Democrats and is the dismay of their opponents. Whenever this harmony passes from our councils, power will pass from our hands. It ought to be said here that the rules of the Democratic caucus expressly excuse a Senator from caucus action whenever he has doubts as to the constitutionality of a measure, whenever he is under instructions from his State legislature, or whenever he is under pledge to his constituency. The caucus merely seeks to subordinate unessential differences to the success of essential principles.

Under the English parliamentary system, while the King is the nominal head, the prime minister is the virtual head of the executive department and is the actual and acknowledged head of the legislative department. There they secure perfect identity of purpose in one and the same person. That is impossible un-der our constitutional system. Our national conventions promulgate our national platforms and nominate our national ticket. This constitutes the President the chosen and accredited leader of his party. To him the country looks for leadership in the fulfillment of party faith.

I say, sir, that this administration is immensely popular aroughout the country. The President's popularity has inthroughout the country. fected-Senators on the other side will approve the word-it has infected all classes, Progressives and Republicans alike.

Mr. President, I must speed, as I have only a few minutes Senators on the other side seem to have a program, perhaps a fortuitous one. I do not believe that it has been adopted by design, though it has been carried out with considerable con-

cert of action.

I believe that the majority ought to respect not only the rights but the feelings of the minority. I can not forget the time when power resided on the other side of the aisle. I think that we ought now to treat the minority-I need not say with the same consideration that was extended to us-but with the same consideration which I felt ought to have been extended to us when we were in the minority.

I believe in the freedom of debate. I still believe that discussion may possibly illuminate rather than darken a subject. It is not the length of debate; it is the character of debate to

which exception might be taken.

No one would be justified in saying that Senators on the other side have undertaken to disturb business, to destroy During the campaign we gave certain assurances to the credits, or to shatter confidence—the very breath of our busi-American people. Those assurances were accepted and the ness life. But, sir, if they had desired to accomplish those objects, they could not have adopted a course better calculated to accomplish those disastrous results.

I have seen Senators tugging like unshorn Samsons at the very pillars of the temple of credit and prosperity. This is true of Senators to whom circumstance and fortune have vouchsafed the influence and reputation of authorities upon such subjects.

Perhaps the passage of such a measure as this must be attended with some slight disturbance of business. The wonder is not that there has been some slight suspension of business activity. The marvel is that the delicate fabric of credit has withstood so well the concentrated and continuous assaults of Senators on the other side. This proves at once the inherent soundness of business conditions and the good sense, fortitude, and patriotism of the American business man. I doubt not that the faith of the business men in the administration will be abundantly justified. If confidence should take flight, the blame and responsibility must rest upon those who have persistently prophesied impending disaster. Distinguished Republican statesmen who have been retired from the cause and who are now wearing the "X" brand, have recently manifested as much joy and jubilation over the reports that a few laboring men here and there were unemployed as it would seem possible to exhibit over the reported triumph of American arms against a foreign foe. If this should continue, it would be in order to substitute a screech owl for the vaulting eagle as the emblem of the Republican Party. Emblazoned upon their coat of arms to-day is a claw hammer rampant and a well-worn pair of holding-back straps.

When the tariff bill was under discussion Republican Senators pronounced their curse upon it. They lapsed into pessimism of the bluest dye. They became prophets of plagues. Indeed, all the plagues of Doneraile were to overwhelm the country over-The measure went into effect. No disturbance followed. The sun arose with Protection passed. Prosperity survived. all its accustomed splendor notwithstanding the cock had not

I heard a distinguished Republican Senator a few days since complaining that prices were not only high but were increasing; complaining that the cost of living had not been reduced. In another breath I heard him discoursing eloquently about a widespread, far-reaching industrial depression which was raging in some obscure village in a neighboring State. The Senator has a right to elect upon what count he will proceed with the prosecution.

No Democrat could foresee or foretell with precision to what extent a reduction of prices would follow upon the reduction of the tariff. The object of protection is to enable the manufacturer to add the duty to the foreign price. This is always the intention, though it is not always the effect. The possibility of adding the duty to the foreign price is regulated by wellascertained economic laws. These laws, however, presuppose a free and unmonopolized market. In a market which is monopolized there might be an entire removal of duty without any perceptible reduction in prices.

The early theory of the protectionist was that high duties would protect the domestic manufacturer against foreign competition and that local competition among domestic producers would protect the people against extortionate prices. The first half of this theory succeeded. The last half has failed. Manufacturers have found it more profitable to combine than to

Democratic statesmen and Democratic platforms have predicted for more than a generation that the tariff would breed trusts and that protection would beget monopoly. "Time and trusts and that protection would beget monopoly. the hour" have converted these prophecies into history. senior Senator from Wisconsin [Mr. La Follette] demonstrated here on one occasion that there are more than 1,000 industrial combinations in the United States. He showed capitalization aggregated more than thirty billions. He showed that their

If the reduction of the tariff should not be followed by a reduction of the cost of living, it does not prove that the tariff bill should not have been enacted. There is neither pleasure nor profit nor patriotism in the payment of taxes which are unjust, unequal, and unnecessary. It would demonstrate that within the outposts of protection privilege has erected a citadel in the form of monopoly. It would demonstrate both the wisdom and necessity of proceeding to carry out the promises of the Democratic platform to strip monopoly of its power to smite the producer with low prices and smite the consumer with high prices.

The very keep in the citadel of monopoly is the Money Trust or the Credit Trust. A committee in another House in an able report recently asserted the existence of such a trust in this country. I do not mean to discuss that question now. He does not expect to sow to-day and to reap upon the morrow,

It must be admitted on all hands that a money or credit trust would be the worst type of trust and the worst form of monopoly. If existing combinations should combine, should confederate, and control the money and credits of the country, it is self-evident that they could cripple or crush existing competitors and prevent new competitors from coming into existence. They could make a desert and call it peace.

Those who believe in the existence of a money trust believe that the pending measure will strip it of its capacity for evil. Those who deny the existence of a money trust can not complain if the present measure safeguard the country against the possibility of such a trust in the future.

Leaving these controverted questions aside, it is universally agreed that our existing banking and currency system calls loudly for reform. We ought to approach the subject in no sort of hostility toward the banks. Banks are essential to developed industry and commerce. They are, therefore, essential to civilization. Systems of commercial banks were evolved during the days of Assyria and Babylon, and they likewise existed among the States of Greece and in the Republic of Rome. Negotiable instruments and promissory notes, bills of exchange, and personal checks were in common use. modern banks of issue I have reviewed on a former occasion.

I now recur for a moment to those reforms on which public opinion has crystallized. The bankers and the people agree that we ought to create a rediscount market in the United States after the order of such markets in the commercial countries of Europe, securing greater steadiness and uniformity in the rates of discounts and giving a greater measure of efficiency to our currency. The friends of the pending measure believe that it will accomplish that end.

Bankers and people agree that our present system of reserves is feeble and ineffective. Our reserves do not avert those evils which they are intended to avert, and when those evils come they do not mitigate their severity. They can not be utilized where-ever needed, whenever needed. The lifeboats are available except when storms arise. The friends of the pending bill believe that it will remedy those conditions.

The bankers and people agree that our present system of banking and currency is rigid and inelastic. The volume of currency does not vary with the varying needs of trade and There is often a deficiency in the fall when the crops are moving which embarrasses and injures the farmer. There is sometimes excess in other seasons which stimulates overspeculation and gambling.

The supply of currency ought to be made to adjust itself automatically to the effective demand. Elasticity of volume ought to be united with stability of value. There are those who believe that this elasticity can be accomplished without, as suggested by the Hoosier banker, printing our currency on india The friends of the pending bill believe that it will in great measure accomplish these needful improvements. all, this measure is intended to prevent panics. Civilized men will not continue to suffer from preventable panics or preventable diseases or preventable famine. These words must sooner or later be marked "obsolete" in the dictionary of civilization.

This bill creates a system of reserve banks whose capital is contributed by and whose dealings are largely limited to member banks. They do not undertake to deal directly with the individual citizen or borrower, although it subserves his interest by affording security against panics and stringency. To this system we will soon make one addition which will perfect our banking and currency plan. I mean that we shall establish a system of farm credits patterned after the most approved systems in the commercial countries of Europe, but adapted, of course, to the local needs and requirements of our own country. I do not mean a system which will enable the farmers to get into debt, but which will enable them to get out of debt. Farm mortgages in the United States aggregate \$2,000,000,000 These mortgages run for comparatively short time or a comparatively high rate of interest. We need a and bear a comparatively high rate of interest. We need a system under which they could be commuted into long-time loans at low interest rates. This will lay deep and broad the foundation of agricultural credit and prosperity in this country; and, after all, our national prosperity is founded upon the farm. In his recent message the President avowed his deep and active interest in the subject of farm credits, and legislation upon this subject is undoubtedly assured at no distant date. When this is done, it can not be said of our system "One thing thou lackest yet"; and whatever an enlightened and perfected system of banking and currency can contribute to national prosperity will be our portion.

Mr. President, the prudent man sows the seed in the fall or springtime and awaits in patience the coming of the harvest.

especially those who reap only what they have sown. The provident man plants his orchard and then abides the slow "process of the suns." He plants with prudence and awaits with patience the passage of the years. He does not expect in a single season to plant the tree and gather the ripened fruit. It is not to be expected that the full fruition of Democratic principles and policies shall be realized within a single month or even within a twelvementh. But I doubt not that if the people will abide in patience their faith and their hope will be abun-

dantly rewarded.
Mr. CRAWFORD. Mr. CRAWFORD. Mr. President, in justice to the junior Senator from Missouri [Mr. Reed] and members of the Committee on Banking and Currency who may not have been present, I wish to say that I find a memorandum in my desk showing the original typewritten draft of the amendment which was voted upon a few minutes ago and a note written in my handwriting underneath stating that it was offered in the committee November 19 and rejected. Whether at that date the committee had divided into the two divisions that made separate reports I am unable to recall. I know very well that I had reports I am unable to recall. I know very well that I had discussed the amendment several times before it was acted upon on the date of November 19. I had carried in a little memorandum book a notation of the substance of it, written with lead pencil, and had brought it up on two or three occasions informally, and this typewritten draft was finally presented on November 19 and rejected by the committee. I am satisfied, from what the Senator from Missouri has told me, that he was not present at the time the amendment was acted upon and

rejected by the committee. I say that in justice to him.

Mr. SMITH of Arizona. Mr. President, before the final vote is reached I should like to announce that I have received a telegram, which is mislaid at this time, from the Senator from New Mexico [Mr. Fall], with whom I am paired, in which he states that he is in favor of the Hitchcock bill and if present would have voted for the amendments submitted by Republicans to that bill. He also stated that as between the present financial status and the Owen bill if he were present he would vote for the Owen bill, and he asked me to make this declaration to the

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Maryland to the amendment, on which he demands the yeas and nays.

The yeas and nays were not ordered. The amendment to the amendment was rejected.

Mr. BRISTOW. Mr. President, I desire to reoffer an amendment that I offered last night, not for the purpose of getting a roll call, but simply to impress upon the committee that will have this bill in conference with the suggestion as to bank depositors' insurance. On page 1161 of the Record will be found the amendment, and I desire to reoffer it. It corresponds exactly with the bill as printed this morning. I want a formal vote on it, because I think it offers the proper solution for the insurance of bank deposits. After it is read I will make a few remarks

The VICE PRESIDENT. The amendment to the amendment

will be read.

The SECRETARY. On page 19, line 16, of the original print, after the period insert:

after the period insert:

After the aforesaid dividend claims have been fully met, an amount equal to 1 per cent of the subscribed capital stock of each regional bank shall be set aside annually in a trust fund, to be known as the depositors' insurance fund, and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made by the board. When, in the judgment of the board, there has been accumulated in such depositors' insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks the board shall have power to suspend the setting aside of the said 1 per cent, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replenished by again setting aside such 1 per cent or so much thereof as, in the judgment of the board, may be necessary.

Mr. President, the House bill provides for

Mr. BRISTOW. Mr. President, the House bill provides for a 5 per cent dividend on the stock; the Senate has increased that dividend from 5 per cent to 6 per cent. This amendment proposes to leave the dividend at 5 per cent, as it came from the other House, and to take 1 per cent on the subscribed capital stock each year and put it into a trust fund, which shall be used to insure the deposits in member banks.

If the dividends are made by all of the regional banks, the sum will aggregate about \$1,000,000 a year. That will go into the trust fund, instead of into the treasury of the banks or to

the credit of the banks.

Since this stock would be a 5 per cent cumulative, nontaxable stock, I think 5 per cent is enough. This 1 per cent will create a fund that will have something to it. It will mean the insurance of the deposits of every member bank and the creation of a fund that will be ample to give full insurance. It is the only proposition which will absolutely insure such a fund.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Kansas [Mr. Bristow] to the

The amendment to the amendment was rejected.

The VICE PRESIDENT. Are there any further amendments? Mr. HITCHCOCK. Mr. President, I move as a substitute for the bill presented by the Senator from Oklahoma [Mr. Owen] the bill as reported by myself on behalf of six members of the Committee on Banking and Currency, and I ask unanimous consent that the reading of the substitute may be omitted, but that it be published in the RECORD at this point.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and it is so ordered.

Mr. HITCHCOCK's proposed substitute for the substitute submitted by Mr. Owen, which was adopted as in Committee of the Whole, is as follows:

That the short title of this act shall be the "Federal reserve act."

The terms "national bank" and "national banking association" used in this act shall be held to be synonymous and interchangeable. The term "member bank" shall be held to mean any national bank. State bank, or trust company which has become a member of one of the reserve banks created by this act. The term "board" shall be held to mean Federal reserve board; the term "district" shall be held to mean Federal reserve district; the term "reserve bank" shall be held to mean Federal reserve bank.

FEDERAL RESERVE DISTRICTS.

Federal reserve bank.

FEDERAL RESERVE DISTRICTS.

SEC. 2. That the Federal reserve board, hereinafter provided for, shall, as soon as practicable after their appointment and confirmation, designate from among the reserve and central reserve cities now established a number of such cities to be termed Federal reserve cities, and shall divide the continental United States into districts, each district to embrace one of such Federal reserve cities: Provided, That the districts shall be formed with due regard to the convenience and customary course of financial and commercial business in each district, and need not necessarily coincide with State or county boundaries. The districts of them shall be designated by the name of the Federal reserve city located therein. The Federal reserve board shall, as soon as practicable after the said districts have been established, proceed to organize, conformable to the provisions of this act, in each Federal reserve city designated as aforesaid, a Federal reserve bank, which shall be known by the name of the city in which it is established, as, for example, "Federal reserve bank of Chicago," Four Federal reserve cities, and appurtenant to them four Federal reserve districts, and noner, shall in the first instance be designated and established as such by the Federal reserve board: Provided, That after Federal reserve banks have been organized and in operation for a period of two years in said four Federal reserve cities, the Federal reserve board any, in its discretion, from time to time, designate not to exced in all cight additional Federal reserve cities, with the requisite Federal reserve districts appurtenant thereto, and for that purpose may alter and change the limits and areas of existing Federal reserve bark of such district, a sun equal to 6 per cent of the Federal reserve bank of such district, as an equal to 6 per cent of the Federal reserve bank of such district, as an equal to 6 per cent of the Federal reserve bank of such district, as an equal to 6 per cent of the

STOCK ISSUES.

SEC. 3. The capital stock of each Federal reserve bank shall be divided into shares of \$100 each, and shall be without voting power. The Federal reserve board shall have power to prescribe regulations for the transfer of said stock. With the consent and approval of the board, reserve banks may establish such branch offices, within their respective districts, as they deem necessary to conform to the convenience and established course of business.

PEDERAL RESERVE BANKS.

Sec. 4. When the Federal reserve board has established Federal reserve districts as prescribed in section 2 of this act, the governor or vice governor of such board shall, under his hand and seal, execute a certificate designating the territorial limits of such districts and the Federal reserve city in each district, and shall file such certificate with the Secretary of the Treasury. When such certificate has been executed and filed as aforesaid, the board shall allot to each and every national bank stock in the reserve banks as prescribed in section 2 of this act, and when, conformable to section 2 of this act, and amount of srch stock has been subscribed for in any Federal reserve district equal to \$6,000,000, and one-third of such subscription has been paid in, the board shall, by its governor or vice governor, under his hand and seal, issue a certificate in writing specifying the name and location of the reserve bank in such district, the territorial limits of the district, the amount of the capital stock subscribed, and the amount paid in on such

subscription, and the name and amount of stock taken by each subscriber. Such certificate shall be acknowledged before the cierk of a court of record, or a notary public, and shall be filed with the Secretary of the Treasury.

Upon the filing of such certificate with the Secretary of the Treasury as aforesald, the said reserve bank so formed shall become a body corporate, and as such, and in the name designated in such organization certificate, shall have power—

First. To adopt and use a corporate seal.

Second. To have succession for a period of 20 years from its organization unless it is sooner dissolved by an act of Congress, or unless its franchise becomes forfeited by some violation of law.

Third. To make contracts.

Fourth. To sue and be sued, complain and defend, in any court of law and equity as fully as natural persons.

Fifth. To appoint by its board of directors, elected as hereinafter provided, such officers as are not otherwise provided for in this act, to define their duties, require bonds of them and fix the penalty thereof, to dismiss such officers or any of them as may be appointed by them at pleasure, and to appoint others to fill their places.

Sixth. To prescribe by its board of directors by-laws not inconsistent with law regulating the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed.

Seventh, To exercise by its board of directors, or duly authorized

mes such officers or any of them as may be appointed by them as the point of appoint of others to fall their places.

Eighth To prescribe by its board of directors by-laws not inconsistent with the provision of the privileges granted to it by law may be exercised and enjoyed.

Seventh To exercise by its board of directors, or duly authorized officers or agents, all powers as shall be necessary to carry on the business of banking within the limitations prescribed by this act.

No Federal reserve bank shall be more any banking business, except such as pertains to the perfection of its organization and management, until two-thirds of its stock subscribed for has been paid in as prescribed in the provision of the provision of the prescribed by the prescribed in the provision of the prescribed in the provision of the prescribed in the prescribed prescribed in the prescribed of the prescribed in the prescribed prescribed and appointed by the member banks as follows:

As soon as practicable after a reserve bank has been incorporated as above provided, the board shall notify the member banks in said Federal reserve district to elect four directors within a certain date to be named in the notification. Said board sing the vote of said member banks and forwarded, shall certify that they are the choice of the board of directors of said member banks, which certificate shall be signed by the officers of said bank and forwarded to the board within the time which said board shall limit. Said board shall cannot be signed by the officers of said member banks and forward a certificate of the result to each of said member banks. The candidate for director of the result to ach of said member banks and forward a certificate for the result to each of said member banks and forward a certificate of the result to each of said member banks and forward a certificate of the result to said board shall limit. Said board shall celected

INCREASE OF CAPITAL.

SEC. 5. That the capital stock in the reserve banks shall be maintained as nearly as practicable in an amount equal to 6 per cent of the capital and surplus of the member banks in said district, and the board is authorized from time to time to sell to the public such additional stock in any reserve bank as may be required to maintain this proportion. The price at which said stock shall be offered to the public shall be at its fair market value, but in no case below par. Any bank applying for membership in a reserve bank shall be required by the board to underwrite, at the price fixed by the board, such an amount of capital stock in said reserve bank equal to 6 per cent of the capital and surplus of such applying bank, as may be allotted to it by the board, and to purchased by the public, as provided for in this act.

When the capital stock of any reserve bank has been increased, the board shall certify the same to the Secretary of the Treasury.

Sec. 6 That in case the Federal reserve bard shall decide, after two years' operation of the reserve banks first established, that one or more additional banks herein authorized should be established it shall make the necessary change in lines of existing districts, designate the new reserve city or cities, and notify the member banks affected by such change to associate themselves with the new reserve bank or banks and

change the deposit of their reserves accordingly. Stockholders in previously established reserve banks affected by the change shall be invited to exchange a portion of their stock certificates as indicated by the reserve board, and for all stock so exchanged the reserve board shall direct the transfer to the new reserve bank or banks from the old reserve bank or banks of the corresponding amount of cash capital in gold.

If sufficient stock certificates are not thus exchanged the reserve board may offer to the general public at par stock in the newly created district or districts to an amount necessary to make up the difference.

As an inducement to make the exchange of stock the reserve board may direct that the stock of the old reserve bank or banks so exchanged shall be entitled to payment in cash of its share of the accumulated surplus.

may direct that the stort of the old reserve bank or banks so exchanged shall be entitled to payment in cash of the share of the accumulated surplus.

SEC, 7. That after the payment of all necessary expenses and taxes, necluding its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative. Net earnings over and above expenses and the aforeauld dividend shall be applied as follows: Twenty-five per cent of such net earnings to be carried to a surplus fund until such serve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such reserve bank, and 373 or eneme of the paid-in capital stock of such crucks and regulations made by the board. When, in the judgment of the board, there has been accumulated in such depositors of insolvent member banks under tules and regulations made by the power to suspend the setting aside-after such 374 per cent of such earnings shall be paid to the United States, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replenished by again setting aside such 374 per cent of the carnings of so much thereof as, in the judgment of the board, may be necessary. The remaining net earnings shall be paid to the United States; and board, the payment of the part of the setting shall be replenished by again setting aside such 374 per cent of the earnings or so much thereof as, in the judgment of the board, may be necessary. The remaining net earnings shall be applied to the purchase of other capital stock therei

STATE BANKS AS MEMBERS.

State banks as members.

Sec. 10. That from and after the passage of this act any bank or banking association or trust company incorporated by special law of any State, or organized under the general laws of any State or the United States, may make application to the Federal reserve board to become a member of the Federal reserve bank organized or to be organized within the Federal reserve basis organized or to be organized within the Federal reserve bank organized or to be organized within the Federal reserve bank organized or to be organized within the Federal reserve bank or the Federal reserve bank of the Applying bank to become a member of the Federal reserve bank of the distriction which such applying bank is located, in which case stock shall be allotted to it as provided in this act.

No such applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up naimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated, under the provisions of the national banking act, and it shall thereafter be required to make the same reports and be subject to the same examination and supervision as national banking associations and subject also to the reserve requirements of this act.

If at any time it shall appear to the Federal reserve board that a member bank has failed to comply with the provisions of this act or the regulations of the Federal reserve board it shall be within the power of the said board, after due hearing, to suspend or expel the said bank from membership. The Federal reserve board in the place where upon due proof of compliance with the conditions imposed by this act.

FEDERAL RESERVE BOARD.

SEC. 11. That the President of the United States shall appoint, by and with the advice and consent of the Senate, a Federal reserve board consisting of eight members, in addition to whom the Secretary of the Treasury shall be an ex officio member. Of the eight members appointed in the first instance, the President shall appoint one for a term of one year, one for a term of two years, one for a term of three years, one for a term of four years, one for a term of five years, one for a term of six years, one for a term of seven years, and one for a term of eight years. Not less than one nor more than three of said members shall be appointed from any one Federal reserve district. Appointments to fill vacancies in the board shall be for the unexpired term and may be made by the President when the Senate is not in session, which appointments shall expire at the end of the next session. In selecting members of the reserve board consideration shall be given to experience in commerce and banking. The eight members of the Federal reserve board thus appointed by the President shall devote their entire time to the work and duties of the board and shall not while in office be officers, directors, or employees of any bank or trust company, nor hold stock in any such institution, and they shall each receive a salary of \$12,000 per year, payable monthly out of the Treasury of the United States upon the order or warrant of the Secretary of the Treasury, one member of said board as governor thereof, and one member as vice governor thereof who shall act in place of the governor during his disability or absence. The governor shall be the active executive and presiding officer of the board. The Secretary of the Treasury bepartment Building, or the board. The Secretary of the Treasury bepartment Building, or the board shall be held as soon as may be, upon the call of the Secretary of the Treasury, at a time and place designated by him.

The Federal reserve board shall have power to levy semiannually upon the Federal reserve board sh

plus, an assessment sufficient to pay its estimated expenses and salaries for the half year succeeding the levying of such assessment, together with any deficiency carried forward from the preceding half year.

The Federal reserve board shall annually make a full report of its operations to the Congress.

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: "There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds and, under the general supervision of the Federal reserve board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency, and shall perform his duties under the general direction of the Secretary of the Treasury." Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and the bureaus under such department.

SEC. 12. That the Federal reserve board hereinbefore established shall be authorized and empowered—

(a) To examine at its discretion the accounts, books, and affairs of each Federal reserve bank and of each member bank and to require such statements and reports as it may deem necessary. The sald board shall publish once each week a statement showing the condition of each Federal reserve bank and a consolidated statement for all Federal reserve banks. Such statements shall show in detail the assets and liabilities of such Federal reserve banks, single and combined, and shall furnish full information regarding the amount and character of the money held as reserve and the amount, nature, and maturities of the paper and other investments owned or held by Federal reserve banks.

(b) To permit or require, in time of emergency, Federal reserve banks to rediscount rate of not more than 3 per cent in

FEDERAL ADVISORY COUNCIL.

FEDERAL ADVISORY COUNCIL.

Sec. 13. There is hereby created a Federal advisory council, which shall consist of as many members as there are Federal reserve districts. Each Federal reserve bank, by its board of directors, shall annually select from its own Federal reserve district one member of sald council, who shall receive such compensation and allowances as may be fixed by the board of directors, subject to the approval of the Federal reserve board. The meetings of said advisory council shall be held in Washington, D. C., at least four times each year, and oftener if called by the Federal reserve board. The council may select its own officers and adopt its own methods of procedure, and a majority of its members shall constitute a quorum for the transaction of business. Vacancies in the council shall be filled by the respective reserve banks, and members selected to fill vacancies shall serve for the unexpired term.

The Federal advisory council shall have power by Itself or through its officers (1) to meet and confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for complete information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold or securities by reserve banks, open-market operations by said banks, and the general affairs of the reserve banking system.

REDISCOUNTS.

REDISCOUNTS

Sec. 14. That any Federal reserve bank may receive from any member bank and from the United States deposits of current funds in lawful money, national-bank notes, Federal reserve notes, and checks and drafts upon solvent member banks of the Federal reserve system, paya-

ble upon presentation; and, solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, and checks and drafts upon solvent member or other Federal reserve banks, payable upon presentation. Reserve banks shall not pay interest on deposits.

Upon the indorsement of any member bank with a waiver of demand notice and protest any Federal reserve bank may discount notes, drafts, and bills of exchange religion out of actual commercial transactions; and bills of exchange issued or drawn for agricultural, industrial on the protect of the page of the proceeds of which have been used, or may be used, for such particultural, industrial or may be used, for such particultural, industrial or may be used. For such particultural, industrial or may be used, for such particultural, industrial or may be used. For such particultural, industrial or may be used for such particultural products; or other goods, wares, or merchandise from being eligible for such discount; but such include notes, drafts, or bills covering merely interest of the contraction of the purpose of carrying or trading in the definition shall not include notes, drafts, or bills covering merely interest of the government of the United States and Integrations and notes of the Government of the United States and Integration of discount of not more than 180 days; Provided, however, That not more than 180 days; Provided, however, That not more than 180 days; Provided, however, That not more than 50 per cent of the paper discounted for any member bank which are based on the exportation or importation of goods and which have a maturity exceeding 90 days and in no case shall any member bank have more than 8200,000 of rediscounts having a maturity which are based on the exportation or importation of goods and which have a maturity at time of discount of not more than six months and of acceptances based on domestic shipments of goods and which have a based on the exportation of importation of th

OPEN-MARKET OPERATIONS.

OF its capital stock without special authority by the board.

OPEN-MARKET OPERATIONS.

Sec. 15. Any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, either from or to domestic or foreign banks, firms, corporations, or individuals, prime bankers' bills, and bills of exchange of the kinds and maturities by this act made eligible for rediscount, and cable transfers.

Every Federal reserve bank shall have power (a) to deal in gold coin and bullion both at home and abroad, to make loans thereon, and to contract for loans of gold or bullion, giving therefor, when necessary, acceptable security, including the hypothecution of interest-bearing obligations of the United States; (b) to buy and sell interest-bearing obligations of the United States and of its dependencies when payment of principal and interest is guaranteed by the United States, and bonds or warrants of any State, county, or muncipality, or short-time interest-bearing obligations issued by foreign governments, with a maturity from date of purchase of not exceeding one year, such purchases to be made in accordance with rules and regulations prescribed by the Federal reserve board; (c) to purchase from a member bank and to sell, with or without its own indorsement, bills of exchange arising out of commercial transactions, as hereinbefore defined; (d) to establish publicly from time to time, subject to review and determination of the Federal reserve board, a rate of discount to be charged by such bank for each class of paper, which shall be fixed with a view of accommodating the commerce of the country and promoting stability in business; and (e) establish accounts with other reserve banks and with the consent of the Federal reserve board, to open and maintain banking accounts in foreign countries and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, letters of credit, and travelers chec

GOVERNMENT DEPOSITS.

Sec. 16. That all moneys now held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes, shall, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks shall act as fiscal agents of the United States; and thereafter the revenues of the Government shall be regularly deposited in such banks and disbursements shall be made by checks drawn against such deposits.

The Secretary of the Treasury shall, subject to the approval of the Federal reserve board, from time to time apportion the Government deposits among the said Federal reserve banks, in proportion to their capital stock as far as practicable: Provided, That for the purposes of collection and transfer only the Secretary of the Treasury may designate national banks as Government depositories.

NOTE ISSUES.

Federal reserve beard, from time to time apportion the Government deposits among the said referrir reserve banks, in proportion to their deposits among the said referrir reserve banks, and proportion to their deposits among the said referrir reserve banks.

Sec. 17. That Federal rever to fost, to be send under authority of the Federal reserve banks as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the Federal reserve banks as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the Pederal reserve banks as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the Pederal reserve bank may, upon yote of its directors, make applied the said of the United States, in the city of Washington, Any Federal reserve bank may, upon yote of its directors, make application to the local Federal reserve agent for such amount of the application shall be accompanied with a fender to the local Federal reserve agent of collateral security in amount equal to the sum of the Federal reserve notes thus applied for and issued question to such a proposed to the said for the fore and the said for the

national-bank notes or notes provided for by the act of May 30, 1908, and any distinctive paper that may be on hand at the time of the passage of this act may be used, in the discretion of the Secretary, for the purposes of this act; and should the appropriations heretofore made be insufficient to meet the requirements of this act, in addition to circulating notes provided for by existing law, the Secretary is hereby authorized to use so much as may be necessary of any funds in the Treasury not otherwise appropriated for the purpose of furnishing the notes aforesaid: Provided, however, That nothing in this section contained shall be construed as exempting national banks or Federal reserve banks from their liability to reliabilities the United States for any expenses incurred in printing and issuing circulating notes.

Every Federal reserve bank shall receive on deposit from member banks or from reserve banks checks and drafts drawn upon any of its depositors and, when remitted by a reserve bank or member bank upon funds to the credit of said depositor in said reserve bank or member bank. Nothing herein contained shall be construed as prohibiting a member bank from making reasonable charges for checks and drafts so debited to its account, or for collecting and remitting funds, or for exchange sold to its patrons. The Federal reserve banks from patrons whose checks are cleared through the reserve bank and the charge which may be imposed for the service of clearing or collection rendered by the Federal reserve bank. The Federal reserve board shall make and promulgate from time to time regulations governing the transfer of funds among Federal reserve banks and their branches.

SEC. 18. That so much of the provisions of section 5159 of the Revised Statutes of the United States and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes, as require that before any national banking association shall be authorized to commence banking business it

SEC, 19. That as soon after the organization of the reserve banks as practicable and under authority from the Federal reserve board each Federal reserve bank shall purchase at par and accrued interest 2 per cent bonds of the United States. The amount purchased by each reserve bank shall not be more than 50 per cent of its capital in any one year. The bonds so purchased may be held by such reserve bank and used for deposit with its reserve agent as security for the Federal reserve notes issued, or they may be exchanged at the Treasury for one-year Treasury gold notes bearing 3 per cent interest. In case of such exchange the reserve banks shall be bound at the option of the United States to renew year by year for 20 years the 3 per cent gold notes so issued. Said one-year 3 per cent United States gold notes may be used to deposit with the reserve agent as security for the United States reserve notes, or be freely purchased by reserve banks from time to time to employ idle funds, or sold to protect the gold supply.

from time to time to employ idle funds, or sold to protect the gold supply.

National banks which sell 2 per cent bonds to a reserve bank under this provision shall retire such portion of their outstanding national-bank notes as are secured by the bonds so sold. The Secretary of the Treasury is hereby directed to issue 3 per cent one-year gold Treasury notes year by year to exchange for 2 per cent bonds as above provided or to take the place of 3 per cent one-year gold notes that have been redeemed. During the period between the first and last purchases of bonds any national bank may continue to apply for and receive circulating notes based upon the deposit of 2 per cent bonds as now provided for by law. The one-year 3 per cent gold Treasury notes above provided for shall be exempt from Federal, State, and municipal taxation, both as to income and principal.

BANK RESERVES.

SEC. 20. That when a Federal reserve bank has been duly organized and established as provided in this act in any Federal reserve district every member bank of that district shall establish and maintain reserves as follows:

and established as provided in this act in any Federal reserve district every member bank of that district shall establish and maintain reserves as follows:

(a) A bank not in a reserve or central reserve city as now or hereafter defined shall hold and maintain reserves equal to 12 per cent of the aggregate amount of its net deposits, as follows:

In its vaults, four-twelfths thereof.

In the Federal reserve bank of its district, for a period of six months after said date, one-twelfth, and for each succeeding six months an additional one-twelfth, until four-twelfths have been so deposited, which shall be the amount permanently required.

After said period said reserves, other than those hereinbefore required to be held in the reserve bank, may be held in the vaults of the member bank or in the Federal reserve bank, or in both, at the option of the member bank.

(b) A bank in a reserve or a central reserve city, as now or hereafter defined, shall hold and maintain reserves equal to 15 per cent of the aggregate amount of its net deposits, as follows:

In its vaults, five-fifteenths thereof.

In the Federal reserve bank of its district, for a period of six months after the date aforesald, at least one-fifteenth, and for each succeeding six months an additional one-fifteenth, until six-fifteenths have been so deposited, which shall be the amount permanently required.

After said period all of said reserves, except those hereinbefore required to be held permanently in the Federal reserve bank, may be held in its own vaults or in the Federal reserve bank, or in both, at the option of the member bank.

If a State bank or trust company is required by the laws of its State to keep its reserves either in its own vaults or with another State bank or trust company, such reserve deposits so kept in such State bank or trust company is situate.

SEC 21. That so much of sections 2 and 3 of the act of June 20, 1874, entitled "An act fixing the amount of United Staes notes, providing for a redistribution of the national-bank cur

no case be counted by any national banking association as a part of its lawful reserve.

SEC 22. That every Federal reserve bank shall at all times have on hand in its own vaults, in gold, gold certificates, or lawful money, a sum equal to not less than 35 per cent of its net deposits, in addition to the reserve required against the Federal reserve notes emitted by such bank. The term "net deposits" wherever used in this act shall mean net deposits as from time to time defined by the Comptroller of the Currency, subject to the approval of the Federal reserve board. The Federal reserve board may notify any Federal reserve bank whose lawful reserve shall be below the amount required to be kept on hand to make good such reserve; and in the meantime may prohibit such Federal reserve bank from making additional loans or discounts: Provided, however, That the Federal reserve board may in case of emergency permit the reserve bank shall in such case pay a tax at the rate of 1 per cent per annum for every 2½ per cent or fraction thereof that the reserve falls below said 35 per cent, but in no case shall it be allowed to fall below 25 per cent of its net deposits: Provided further, That the amount of such tax paid by the bank during a fiscal year shall be charged to the member banks in the district in proportion to their average discounts during that year.

BANK EXAMINATIONS.

purther, That the amount of such tax paid by the bank during a fiscal year shall be charged to the member banks in the district in proportion to their average discounts during that year.

SEC. 23. That he examination of the affairs of every member bank shall take place at least twice in each calendar year and as much of turnish a full and complete knowledge of its condition. The Federal reserve board may authorize examinations by the State authorities to be accepted in the case of State banks and trust companies and may at any time direct the holding of a special examination. The person assigned to the making of such examination of the affairs of any member bank shall have power to call together a window of the character and circumstances of such of its loans or discounts as he may designate; and from and after the passage of this act all bank examiners and interest of the character and circumstances of such of its loans or discounts as he may designate; and from and after the passage of this act all bank examiners ball receive fixed salaries, the amount whereof shall be not less than \$2,000 nor more than \$7,000 per annum and be determined by the Federal reserve bard and annually reported to Congress. But the expense of the examinations herein provided for shall be assessed by authority of the Federal reserve board, arrange for special or periodical examination of the general reserve board, arrange for special or periodical examination of the member banks within its district. Such examination shale be conducted by the Comptroller of the Currency, every Federal reserve bank may, with the approval of the Federal reserve agent or of the Federal reserve board shall arrange for special or periodical examination of the member banks within its district. Such examination shale be conducted as to for the condition of its member banks and of the fines of credit which are being extended by them. Every Federal reserve bank shall at all times furnish to the Federal reserve board shall order a special examination and reserve

Sec. 26. That deposits in national banks, payable more than 30 days after they are made, shall be known as time deposits, and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same. All national banks not located in central reserve cities may make loans, secured by improved, occupied, and unencumbered farm land situated within the Federal reserve district where the loaning bank is located to the extent of one-half of its value, but no such loan shall be made for a longer period than five years, nor shall the aggregate of such loans by any bank exceed one-third of its time deposits.

After becoming member banks of any reserve bank, national banks are hereby authorized to act as administrators, executors, or trustees.

FOREIGN BRANCHES.

SEC. 28. That any Federal reserve bank or national banking association possessing a capital of \$5,000,000 or more may file application with the Federal reserve board, upon such conditions and under such circumstances as may be prescribed by the said board, for the purpose

of securing authority to establish branches in foreign countries or dependencies of the United States, and to act, if required to do so, as fiscal agents of the United States, and to act, if required to do so, as fiscal agents of the United States. Such applications shall specify, in addition to the name and capital of the banking association filing it, the place or places where the banking operations proposed are to be carried on and the amount of capital set aside by the said banking association filings such application for the conduct of its foreign countries. The Federal reserve board shall have power to approve or to reject such application if in its judgment the amount of capital proposed to be set aside for the conduct of foreign business is lnadequate or if for other reasons the granting of such application is deemed inexpedient.

Every national banking association which shall receive authority to establish branches in foreign countries shall be required at all times to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and the Federal reserve board may order special examinations of the said foreign branches at such time or times as it may deem best. Every Federal reserve bank and every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its home office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accruing at each such branch as a separate item.

SEC. 29. All provisions of this act are to that extent and to that extent only hereby repealed: Provided, That nothing in this act contained shall be construed to repeal the parity provision or provisions contained in an act approved March 14, 1900, entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes."

or coined by the United States, to retund the public debt, and for other purposes."

SEC. 29a. That the provisions of the act of May 30, 1908, authorizing national currency associations, the issue of additional national-bank circulation, and creating a National Monetary Commission, which expires by limitation under the terms of such act on the 30th day of June, 1914, are hereby extended to June 30, 1915.

SEC. 30. That the right to amend, alter, or repeal this act is hereby expressly reserved.

Mr. SMITH of Georgia. Mr. President, I desire to make the point of order that as the Owen bill has been offered as an amendment in the nature of a substitute for the House bill. I do not think the bill now submitted by the Senator from Nebraska as a substitute for that is in order.

The VICE PRESIDENT. Perhaps the Senator from Ne-

braska has not stated his request in exactly parliamentary language, but his motion is to insert his bill in lieu of the matter proposed to be inserted by the Senator from Oklahoma, and the Chair thinks it is in order.

Mr. HITCHCOCK. There can be no doubt of that, Mr. President, I have moved to substitute for the Owen bill as it has been amended the bill as reported by the section of the committee to which I belong, in order that the struggle of more than three months may be drawn to an orderly close by a final

When the record of that vote shall have been made we will have reached the point where I shall be compelled to part company with some Senators with whom for months I have been closely cooperating. Some of them will vote against the bill upon its final passage. I shall vote for it. I have never for a moment had any other purpose. My whole fight has been to strengthen and improve the bill and to prevent hasty action and blundering legislation. To attain any measure of success I found it necessary to go to extreme lengths and to make some

sacrifices. I feel fully justified by the result.

The bill as passed by the House and as introduced in the Senate by Senator Owen has been changed over 60 per cent in letter and nearly as much in spirit. Let me recite some of the more important changes that have been made.

The character and make-up of the Federal reserve board have been greatly improved, and it has been in part rescued from political subservience.

A gradual transfer of reserves from banks now holding them instead of a sudden transfer has been provided for, thus greatly reducing the shock to the business world.

An insurance of bank deposits has been secured for banks

joining the new system.

The equal treatment of member banks has been stipulated for. Six-month paper held by banks in agricultural regions has been removed from the blacklist and admitted to discount privileges in limited amounts.

Member banks have been authorized to make farm-mortgage loans for five years in limited amounts.

It has been provided that Federal reserve notes shall be redeemed at the Treasury in gold or gold certificates only.

The gold reserve of Federal reserve banks has been increased

from 33½ per cent to 40 per cent.

A tax on the deficiency in reserves held against deposits and against notes in Federal reserve banks has been provided for.

A reduction in the number of Federal reserve banks from

12 to 8 has been made possible. Mr. President, all these improvements have been contended for by the section of the Banking and Currency Committee of which I am a member. We have not in all cases been able to make these changes as complete as they should be. The Federal

reserve board should be larger and the term of its members longer. The transfer of reserves should be made even more gradual. The insurance of deposits in member banks should be made more certain. The equal treatment of banks should be guaranteed in more specific terms. Federal reserve notes should be made redeemable only in gold at the reserve banks as well as at the Treasury. The gold reserve against notes should be at least 45 per cent instead of 40 per cent. The number of Federal reserve banks should be yet further reduced. Some automatic restrictions against the inflation of bank credits and currency should be provided. I regret that we could not secure public ownership of the stock, Government control of the banks, and other improvements we struggled for, but we have cause to congratulate the country on what has been

I am glad the struggle is over. It has been long and it has resulted in a greatly improved bill. I have my misgivings, of course, as others have. The prospect in the United States is not altogether bright. There are clouds in the sky. There may be dangers ahead. I join others, however, in hoping that the clouds may be dissipated and the dangers passed, and that this legislation may contribute to this result.

I should like to have the yeas and nays on my amendment to the amendment, Mr. President.

The yeas and nays were ordered, and the Secretary proceeded

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts

[Mr. LODGE], I refrain from voting.

Mr. STERLING (when his name was called). I again transfer my pair with the senior Senator from Louisiana [Mr. THORNTON] to the Senator from New Mexico [Mr. FALL] and vote "yea.

The roll call was concluded.

Mr. WILLIAMS (after having voted in the negative). wish to ask whether the senior Senator from Pennsylvania [Mr.

The VICE PRESIDENT. The Chair is informed he has not. Mr. WILLIAMS. Then I must withdraw my vote, as I am paired with that Senator.

The result was announced-yeas 41, nays 44, as follows: YEAS-41.

Borah Bradley Brady Brandegee Bristow Burton Catron Clapp Colt Crawford Cummins	Dillingham du Pont Gallinger Goff Gronna Hitchcock Jackson Jones Kenyon La Follette Lippitt	McCumber McLean Nelson Norris Oliver Page Perkins Poindexter Root Sherman Smith, Mich. So Mr. HITCHCOCK's amendment to the amendment was rejected.

The VICE PRESIDENT. Are there further amendments?

Mr. OWEN. I ask for the adoption of the amendment offered by myself.

The VICE PRESIDENT. The question is, Will the Senate concur in the amendment made as in Committee of the Whole as amended?

Mr. OWEN. I ask for the yeas and nays.

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Are there further amendments to be proposed?

Mr. BRISTOW.

Mr. BRISTOW. I desire to address myself to the bill. Mr. GALLINGER. The question is, I suppose, on concurring

in the bill as amended.

The VICE PRESIDENT. The Chair is going to rule—and will explain the reasons for it if necessary—that the question

is, Will the Senate concur in the amendment made as in Committee of the Whole as amended?

Mr. BRISTOW. I desire to speak on the bill; not on that question.

Mr. WEEKS. Mr. President-

Mr. OWEN. I yield to the Senator from Massachusetts. Mr. WEEKS. What is the motion of the Senator from Oklahoma?

Mr. OWEN. The question is on concurring in the amendment offered by the Senator from Okahoma.

Mr. WEEKS. Mr. President, that being the case, I think I may well follow the example set by the Senator from Nebraska [Mr. HITCHCOCK] in briefly stating my position on this legislation.

Like him, I find it necessary to part company with some of those with whom I have been laboring on this question during the past three months and with many of my associates on this side of the aisle. I have contended from the time this question was taken up that it should be treated as a business measure, distinct and devoid of any political flavor, and I do not think that I ought to be diverted or thwarted from that course because of the pressure of the administration or the partisan course taken by the majority in the House and in the Senate.

I am not satisfied that this is the best bill that could have been prepared; but if all Democratic Senators had taken the independent and nonpartisan course which has been followed by the Senator from Nebraska, we would have had a bill which would have removed from the minds of those on this side of the Chamber any doubt as to what course they should take. If the bill is not as good as it should be, it is entirely because the administration and majority have attempted to hasten action unreasonably and have forced action at a caucus which has only represented a small majority of the majority, so that the bad features have been forced by a minority of the Senate.

There are a half a dozen provisions in this bill which make me hesitate about supporting it. I am fearful that they may bring results which all Senators and the country will greatly regret; and yet there is so much more good in the legislation than there is bad-if I might deal in percentages, I should say 75 per cent good and 25 per cent bad—there is so much more good in it than there is bad, that I feel it my duty to vote for the bill. I do this because I know perfectly well how difficult it is to bring about fundamental banking and currency legislation.

It is not a popular topic. Most men have not studied it and considered it carefully. We have made a distinct advance by the agitation that has been going on during recent years and during recent months. Having made that advance, I do not wish by my vote to take any step which will seem to lessen its results. I believe the good in this bill will show itself as soon as the law is put into operation, and I hope the bad in the bill may be minimized by the operation of the law and the good administration which may be given it.

Mr. BRISTOW. Mr. President, I regret that the Senator from Nebraska and the Senator from Massachusetts should be compelled to part company at this time. I do not intend to vote for this bill, because I believe it is fundamentally wrong. It creates a great, top-heavy organization apparently for the ac-complishment of one thing, and that is to provide an additional flexible currency. It does not retire the bond-secured circulation. It does not change the character of the currency which now exists.

If the purpose were to provide an emergency currency, a few simple amendments to the Aldrich-Vreeland bill would have accomplished that purpose; but the House started out to provide a substitute for the rigid and inflexible bond-secured currency which we now have, and the bill that came to us made such provisions, such as they were. Those provisions have been stricken out, and flexibility has been given by increasing the currency, but giving it no flexibility, so far as decreasing the rigidity was concerned.

I can not understand why so much pretense was necessary in order to accomplish such a small thing. The Committee on Banking and Currency of the Senate of the United States could have reported, after a week's deliberation, amendments to the Aldrich-Vreeland bill that would have met every requirement, so far as elasticity of the currency is concerned, without the tremendous effort that has been made.

What has been born of this effort? A number of regional banks to serve as reserve banks, that are owned by the banks, that are controlled by directors elected by the banks, and that are run for the profit of the banks.

There have been created from 8 to 12 central banks that are to operate in certain regions, and those central banks practically have been given a monopoly-in fact, they have been given a monopoly-of the reserves of the banks within those regions. The banks no longer have an opportunity of picking their own reserve agents. They must put their reserves in these regional banks, and the regional banks are given the power to determine whether or not there shall be rediscount

privileges extended to the member banks.

The member banks are given no legal rights. Their rights are subject to the decision of the board. If unfriendly influences should get control of the board, it has greater powers than any banking organization under present conditions possibly could have under any organization that could be now formed. So the alleged purpose of breaking what is known as the credit trust of the United States has not only failed, but no effort has been made to carry it out. So far as breaking up what is commonly called the Money Trust, this bill makes no effort to do it, although its authors at the time claimed that that was its purpose.

I shall not cast my vote for any bill that organizes, under the forms of law, banking trusts that can control credit and that will be more powerful than any control of credit that has been heretofore organized. As I said upon another occasion, this bill may become a benevolent monopoly, but there are seeds of evil sown in it which I think are dangerous. I believe

it will lead to inflation.

It has been said—and the statement has been criticized—that it will not only inflate, but that it will also contract. The first influence will be a contraction; the second influence, to follow the contraction, will be, in my opinion, inflation. I predict—and it is dangerous to predict, I know—that this bill will be amended time and again before it has been in operation a year, in order to save the country from calamity and misfortune.

Personally, I am in favor of a central bank of the United States, the stock of which shall be owned by the people of the United States in small subscriptions, and the management of which shall be by a board of directors who are Government officials. The business of such a bank would be to receive the reserves and rediscount the notes of every independent banking institution in the United States; and every bank, great or small, whether its capital be \$25,000 or \$25,000,000, would have an equal proportionate right to discounts and favors.

I believe there are more possibilities for evil in the bill than for good and that the small good that has been undertaken to be accomplished is very greatly overbalanced by the evils that are made possible. Believing that, I shall cast my vote against

the bill.

Mr. KERN. Mr. President, I move that the order heretofore made by resolution as to taking a recess at 6 o'clock be vacated, and that we do not take a recess at 6 o'clock. I should like unanimous consent to that arrangement, but I understand it can not be had.

Mr. LA FOLLETTE. Mr. President, a unanimous-consent

agreement can not be changed by a motion.

Mr. KERN. This is not a unanimous-consent agreement. The hour of 6 o'clock was fixed by motion as the time for taking a recess.

Mr. LA FOLLETTE. I suggest, Mr. President, that a unanimous-consent agreement can not be changed by a motion.

The VICE PRESIDENT. That is true; but there is not any unanimous-consent agreement on the subject of a recess to-day.

Mr. SHIVELY. It was fixed by a vote.

The VICE PRESIDENT. The question is on the motion of the Senator from Indiana that the order heretofore entered, that the Senate take a recess from 6 to 8 p. m., be vacated.

Mr. LA FOLLETTE. Is that a request for unanimous onsent?

Mr. ROOT. No; it is not.

The VICE PRESIDENT. It is a motion.

The motion was agreed to.

Mr. GALLINGER. Mr. President, I fear that the iridescent dream of the Senator from Oklahoma as to the results of the "New Freedom" legislative program is destined to a rude awakening. Time will tell.

Having taken practically no part in the discussion thus far, I beg the indulgence of the Senate for a few minutes before

the final vote is taken.

I am not one of those who, in season and out of season, have denounced our currency system as the worst in the world. On the contrary, I have believed and still believe that the national bank act was a piece of wise legislation which, as a general rule, has well served the people of the country. At the same time, I have believed that the existing currency system is susceptible of improvement, and I have been ready to cooperate with others in accomplishing that result.

In that view I had hoped that the proposed legislation would be simple, easily understood, and directly calculated to correct

any defects that now exist in our banking and currency laws. For the purpose of enlightenment, I have carefully followed the discussion, which discussion has developed a wide and irreconcilable difference of opinion among Senators as to the workability of the plan, the only point on which there seems to be complete unanimity being found in the frequent admission that the legislation is "experimental."

That the bill contains a provision that will inflate the currency, possibly to the extent of real danger, has not been denied, but on the other hand has been frankly admitted. For one, I am against currency inflation, and do not propose to cast a vote that will put me in opposition to the well-established monetary policy of the Republican Party. That party, aided by sound-money Democrats, carried to a successful issue the battle for sound money and the gold standard, and I am against weakening in any way our legislation on that subject.

There are other objectionable features in the bill which the limited time at my disposal will not admit of my discussing. I agree with the Senator from Kansas that, had an amendment similar to the one that was inserted in the bill last evening, which liberalizes the provisions of the so-called Aldrich-Vreeland law, been made to that statute, as the junior Senator from Minnesota and I advocated some time ago, this elaborate, complicated, and experimental piece of legislation would have been unnecessary. What the country has long been demanding is greater elasticity of our currency, and that could have been accomplished by a simple amendment to the Aldrich-Vreeland law.

I am also clearly of opinion that if legislation, such as is contemplated in the bill now under consideration, should at any time be deemed essential, one great central bank with branches should be provided for instead of a multiplicity of banks with complicated machinery and widely distributed powers. I am also fully persuaded that the Federal reserve banks provided for in this bill should be under the jurisdiction of the General Government, and that subscription to the stock should be first

offered to the public.

Mr. President, the recent tariff legislation of the Democratic Party was loudly heralded as a panacea for all the ills of the body politic present and prospective. It would, so we were told, give added employment to American artisans and workingmen, reduce the high cost of living, and make everybody happy. While I know it grates harshly on Democratic ears, I can not refrain from suggesting that instead of producing the promised result tens of thousands of workingmen are out of employment to-day, the cost of living has increased, bread lines are being formed in some of the great cities of the country, and in lieu of prosperity and happiness discontent, unhappiness, and despair are rapidly taking possession of the public mind.

It is now contended that the pending legislation will relieve the existing industrial disturbance and restore to work the men who have recently lost employment in consequence of a lack of orders on the part of manufacturers. I sincerely wish that that result might follow, but my judgment is that this prediction, like those so confidently made during the discussion of the tariff bill, will fail of fulfillment, and that permanent relief will only come through another revision of the tariff along the lines of adequate protection to the industries and labor of the

United States.

This bill will doubtless pass, for good or for bad. I would gladly vote for it if I believed it was, in its present form, wise and salutary legislation; but believing otherwise, I feel constrained to vote against it.

Mr. NEWLANDS. Mr. President, I regard this bill as a great improvement upon the existing system. In some respects I regard it as inferior to the bill that passed the House. In other

respects I believe that it is superior to that bill.

I hope this bill will be still further perfected in conference. The opportunity is afforded for such improvement, for our legislative action has resulted practically in disagreement between the two Houses upon the entire bill, so that all the different provisions of these bills will be before the conferees.

I hope before this bill emerges from conference it will be amended in the following particulars: I trust that all limitation as to the enlargement of the number of reserve banks will be stricken out, so that by a gradual process of evolution we shall finally bring about a system that will enable the establishment of a reserve bank in every State, of which the State and National banks of that State shall be members.

I also hope that it will be amended in such a way as to establish at Washington a Federal reservoir, supplementing the regional reservoirs provided for by this act, so that the reserve board in control of that reservoir can act directly in aid of any regional reserve bank without calling upon one reserve bank to aid another.

Mr. SMOOT. Mr. President-

Mr. NEWLANDS. I prefer not to be interrupted. I wish to

conclude my remarks.

I also hope that the bill will be amended in such a way as to provide that the national-bank notes will be gradually retired, somewhat as provided in the House bill. An extraordinary inflation of basic money has taken place within the last 20 years. Every civilized government ought to avail itself of the opportunity to retire its uncovered paper money, which has been issued in the past simply because of a deficiency of basic money. The national-bank notes belong to the past system of contraction and of false monetary methods, and should be retired as rapidly as they can be without producing contraction.

The enormous increase in the basic money of the world of which this country supplies so large a part can be availed of in gradually covering these bank notes by basic money, or in

gradually retiring the notes themselves.

I also hope that the conferees will so amend this section as to provide that the reserve notes shall not be held as reserves of the bank. It is opposed to all the correct principles of banking that a mere promise to pay money shall constitute a part of the cash reserves of a bank. Hitherto bank notes have not constituted a part of the reserves of national banks. The State banks, however, have been in the habit of using national-bank notes as a part of their reserves. I would be glad to see that vicious system gradually abandoned, and I trust that it will not be enlarged by this bill by permitting the national banks themselves to hold mere promises to pay basic money as a part of their cash reserves.

I admit that time will be necessary in order to accomplish the retirement of the national-bank notes. I admit that time will be required in order to bring the State banks up to the requirements of this legislation regarding their reserves. I believe that time should be given in this bill, and the reserve board should be authorized to extend that permission from time to time so that the efforts of the State banks to secure the reserves required by his law will not necessitate a contraction of their bank

I hope to see a return to correct principles accomplished without any contraction whatever, either of the money of the country or of the bank credits, and to have this accomplished in such a moderate and gradual way as to result in no contraction either of money or of credit, but on the other hand to result in a moderate expansion of the money of the country proportioned

to its increase in population and wealth.

I also hope that the requirements of this bill regarding the reserves to be held against these reserve notes will be made of such a character that the notes will be out simply as emergency notes. The country and the world to-day is suffering from an inflation of basic money, the most extraordinary infla-tion that has taken place in the history of the world, and that basic money has been made the base of an enormous increase of banking credits throughout the world. The result has been a great increase in prices, of which we all complain, which has been a disturbing element in our industrial and economic life. We can never stop that increase in prices unless we conclude in some way to limit this vast inflation of money; and the way to do it now is not to create new units, new promises to pay, in order to meet emergencies, without also putting in the bill provisions for the retirement of those units of money when the emergency is over.

I do not believe that this bill is securely guarded in that While I favor the issue of these reserve notes in particular. order to meet the emergency of a bank panic or a monetary stringency, local or nation-wide, I object to the lax provisions of this bill, which will not force the immediate retirement of those notes after the emergency is over, such lax provisions as permit this emergency money to remain in circulation for the purposes of inflation and for further expansion in prices.

Mr. President, the conferees have the opportunity of making this bill perfect in every particular. I trust that they will avail

themselves of the opportunity.

Mr. SMOOT. Mr. President, I am amazed at the last statement of the Senator from Nevada [Mr. NEWLANDS]. I have heard a similar statement made upon the floor of the Senate once or twice before during this discussion. Does the Senator from Nevada mean to convey the idea that after the bill has passed the Senate, the conferees can make a complete new bill, insert provisions that have never been offered in the House and have never been considered in the Senate, and make a bill in conformity with their ideas of legislation? Mr. President, if such a thing can be done, it seems to me that we have wasted months of time in considering the bill in this body.

Mr. NEWLANDS. Will the Senator allow me to interrupt

him there?

Mr. SMOOT. The Senator refused to allow me to interrupt him, but I graciously allow the Senator to interrupt me.

Mr. NEWLANDS. I am greatly indebted to the Senator. The Senator made a statement which is not justified by the facts, and I desire to correct him. The Senate and the House are in disagreement as to these bills. First, they are in disagreement as to the number of regional banks. I wish them to come to an agreement with reference to the number of those banks in harmony with my contention, and I have a right to ask that. Second-

Mr. SMOOT. Right in answer to that question—
Mr. NEWLANDS. Second, if the Senator will allow me-Mr. SMOOT. The House provided for 12 regional banks and the Senate for not less than 8 nor more than 12. The conferees have no power or right to change the number of regional banks to a number different from those of the House bill or the Senate bill.

Mr. NEWLANDS. The House bill provided for not less than 12, which may mean 48, and which, I hope, will be 48—one in each State. The House bill also provides for the retirement of the national-bank notes. Certainly the conferees can agree

Mr. SMOOT. Mr. President, I yielded for a question. I do not want the Senator to take me off the floor now by another 15-minute speech.

Mr. NEWLANDS. If the Senator will permit me, I will show him that all the matters I have referred to are in disagreement and the conferees will be called upon to act in regard to them.

Mr. SMOOT. I do not want to be shown by the Senator. Mr. NEWLANDS. It will take me only three seconds to state the subject to which I have referred or that will be in disagree-

ment between the two Houses.

Mr. SMOOT. The very last words the Senator spoke before taking his seat were that the conferees had the chance now to make this a perfect bill, and he suggested a number of changes that do not appear in either the House bill or the Senate amendments, and only——
Mr. NEWLANDS. Does the Senator object to making it a

perfect bill?

Mr. SMOOT. I object to the conferees amending the bill outside of what has been considered in the House and Senate. That is what I object to. I do not want to refuse the Senator further time, but he has spoken to-day four times-in all, one

It seems to me that all the burden of his remarks has been a criticism of this bill. Every time he has offered an amendment all of his remarks have been such as would convince any Senator that he does not believe in the provisions of the bill. A Senator with such an elastic political conscience as the Senator from Nevada should not have such a profound knowledge of the evils of party measures.

Mr. President, I rose to emphasize this one thought, that the

conferees of the House and the Senate can not deal with any question that is not found in the House bill or the bill as it

passes the Senate.

I am beginning to believe there is something in the following, and changes are to be made in the bill in conference: A banker friend of mine called on me about three weeks ago and asked me if I would offer an amendment to the bill, and suggested the amendment. I gladly consented to offer the amendment, but about four or five days ago the same gentleman came to me and said, "I do not want you to offer the amendment now; I have made arrangements to have it put in the bill in conference."

I want Senators, when the conference report is made-is submitted to the Senate-to keep this in mind and examine it carefully, and I ask Senators not to approve of a conference report if changes are made in the bill the substance of which is not in the House bill or in the Senate amendment, or, as the Senator from Mississippi [Mr. WILLIAMS] suggests to me, about which there has not been a difference between the Senate and the House.

Mr. President, this bill does not express the judgment of a majority of the Senators. I believe that the majority of this body believe in a central bank, and I wish that the Republican members of the committee had reported to the Senate a bill creating a central bank, "the bank of America," controlled by the Government, the stock of which should be subscribed by the people of this country, with a capital of \$100,000,000, and with authority to rediscount paper in any part of this country at any time for any amount on all classes of notes and obliga-tions that are ordinarily used in the course of business.

If that had been the case, Mr. President, the currency question would have been solved for the next hundred years in this country. This bill, I believe, is but temporary. There are provi-

sions in the bill that I can not approve of. There are other provisions in the bill that I would like to support, but, Mr. President, I can not vote for the bill in its present form. I would not be doing justice to my conscience or to my judgment if I did. I hope the result of the passage of the bill will be all that its friends anticipate for it. I think, Mr. President, that the result will be an inflation of our currency. That may afford the result will be an inflation of our currency. That may afford temporary relief, and tide over our present business depression, but it can only be temporary. I am afraid that it will fail to accomplish in the end what it is contemplated to accomplish.

Mr. President, I agree with a number of the other Senators, who have already stated that all that was necessary to create an elastic currency was to amend the Vreeland-Aldrich bill, reduce the penalties of that measure, and put it into a shape so that the business interests of the country could avail themselves of it in time of stress. Then, we would have had a banking system in this country that would have been far better than this bill will provide. I am quite sure that it would accomplish all that this bill can accomplish, and would have avoided all of the errors that we find in this bill.

I wish that I could vote for the bill, but I can not. I shall

cast my vote against the bill.

Mr. BRANDEGEE. Mr. President, I should feel better than I do if I was as satisfied as the Senator from Utah [Mr. SMOOT] appears to be that this bill when it shall have been

passed would be but temporary.

Mr. President, this country is entitled to the best system of banking and currency that can be made for it. What is now being imposed upon the country is an experiment. The great commercial nations of the world have demonstrated that a central bank with branches is a success as a banking system. I believe in that kind of a system. I know it has succeeded elsewhere under the greatest strain. The present bill proposes, as the Senator from Kansas [Mr. Bristow] has said, a complicated, top-heavy, widespread, loosely joined structure, framed entirely without any previous experience as a guide, and it is proposed to impose it upon the country, which, as other Senators have said, could easily have gotten along for a few years with a very few simple amendments to the existing sys-

tem under which we have prospered so long.

The chief objection I have to the bill is that, instead of providing the best banking and currency system for the country, it gives us what I consider to be about the third best, and a complicated system, inaugurated with a large number of officials, who, after the trouble it will take to get this system established in the country and then get business accustomed to

it, will not be easily disposed of.

Mr. President, believing that this is the wrong system for this country, knowing it to be an experimental one, believing that its adoption will make it more difficult to get the best, which is what this country is entitled to, I shall, without the slightest hesitation, cast my vote against this measure.

The VICE PRESIDENT. The question is, Will the Senate

concur in the amendment made as in Committee of the Whole

as amended?

Mr. LA FOLLETTE. I suppose, Mr. President, amendments

are in order?
The VICE PRESIDENT. Amendments are in order. Under the peculiar condition of this bill the Chair has been compelled to rule that, when once in the Senate and the amendment is concurred in, no further amendments will be in order. amendments are now in order.

Mr. LA FOLLETTE. Mr. President, on page 13, after line 3, I propose to insert as an amendment a separate paragraph. I will say that I am using the print of December 18, which I suppose is the print which the Secretary has at the desk. propose to insert the following:

No United States Senator and no Member of Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer, director, or stockholder of any member bank.

The VICE PRESIDENT. The amendment proposed by the Senator from Wisconsin will be stated.

The Secretary. On page 13, at the end of line 3, it is proposed to insert as a separate paragraph:

No United States Senator and no Member of Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer, director, or stockholder of any member bank.

[Mr. LA FOLLETTE addressed the Senate. See Appendix.]

Mr. CLARKE of Arkansas. Mr. President, I do not feel myself at liberty at this time to support that amendment, but if the Senator would strike out the words "or stockholder" I would most unhesitatingly advise the chairman of the Committee on Banking and Currency to accept it. I think it states a sound principle and one that ought to be recognized, but I do

not believe we ought to preclude persons from the right to in-

vest in any legitimate enterprise.

Mr. GALLINGER. Mr. President, I rose for the purpose of asking the Senator from Wisconsin if he feels clear in his mind that the words "or stockholder" should be in his amendment? The principle the Senator enunciates, in a general way, is undoubtedly sound, but it occurs to me that that perhaps is going a little too far.

Mr. LA FOLLETTE. Mr. President, I appreciate that that portion of the amendment may strike Members of the Senate as pressing the matter to the limit, and yet on principle it should be a part of the amendment. I appreciate, however, the fact that there might be many stockholders who, on small holdings, might serve in such an official capacity without detriment to the public interest.

I am inclined to accept the suggestion of the Senator from New Hampshire and the Senator from Arkansas, and withdraw the words "or stockholder" from the amendment as I have

offered it.

The VICE PRESIDENT. Now let the amendment be stated. The Secretary. On page 13, after line 3, it is proposed to

No United States Senator and no Member of Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer or director of any member bank.

Mr. GALLINGER. I suggest to the Senator from Wisconsin that we are all Members of Congress, and that the term "United States Senator or Member of Congress" should be "or Representative in Congress.

Mr. LA FOLLETTE. I think that is right, too.
Mr. PENROSE. "No Senator or Representative in Congress."
Mr. LA FOLLETTE. I accept that suggestion.
Mr. TOWNSEND. May I ask the Senator from Wisconsin if, under that provision, a Senator or Representative who might wish to go on this board, or whom it was desired to put on the board, could not resign and then go on it? As I understand the Constitution, it would not be possible now to appoint a Member of the Senate or of the House to a place on this board, and the only way he could go on the board would be to resign. One part of the amendment says that no Member of Congress shall be a member of this board. Of course, he could not be, under present conditions.

Mr. LA FOLLETTE. I never knew any Member of the Sen-

ate or House to resign.

Mr. TOWNSEND. Does the Senator from Wisconsin maintain that without his amendment a Member of Congress could be appointed to this Federal board and still retain his seat in Congress?

Mr. LA FOLLETTE. I think he might.
Mr. BURTON. The constitutional provision seems to be

clear in regard to that.

Mr. BRYAN. Mr. President, I suggest that clause 2 of section 6 of Article I of the Constitution makes it impossible for any Member of Congress to be appointed upon the Federal reserve board during the term for which he was elected to office. I will read it:

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a Member of either House during his continuance in office.

Mr. THOMAS. I should like to inquire whether he might not be elected a director of one of the Federal reserve banks by the stockholders of the member bank?

Mr. LA FOLLETTE. Yes.

Mr. BRYAN. Oh, he could hold stock, but he could not hold

Mr. THOMAS. That would not be a civil office under the United States.

Mr. LA FOLLETTE. I think that is true; and in order to provide against every possible contingency I think we might very safely adopt this provision.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Montana?

Mr. LA FOLLETTE. I do.

Mr. WALSH. It is quite obvious, as a matter of course, that no Member of the present Congress would be eligible to any of these offices. The amendment offered by the Senator from Wisconsin goes further than that, however.

Mr. LA FOLLETTE. Yes. Mr. WALSH. It excludes from appointment to any of these

places any Member of any subsequent Congress.

Mr. BRYAN. Mr. President—

The VICE PRESIDENT. Does the Senator from Wisconsin further yield to the Senator from Florida?

Mr. LA FOLLETTE. I do. Mr. BRYAN. I wish to ask the Senator from Wisconsin whether he has examined the statute that is on the books now, against Members of Congress being employed upon any board, and prohibiting them from practicing before it? Is not the statute we now have broad enough to cover that?

Mr. LA FOLLETTE. I do not believe it is. Mr. BRYAN. Has the Senator examined it?

Mr. LA FOLLETTE. I have looked at it, and I do not think it covers the proposition I have aimed to cover in this amendment. I submit that no harm can possibly come from

the adoption of this amendment.

Mr. WILLIAMS. The word "Senator" ought to be stricken out, because a Senator is a Member of Congress

Mr. LA FOLLETTE. I have made that amendment.

Mr. CLARKE of Arkansas. Mr. President, I am entirely in accord with the principle stated in this amendment, and I should be very glad to see it made part of the bill. In frankness, however, I must say that I am not at liberty to vote for everything I favor. [Laughter.] I am proceeding at this time under a certain self-imposed limitation, which will make it necessary for me to postpone to a more opportune time the accomplishment of all the purposes I have in view. Senator from Oklahoma, as chairman of the Committee on Banking and Currency, chooses to accept what, it seems to me, would be an obvious improvement in the bill, I shall have to keep faith with the brethren by voting against it at this time.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment adopted as in Committee of the

I ask that the amendment be reported. The VICE PRESIDENT. The Secretary will state it.

Mr. PENROSE. Let us have the amendment read. The VICE PRESIDENT. The Secretary will read the amendment as it is now proposed.

The SECRETARY. On page 13, after line 3, it is proposed to

No Senator or Representative in Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer or director of any member bank.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. LA FOLLETTE. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to add, after the amendment just agreed to, the following:

No member of the Federal reserve board, and no director of a Federal reserve bank, and no officer or director of any member bank shall be an officer, director, or stockholder of any other bank, trust company, or insurance company.

[Mr. LA FOLLETTE addressed the Senate. See Appendix.]

The VICE PRESIDENT. The 15 minutes have expired. The question is on the amendment proposed by the Senator from Wisconsin to the amendment.

Mr. GALLINGER. Let it be read, Mr. President.
The Secretary. After the amendment lately agreed to, insert the following words:

No member of the Federal reserve board, and no director of a Federal reserve bank, and no officer or director of any member bank shall be an officer, director, or stockholder of any other bank, trust company, or insurance company.

Mr. OWEN. Mr. President, this bill was drafted on the theory that there was to be an association of the banks of the country, a concentration of all their reserves, under the safeguard and supervision of the power of the United States. In the framing of the bill the Federal reserve board was made to consist exclusively of members appointed by the President of the United States, to be confirmed by the Senate of the United States.

We have a just right to assume that the President will make these selections with great care, with the most careful scrutiny, and that the Senate of the United States will not confirm men who can not be relied upon faithfully and honestly to administer the great trust reposed in them. They have very large powersthe power of summary removal of any officer, of any director, of any employee, of any of these reserve banks. They have the power to name three of the directors of each of these Federal reserve banks. The have the power to name the chairman of the board and the deputy chairman of the board. The chairman of the board will be the Federal reserve agent in charge of the Federal reserve notes, and those notes can not be emitted except through his hands and with his approval.

I have great sympathy with the effort to control those who now exercise the right as private individuals or of their power | ment of the Senator from Wisconsin [Mr. LA FOLLETTE].

as private individuals over the credits of the country. I believe that the report of the Pujo committee was one of the most valuable contributions that we have ever had in the history of this country looking toward a restoration of the rights of the great mass of our people. I am in favor of controlling these interlocking directorates.

This particular provision, offered at this late hour, in this way, contains something that is of value. It contains also provisions that are not of value in this bill. If the provision as the Senator has drawn it should be adopted, it would prevent the member banks from electing members who are officers of their own banks or directors of their own banks as directors of these banks.

Mr. WILLIAMS. Or stockholders. Mr. OWEN. Or stockholders, perhaps.

Now, there are a good many very small banks where a man will be a director in two or three of these little banks. It is a negligible matter. He would be of no more importance than one having stock in a number of grocery stores. They are little banks of \$10,000 here and there and yonder.

The thing which we really want to reach in controlling the interlocking directorates are the big concerns, involving many millions of dollars, where the power is so gigantic that, as the Senator has pointed out, it reaches from one city to another all over the Union, and it is anticipated that that will be done in controlling the question of trusts in this country.

I think the amendment which the Senator has proposed could be modified so as to reach the evil that might be in this bill and be germane to it, but I think it has been drawn too drastically. I should like to have it read again.

The VICE PRESIDENT. The amendment will be again read. The Secretary. It is proposed to insert the following:

No member of the Federal reserve board and no director of a Federal reserve bank and no officer or director of any member bank shall be an officer, director, or stockholder of any other bank, trust company, or insurance company.

Mr. OWEN. I think in drawing the amendment it has been made so drastic as to do some injustice that is not really necessary to be done in order to meet the evil which the Senator has in mind. I should like very much if the Senator would try to amend it so that it would not be objectionable in these minor particulars; but as it is I think it would interfere with the bill as it stands drawn, which contemplates permitting the member banks to choose their representatives.

Mr. BORAH. Mr. President, I am going to move to strike out from the amendment as it stands at this time the words "or insurance company" and then insert, between "bank" and "trust," in the last line, the word "or."

The VICE PRESIDENT. The Senator from Idaho moves to

amend the amendment proposed by the Senator from Wisconsin. The amendment to the amendment will be stated.

The Secretary. Strike out, at the end of the proposed amendment, the words "or insurance company," and before the words "trust company" insert the word "or," so as to read:

No member of the Federal reserve board and no director of a Federal reserve board and no officer or director or any member banks shall be an officer, director, or stockholder of any other bank or trust company.

Mr. LA FOLLETTE. Mr. President, upon that amendment I should like to be heard.

The VICE PRESIDENT. It is a new amendment.

[Mr. LA FOLLETTE addressed the Senate. See Appendix.]

Mr. OWEN. Mr. President, I want the attention of the Senator from Wisconsin to these words in the bill:

No member of the Federal reserve board shall be an officer or director of any bank, banking institution, trust company, or Federal reserve bank nor hold stock in any bank, banking institution, or trust company.

So far the Senator has included that also in his proposition. Mr. LA FOLLETTE. I have. Mr. OWEN. On page 13, in lines 4 and 5, we have provided,

as to six of these directors of Federal banks, that-

No director of class D or of class C shall be an officer, director, employee, or stockholder of any bank.

"A bank," under the interpretation, means a bank or trust company. The Senator has embraced a number of other things in his proposal, which I think would be injurious to the bill in so far as the banks are concerned which we are inviting to come in. We have made this bill about as drastic as we can make it and get their adherence. If we go too far, we may be put in an attitude where they will not come into the organization proposed. In that event we will be left exactly where we started. For that reason I am not able to accept the amend-

ment proposed by the Senator from Wisconsin.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Idaho [Mr. Borah] to the amend-

Mr. GALLINGER. I ask for the yeas and nays on the amend-

ment to the amendment.

Mr. LA FOLLETTE. I ask the Senator from Idaho to withdraw his amendment, and let me have a vote directly on the amendment as I offered it, if he will, after he has submitted whatever observations he has to submit.

Mr. BORAH. I withdraw the amendment to the amendment. Mr. LA FOLLETTE. I ask for the yeas and nays on the

amendment as I presented it.

Mr. CHILTON. I ask that the amendment be stated.

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. It is proposed to add, after the amendment last agreed to, the following words:

No member of the Federal reserve board and no director of a Federal reserve bank and no officer or director of any member bank shall be an officer, or stockholder of any other bank, trust company, or insurance company.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Wisconsin [Mr. La Follette], which has just been stated, on which he asks for the yeas and

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. COLT (when his name was called). I have a pair with the junior Senator from Delaware [Mr. SAULSBURY] and there-

fore withhold my vote,
Mr. SMITH of Georgia (when his name was called). On account of my pair with the senior Senator from Massachusetts [Mr. Lodge] I am not at liberty to vote. If I were at liberty to

vote, I should vote "nay."

Mr. STERLING (when his name was called). I transfer my pair with the senior Senator from Louisiana [Mr. THORNTON] to the Senator from New Mexico [Mr. FALL] and vote. I vote

"yea."
The roll call was concluded.

Mr. FLETCHER. I have a pair with the Senator from Wyo-

ming [Mr. Warren], and in his absence I withhold my vote.

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. Culberson]. I transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote

Mr. SMITH of Georgia. I transfer my pair with the Senator from Massachusetts [Mr. Lodge] to the senior Senator from Colorado [Mr. Thomas] and vote. I vote "nay."

The result was announced-yeas 30, nays 51, as follows:

	YE	AS-30.	
Borah Bradley Brady Brandegee Bristow Clapp Crawford Cummins	du Pont Gallinger Gronna Hitchcock Jones Kenyon La Follette Lane	McCumber McLean Nelson Norris Penrose Perkins Poindexter Root	Sherman Smith, Mich. Sterling Sutherland Townsend Works

So Mr. LA FOLLETTE's amendment to the amendment was re-

lected.

The VICE PRESIDENT. The question is, Will the Senate concur in the amendment made as in Committee of the Whole as amended in the Senate?

The amendment made as in Committee of the Whole as

amended in the Senate was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The question is, Shall the bill

Mr. OWEN. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). have a general pair with the senior Senator from Missouri [Mr. Stone], who is ill and unable to attend the sessions of the

Senate. I therefore withhold my vote. If I were at-liberty to vote, I should vote "nay."

Mr. SHEPPARD (when Mr. Culberson's name was called). The senior Senator from Texas [Mr. Culberson] is necessarily absent. He has a general pair with the Senator from Delaware [Mr. DU PONT]. If present, the senior Senator from Texas would vote "yea."

Mr. DU PONT (when his name was called). I have a general

pair with the senior Senator from Texas [Mr. Culberson]. transfer that pair to the junior Senator from Maine [Mr. Bur-LEIGH]. I am authorized to state that, if the Senator from Maine were present, he would vote against the bill. I vote "nay."

Mr. SMITH of Georgia (when his name was called). general pair with the senior Senator from Massachusetts If I were at liberty to vote, I should vote "yea."

Mr. STERLING (when his name was called). The senior Senator from Louisiana [Mr. THORNTON], with whom I have a pair, I know would, if present, vote "yea," and therefore I feel at liberty to vote. I vote "yea."

Mr. REED (when Mr. STONE's name was called). My col-

league [Mr. STONE] is compelled to remain away from the Senate on account of illness. He is paired with the Senator from Wyoming [Mr. Clark]. If he were present, my colleague would vote "yea.

Mr. RANSDELL (when Mr. Thornton's name was called). The senior Senator from Louisiana [Mr. Thornton] is unavoidably absent. If present, he would vote "yea."

The roll call was concluded.

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Louisiana [Mr. THORNTON] and vote "yea."

Mr. WEEKS. As the junior Senator from Georgia [Mr. SMITH] has announced, my colleague [Mr. Lodge] has a general pair with him. If my colleague were present, he would vote "nay."

Mr. GALLINGER. I desire to announce that the absence of the junior Senator from Maine [Mr. Burleigh] is on account of illness. He is paired, and wished to have it announced that he would vote against the bill if he were present and privileged

The result was announced-yeas 54, nays 34, as follows:

	3.10	IAN UT.	
Ashurst Bacon Bankhead Bryan Chilton Clarke, Ark. Crawford Fletcher Gore Hitchcock Hollis Hughes James	Johnson Jones Kern Lane Lea Lewis Martin, Va, Martine, N. J. So the bill was passed.

Mr. OWEN. Mr. President, I move that the Senate request a conference with the other House upon the bill and amendment. On account of the great importance of the bill, I am authorized by the committee to move that nine conferees be appointed on behalf of the Senate.

The motion was agreed to.
The VICE PRESIDENT. Is the Chair to appoint the conferees on the part of the Senate?

Mr. OWEN. I should be glad to have the Chair do so. The VICE PRESIDENT. The Chair appoints Messrs. Owen, O'GORMAN, REED, POMERENE, SHAFROTH, HOLLIS, NELSON, BRIS-TOW, and CRAWFORD.

Mr. GALLINGER. Mr. President, I should like to have the

names of the conferees stated from the desk.

The VICE PRESIDENT. Messrs. Owen, O'GORMAN, REED, Pomerene, Shafroth, Hollis, Nelson, Bristow, and Crawford, Mr. KERN. Mr. President, I move that the Senate adjourn until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 7 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Saturday, December 20, 1913, at 12 o'clock m.

HOUSE OF REPRESENTATIVES.

FRIDAY, December 19, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

"In the world ye shall have tribulation, but be of good cheer; I have overcome the world." We thank Thee, our Father in heaven, for those blessed and altogether reassuring words which fell from the lips of the Master. He had met life, its trials, temptations; drank deep of its sorrows and disappointments, yet rose supremely above them all by a complete surrender of selfish ambitions to the burning needs of the hour and had heard "This is my beloved Son in whom I am well pleased." What has been done may be done again, but not without struggles, trials, and temptations; but at last if we shall rise to the sublime heights of that nobility of soul which loses itself in a labor of love, we shall have overcome the world in the reflection of God's eternal love. Thus may we attain under the superb leadership of the world's great Exemplar.

The Journal of the proceedings of yesterday was read and approved.

EXPENSES OF REPRESENTATIVES OF THE UNITED STATES AT THE INTERNATIONAL MARITIME CONFERENCE FOR SAFETY OF LIFE AT

Mr. FITZGERALD. Mr. Speaker, by direction of the Committee on Appropriations I report the following bill and ask for its immediate consideration. (H. Rept. 155.)

The SPEAKER. The gentleman from New York reports a bill which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 11003) to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for its present consideration in the House as in Committee of

the Whole House on the state of the Union.

The SPEAKER. The gentleman from New York [Mr. Fitz-GERALD] asks unanimous consent for the present consideration of the bill-

Mr. MANN.

Mr. MANN. Let it be read first. The SPEAKER. The Clerk will read the bill.

The Clerk read as follows:

Be it enactel, etc., That for the expenses of the representatives of the United States at the International Maritime Conference for Safety of Life at Sea, now in session at London, there is appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$5,000 in addition to the appropriation of \$10,000 made in the joint resolution approved June 28, 1912, entitled "Joint resolution proposing an international maritime conference."

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of the bill just reported in the House as in Committee of the Whole House on the state of the Union. Is there objection to either one of these requests-for present consideration or to consider it in the House? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. Yes. Mr. MANN. This International Maritime Conference, I be-

lieve, was projected by the United States?

Mr. FITZGERALD. It was called practically upon the initiative of the United States and is the result of a resolution passed by the Congress

Mr. MANN. This is the conference which Judge Alexander, of Missouri, is now attending?

Mr. FITZGERALD. The same one.
Mr. MANN. What is the occasion for the increase in the Mr. MANN.

appropriation?

Mr. FITZGERALD. In pursuance of the joint resolution which was adopted by Congress, Great Britain called this International Maritime Conference, and, under the authority given in the joint resolution, 12 representatives were appointed on behalf of the United States to represent the United States in that conference, which is being held in London. Ten of the persons appointed went abroad and are participating in the conference. It commenced on the 12th day of November. Under date of December 12, Judge Alexander sent a cablegram to the President of the United States that Lord Mersey, who is chairman of the conference, states that it will be impossible for the conference to conclude its work before the 15th of January, and that unless \$5,000 additional is appropriated to defray the expenses of the American representatives it will be necessary for them to withdraw; that it would be considered very unfortunate if, from a conference called on the initiative of the United States, its representatives were compelled to withdraw before the completion of the conference because of a lack of a few thousand dollars. By the investigation had by the Committee on Appropriations information was obtained that the funds hitherto appropriated are sufficient to defray the expenses of the commission until about the 27th day of this month; so that if the representatives of the United States are to continue to participate in the conference it is important that legislation which would practically give them that authority becomes a law before the holiday recess

Mr. MANN. Is the gentleman able to say what expenses are paid? Are they merely traveling expenses and expenses of

persons while over there in London?

Mr. FITZGERALD. The representative of the State Department stated that \$2,000 was reserved out of the \$10,000 to

cover traveling expenses. The balance was placed to the credit of the members of the commission, if they might be termed a commission, and Capt. Cooper, of the Navy, who was one of those appointed to represent the United States, has been designated as the special dis-

bursing officer.

The State Department representative said that, in addition to the living expenses while abroad, he believed that the American representatives would have to do some slight entertaining in return for the courtesies extended to them.

Mr. MANN. There is no pay to any of the representatives?

Mr. FITZGERALD. No pay.

They are all officers of the Government?

Mr. FITZGERALD. Not all officers. Those designated to represent the United States were Judge Alexander, the chairman of the Committee on the Merchant Marine and Fisheries; Senator Fletcher, Senator Burton; the Commissioner of Navi gation, Mr. Chamberlain; Capt. Bertholf, of the Revenue-Cutter Service; Rear Admiral Capps, formerly Chief Constructor of the Navy; Mr. Ferguson, president of the Newport News Shipbuilding Co.; Mr. Smith, president of the New York & Cuba Mail Steamship Co.; Mr. Andrew Furuseth, president of the International Seamen's Association; Capt. Ballard, of the Navy, who is in charge of the wireless station at Arlington; Gen. Uhler, the Supervising General of the Steamboat-Inspection Service. With the exception of Senators Burton and Fletcher, they are abroad attending the conference.

Mr. MANN. As I understand, then, unless this additional appropriation is made, our delegates to that conference that we started will not be able to continue until the conference con-

cludes its labor?

Mr. FITZGERALD. That is the information.

Mr. MANN. Will the gentleman let me ask him one other question? Agreeing with him on the propriety of this bill at this time, is it the policy of the Committee on Appropriations to authorize and report a general deficiency bill or report these little bills in driblets, one at a time, carrying \$5,000, so that it may string them out at the request of the departments for a long time?

Mr. FITZGERALD. Mr. Speaker, that is not the policy of the Committee on Appropriations. In the last regular session of Congress there was no urgent deficiency bill at all. The committee reported the general deficiency bill and no urgent deficiency bill or special resolutions to take care of emergency cases. It has been the practice on the part of some persons in the executive departments of the Government to imagine that Congress sits merely to obey the requests or demands or suggestions that are made that money be appropriated out of hand whenever it is believed in the departments to be desirable that money be appropriated.

In order that the House may conduct its business in a systematic, orderly, and proper manner, as long as anybody can recall, it has been the custom to make provision in the deficiency bills at each regular session of Congress for moneys urgently required in addition to the appropriations carried in the general appropriation bills for the fiscal year. And it is the policy, and it will be the practice, of the Committee on Appropriations not to appropriate these additional moneys in driblets, or spasmodically, but to compel the departments to submit in an orderly manner estimates for deficiency appropriations and have them included in the general deficiency bill, and such as may be of imperative necessity at the outset of the session in an urgent deficiency bill, and then to permit the departments to accommodate themselves to the law and the funds provided in that manner.

Mr. MANN. Does the gentleman think it is possible to get the departments to understand that very necessary thing?

Mr. FITZGERALD. I do not know whether they will get to understand it, but they will not get money in any manner other than indicated if it were not for the fact that the information before the committee is to the effect that this appropriation will be exhausted by the 27th of December, and that

the representatives of the United States would not feel justified in continuing to participate in the conference beyond the time the money would meet their expenses, the committee would not have acted in this instance. I may say further, that it was anticipated when the conference commenced that it would be completed within six weeks, and, if that expectation had been realized, there would have been no necessity for additional funds.

Mr. Speaker, I ask for a vote. The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time,

was read the third time, and passed. On motion of Mr. FITZGERALD, a motion to reconsider the vote by which the bill was passed was laid on the table.

CHANGE OF REFERENCE.

By unanimous consent, the Committee on the Post Office and Post Roads was discharged from further consideration of the bill (H. R. 10849) to provide for the construction and maintenance of post roads, etc., and the same was referred to the Committee on Roads.

EXTENSION OF REMARKS.

Mr. EDWARDS. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by inserting some data con-coning a bill (H. R. 11009) that I introduced this morning for an additional United States district judge in the State of Georgia

The SPEAKER. The gentleman from Georgia [Mr. EDWARDS] asks unanimous consent to print in the Record some data which he has applying to a bill which he introduced to-day concerning a United States judge in Georgia. Is there objection? Mr. MANN. How long is it?

Mr. EDWARDS. It is just a brief statement, The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District appropriation bill.

The SPEAKER. The gentleman from North Carolina [Mr. moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District of Columbia appropriation bill. The question is on agreeing to that motion.

The motion was agreed to. Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HULL in the

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523. When the committee rose yesterday the gentleman from Kentucky [Mr. Johnson] was in the act of offering an amendment. The Clerk will report the amendment which the gentleman offered from the floor. The gentle-

man from Kentucky will send the amendment to the desk.

Mr. JOHNSON of Kentucky. The amendment, Mr. Chairman,

is printed in the RECORD. I have not a copy of it.
The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Amend the paragraph, beginning line 10, page 9, by adding at the end of the paragraph, on line 18, the following: "Provided, That none of the officers, clerks, or other employees provided for in this paragraph shall receive or accept compensation of any kind from, or perform any work or render any services of a character required of them officially by the District of Columbia."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a

point of order against the amendment.
The CHAIRMAN. The gentleman from North Carolina re-

serves a point of order against the amendment,
Mr. JOHNSON of Kentucky. Mr. Chairman, I concede the point of order.

The CHAIRMAN. Does the gentleman from North Carolina

make the point of order?

Mr. PAGE of North Carolina. I make the point of order.

The CHAIRMAN. The point of order is sustained. Clerk will read.

Mr. PAGE of North Carolina. Mr. Chairman, before proceeding with the reading of the bill, if agreeable I would like to refer back to an item passed over yesterday in connection with point of order made by the gentleman from Illinois [Mr.

The CHAIRMAN. Without objection, that will be done. There was no objection.

Mr. PAGE of North Carolina. It refers to the salary of the attorney for the District, the corporation counsel, on page 6 of the bill.

The CHAIRMAN. The Clerk will read the paragraph.

The Clerk read as follows:

Page 6, lines 3, 4, 5, 6, and 7:
"Office of corporation counsel: Corporation counsel, \$4,500; first assistant, \$2,500; second assistant, \$1,800; third assistant, \$1,600; fourth assistant, \$1,500; fifth assistant, \$1,500; stenographers—one, \$1,200, one \$840; clerk, \$720; in all, \$16,160."

Mr. PAGE of North Carolina. Mr. Chairman, on yesterday, when this item was passed over, it was on a question of whether or not the salary of this particular official was fixed by statute; and the gentleman from Illinois [Mr. Fowler] having made the point of order, I was disposed to put the burden upon him of showing that there was a statutory law fixing the salary of this office.

I am prepared this morning to make the statement that the salary of this official is not fixed by statutory law, and that the point of order is not well taken. The office is created by statute, but the salary is not fixed by that statute or fixed by law other than in an appropriation bill.

The CHALDMAN Is it the contlement's contention that the

The CHAIRMAN. Is it the gentleman's contention that the point of order is not well taken?

Mr. PAGE of North Carolina. My contention is that the point of order is not well taken.

point of order is not well taken.

Mr. FOWLER. Mr. Chairman—
Mr. PAGE of North Carolina. Mr. Chairman, before the gentleman from Illinois proceeds I would like to say that the statute can be found in the Code of Laws of the District of Columbia, on page 244, section 932. It provides for an attorney for the District of Columbia, hereafter to be known as the corporation counsel, or city solicitor, as the law was then, since changed to corporation counsel, without any reference whatever changed to corporation counsel, without any reference whatever to the salary that he shall receive. I make the point of order that his salary is not fixed by law and that the gentleman's point of order will not lie.

The CHAIRMAN. The Chair would inquire has that statute

been repealed?

Mr. PAGE of North Carolina. That statute has not been re-

pealed and is in force to-day.

Mr. FOWLER. Mr. Chairman, I desire to say that the salary of the corporation counsel is fixed by statute, notwithstanding the statement of the distinguished gentleman from North Carolina.

In 1871, in the Acts of the First Legislative Assembly of the District of Columbia, on page 150, section 18, there was an enactment passed fixing the salary. That section reads as fol-

The CHAIRMAN. May the Chair inquire whether that act is subsequent to the date of the act read by the gentleman from North Carolina?

Mr. FOWIER. There is so much noise around me, Mr. Chairman, that I could not understand the question propounded by the Chair.

The CHAIRMAN. The gentleman will proceed, then. Mr. FOWLER. Section 18 of that act reads as follows:

That the attorney for the District of Columbia shall be under the direction of the governor—

Mr. PAGE of North Carolina. I should like to ask what act the gentleman is reading?

Mr. FOWLER. I have just stated.

Mr. PAGE of North Carolina. In the confusion I did not hear the gentleman, and I was paying attention.

Mr. FOWLER. It is section 18 of an act passed by the First Legislative Assembly of the District of Columbia, August 23, 1871, and it reads as follows:

SEC. 18. That the attorney for the District of Columbia shall be under the direction of the governor and have charge and conduct of all law business of the said District and all suits instituted by and against the government thereof. He shall furnish opinions in writing to the governor, either branch of the legislative assembly, or any committee thereof, whenever requested to do so. All requests for opinions shall be transmitted through the governor and a record thereof kept, with the opinions, in the office of the secretary of the District. He shall perform such other professional duties as may be required of him by the governor. He shall receive an annual compensation of \$3,000.

Now, Mr. Chairman, that act has never been changed since

its enactment, so far as fixing the salary at \$3,000.

It is true that this is an act of the Legislative Assembly of the District of Columbia, but that very same act which fixed the salary then has been carried in subsequent appropriations and in subsequent acts dealing therewith, and has never been changed, with the exception of once, and that was to give the Commissioners of the District of Columbia the power to reduce it 20 per cent.

Mr. FITZGERALD. What was the title of that office, if the gentleman will state?

Mr. FOWLER. Attorney for the District.

Mr. Chairman, by an act of Congress entitled "An act to establish a Code of Law for the District of Columbia," approved March 3, 1901, Thirty-first Statutes at Large, pages 1189 to 1439, it was declared in section 932, page 1340:

The attorney for the District of Columbia shall hereafter be known as the city solicitor.

The act approved June 30, 1902, Thirty-second Statutes at Large, part 1, pages 520 to 546, inclusive, entitled "An act to amend an act entitled 'An act to establish a Code of Law for the District of Columbia,'" amended section 932, the same section referred to, so as to substitute the words "corporation counsel" for the words "city solicitor," page 537; but the code did not either create the office or fix the compensation, nor does the code set forth or prescribe the duties of the office, except that in section 932 it says:

Prosecutions for violations of all police or municipal ordinances or regulations and for violations of all penal statutes in the nature of police or municipal regulations, where the maximum punishment is a fine only or imprisonment not exceeding one year, shall be conducted in the name of the District of Columbia and by the city solicitor or his assistants.

In that act he was referred to as the "city solicitor," notwithstanding in the act of 1901 his official name had been changed to "corporation counsel."

Mr. Chairman, as long as the legislative assembly existed the salary of the attorney was \$3,000 a year, and it has so remained until by legislation on appropriation bills it has been increased without authority.

In the act of June 26, 1873, it was provided as follows:

For salary of attorney, \$3,000.

That is found in the printed session acts of the third legis-

lative assembly, pages 86 to 88.

The governor and legislative assembly were displaced in 1874 by the act of Congress entitled "An act for the government of the District of Columbia, and for other purposes," June 20 of that year. (18 Stat. L., pp. 116-121.) That act, which puts the District government provisionally into the hands of three commissioners, provided, among other things, as follows (18 Stat. L., pp. 116-117):

And said commissioners are hereby authorized to abolish any office, to consolidate two or more offices, reduce the number of employees, remove from office, and make appointments to any office authorized by law; and the compensation of all officers and employees, except teachers in the public schools and officers and employees in the fire department, shall be reduced 20 per cent per annum.

The CHAIRMAN. Will the gentleman allow an inquiry right there?

Mr. FOWLER. Certainly.

The CHAIRMAN. Is it the contention of the gentleman that an act of the Territorial legislature which fixed the salary governs Congress, under the rule which he now invokes, or do only the laws of Congress apply under the rule which the gentleman

invokes to sustain his point of order?

Mr. FOWLER. This statute to which I have just referred was passed in 1873, and the salary of the attorney was \$3,000. I am trying to carry on in a systematic way the different statutes which have dealt with this salary and with the changes in the name given to the office by public acts. I think, Mr. Chairman, that the legislative acts which have taken place since the abolition of the Territorial form of government which the District once had have been of such a character as to carry out the salary of the district attorney as it was at the time when such government existed in the District.

When the Postmaster General's department was created he received before that time \$1,000, and the provision of the statute creating it provided that he should receive the same salary paid to this office under our confederation. That is my recollection. So the salary that was received for that character of work before the passage of the Constitution was fixed as the salary of the Postmaster General in a similar way as is the case of this corporation counsel. In 1875 (18 Stat. L., pp. 501 to 505, inclusive), and also by the statutes of 1876 (19 Stat. L., p. 87), the following language was carried in that act:

That the Commissioners of the District, or their successors in office, are hereby authorized to reduce, adjust, and equalize the pay or salaries of all officers or employees payable from the funds of the District government, in whole or in part: Provided, however, That the aggregate sum of pay and salaries shall not be increased.

That statute undertook to confer the power on the Commissioners of the District of Columbia to regulate certain salaries of officers in the District, but there was a limitation imposed to the extent that the salaries of the officers should not be changed in the aggregate. And every statute which has been passed since the salary was fixed in 1871 at \$3,000, it has always referred to the existing salary and placed a limitation upon the increase

In the sundry civil appropriation act approved March 3, 1875 (18 Stat. L., pp. 371 to 402, inclusive), was the following provision:

To be expended by the Commissioners of the District.

But it inserted the following provision:

No salaries to be changed from the standard fixed under the act of June 20, 1874.

Now, that was the act of March 3, 1875, in the sundry civil appropriation bill, for the benefit of the District of Columbia. The provisional government of the District by three commissioners obtained until 1878. By an act of Congress of that year, Statutes at Large, volume 20, pages 120 to 189, the form of government was changed, and we have been under that change ever since, as I understand.

Congress provided in the act of 1801 that the United States should have an attorney for the District of Columbia, and it was not until 1871 that Congress created the District of Columbia, as it has continued to be ever since, a body corporate for municipal purposes, making the District a municipality, the successor of these parties.

As will be seen, Mr. Chairman, from the foregoing, the official name of the attorney of the municipality of the District has been changed by Congress from attorney to city solicitor, and then to corporation counsel, which name the officer bears at the present time. Congress never did create the office, Congress never did define his duties, never has fixed any compensation different from what has been set forth in the statutes which I have read; that is, that they referred to the salary which had been fixed at \$3,000, saying repeatedly that the salary should not be increased in the aggregate; and in no place has Congress ever provided for a change, except what was provided in 1871, when it was fixed at \$3,000.

Mr. Chairman, I challenge the gentlemen on the other side to show an act of Congress since the adoption of the plan of government for the District of Columbia as it exists to-day wherein the salary of the district attorney or the counsel for the city or the corporation counsel has ever been changed from that fixed

by the act of 1871 above read, fixing it at \$3,000.

Mr. Chairman, in all of these acts which I have read-and I have read all of them-none have escaped my attention, because last year, when I made a point of order against this increase of salary in the face of existing law I was overruled, and I have gone into the matter, even yesterday, running down every act that has been passed since 1871. For 35 years this officer has been drawing a salary from the District and the Government of the United States in the face of the existing law, and we have paid out more than \$35,000 unlawfully. It ought to be returned to the treasury of the District of Columbia and the United States. I say, Mr. Chairman, that it is as wrong to violate a civil statute as it is to violate a criminal one, except that it is a little more dangerous to violate a criminal statute. The moral turpitude which involves the violation of the one is as great as that involved in the violation of the other. Mr. Chairman, before the Chair passes on this question, if he desires, I will be very glad to submit my brief—
Mr. FITZGERALD. I hope we will have time to file one in

Mr. FOWLER. Oh, certainly. I never have been so deaf or dumb but what I have invited every living good man on earth, when he competed with me in any matter, to get no lower than the plane on which I occupied.

Mr. FITZGERALD. I would not want to get so high up in

the air as the gentleman is.

Mr. FOWLER. Mr. Chairman, I heard a story told of Tom Merritt, once a member of the Illinois Legislature on one occasion, which illustrates this situation. He was very much disturbed when a gentleman visited his room. He was asked what was the matter, and he said he was looking around for a valise. The gentleman asked him what it was. Tom stuttered out, say-S-s-s-some d-d-d-darned fool come up and v-v-y-y-velled f-f-f-fire last night and r-r-r-run into my r-r-r-room and threw my gr-gr-grip out of the window." The man said: "Why don't you make him go down and get it?" Tom replied: "The d-d-darned thing went up." [Laughter.]

Mr. Chairman, I hope that no one in this House will ever be light enough to go up until he dies, and then I hope all will go

up. I insist on my point of order.

Mr. PAGE of North Carolina. Mr. Chairman, the gentleman from Illinois, in referring to my statement that this salary was not fixed by law, said that it was, notwithstanding that statement. I-desire to say that I was not ignorant of the statute which he cited of the one legislature that had existed in the District of Columbia, a body that Congress has never taken the slightest notice of, and one that everybody else has tried to

I was basing my argument against the point of order upon what Congress has done in connection with the salary of this particular official. The history of that salary and of that legislation is this: The salary of the attorney for the District was first specifically appropriated for by Congress at \$4,000 per annum in the sundry civil act for the fiscal year 1880, and was annually provided therefor in that sum until the fiscal year 1903

Mr. FOWLER. Will the gentleman yield?

Mr. PAGE of North Carolina. One moment-when the title was changed to that of city solicitor and the salary was provided for at the rate of \$4,500 per annum. At that sum it has continued until this time. As I cited to the Chairman a little while ago, section 932 of the District Code in terms changed the title to that of corporation counsel.

Will the gentleman yield before he leaves Mr. FOWLER.

Mr. PAGE of North Carolina. Certainly. Mr. FOWLER. Mr. Chairman, I think the gentleman is mistaken in his date as to the time when the corporation counsel

began to draw \$4,000.

Mr. PAGE of North Carolina. I will say to the gentleman that the records of the appropriations of the Congress of the United States, in the sundry civil bill for the fiscal year 1880, show that the salary was carried at \$4,000 per annum, the gentleman's statement to the contrary notwithstanding.

Mr. FOWLER. I am not stating to the contrary, but I state

that it does, but that it went back further than that.

Mr. PAGE of North Carolina. I did not go back any further than that.

Mr. FOWLER. It went back to 1878.
Mr. PAGE of North Carolina. That is since the enactment of the legislation under which appropriations are now made for the maintenance of the government of the District of Co-

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. Certainly.

Mr. MANN. Is it the same office?

Mr. PAGE of North Carolina. No; it is not the same office as to title. I presume that the duties of the office are the same. I can not say specifically about that. It has been enlarged, no doubt, as the years have gone by and the amount and variety of work have become greater.

Mr. MANN. After the abolition of the District government, did Congress make an appropriation for this office because it had been provided by the District government, or did Congress make an appropriation because it was providing for the District

needs?

Mr. PAGE of North Carolina. I presume it was made by Congress because of the needs of the District. No reference is made to the fixing of the salary in any of the acts making appropriation for it, nor is there any other reference to the legislature of the District of Columbia, which has been cited by the gentleman from Illinois.

Mr. MANN. Is there anything to show that this office now is an office that Congress continued, because it was created by

the District legislature?

Mr. PAGE of North Carolina. Nothing that I have been able to find. Now, Mr. Chairman, I want to say further in reference to the point of order made by the gentleman from Illinois, that year ago, in the District of Columbia appropriation bill for 1914 reported to this House from the Committee on Appropriations, the salary of this officer was fixed at \$5,000, and against that \$5,000, not \$4,500, the gentleman made his point of order, and it was sustained as to the \$500 increase which went out, but the total of \$4,500 in this bill was sustained by the ruling of the Chair at the time. I do not care to prolong this discus-The salient facts have been given to the Chair, and your committee, as far as I am concerned, is ready to drop the case

Mr. FOWLER. Mr. Chairman, may I be permitted to answer the inquiry of the gentleman from Illinois-

The CHAIRMAN. The gentleman from Illinois is recognized. Mr. FOWLER (continuing). As to whether Congress had made appropriations for this office because of its having been created by the District government or for some other purposes? I will state, Mr. Chairman, that in examining these acts I find the Government not only carried an appropriation for the attorney for the District, but it carried an appropriation for other offices which had been created during the District government, and that the duties of the District attorney or city counsel or corporation counsel has always been one and the same and confined to the same line of duties, and that all appropriations that have been made subsequent to 1878, from the time that the territorial form of government was abolished,

have carried the appropriation for this office for the same duties

without any changes except in name.

The CHAIRMAN. The Chair was unable to follow the gentleman in the citations he read and would like to inquire of him as to which particular act of Congress he cites which undertakes to fix the salary of the corporation counsel, either as an original proposition or by ratifying the salary as fixed by the act of the Territorial government.

Mr. FOWLER. The act of 1871 of the Territorial government, Mr. Chairman, fixes the salary at \$3,000. The act of 1875 and the same act of 1876 provided that there should be no increase in the salary, and subsequent to the act of 1878, as I recall, no provision has been enacted for the increase in the salary or any change in salary whatever, except by current law.

Mr. SISSON. Will the gentleman permit one interruption?

Mr. FOWLER. I will.

Mr. SISSON. As a matter of fact, there is nothing at all in any of those acts that prevents the Congress changing the salaries. They simply provided that in the readjustment of offices and in the reclassification of the duties of the offices under the old legislative act that the Commissioners of the District should not change the aggregate of the salaries, but you do not find in any of those acts that Congress could not change the salary of this officer. The contention of the committee is that this office was created and is an office and after the old Territorial government was abolished that Congress then provided that this officer, holding the office under the legislative provisions of the old Territorial legislature, should continue in office until the new commissioners could readjust the offices and readjust their duties, but it was a limitation placed upon their power in readjusting them that the commissioners could not increase salaries. That limitation was against the commissioners and not against the Congress.

Mr. FOWLER. In reply, Mr. Chairman, I desire to say there is no contention on my part that Congress has not the full and ample power at any time to change the salaries of the officers. It has repeatedly done that, though criticized by the public, and it might change the salary of this attorney for the District of Columbia at any time it deems proper to pass an act of that character. It could do that by the current law or it could do it by a permanent law, but when it is attempted by current law it is subject to a point of order, which ought to be sustained as a check to unlawful appropriations in the face of existing law.

Mr. FITZGERALD. Mr. Chairman, for 23 years the corporation counsel of the District of Columbia was paid at the rate of \$4,000 a year, and for 12 years subsequently at the rate of \$4,500 a year, so that for 35 years a compensation in excess of \$3,000 a year has been paid to the man charged under the law with the important duties of conducting the law business for the District of Columbia. Evidently some person with very little to do, but harboring a grievance of some kind, has laboriously picked out of the statutes all the antique provisions regarding the government of the District of Columbia more than 42 years ago in order to enable the gentleman from Illinois to base an argument in favor of the proposition that the compensation of this official is only \$3,000 a year.

I would not mention this fact, Mr. Chairman, were it not that many who read the Congressional Record are not quite so familiar with public affairs as men in the House, and some might take seriously the statement of the gentleman from Illinois [Mr. Fowler] that over \$35,000 has been illegally paid to some one occupying this office; that it was paid in violation of the law, and that it ought to be recovered and paid back into the Treasury. There ought to be some rule of the House that would prevent the wasting of valuable time and the wasting of valuable money in printing such ridiculous statements as the ones to which I have referred.

I have some knowledge of the duties of the official now known as the corporation counsel in the District government, and I am somewhat surprised that even for the glory and the distinction and the honor of holding public office a lawyer of the capacity, rank, and ability that is necessary to fit a man to discharge the duties of this office could be obtained in the Dis-

trict of Columbia at a compensation of \$4,500.

I do not know that I have ever been charged here with being extravagant or with favoring unfair or undue compensation for public officials. But anyone who knows anything about the extent of the law business of this community and the great responsibilities devolving upon this official can not help but be surprised at the fact that lawyers of high type and of great capacity have been found to take the place at the compensation offered, for the distinction which goes with the fact that he is the chief law officer of the community in which he resides. How ridiculous it is, Mr. Chairman, that for 35 years appropriations have been made by Congress—of \$4,000 for 23 years for the chief law officer of the District, and then for the next 12 years for \$4,500, and not to one particular individual but to the many men who from time to time have held this office-how ridiculous it is to go back to that old discredited legislature of the District of Columbia and attempt to set its action up here as the law controlling the Congress of the United States in appropriating money for the compensation of the officials of the government.

We have taken already, Mr. Chairman, so much time of the House on this question that, if computed in money, would pay the compensation of the corporation counsel of the District of Columbia for the remainder of the present administration. hope that the Chair will rule on this question and settle it, and I hope that nobody who reads the RECORD will get the impression, or will retain it long, that money has been filegally, improperly, unjustly, and improvidently paid to various occupants of this office. I know from my examinations as a member of the Committee on Appropriations during nine years the services rendered have more than justified the payment not only of the sums already appropriated but the payment of much larger compensation

Mr. FOWLER. Mr. Chairman, I feel much surprised at the position of the distinguished chairman of the Committee on Appropriations in his opposition to an effort here on the floor of this House to keep legislation well within the bounds of decency and existing law.

Mr. Chairman, all the salaries of the various departments of this Government ought to be regulated; they ought to be fixed by statutory law, so as to prevent favoritism and what is some-times termed graft. The effort which I have made for the purpose of enforcing the law of the land and protecting the people of this country is in the very best of faith. When I was in my swaddling clothes here as a Member of Congress, I was confronted with appropriation bills coming from the hand of this distinguished chairman, every one of which had an increase of salary of big men in violation of existing law. When I made points of order against them the gentleman threatened to bring in a rule to pass a bill without giving me an opportunity to pick the pin feathers off his bills so that the meat of his injustice could be revealed and exposed. Now he comes with the same tactics in this case. Let men come on the floor of this House with clean hands and decent legislation before they undertake to impugn the motives of other Members who seek to keep legis-

lation in harmony with the law and for good government.

Mr. FITZGERALD. I hope the gentleman will keep that statement in mind when he helps to make up the Post Office appropriation bill.

Mr. FOWLER. I have kept it in mind.

Mr. FITZGERALD. He has not lived up to it.
Mr. FOWLER. I have interposed, if I may be excused, amendments to that bill saving more than a half million of

Mr. FITZGERALD. My information is that the gentleman has favored amendments which added several millions to it contrary to existing law.

The CHAIRMAN. The Chair is ready to rule.

Mr. FOWLER. Mr. Chairman, I beg the pardon of the House for having had to refer to this matter, but I will be glad to furnish the Chairman with the brief that I have here if he is not ready to pass upon this question. I think it is so serious, Mr. Chairman, it not only deserves the careful scrutiny of the Chair but every Member of the 435 who sit here and are responsible to the people of this country for legislation.

The CHAIRMAN. The gentleman from Illinois [Mr. Fowler] makes a point of order against that portion of the paragraph read relating to the office of the corporation counsel, whose salary is fixed in the pending bill at \$4,500. The point of order is based upon the ground that the original act of the territorial government of the District authorized this position and fixed the salary, and that subsequent acts of Congress em-

braced both authorizations in the laws of Congress.

Of course, if the contention of the gentleman is correct, that Congress subsequently carried this provision, both as to the creation of this office and the fixing of the salary in its act, so as to give each a fixed status by law, the point of order would be well taken. Upon the best examination possible to make under the circumstances the Chair is of opinion that Congress by subsequent laws authorized and in that way ratified the act of the Territorial legislature in the establishment of the office of corporation counsel. But while it did prescribe certain limitations upon the salary on two or three occasions those do not appear to have been permanent limitations fixed by law, but seem afterwards to have been abandoned by acts repealing, impliedly or expressly, those limitations.

Summing up the entire matter, the Chair is of the opinion that this office is one established by law, but that the salary was not fixed in such a manner as to prevent the House, under the rules, from embracing in the present bill the figures fixed by former appropriation bills as the salary, which is \$4,500. For that reason the point of order is overruled. The Clerk will read.

The Clerk read as follows:

Public Utilities Commission: For salaries (including 1 inspector of gas and meters, \$2,000; assistant inspectors of gas and meters—1 at \$1,000 and 2 at \$900 each; messenger, at \$600, transferred from engineer commissioner's office); in all, \$25,479.96.

For incidental and all other general necessary expenses authorized by law, \$2,799.

Mr. MONDELL. Mr. Chairman, I offer the following amend-

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 9, after line 25, insert the following: "For making valuations of the following utilities: Washington Gaslight Co., Georgetown Gaslight Co., Washington Electric & Railway Co. (including the Potomac Electric Power Co.), Capital Traction Co., and Chesapeake & Potomac Telephone Co., to be immediately available, \$65,000.

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order

The CHAIRMAN. The gentleman from New York [Mr. Fitz-gerald] reserves a point of order against the amendment.

Mr. MONDELL. Mr. Chairman, the item is not subject to a point of order, as the gentleman from New York [Mr. Fitz-GERALD] should know.

The public-utilities law contained in the current District appropriation act, paragraph 7, page 45, of the printed act, makes it the duty of the Public Utilities Commission to value the property of every public utility within the District of Columbia, and this amendment is intended to supply the funds for the purpose of carrying out the duties thus made incumbent upon the Public Utilities Commission.

Mr. FITZGERALD. Mr. Chairman, I understand this amend-

ment is in the language of the act?

Mr. MONDELL. It is.

Mr. FITZGERALD. Then I withdraw the point of order; it does not lie.

Mr. MONDELL. I understand it so. The commissioners estimated that \$110,000 would be necessary to carry on this work

for the coming fiscal year.

Subsequent to the submission of the estimate of \$110,000-and think in accordance with a suggestion made by the chairman of the subcommittee, Mr. Page—the commissioners substituted a lower estimate, amounting to \$65,000, and that is the amount

carried in my amendment.

In a letter written by Commissioner Chester Harding to the that letter written by commissioner chester harding to the chairman of the Committee on Appropriations the commissioner suggested that this sum of \$65,000, which was the revised estimate as to what was necessary for this work, should be placed in the deficiency bill, which it is suggested will be passed some

time in the future.

Now, I have no desire to press this amendment at this time on this bill if it is clearly understood that the item is to go on the deficiency bill, and that it will thus become available at an earlier date than it could become available if placed on the District of Columbia bill.

Mr. FITZGERALD. Mr. Chairman, I could not give the gentleman any assurance that the deficiency bill will carry the item.

This is the situation: The bill providing for the valuation of these utilities appropriated \$40,000 to carry out the work. I understand that when the estimate was reached by the subcommittee in charge of the District bill it was ascertained that part of the money was desired for this fiscal year, and it was then stated that the matter would be taken up by the subcommittee in charge of the bill. And that will be done. That is, the estimate will be taken up and investigated, and if the circumstances disclose that additional money is required for the current fiscal year, I have no doubt the committee will recommend it; but as I am not familiar with the circumstances, I did not wish to be put in the position of pledging myself to favor any particular sum in a deficiency bill. The intention was to have it considered, and whatever was proper, if anything was needed, to carry it in the deficiency bill rather than in this bill for this

Mr. MANN. Will the gentleman from Wyoming permit me to ask the gentleman from New York a question?

Mr. MONDELL. Yes. Mr. MANN. Is there to be an urgent deficiency bill?

Mr. FITZGERALD. Mr. Chairman, I have been informed that the Treasury Department has a number of estimates which are considered to be of an urgent character, and I had expected they would be transmitted to the House some time during the present week. There is one item which is urgent. It is already before the Committee on Appropriations. It is an item for about half a million dollars for the Post Office Department. I expect, too, that there may be some other matters that will require the passage of an urgent deficiency bill after the holiday recess, as the general deficiency bill in the long session is usually with-held until close to the end of the session.

In addition to the post office item there is also a deficiency item of which I have knowledge in connection with the Panama

Canal, that will necessitate prompt action after the holidays.

Mr. MANN. Of course, this bill will become a law before the

general deficiency bill becomes a law.

Mr. PAGE of North Carolina. On what does the gentleman base that statement?

Mr. MANN. Upon the history of the Government. Mr. PAGE of North Carolina. The history of this bill has been that it is usually enacted into law on the last day of the session of Congress.

Mr. MANN. No. That is very often so, but the deficiency bill is always passed on the last day of the session of Congress, while the District bill sometimes becomes a law before that time.

Mr. FITZGERALD. The Panama Canal item of which I have knowledge, resulting from slides and the consequent work, has made a situation there in one department particularly that requires several hundred thousand dollars,

Mr. MANN. I was under the impression that in view of the mileage situation there would probably be no urgent deficiency bill.

Mr. FITZGERALD. My opinion is

Mr. MONDELL. Do I understand that the mileage should be provided for?

Mr. FITZGERALD. My opinion is that it will be necessary immediately after the holidays to pass an urgent deficiency bill. Mr. SISSON. Mr. Chairman, I will say-

The CHAIRMAN. To whom does the gentleman from Wyoming yield?

Mr. MONDELL. I yield to the gentleman from Mississippi. The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. FITZGERALD. I ask unanimous consent that the time be extended five minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent that the time of the gentleman from Wyoming [Mr. Mondell] be extended five minutes. Is there objection?

There was no objection.

Mr. SISSON. Mr. Chairman, for the benefit of the gentleman from Wyoming [Mr. Mondell], I will say that after these hearings were had on this item Col. Harding came back to the committee in company with the gentleman from Illinois [Mr. Madden], who has had some experience with the valuation of utilities in the city of Chicago. After that conference by the subcommittee having charge of this bill, in view of the fact that the commissioner was not satisfied that the estimate was of the right size, and that the work might be done for less than that amount, after a very long conference of the members of the subcommittee, all of them being present except one, we decided that the proper place to take care of this would be in the deficiency bill, so that Col. Harding and the commissioners might have an opportunity to revise that estimate that they had given us and do all of this work for a very much less

Mr. JOHNSON of Kentucky. A less sum than what? Mr. SISSON. A less sum than the \$140,000, including the sum which they now had. That being so, it was understood that this matter would be taken up in the deficiency bill. And there are matter would be taken up in the denciency bill. And there are numbers of items that are being asked for, and, so far as we know, it is absolutely certain that there will be a deficiency bill. That being true, your subcommittee thought it was proper that this matter should go into the deficiency bill and not into this bill at this time. Every member of the subcommittee is just as anxious for physical valuation of the property in the District of Columbia as is my friend from Wyoming.

I have thought this statement necessary, so that the committee

might understand why the item was left out of this bill.
Mr. DAVIS. Will the gentleman permit a question?
Mr. SISSON. The gentleman from Wyoming has the floor.
Mr. MONDELL. I yield to the gentleman.

Mr. DAVIS. Was it not the unanimous opinion of the sub-committee that this appropriation was absolutely necessary, and that it was their desire that an appropriation should be had as quickly as possible.

Mr. SISSON. I stated that in my remarks.

Mr. DAVIS. And also that it was the opinion of the committee-at least it was my opinion-that if there was not to be an urgent deficiency bill we would put it in here?

Mr. SISSON. That was the understanding upon the part of

the subcommittee.

Mr. DAVIS. That something ought to be done at this time in regard to this matter? Mr. SISSON. Yes.

Mr. MONDELL. Mr. Chairman, as I understand the situation, it is this: I think the gentleman from Mississippi [Mr. Sisson], who just took his seat, is not entirely accurate when he says that there is an available fund of \$40,000, or something of that port.

Mr. SISSON. You are mistaken about that.

Mr. PAGE of North Carolina. The gentleman is mistaken. Mr. MONDELL. The bill of last year carried \$40,000 for the organization of the public-utilities commission, in the payment of salaries, and so forth; that sum will be largely used before the end of the fiscal year.

Mr. SISSON. They have used practically none of the \$40,000. They have made some preliminary investigations and paid a few employees. My recollection is that they have not used more than \$500 of it.

Mr. DAVIS. My understanding is that there will be about \$12,000 left of the \$40,000.

Mr. SISSON. At the end of the fiscal year? Mr. DAVIS. Yes.

Mr. MONDELL. There can not be more than that amount left.

Mr. SISSON. I am not positive about the amount they have expended, but at the end of the fiscal year they will have \$12,000 unexpended, and that would leave \$122,000, which your committee thought might be more than necessary to do the work, and for that reason did not make an appropriation at this

Mr. MONDELL. Well, Mr. Chairman, admitting that there will be \$12,000 available, I have in my amendment the revised estimate of the District Commissioners based on that fact. Their original estimate was \$110,000 for this work, in addition to the \$25,000 for salaries which is provided for in the bill. I have taken the reduction of \$65,000 from \$110,000. Now, we all realize that this work is highly important. The law makes it mandatory on the commission to carry out this work.

The CHAIRMAN. The time of the gentleman from Wyoming

has expired.

Mr. MONDELL. Mr. Chairman, I have not had more than half of my time.

Mr. DAVIS. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended five minutes.

The CHAIRMAN. The gentleman from Minnesota asks that the time of the gentleman from Wyoming be extended five minutes. Is there objection?

There was no objection.

Mr. MONDELL. We all realize that this work must be performed. The law makes it mandatory, and the commissioners have called attention to the fact that it is impossible for the public utilities commission to properly discharge the duties of their office without this valuation. They can not de-termine the facilities which may be properly required or what charges may be properly allowed without this information. The commissioners have suggested that they could get along with \$65,000. I have offered an amendment for that amount. It is possible that there may be an urgent deficiency bill and there may not. And it is possible that an urgent deficiency bill might become a law before the District bill and it may not. But here and now we are in position to provide for this work. This is the bill it belongs upon.

Mr. FITZGERALD. The gentleman is mistaken.

Mr. MONDELL. If the gentleman will allow me to conclude my statement, there is no harm in placing it on this bill even though you anticipate placing it in another bill at a later date.

Mr. PAGE of North Carolina. I want to say that in my judgment this is not the place for this appropriation. It is

not orderly legislation to place on a regular annual appropriation bill carrying amounts for annual expenditures an appropriation for an emergency of this sort for a special, specific pur-

Mr. MONDELL. I do not think the gentleman from North Carolina is serious in that contention. I do not think he can be. Here is a continuing work of the District of Columbia, made mandatory by the law, and this is the District bill providing for all expenditures for the District except some special expenditures that may be provided for in connection with new projects. There is not any other bill upon which this could be properly

placed, unless it might be a special bill reported by the Committee on Appropriations. Whether it might be put on the deficiency bill or not, let us carry out the good intentions that all the gentlemen say reside in their hearts and place the appropriation on this bill now.

Mr. PAGE of North Carolina. Mr. Chairman, the subcom-

mittee preparing this bill in connection with this item, as stated by the gentleman from Minnesota, was in full harmony as to carrying out the purpose for which the appropriation was asked. There was not a fixed conviction in the mind of the commissioners who made the recommendations for this amount as to the sum that would be required to properly discharge the duties that devolved upon them in the work for which the appropriation was asked. It developed in the course of the hearing that while they had originally asked for the whole amount to be appropriated for the fiscal year 1915, the commissioners came before us and asked that they be permitted to revise their esti-mates and to withdraw \$65,000 of the amount for the reason that it would not be needed during the current fiscal year. They asked, in the first place, to change the language making this amount immediately available. The chairman of the subcommittee called their attention to the fact that in all human probability this bill would not become a law until very near the end of the present session of Congress, which might be and probably would be very nearly the beginning of the next fiscal year, if not later than that. Then seeing these facts the subcommittee, having called their attention to the fact that this was a continuing appropriation for carrying out the purpose for which \$40,000 was appropriated in the present law, after full consulta-tion, believed that the place for this appropriation was not in this bill, but that it should be carried in the urgent deficiency bill in order that the money might be available at an earlier flate, and that the special work which these gentlemen had placed upon them might be expedited and completed earlier.

We still think so, and I think if the gentleman from Wyoming

[Mr. Mondell], in the submission of this amendment, wants really to expedite the work of the physical valuation of the utilities of the District, he will withdraw his amendment upon the assurance and the statements made here by members of the Appropriation Committee that it is the purpose of this committee to carry in an urgent deficiency bill the amount necessary to do the work that is to be done. In this connection I want to renew a statement that I made awhile ago, about which the gentleman from Wyoming seemed to think I was joking, and that was that I did not believe it was in the interest of orderly legislation or good legislation to carry an appropriation in this annual appropriation bill for a purpose that was specific and definite, and once made would be finished, and that its proper place was in another bill. I still think so, and I make that

statement seriously.

Mr. JOHNSON of Kentucky. Mr. Chairman, in the report which the auditor for the District of Columbia has recently made to Congress, and in many previous reports, he has urged Congress to make all of its appropriations for the District of Columbia in one bill. It is my opinion that as many of the appropriations for the District of Columbia as can be made in one bill should be made in one bill. The auditor says that at the end of Congress it takes nearly 60 days to go through the great number of acts that have been passed, in order to dig out the sums which are appropriated for the District of Columbia, in the payment of which the District of Columbia must participate. We find its affairs in the Navy bill sometimes, and we find them in the appropriations for the Army. We find them in every appropriation bill which comes before Congress. It is my belief It is my belief that the better policy should be commenced right here and that this item should be included in this appropriation bill. As a matter of fact, I can see no reason why this bill shall not become a law sooner than any appropriation bill which is to follow it.

As a matter of justice, I believe that the entire amount should be paid out of the funds of the District of Columbia, but I am not going to raise any quibble about that, because this is such an important matter. The purpose of the items that are conan important matter. The purpose of the items that are contained herein, under the utilities measure, are for no other purpose than to prevent one Washingtonian from practicing extortion upon another Washingtonian; and therefore, in my judgment, sooner or later the Washingtonians should bear this expense themselves. To repeat, I agree with the auditor of the District in that all of the items pertaining to the District of Columbia should come under one head, and I would therefore be glad to see adopted the amendment offered by the gentleman

Mr. FITZGERALD. Mr. Chairman, I hope the amendment will not be adopted. Regardless of the opinion of the auditor for the District of Columbia, it is a very vicious practice to incorporate in annual appropriation bills, which carry the appro-

priations for the next ensuing fiscal year, appropriations to conduct the service in any department for the current year or to make up deficiencies in past fiscal years. It is much more important that our fiscal system be maintained in the proper shape than it is to accommodate the auditor for the District of Columbia.

Mr. Chairman, I know of some very good reasons why this bill is not likely to become a law before an urgent deficiency The most important perhaps is that the gentleman from Kentucky [Mr. Johnson] and many Members, like myself, believe that the District appropriation bill should not be a vehicle for enacting general legislation pertaining to the District. This bill, reported from the Committee on Appropriations, is comparatively free from general legislation, and, with the exception of two or three small administrative provisions designed to correct abuses, there is no general legislation on the bill. If I were sure that when the bill comes back from the Senate it would be as free from legislation as it is now, I would share with the gentle-man from Kentucky his belief that the bill would speedily be enacted into law; but, judging from the experience in the past, I can not indulge any such hope. I rather anticipate a somewhat protracted struggle before the legislation will be eliminated

Mr. Chairman, there is one practical question that should be considered, investigated, and determined, and which can be if this matter goes over until the deficiency bill comes up. The estimate upon which this work is to be done, unless I am mistaken, is an estimate made by a firm of accountants in the city of New York, as to what it would cost to do the work. opinion was expressed by the District commissioners that perhaps it would cost less to do this work by contract than to organize their own force and do it by a force employed by the commissioners themselves. The reason given was that these men brought here by private concerns to do this work would be able to do other work for which compensation would be received, and in that way the cost would not be so great. In my opinion, Mr. Chairman, all of these valuations should be made as speedily as possible. A force should be organized sufficient to dispose of the work quickly. The more quickly it is done, the more thoroughly it is done, the better the results and the more valuable the information acquired; and if some private concern is to be brought here from New York or Chicago or some other city they will be paid for the work done upon the basis of full time being given to the Government, and then if

their employees are diverted to some other work it will be just so much delay in the work of the Government.

The Interstate Commerce Commission, when before the Committee on Appropriations at the last session of Congress in connection with the physical valuation of railroads and public utilities, had outlined a plan of organization for conducting that work that was believed would be satisfactory, but even that commission, with its facilities, with the great capacity and experience of the men at its head, stated that by the first of the coming year they would be much better able to determine the character of the organization desired and the manner in which the work should be conducted. It seems to me it will be much wiser for the House to defer this appropriation until the urgent deficiency bill will be reported, and one must be reported, so that the House may have the benefit of the information that can be obtained, not only by the commissioners in further inquiry of this subject, but some information may be obtained from the Interstate Commerce Commission from their larger experience and information, and then to determine the manner in which the work shall be done, and make appropriations to enable it to be done at the earliest possible moment. I hope the amendment will not be agreed to.

The CHAIRMAN. The time of the gentleman has expired. Mr. MADDEN. Mr. Chairman, the question of the physical valuation of the public utilities of the District is an important one, but the estimate of cost for this valuation made by the District Commissioners was based on a calculation that it would take 18 months to do it, and, of course, the longer the period of time consumed in the work the more excessive would be the cost. At the suggestion of the subcommittee on appropriations on the District, I consulted with Col. Harding, the Engineer Commissioner of the District, and during the consultation I suggested that the work ought to be done in 6 months instead of 18 months, and that if the work of making this physical valuation was confined to 6 months that a very material reduction could be made in the estimate of cost of doing the work by taking off the overhead charges of high-priced men who would be engaged over the period of 18 months. The result of that suggestion was that Col. Harding made some figures, based upon a calculation to complete the work within a year, and the deduction which he was able to make by reducing the time from a

year and a half to 12 months enabled him to reduce the figures as estimated to the committee from \$110,000 to \$92,000. If he made the calculation based on 6 months instead of 12 months, he could have reduced the cost of making this valuation \$30,000 more. There is not a bit of reason on earth why this valuation ought not to be made within six months, and it occurs to me that if the House is interested in having the valuation made at an early date that the way to do it is to appropriate the money in a bill which will make it immediately available. understand that the appropriation made in this bill will not be immediately available.

Mr. MONDELL. Will the gentleman yield?

Mr. MADDEN. Surely.
Mr. MONDELL. The item which I have offered makes this

appropriation immediately available.

Mr. MADDEN. Notwithstanding, I think the estimate made by the engineers in its modified form, namely, \$65,000, if you add what they will have unexpended at the end of this year, will be greatly in excess of what they need, and if they are allowed to make further investigations and take bids from expert men in the line of work which they are called upon to do I feel quite sure that they will be able to do this work in much less time than one year, and the \$40,000 which they have already had-

Mr. MONDELL. Will the gentleman yield again? Mr. MADDEN. Surely.

Mr. MONDELL. The gentleman knows there is no \$40,000 available.

Mr. MADDEN. There was.

Mr. MONDELL. There was, but \$25,000 has been used. Mr. MADDEN. There will be \$12,000 available at the end of this year if the statement of the engineer commissioner is correct, so that \$65,000 and \$12,000 would make \$77,000, and my own judgment is that whatever is done ought to be done on the theory that the work should be completed, not in a year, not in a year and a half, but at the earliest possible date not to exceed The more you save in time the more you will six months save in cost.

Mr. PAGE of North Carolina. Will the gentleman yield for a question?

Mr. MADDEN. Surely.
Mr. PAGE of North Carolina. Having that in view, does not the gentleman think this work will be expedited by making that appropriation in the urgent deficiency bill that will in all probability immediately become a law, whereas this bill in all probability will not become a law until very much later in the session?

Mr. MADDEN. Most undoubtedly; I just stated that. Of course whatever money is placed at the disposal of the commission should be placed at their disposal so that they can begin to use it at once.

And so the failure to appropriate in this bill not only does not retard the progress of the physical valuation work, but really, as a matter of fact, expedites it.

The CHAIRMAN. The time of the gentleman from Illinois

has expired.

Mr. MONDELL. Mr. Chairman—
The CHAIRMAN. The Chair would state to the gentleman that debate has been exhausted on this amendment.

Mr. MONDELL. I ask unanimous consent to proceed for three minutes

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, I do not see how it is possible that the inclusion of this item in the bill is going to retard the passage of the item for this work. The gentleman from Illinois [Mr. Madden] must know that that is not true. item goes into this bill, and later there is an urgent deficiency bill, the item can also be placed in that bill.

Mr. FITZGERALD. But it will not be placed in the bill, I

will say to the gentleman.

Mr. MONDELL. The gentleman says it would not be; but the gentleman has done it himself repeatedly.

Mr. FITZGERALD. I have not done anything of the kind. Mr. MONDELL. There have been items frequently placed in the deficiency bills of this Congress that were in bills pending,

for the purpose of expediting the appropriation.

Mr. FITZGERALD. Mr. Chairman, if the gentleman will yield, I will say that when he has had a little more experience on the Committee on Appropriations he will not make that statement

Mr. MONDELL. I have had some experience. There is no reason why, if it will expedite this matter by putting it in the says it must be done. The commissioners have asked \$60,000, and later \$65,000. Now, are we or are we not in favor of having the work done? If we are, now is the place to make it possible. This is the bill to which it belongs, if the item is be made immediately available. If there is a doubt about this bill becoming a law as quickly as an urgent deficiency bill, it can be taken from this bill and placed on the other, and I think everyone in favor of having this work done should vote for this amendment.

The CHAIRMAN. The question is on the amendment offered

by the gentleman from Wyoming [Mr. Mondell].

The question was taken; and the Chairman announced that the ayes seemed to have it.

Mr. PAGE of North Carolina. Division, Mr. Chairman. The committee divided; and there were-ayes 17, noes 28. So the amendment was rejected.

The Clerk read as follows:

Street-cleaning division: Superintendent, \$2,500; assistant superintendent and clerk, \$1,600; chief clerk, \$1,400; stenographer and clerk, \$1,000; clerks—one \$1,200, one \$1,100, one \$1,000, two at \$720 each; chief inspector, \$1,300; inspectors—four at \$1,200 each, one \$1,100; foreman of repairs, \$1,200; foremen—one \$1,300, four at \$1,200 each, eight at \$1,100 each, one \$1,000, one \$900; assistant foremen—three at \$900 each, two at \$720 each; messenger and driver, \$600; in all, \$41,180 \$41.180.

Mr. CARY. Mr. Chairman, reserving a point of order, I

would like to ask in regard to an item in this paragraph.

The CHAIRMAN. The gentleman from Wisconsin reserves

The CHAIRMAN. The gentleman from wisconsin reserves a point of order on the paragraph.

Mr. CARY. In line 5, "assistant superintendent and clerk, \$1,600," I would like to ask if that is not a new position?

Mr. PAGE of North Carolina. No, sir. It is the same, and exactly in the same language, as carried in the present appropriation

Mr. CARY. There is no assistant superintendent of the streetcleaning department now by law and never has been. Congress has stricken that out before.

Mr. PAGE of North Carolina. Well, I will say to the gentleman there is no statute creating any of these positions. If there is, it has not been called to the attention of the chairman of the subcommittee.

Mr. CARY. Well, in the last bill this same proposition came up, and it was stricken out, and this man was put on at \$4.50 per diem, regardless of that.

Mr. PAGE of North Carolina. I will say to the gentleman that there were several requests made in the estimates submitted to this committee from the commissioners to transfer men from the per diem roll to the statutory roll, not only in this item, but in various other items, but the subcommittee refused in every instance to transfer any man now on the per diem roll to the statutory roll from the beginning to the end of this bill.

Mr. CARY. This gentleman is now on the per diem roll?

Mr. PAGE of North Carolina. I will say to the gentleman the position was carried in the last bill exactly as it is carried in this bill. There has been no change in language and no change in appropriation. Under the street-cleaning division for the current fiscal year of 1914 is carried exactly the same language as appears in the item which has just been read.

Mr. CARY. Was it not stricken out here in the House? Mr. PAGE of North Carolina. No, sir; it was not stricken out. It was exactly the same.

Mr. CARY. Is he now under the title of "assistant superintendent" by law?

Mr. PAGE of North Carolina. Yes, sir. He is now under that title by law.

Mr. CARY. Why is it, then, that he is on the per diem roll? Mr. PAGE of North Carolina. That man is not on the per diem roll at all. No man in this paragraph here, with a salary attached, is carried on the per diem roll.

Mr. CARY. The assistant superintendent of the street-clean-

ing department to-day in the city of Washington is carried on the per diem roll at \$4.50 a day. Mr. PAGE of North Carolina. The gentleman may have some knowledge from the outside that I have not, but I am perfectly satisfied that my statement is correct, that the man who draws

this salary is not on the per diem roll. Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentleman yield? Perhaps I can give him some information on the subject.

The CHAIRMAN. Does the gentleman yield?

Mr. CARY. Certainly.
Mr. JOHNSON of Kentucky. I will say, Mr. Chairman, that I received a communication from a Member of this body, stating in substance what the gentleman from Wisconsin [Mr. Cary] now says, that notwithstanding no appropriation was made for it, one of the gentlemen who recently went off of the Board of

Commissioners of the District of Columbia placed a man at work under a per diem of \$4.50. The additional statement was made in this communication to the effect that the wages and time of laborers had been reduced in order to get the money

with which to pay this man.

Upon receipt of that communication I addressed one to the present board of commissioners, asking them to advise me whether or not these statements were correct, and stating, if they were correct, that I would be glad to have the opinion of the corporation counsel as to whether they were authorized by law to do that. That was only a few days ago, and I have not had time to hear from them in that respect, but I have no doubt that if the law is being violated it will cease to be as soon as the present commissioners have their attention called to it.

Mr. CARY. I will say, Mr. Chairman, that I called on the commissioners in regard to this position, and told them that this man was not only drawing \$4.50 per workday for labor, but also for Sunday. He was not working on Sunday at all, and still he drew this \$4.50. After I had been down there they told me they had stopped that Sunday pay, so that the man is

certainly on the per diem roll.

Mr. PAGE of North Carolina. That may be, but it is not this

Mr. CARY. He is acting superintendent of streets, and his name is Behman.

Mr. PAGE of North Carolina. This man is acting as assistant superintendent and he is designated as a clerk.

Mr. CARY. The man I refer to is acting superintendent of streets, and his name is Behman.

Mr. PAGE of North Carolina. Then it must be another man, paid out of another appropriation, to whom they pay \$4.50 a day. But I have no knowledge on the subject, and the chairman of the Committee on the District of Columbia has stated that he asked for that information, and I can assure the gentleman that my confidence in the present board of commissioners is sufficient to make me think that they are not going to allow what the gentleman refers to and pay this man \$4.50 per day out of this sum.

The CHAIRMAN. The time of the gentleman from Wiscon-

sin has expired.

Mr. CARY. Mr. Chairman, I would like one minute more. The CHAIRMAN. Without objection, the gentleman is recognized for one minute more.

Mr. CARY. Mr. Chairman, let me repeat what I said before. went to the commissioners about this gentleman, and told them that he was not only drawing salary on week days, but also on Sunday, and Commissioner Siddons told me he would stop it on Sunday, and he did stop it on Sunday. I was also told that in order to get the money to pay this fellow they lay off the so-called "white angels" and pay him out of that appropriation. I do not think there is any authority for placing a man on the permanent roll now in that way.

Mr. PAGE of North Carolina. In my judgment, it is not the

same man at all.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Board of examiners, steam engineers: Three members, at \$300 each, \$900.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kentucky [Mr. John-

son] moves to strike out the last word.

Mr. JOHNSON of Kentucky. I do so for the purpose of asking the chairman of the committee if he has any information as to what the annual compensation of these men amounts to under the fee system, it having been charged that one of them,

at least, makes seven or eight thousand dollars a year.

Mr. PAGE of North Carolina. I can supply the gentleman with that information. The gentleman will remember that I made an investigation, upon an inquiry forwarded to me, as to the compensation of one of these persons serving on this board, a statement having been made in line with the statement which a statement having been made in line with the statement which has just been made by the gentleman from Kentucky, that his compensation from the fees was large. The report from the Engineer Commissioner of the District of Columbia is that during the last fiscal year his salary from fees was nineteen hundred and odd dollars. Of course, this compensation is in addition to that paid for another service.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. Byrns of Tennessee having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the

Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3588. An act releasing the owners of all lode and placer mining claims in the basin of Dan Creek in the Chitina mining district in the Territory of Alaska for the year 1913.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The committee resumed its session. The Clerk read as follows:

Surveyor's office: Surveyor, \$3,000; assistant surveyor, \$2,000; clerks—one \$1,225, one \$975, one \$675; three assistant engineers, at \$1,500 each; computer, \$1,200; record clerk, \$1,050; inspector, \$1,200; draftsmen—one \$1,225, one \$900; assistant computer, \$900; \$1,200; men, at \$825 each; chainmen—three at \$700 each, two at \$650 each; computer and transitman, \$1,200; in all, \$25,925.

Mr. ADAIR. Mr. Chairman, I move to strike out the last word, for the purpose of correcting a statement made on the floor yesterday by the gentleman from Illinois [Mr. MADDEN]. When the Speaker of the House [Mr. CLARK of Missouri] was addressing the House he was interrupted by the gentleman from Illinois [Mr. MADDEN], who made the statement that none of the responsibility for existing conditions in this country should be traced to any action on the part of the banks in withholding loans. I was not familiar with the facts at that time, but since that statement was made I have called up the Comptroller of the Currency and obtained this statement from him in relation to the reserves of the country:

On August 9, 1913, the legal reserves held by the national banks of the country amounted to \$1,470,487,279. That was the date when a call was made for a report by national banks.

On October 21, a little more than two months later, the reserves of the national banks of the country amounted to \$1,473,-487,722. In other words, there was an increase of reserves held by the national banks of over \$3,000,000 during that period. And I dare say that if the national banks of the country were called upon for a report at this time, it would show that their reserves have increased more than that amount from October 21 up until the present time.

But assuming that this \$3,000,000 represents the increase in reserves of national banks up to this time, and taking into consideration the fact that we have 27,000 banks in this country and that only a little over one-fourth of them are national banks, it is fair to assume that the reserves of all banks throughout the country have increased at least \$12,000,000 dur-

ing that period. I am inclined to the opinion-Mr. MADDEN. Will the gentleman yield? Will the gentleman yield?

Mr. ADAIR. In just a moment. Let me finish this statement. When I have done so, I will yield to the gentleman. I am inclined to the opinion that the next report will show that the reserves of the banks of the country, National and State, and trust companies, have increased more than \$20,000,000 since the report was made, on August 9; and I dare say that it would not be possible to pile up even \$10,000,000 or \$20,000,000 in the vaults of the banks of the country without disturbing business conditions. Now I will yield to the gentleman from

Mr. MADDEN. Is the gentleman able to state how much the

loans have been increased

Mr. ADAIR. I am not able to give the exact figures with reference to the amount of loans. The gentleman stated yesterday upon the floor of the House that the loans had been increased from an average of 8 to 1 to 12 to 1 of the cash held in the banks.

Mr. MADDEN. That is what I stated. Mr. ADAIR. Yes; but the gentleman must understand, if he has ever been engaged in the banking business, that a bank usually carries about the same amount of cash, or nearly the same amount of cash, in its vaults regardless of its deposits. For instance, I am engaged in the banking business, and our deposits will vary sometimes quite a good many thousand dollars; yet we carry in our vaults all of the time about so much cash—a sufficient amount to take care of the daily business transac-tions—and if our deposits increase in excess of the amount of currency necessary to transact the daily business we carry the excess with our correspondents. So it is not fair to say that loans have increased because the banks have loaned 12 to 1 or 8 to 1 of the amount of money carried in their vaults. But I do say, Mr. Chairman, that the records will show that the banks of the country, national, State, and private, have hoarded up in their vaults from \$10,000,000 to \$20,000,000 in the last 90 days, and I predict the report which will be made within the next few
